(c) *Scope.* (1) This regulation applies to state chartered banks that are members of the Federal Reserve under section 9 of the Federal Reserve Act (12 U.S.C. 321, et seq.) and to all national banks. The regulation also applies to any Federal branch or agency of a foreign bank and to a State uninsured branch or agency of a foreign bank in the same manner and to the same extent as if the branch or agency were a member bank, except as may be otherwise provided by the Board, if:

(i) Its parent foreign bank has total worldwide consolidated bank assets in excess of $1 billion;

(ii) Its parent foreign bank is controlled by a foreign company which owns or controls foreign banks that in the aggregate have total worldwide consolidated bank assets in excess of $1 billion; or

(iii) Its parent foreign bank is controlled by a group of foreign companies that own or control foreign banks that in the aggregate have total worldwide consolidated bank assets in excess of $1 billion.

(2) For deposits held by a member bank or a foreign bank, this regulation does not apply to "any deposit that is payable only at an office located outside of the United States" (*i.e.*, the States of the United States and the District of Columbia) as defined in § 204.2(t) of the Board's Regulation D— Reserve Requirements of Depository Institutions (12 CFR Part 20.4).

---

[2] Section 217.4 of this final rule retains the current requirement that a member bank disclose to the customer the effect of any early withdrawal penalty. That section also retains the current requirement that interest cannot be paid after a maturity date unless the contract provides otherwise.

§ 217.2 Definitions.

For purposes of this part, the following definitions apply unless otherwise specified:

(a) "Demand deposit" means any deposit that is considered to be a "demand deposit" under § 204.2(b) of the Board's Regulation D—Reserve Requirements of Depository Institutions (12 CFR Part 204).

(b) "Deposit" means any liability of a member bank that is considered to be a "deposit" under § 204.2(a) of the Board's Regulation D—Reserve Requirements of Depository Institutions (12 CFR Part 204).

(c) "Foreign bank" means any bank that is considered to be a "foreign bank" under § 204.2(o) of the Board's Regulation D—Reserve Requirements of Depository Institutions (12 CFR Part 204).

(d) "Interest" means any payment to or for the account of any depositor as compensation for the use of funds constituting a deposit. A member bank's absorption of expenses incident to providing a normal banking function or its forbearance from charging a fee in connection with such a service is not considered a payment of interest.

§ 217.3 Interest on demand deposits.

No member bank of the Federal Reserve System shall, directly or indirectly, by any device whatsoever, pay any interest on any demand deposit.[1]

4. A new § 217.4 is added as follows:

§ 217.4 Miscellaneous.

(a) *Early withdrawal penalty.* At the time a depositor enters into a time deposit contract with a member bank, the bank shall provide a written statement of the effect of any early withdrawal penalty which shall (1) state clearly that the customer has contracted to keep the funds on deposit for the stated maturity, and (2) describe fully and clearly how such penalty provisions apply to time deposits in such bank, in the event the bank, notwithstanding the contract provisions, permits payment before maturity. Such statement shall be expressly called to the attention of the customer.

(b) *Payment of interest.* On each automatically renewable certificate, passbook, or other document representing a time deposit, the bank shall have printed or stamped a conspicuous statement indicating that the contract will be renewed automatically upon maturity and indicating the terms of such renewal.

By order of the Board of Governors of the Federal Reserve System, March 17, 1986.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 352

Nondiscrimination on the Basis of Handicap

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Final rule.

SUMMARY: This final regulation, which implements the spirit of section 504 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. 794, defines the scope of the FDIC's obligation to ensure that, to the extent practicable, handicapped persons are provided with equal access to FDIC programs and activities.

EFFECTIVE DATE: April 21, 1986.

FOR FURTHER INFORMATION CONTACT: Ann Marie Kohlligian, Attorney, Legal Division (202/898-3711) or Thomas W. Louden, Jr., Assistant to the Associate Director, Division of Accounting and Corporate Service (202/298-3615), Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

SUPPLEMENTARY INFORMATION: This regulation implements the spirit of section 504 of the Rehabilitation Act of 1973, as amended, which prohibits discrimination on the basis of handicap, as it applies to programs and activities conducted by various agencies. Although the FDIC does not believe that Congress contemplated coverage of non-appropriated, independent regulatory agencies such as the FDIC, it has voluntarily chosen to promulgate this regulation pursuant to section 504.

On April 18, 1985 the FDIC published a Notice of Proposed Rulemaking ("NPRM") pursuant to its policy of voluntary compliance. The prohibitions against discrimination on the basis of handicap contained in the proposed regulation applied only to those FDIC programs or activities which are available to members of the general public. The proposed regulations also stated that the FDIC did not have to take any action to accommodate handicapped persons if such action would result in a fundamental alteration in the nature of the program or activity or in undue financial or administrative costs. The deadline for receiving comments on the proposed regulation was set for June 18, 1985. Five comments were received in response to the notice, two from organizations representing handicapped persons and three from other federal agencies, including the Department of Justice and the Equal Employment Opportunity Commission ("EEOC").

In general, the commenters objected to the limitation of the application of the proposed regulation to only those programs and activities in which the general public participates and to the use of the fundamental alteration and/or undue burdens defenses in areas which they argued are inappropriate, such as in the definition of qualified handicapped person or with respect to program accessibility in cases of new construction. The FDIC has discussed all the comments with the Justice Department and the EEOC. A complete analysis of these comments and of the changes made to the proposed regulation is provided below.

Section-by-Section Analysis and Response to Comments

Section 352.1 Purpose.

This section, as proposed, described the general purpose of the regulation and there is no change from the proposed regulation.

Section 352.2 Application.

In the proposed regulation, this section stated that Part 352 applies to those FDIC programs and activities which are available to members of the general public. The section has been modified in response to the comments received and now states that this rule applies to all activities and programs conducted by the FDIC. Since this rule will most likely apply to the programs and activities which are open to members of the general public, the final regulation retains the list of such programs and activities that was contained in the proposed rule to provide notice to interested persons. Also, in response to commenters, the FDIC has added a paragraph (b) which specifically states that FDIC personnel will comply with this part in their interaction with employees of insured

---

[1] A member bank may continue to pay interest on a time deposit for not more than ten calendar days: (1) Where the member bank has provided in the time deposit contract that, if the deposit or any portion thereof is withdrawn not more than ten calendar days after a maturity date (one business day for "IBF time deposits" as defined in § 204.8(a)(2) of Regulation D), interest will continue to be paid for such period; or (2) for a period between a maturity date and the date of renewal of the deposit, provided that such certificate is renewed within ten calendar days after maturity.

banks and other state or federal agencies during the discharge of their official FDIC duties. This paragraph is not intended to reach the activities of the banks themselves merely because they are regulated or insured by the FDIC. *See, Community Television of Southern California* v. *Gottfried*, 459 U.S. 498 (1983).

One commenter noted that references to employment in this section could result in confusion as to which standard governs employment—those set forth in the proposed regulation or those in section 501 of the Rehabilitation Act and at 29 CFR Part 1613. The FDIC agrees and, therefore, paragraph (c) has been added to make it clear that employment and application for employment are "programs and activities" of the FDIC but are governed by the standards set forth in section 501 of the Rehabilitation Act and at 29 CFR Part 1613 as expressly provided in § 352.6 of the final rule.

Another commenter noted that the proposed regulation mentioned "FDIC-assisted programs" and pointed out that the FDIC does not administer any federal financial assistance programs. The FDIC concurs with this comment and, therefore, all references to "FDIC-assisted programs" have been deleted from the final rule. The same commenter criticized the proposed regulation for stating that the programs and activities enumerated in this section "constitute the programs and activities of the FDIC governed by this regulation." This commenter argued that such a statement implies that the FDIC conducts other programs and activities which it is unlawfully excluding from the nondiscrimination requirements of section 504. The FDIC does not intend that Part 352 be read in such a narrow fashion and has modified paragraph (a) accordingly.

Section 352.3(a) Definition of "auxiliary aids."

The proposed definition of "auxiliary aids" stated that this term means services or devices that enable persons with impaired sensory, manual or speaking skills to participate in or enjoy the benefits of FDIC programs or activities. Two commenters suggested that the FDIC add to the definition of "auxiliary aids" examples of what such aids may include. Since primary consideration will be given to any reasonable requests of handicapped persons in determining what type of auxiliary aid is required by § 352.9(a)(1)(i), the FDIC believes that such an expansive definition of "auxiliary aid" is unnecessary.

One commenter recommended that the term "aids for reasonable accommodation" be used instead of "auxiliary aids" as the term to be defined because the latter term implies something that is extra or discretionary. This suggestion has not been adopted. The FDIC believes that the term "auxiliary aids" adequately indicates what is intended and what is required. Moreover, the term "reasonable accommodation" is a term of art applicable only to discrimination in employment under section 501 of the Rehabilitation Act. The use of this term in Part 352 would be inappropriate and confusing since Part 352 covers more than employment programs and activities.

A further suggestion by the same commenter called for the expansion of the definition to encompass services or devices for persons who have "auditory, visual and physical impairments" and include attendant services for such persons. The proposed definition of "auxiliary aids" takes into account services or devices to aid persons with "impaired sensory, manual or speaking skills." The FDIC believes that this coverage adequately addresses the auditory, physical and visual impairments that are pertinent to § 352.9 (Communications), where the term "auxiliary aids" is used. Therefore, no change has been made in this regard. The FDIC has also declined to incorporate attendant services in the definition of "auxiliary aids." Such services are generally personal in nature and thus are properly outside the scope of "auxiliary aids," as indicated by the Justice Department in the preamble to its final rule under section 504. *See* 49 *F.R.* 35724, 35732 (1984). Nevertheless, to the extent that attendant services are not personal in nature and are directly related to a program or activity listed in § 352.2, such services may be provided when necessary for FDIC purposes under the final version of § 352.9(a)(1)(ii).

Section 352.3(b) Definition of "complete complaint."

"Complete complaint" in the proposed regulation was defined to mean a written statement with sufficient detail about an alleged violation of Part 352 to enable the FDIC to determine the beginning of its obligation to investigate a complaint. In response to a suggestion by one commenter, a sentence has been added to the definition of "complete complaint" requiring that complaints filed on behalf of classes or third parties describe or identify by name, if possible, the alleged victims of discrimination. The definition has also been clarified to indicate that it does not apply to complaints regarding allegations of discrimination on the basis of handicap in employment, which is governed only by the standards set forth in § 352.6 of this part.

Section 352.3(c) Definition of "facility."

The proposed regulation defined "facility" to mean buildings and other real estate which must be accessible to ensure participation in FDIC-conducted programs or activities. One commenter stated that the definition should include all programs and activities conducted by the FDIC regardless of whether the facility in which they are conducted is owned, leased or used on some other basis by the agency. The proposed definition of "facility" is consistent with this recommendation and therefore has not been changed. Another commenter noted that the definition was limited by the phrase, "which must be accessible to ensure participation." The commenter stated that the limitation should be in § 352.7 where the term is used rather than in the definition. The FDIC agrees with this commenter and has deleted the qualification from the definition. The same commenter suggested that personal property, such as furniture and similar fixtures, be added to the definition of facility because not all problems concerning accessibility involve real estate. The FDIC agrees and has included personal property in the definition of "facility." Personal property is further defined in this regulation to mean only furniture, carpeting, and the like, and does not include items of a personal nature.

Section 352.3(e) Definition of "qualified handicapped person."

In the proposed regulation, "qualified handicapped person" was defined to mean a handicapped person who meets the essential eligibility requirements of a program or activity and whose participation would not result in fundamental alteration in the nature of the program or activity or in undue financial or administrative burdens. The FDIC received criticism over the proposed rule's definition of "qualified handicapped person" from three commenters. All three argued that the FDIC has the burden of proving that a handicapped person is not a "qualified handicapped person" for purposes of section 504. The commenters cite no authority for this proposition and, in fact, the case law does not support their contention. *See, Plummer by Plummer* v. *Brandstand,* 731 F.2d 574 (8th Cir. 1984); *Doe* v. *New York University,* 666 F. 2d

VOL 51
ISS 54
MR 20
1986
UMI

761 (2d Cir. 1981); *Pushkin* v. *Regents of University of Colorado*, 658 F.2d 1372 (10th Cir. 1981).

Instead of adopting the suggested language, the FDIC has revised § 352.3(e) to make it clear that the question as to whether a handicapped person is a "qualified handicapped person" is to be determined by the FDIC on the basis of a written record. By requiring that such determinations be based on a written record, the final version of § 352.3(e) facilitates both the FDIC's decision on this issue and any subsequent judicial review of FDIC determinations.

The FDIC has also revised this section, as discussed in § 352.2, in order to eliminate the possibility of confusion regarding the applicable standards for matters involving employment. The language, "such as employment" and "perform the tasks required by the position," has been removed and a new paragraph (3) has been added which makes clear that "qualified handicapped person" is defined for purposes of employment in 29 CFR 1613.702(f), which is made applicable to this part by § 352.6. Nothing in this part changes existing regulations applicable to employment. The FDIC has not adopted the suggestion of one commenter that the term "reasonable accommodation" be included in the definition of "qualified handicapped person." This would result in the possibility of needless confusion since "reasonable accommodation" is a term of art used exclusively in the employment context.

Two commenters recommended eliminating from the definition of "qualified handicapped person" the requirement that the person's participation must not cause a fundamental alteration to the program or activity or undue financial and administrative burdens. They argued that any handicapped person who meets the essential eligibility requirements for the program or activity in question as set forth in the definition is a qualified handicapped person and that the "fundamental alteration" and "undue financial and administrative burdens" limitations are to be considered only in determining the extent to which the qualified handicapped person must be accommodated. These commenters support their position by noting that the United States Supreme Court has upheld the validity of regulations promulgated by the Department of Health, Education and Welfare ("HEW") (now Department of Health and Human Services ("HHS")), 45 CFR 84.3(k), in which HHS defines "qualified handicapped person" without reference to fundamental alterations or undue burdens. *See, Consolidated Rail Corporation* v. *Darrone*, 104 S. Ct. 1248 (1984). A third commenter did not criticize the use of the fundamental alteration limitation in the definition of "qualified handicapped person," but did recommend that the undue burdens exception be eliminated.

The FDIC believes that the standard to be applied is set forth in *Southeastern Community College* v. *Davis*, 442 U.S. 397 (1979), where the United States Supreme Court analyzed the term "qualified handicapped person" for the purposes of section 504. The FDIC construes the Court's language in *Davis* to mean that a handicapped person is a "qualified handicapped person" when he or she can meet the essential eligibility requirements of the program or activity in question without requiring a fundamental alteration in the nature of the program or activity. Although in *Consolidated Rail Corp.* v. *Darrone* and *Alexander* v. *Choate*, 105 S. Ct. 712 (1985), the Supreme Court upheld the validity of the aforementioned HHS regulations, neither case challenges or modifies *Davis*. In accord with *Davis*, the FDIC recognizes that compliance with section 504 may require affirmative efforts to accommodate handicapped persons. The definition of "qualified handicapped persons" in § 352.3(e) simply restates the rule, set forth in *Davis* and subsequent cases, that the obligation to accommodate handicapped persons is not without limit.

While the Court's language in *Davis* includes the fundamental alteration limitation in the definition of "qualified handicapped person," it does not appear to incorporate the undue financial and administrative burdens limitation. Accordingly, the FDIC has deleted the undue burden limitation from § 352.3(e).

The FDIC agrees with the recommendation of one commenter to delete the fundamental alteration limitation from the definition of qualified handicapped persons in subparagraph (2), which concerns programs and activities in which handicapped persons are not required to perform services or achieve a level of accomplishment in order to participate. Since *Davis* states that a handicapped person is a "qualified handicapped person" except where participation in a program or activity requires participants to perform services or achieve a level of accomplishment, the fundamental alteration limitation has no bearing on the definition of "qualified handicapped person" in reference to programs or activities governed by subparagraph (2).

Finally, one commenter criticized the use of the phase, "level of achievement [sic accomplishment]," in the definition of "qualified handicapped person" as being inconsistent with HHS regulations. Contrary to the view expressed by this commenter, the use of this term is consistent with section 504 and the HHS regulations. As explained in *Davis*, the HHS regulations reinforce the conclusion that the language "otherwise qualified handicapped person" in section 504 means a person who, despite his or her handicap, is able to meet all of a program's requirements, i.e., attain a certain level of achievement. 442 U.S. at 406.

Section 352.3(f) Definition of "section 504."

Paragraph (f) in the proposed rule contained the definition of "reasonable accommodation." The use of the term "reasonable accommodation" was criticized by several commenters because the term is used with respect to employment matters and may involve different standards than those called for by section 504 in connection with the range of services or other benefits covered by this regulation. To eliminate the possibility that there might be confusion over the two standards, the proposed "reasonable accommodation" difinition for § 352.3(f) has been deleted and the reference to the term in § 352.5 has been eliminated from this part for the same reason. The final version of § 352.3(f) contains what was formerly § 352.3(g) in the proposed regulations.

Section 352.4 Self-evaluation.

This section, as proposed, stated that the FDIC will conduct an evaluation of its program to implement Part 352. The procedures for the self-evaluation have been revised to reflect some of the suggestions made by two commenters. The final version calls for the FDIC to make available to the public for a period of three years after the self-evaluation a description of areas examined, problems identified, and modifications made. The FDIC has also clarified the procedures to be used by persons interested in participating in the self-evaluation process by specifying that handicapped persons and persons representing such individuals may participate through the submission of written comments.

The FDIC has declined to adopt additional provisions recommended by one commenter which would require: (1) That an assurance be submitted with the self-evaluation which would pledge that the effects of any discriminatory policy be eliminated; (2) the submission of a transition plan for compliance;' and (3) specific modification requirements. The FDIC does not find these additional

provisions to be necessary in order to carry out the spirit of section 504.

Section 352.5 General requirements.

This section in the proposed rule contained the general principles of nondiscrimination which serve as the foundation for the remaining sections of the regulation. Three commenters suggested that the FDIC revise this section to incorporate the very detailed language contained in the prototype section 504 regulation developed by the Department of Justice. In drafting the proposed rule, the FDIC did not adopt many of the provisions in the prototype regulation for several reasons. First, many of the specific prohibitions against discriminatory treatment discussed in the prototype have no application to FDIC-conducted programs and activities and their inclusion in this section is, therefore, unnecessary. Secondly, the proposed regulation adequately covers those situations in which issues of discrimination against qualified handicapped persons might arise. As was stated in the preamble to the proposed rule, 50 FR 15453, this section provides the "general principles which serve as the analytical foundation for the remaining sections of the regulation." *Id.* at 15454. The preamble goes on to say that when no provision in any of the subsequent, more specific, sections apply to a particular alleged discriminatory act by the FDIC, "the general prohibition in this section would apply." *Id.* The FDIC believes that the final rule as proposed provides adequate notice to both the FDIC and potential victims of discrimination of the FDIC's obligation under Part 352.

The FDIC has modified paragraph (b) to make it clear that the term "equal opportunity" means "equal opportunity to benefit from or to reach the same level of achievement from [FDIC-conducted programs and activities] as that provided to non-handicapped persons." Further, the FDIC has adopted a suggestion from one commenter by adding a paragraph (c) which obligates the Corporation to give priority to those methods of administering programs or activities which will not segregate participation by qualified handicapped persons in FDIC-conducted programs from that by non-handicapped persons.

Another commenter suggested that the FDIC revise this section to provide that the FDIC will not aid or perpetuate discrimination against a qualified handicapped person by another agency, organization, or person by providing significant assistance to such other agency, organization, or person that discriminates. The commenter noted that several federal agencies are not required to promulgate regulations under section 504 of the Rehabilitation Act and explained that such a revision would allow a person who has been discriminated against by another agency, organization, or person to file a complaint with the FDIC regarding the discriminatory actions of such parties if the FDIC has provided assistance to them. While the language recommended by this commenter may be applicable to programs receiving federal financial assistance, it does not apply to the FDIC because the FDIC does not conduct such programs. Furthermore, courts have held that a federal agency having supervisory or regulatory authority over a private entity does not have authority to enforce section 504 against such entity absent a clear grant of statutory authority to do so, *see, Community Television of Southern California* v. *Gottfried*, and the FDIC has no clear grant of statutory authority to enforce section 504 against the banks it regulates.

Section 352.6 Employment.

In the proposed regulation, this section states that no qualified handicapped person shall be subjected to discrimination in employment and that all matters concerning employment shall be governed by standards in section 501 of the Rehabilitation Act and 29 CFR Part 1613. No changes have been made in § 352.6.

Section 352.7 Program accessibility: Existing facilities.

This section, as proposed, contained the standards by which the FDIC will make its programs and activities accessible to and usable by qualified handicapped persons in existing facilities. It stated that ensuring program accessibility does not necessarily require that the FDIC make each of its existing facilities accessible or take any action which would result in the fundamental alteration in the nature of the program or activity or in undue financial or administrative burdens. Two commenters pointed out that the proposed rule defined the "undue burdens" limitation as one of excessive financial *or* adminstrative costs and that the Supreme Court in *Davis* spoke in terms of excessive financial *and* administrative burdens. 442 U.S. at 412. The FDIC acknowledges that the *Davis* Court used the conjunctive term and has, therefore, made the requisite change in this and subsequent sections where this phrase appears.

The Supreme Court in *Davis* was far from clear in specifying what constitutes an "undue burden." The Court spoke in terms of excessive financial *and* administrative costs, but subsequent decisions have not given equal weight to each factor and have focused on the total impact a requested modification would have on the program or activity in question. *See, e.g., Alexander* v. *Choate, supra; Dopico* v. *Goldschmidt*, 518 F. Supp. 1161 (S.D.N.Y. 1981), *rev'd on other grounds*, 687 F.2d 644 (2d Cir. 1982); *American Public Transit Ass'n* v. *Lewis*, 655 F.2d 1272 (D.C. Cir. 1981). The existence of financial or administrative costs alone, therefore, will not preclude a finding that a proposed modification is "undue" since either, if excessive, could have substantial repercussions on the FDIC's capacity to meet its primary regulatory obligations.

Two commenters were critical of the use of the limiting phrase, "undue financial [and] administrative burdens," in this section on the ground that its repeated use in the regulation constitutes an unjustified, additional limitation on the responsibility of the FDIC for accommodating qualified handicapped persons. As previously explained above, the FDIC is not obligated to make changes in existing facilities which impose undue burdens. The commenters also contended that the phrase is overly broad and, therefore, offers little guidance. Since every instance in which this issue may arise presents differing factual circumstances, the regulations cannot be formulated to provide any more detail than is contained in the proposed rule. This section has been modified, however, to require that all determinations regarding undue burdens, as well as those concerning fundamental alterations in the nature of the program or activity, be made on the basis of a written record in order to guarantee objective and substantiated decision-making. This change also responds to the recommendation of three commenters that the rule be revised to require explicitly that all agency resources be considered in determining whether or not a modification should be made.

Another commenter expressed concern over the FDIC's use of the term "feasible actions" in paragraph (a)(2) with respect to the efforts the FDIC would undertake to ensure that qualified handicapped persons receive the benefits and services of a program or activity. The commenter contended that the term implied a standard lower than that required by the fundamental alteration or undue burdens limitations. The FDIC did not intend that the term be read to imply a lower standard and has decided to delete it from the final rule in order to avoid any unnecessary confusion. The time period for compliance with this part (except where

VOL
51
ISS
54
MR
20
1986
UMI

structural changes in facilities are undertaken) that is contained in paragraph (b) was extended from sixty to ninety days to ensure that the FDIC will be able to implement its program within the time frame established by this rule.

One commenter recommended that the FDIC include provisons which reaffirm the Corporation's commitment to provide accesible facilities and the most appropriate integrated setting for the programs and activities as is possible. Since the suggested language only reiterates what is explicity stated in § 352.5, its inclusion here is unnecessary. Two commenters also recommended that the FDIC include a provision to indicate that, in carrying out this section, the FDIC will comply with section 106 of the National Historic Preservation Act, the regulations at 36 CFR Part 800 and the supplementary guidance for handicapped access to historic places at 45 FR 9757 (1980) and the Architectural Barriers Act of 1968, as amended, and the regulations at 41 CFR Part 101–19. Since the requirements of these two Acts stand independently of section 504, the FDIC has determined that Part 352 need not reference these Acts and has, therefore, declined to adopt this suggestion.

Section 352.8 Program accessibility: New construction and alterations.

As proposed, this section stated that the FDIC need only make new construction or substantial alterations accessible if to do so would not result in a fundamental alteration or in an undue burden. This section has been revised to incorporate the observation of a commenter that the fundamental alteration and undue burdens exceptions should not apply in cases of new construction and substantial alterations. The FDIC agrees with the underlying premise that the fundamental alteration or undue burden limitation is not likely to arise in cases of new construction or substantial alterations. The recommendations concerning the National Historic Preservation Act and the Architectural Barriers Act made for § 352.7 were also made in reference to this section. For the reason discussed in § 352.7, no change has been made to § 352.8 to incorporate this suggestion.

Section 352.9 Communications.

This section in the proposed regulation contained the standards by which the FDIC will ensure effective communication with participants in its programs and activities. In response to the recommendation of one commenter, the FDIC has changed paragraph (a)(1)(i) of the proposed rule to indicate that it will give primary consideration to any reasonable requests of handicapped persons in determining what type of auxiliary aid is necessary. The FDIC has clarified § 352.9(a)(1)(ii) to state that it need not provide individually prescribed devices or other devices of a personal nature such as hearing aids or eyeglasses. If sign interpreters or special readers are needed, the FDIC may require that it be given reasonable prior notice of the need for an interpreter or reader.

One commenter stated that proposed subparagraph (a)(2) was ambiguous because it could be construed as establishing a special FDIC obligation for persons with hearing impairments, regardless of whether the FDIC provides comparable communications to others. The FDIC agrees and, accordingly, the revised subparagraph indicates that the FDIC will use telecommunications devices for deaf persons ("TDD's") or similar devices to communicate with hearing impaired participants and beneficiaries only when it communicates by telephone with persons who do not have such impairments.

Another commenter expressed concern that the inclusion of the word "applicants" in §352.9(a) might confuse the fact that employment and application for employment are covered only by the standards set forth in section 501 of the Rehabilitation Act and at 29 CFR Part 1613. The FDIC agrees and the term "applicants" has been deleted from the final version of § 352.9. It was also noted that the proposed rule provided that information about accessible facilities is only to be available at the primary entrance of accessible facilities. The FDIC has modified this so that such information will be available at inaccessible facilities to direct handicapped persons who arrive at such facilities as to where they should go to obtain services. Should persons require additional information, paragraph (b) indicates how they may obtain such information. Information will be provided at inaccessible entrances of accessible facilities to direct handicapped persons to the accessible entrances.

In response to a recommendation that this section be revised to make it clear that the FDIC has the burden of proving "fundamental alterations" and "undue financial or administrative burdens," the FDIC has made a change in the new paragraph (d) of this section that is identical to those made in §§ 352.3(e) and 352.7 and explained previously in connection with § 352.3(e). Likewise, for the reasons set forth in regard to § 352.7, this paragraph retains the "fundamental alteration" and "undue burdens" language, but reflects the changes made in other sections that the latter term is properly phrased as undue financial *and* administrative costs. The term "feasible," which was contained in paragraph (e) of the proposed rule, has been deleted to avoid confusion as to the nature of the FDIC's obligation to ensure effective communication.

Finally, in view of the new notice provision in § 352.11, paragraph (d) of proposed § 352.9 is redundant and has been eliminated from the final regulation. Paragraph (e) of the proposed regulation is now paragraph (d) of the final version.

Section 352.10 Compliance procedures.

The proposed section outlined the procedures by which complaints about discrimination on the basis of handicap will be processed by the FDIC. One commenter recommended expanding the compliance section to include: (1) A provision for obtaining the expertise of the Architectural and Transportation Barriers Compliance Board ("ATBCB") to help resolve deficiencies in the construction or location of facilities; (2) a provision for judicial review; (3) a provision to ensure that all other regulations, forms and directives issued by the FDIC are superseded by the nondiscrimination requirement of this regulation; (4) a provision for the availability of attorneys fees in administrative proceedings; and (5) a provision for the availability of compensation to the prevailing party in such proceedings. Another commenter recommended that the FDIC notify the ATBCB of any complaint alleging that a FDIC facility is not readily accessible to and usable by handicapped persons in order to assist the Board in carrying out its statutory responsibilities. These suggestions are not called for by section 504 of the Rehabilitation Act and, therefore, have not been adopted in the final version of this section.

Paragraph (c) has been modified to incorporate a suggestion from one commenter that the FDIC state the official to whom persons who allege discriminatory treatment on the basis of handicap in FDIC programs or activities should submit their complaints. The final rule states that the FDIC's Office of Equal Employment Opportunity is responsible for implementing the compliance procedure and directs that all such complaints be submitted to this office.

A new paragraph (j) has been added which allows the time frames for complaint investigations and appeals to

be extended in an individual case by the Chairman of the FDIC or the Chairman's designee for good cause based on the particular circumstances of that case. Paragraph (j) of the proposed regulation is now paragraph (k) of the final version.

Section 352.11 Notice.

In response to the suggestions of two commenters a notice provision has been added to the final regulation. This new provision resembles, almost verbatim, equivalent sections in the final rules promulgated by the Justice Department and by the Federal Reserve Board. It states that the FDIC will provide all interested persons with information regarding this part in a manner which will apprise such persons of the protections assured them by this regulation.

Other Matters

Regulatory Flexibility Act statement. This rule applies to all programs and activities conducted by the FDIC but does not reach the activities of the banks regulated and/or insured by the FDIC. On this basis, and in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), the Board of Directors certifies that the rule will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act statement. This rule neither alters any existing nor creates any new recordkeeping or reporting requirements. Therefore, the Paperwork Reduction Act is inapplicable.

List of Subjects in 12 CFR Part 352

Blind, Civil rights, Equal employment opportunity, Federal building and facilities, Handicapped.

In consideration of the foregoing, the FDIC hereby adds Part 352 of title 12 of the Code of Federal Regulations as follows:

PART 352—NONDISCRIMINATION ON THE BASIS OF HANDICAP

Sec.
352.1 Purpose.
352.2 Application.
352.3 Definitions.
352.4 Self-evaluation.
352.5 General requirements.
352.6 Employment.
352.7 Program accessibility: Existing facilities.
352.8 Program accessibility: New construction and alterations.
352.9 Communications.
352.10 Compliance procedures.
352.11 Notice.

Authority: 12 U.S.C. 1819.

§ 352.1 Purpose.

The purpose of this part is to implement the spirit of section 119 of the Rehabilitation, Comprehensive Services, and Developmental Disabilities Amendments of 1978, which amended section 504 of the Rehabilitation Act of 1973 to prohibit discrimination on the basis of handicap in programs or activities conducted by various Executive agencies. Although the FDIC does not believe that Congress contemplated coverage of non-appropriated, independent regulatory agencies such as the FDIC, it has chosen to promulgate this final regulation to ensure that, to the extent practicable, handicapped persons are provided with equal access to FDIC programs and activities.

§ 352.2 Application.

(a) This part applies to all programs and activities conducted by the FDIC. The following programs and activities involve the direct provision of benefits and services to, or participation by, members of the public:

(1) Attending Board of Directors meetings open to the public and all other public meetings.

(2) Making inquiries or filing complaints at the FDIC Office of Congressional Relations and Corporate Communications;

(3) Using the FDIC library in Washington, DC;

(4) Visiting an insured bank at which they conducted business (or an alternative liquidation site selected by the FDIC) and which has become insolvent, or been purchased by another bank under FDIC supervision, for the purpose of:

(i) Collecting FDIC checks for the insured amount of their deposits previously held in such bank; and/or

(ii) Discussing with FDIC representatives matters related to the repayment of debts which they previously owed to such bank, prior to its failure or purchase by another bank under FDIC supervision;

(5) Seeking employment with the FDIC;

(6) Conducting regular banking business at a Deposit Insurance National Bank formed by the FDIC pursuant to the authority in 12 U.S.C. 1821(h).

(b) This regulation governs the conduct of FDIC personnel in their interaction with employees of insured banks and employees of other state or federal agencies while discharging the FDIC's statutory obligations as insurer and/or receiver of financial institutions. It does not apply to financial institutions insured by the FDIC.

(c) Although application for employment and employment with the FDIC are programs and activities of the FDIC for purposes of this regulation, they shall be governed only by the standards set forth in § 352.6 of this part.

§ 352.3 Definitions.

For purposes of this part, the term—

(a) "Auxiliary aids" means services or devices that enable persons with impaired sensory, manual, or speaking skills to have an equal opportunity to participate in, and enjoy the benefits of, the FDIC programs or activities set forth in § 352.2.

(b) "Complete complaint" means, with respect to any FDIC program or activity other than employment, a written statement that contains the complainant's name and address and describes the FDIC's action in sufficient detail to inform the FDIC of the nature and date of the alleged violation of these regulations. It shall be signed by the complainant or by someone authorized to do so on his or her behalf. Complaints filed on behalf of classes or third parties shall describe or identify (by name if possible) the alleged victims of discrimination.

(c) "Facility" means all or any portion of buildings, structures, equipment, roads, walks, parking lots and other real or personal property. As used in this definition, "personal property" means only furniture, carpeting and similar features not considered to be real property.

(d) "Handicapped person" means any person who has a physical or mental impairment that substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment. As used in this definition, the phrase:

(1) "Physical or mental impairment" includes—

(i) A physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive; digestive; genitourinary; hemic and lymphatic; skin; and endocrine; or

(ii) A mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities.

(2) "Major life activities" including functions such as caring for oneself, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning and working.

VOL
51
ISS
54
MR
20
1986
UMI

(3) "Has a record of such an impairment" means has a history of, or has been misclassified as having, a mental or physical impairment that substantially limits one or more major life activities.

(4) "Is regarded as having an impairment" means—

(i) Has a physical or mental impairment that does not substantially limit major life activities but is treated by the FDIC as constituting such a limitation;

(ii) Has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward such impairment; or

(iii) Has none of the impairments defined in paragraph (d)(1) of this definition but is treated by the FDIC as having such an impairment.

(e) "Qualified handicapped person" means—

(1) With respect to any FDIC program or activity under which a person is required to perform services or to achieve a level of accomplishment, a handicapped person who meets the essential eligibility requirements and can achieve the purpose of the program or activity without modifications in the program or activity that the FDIC can determine on the basis of a written record would result in a fundamental alteration in its nature;

(2) With respect to any other program or activity, a handicapped person who meets the essential eligibility requirements for participation in, or receipt of benefits from, that program or activity;

(3) With respect to employment, a handicapped person as defined in 29 CFR 1613.702(f), which is made applicable to this part by § 352.6.

(f) "Section 504" means section 504 of the Rehabilitation Act of 1973 (Pub. L. 93–112, 87 Stat. 394 (29 U.S.C. 794)), as amended by the Rehabilitation Act Amendments of 1974 (Pub. L. 93–516, 88 Stat. 1617), and the Rehabilitation, Comprehensive Services, and Developmental Disabilities Amendments of 1978 (Pub. L. 95–602, 92 Stat. 2955). As used in this regulation, section 504 shall be applied only to the programs and activities conducted by the FDIC as set forth in § 352.2 of this regulation.

§ 352.4 Self-evaluation.

(a) Within one year of the effective date of this regulation, the FDIC shall conduct a self-evaluation of its program implementing the spirit of section 504.

(b) The agency shall provide an opportunity to interested persons, including handicapped persons or organizations representating handicapped persons, to participate in the self-evaluation process by submitting written comments. Comments on the program made by such persons or organizations, while not binding on the FDIC for adoption, will be received and considered as part of the FDIC's self-evaluation process.

(c) The FDIC shall, for a period of three years from the date of completion of the self-evaluation, maintain on file and make available for public inspection:

(1) A description of areas examined and any problems identified in the program implementing the spirit of section 504; and

(2) A description of any modifications made in the program.

§ 352.5 General requirements.

(a) No qualified handicapped person shall, on the basis of handicap, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under the programs and activities conducted by the FDIC and set forth in § 352.2 of this regulation.

(b) The FDIC, in providing any services under the programs and activities set forth in § 352.2 of this part, shall ensure that qualified handicapped persons are provided with an equal opportunity to benefit from or to reach the same level of achievement from such services as that provided to non-handicapped persons.

(c) The FDIC, in providing any services under the programs and activities set forth in § 352.2 of this part, shall give priority to those methods of administration which will not segregate participation by qualified handicapped persons in FDIC-conducted programs and activities from participation by non-handicapped individuals.

§ 352.6 Employment.

No qualified handicapped person shall, on the basis of handicap, be subjected to discrimination in employment under any program or activity conducted by the FDIC. The definitions, requirements, and procedures (including those pertaining to employment discrimination complaints) of section 501 of the Rehabilitation Act of 1973 (29 U.S.C. 791), as established in 29 CFR Part 1613, shall apply to employment in the FDIC.

§ 352.7 Program accessibility: Existing facilities.

(a) *General.* The FDIC shall operate each of the programs or activities set forth in § 352.2 of this part so that the program or activity, when viewed in its entirety, is readily accessible to and usable by handicapped persons. This paragraph does not—

(1) Necessarily require the FDIC to make each of its existing facilities accessible to and usable by handicapped persons; or

(2) Require the FDIC to take any action that the FDIC can determine on the basis of a written record would result in a fundamental alteration in the nature of a program or activity or in undue financial and administrative burdens. If it is determined that an action would result in such an alteration or such burdens, the FDIC shall take other reasonable actions that would not result in such an alteration or such burdens but would nevertheless ensure that handicapped persons receive the benefits and services of the program or activity.

(b) *Methods.* The FDIC may comply with the requirements of this section through such means as redesign of equipment, reassignment of services to accessible buildings, assignment of aides to beneficiaries, delivery of services at alternate accessible sites, alteration of existing facilities and construction of new facilities or any other methods that result in making its programs or activities readily accessible to and usable by handicapped persons. The FDIC is not required to make structural changes in existing facilities where other methods are effective in achieving compliance with this section.

(c) *Time period for compliance.* The FDIC shall comply with the obligations established under this section within ninety days of the effective date of this part except that where structural changes in facilities are undertaken, such changes shall be made within three years of the effective date of this part, but in any event as expeditiously as possible.

(d) *Transition plan.* In the event that structural changes to existing facilities will be undertaken to achieve program accessibility, the FDIC shall develop, within six months of the effective date of this part, a transition plan setting forth the steps necessary to complete such changes. The plan shall be developed after consultation with representatives of the General Services Administration and the Architectural and Transportation Barriers Compliance Board. The plan shall—

(1) Identify physical obstacles in the FDIC's facilities that limit the accessibility of its programs or activities to handicapped persons;

(2) Describe the methods that will be used to make the facilities accessible;

(3) Specify the proposed schedule for taking the steps necessary to achieve compliance with this section and, if the time period of the transition plan is longer than one year, identify proposed steps that will be taken during each year of the transition period;

(4) Indicate the official responsible for implementation of the plan; and

(5) Identify the persons or groups with whose assistance the plan was prepared.

§ 352.8 Program accessibility: New construction and alterations.

Each building or part of a building in which the programs or activities set forth in § 352.2 will be carried on, and which is newly constructed, or substantially altered by, on behalf of, or for the use of the FDIC, shall be designed, constructed or altered so as to be readily accessible to, and usable by, handicapped persons.

§ 352.9 Communications.

(a) The FDIC shall take appropriate steps to ensure effective communication with participants in the FDIC programs and activities set forth in § 352.2.

(1) The FDIC shall furnish appropriate auxiliary aids where necessary to afford a handicapped person an equal opportunity to participate in, and enjoy the benefits of, the FDIC programs or activities set forth in § 352.2 of this part.

(i) In determining what type of auxiliary aid is necessary, the FDIC shall give primary consideration to any reasonable requests of the handicapped person.

(ii) The FDIC need not provide individually prescribed devices, readers for personal use or study, or other devices of a personal nature.

(2) Where the FDIC communicates by telephone, it shall use telecommunications devices for deaf persons (TDD's) or equally effective telecommunication systems with hearing impaired participants and beneficiaries.

(b) The FDIC shall ensure that interested persons, including persons with impaired vision or hearing, can obtain information as to the existence and location of accessible services, activities, and facilities. Interested persons may obtain such information by calling, writing or visiting the FDIC Office of Equal Employment Opportunity, located at 550 17th Street, NW., Washington, DC 20429. The Office of Equal Employment Opportunity telephone number is (202) 898–6745 (District of Columbia area) and (800) 424–5488 (all others) (TDD).

(c) The FDIC shall provide information at a primary entrance to each of its accessible and inaccessible facilities where programs or activities as set forth in § 352.2 are conducted, directing users to a location at which they can obtain information about accessible facilities. The international symbol for accessibility shall be used at each primary entrance of an accessible facility.

(d) This section does not require the FDIC to take any action that the FDIC can determine on the basis of a written record would result in a fundamental alteration in the nature of a program or activity or in undue financial and administrative burdens. If an action that is required to comply with this section would result in such an alteration or such burdens, the FDIC shall take other reasonable actions that would not result in such an alteration or such burdens but would nevertheless ensure that, to the maximum extent possible, handicapped persons receive the benefits and services of the program or activity.

§ 352.10 Compliance procedures.

(a) Except as provided in paragraph (b) of this section, this section applies to all allegations of discrimination on the basis of handicap in the FDIC programs or activities set forth in § 352.2 of this part.

(b) The FDIC shall process complaints alleging employment discrimination on the basis of handicap according to the procedures established in 29 CFR Part 1613 pursuant to section 501 of the Rehabilitation Act of 1973 (29 U.S.C. 791).

(c) The FDIC's Office of Equal Employment Opportunity shall be responsible for coordinating implementation of this section. All complaints should be sent to the FDIC's Office of Equal Employment Opportunity, 550 17th Street, NW., Washington, DC 20429.

(d) The FDIC shall accept and investigate all complete complaints over which it has jurisdiction. All complete complaints must be filed within 180 days of the alleged act of discrimination. The FDIC may extend this time period for good cause.

(e) If the FDIC receives a complaint over which it does not have jurisdiction, it shall promptly notify the complainant and shall make reasonable efforts to refer the complainant to the appropriate government entity.

(f) Within 180 days of the receipt of a complete complaint for which it has jurisdiction, the FDIC shall notify the complainant of the results of the investigation in a letter containing—

(1) Finding regarding the alleged violations;

(2) A description of a remedy for each violation found; and

(3) A notice of the right to appeal.

(g) Appeals of the findings or remedies must be filed by the complainant within 90 days of receipt from the FDIC of the letter required by § 352.10(f). The FDIC may extend this time for good cause.

(h) Timely appeals shall be accepted and processed by the Chairman of the FDIC or designee.

(i) The Chairman of the FDIC or designee shall notify the complainant of the results of the appeal within 90 days of the receipt of the request. If the Chairman of the FDIC or designee determines that additional information is needed from the complainant, he or she shall have 60 days from the date of receipt of the additional information to make a determination on the appeal.

(j) The time limits set forth in (f) and (i) above may be extended for an individual case when the Chairman of the FDIC or designee determines that there is good cause, based on the particular circumstances of that case, for the extension.

(k) The FDIC may delegate its authority for conducting complaint investigations to other federal agencies, except that the authority for making the final determination may not be delegated.

§ 352.11 Notice.

The FDIC shall make available to employees, applicants, participants, beneficiaries, and other interested persons such information regarding the provisions of this part and its applicability to the program or activities conducted by the agency, and make such information available to them in such manner as the Chairman or his designee finds necessary to apprise such persons of the protections against discrimination assured them by section 504 and this regulation.

By order of the Board of Directors, 7th day of March, 1986.

Hoyle L. Robinson,

Executive Secretary.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 86–ASW–5, Amdt. 39–5253]

Airworthiness Directives; Boeing Vertol Company Model 234 Series Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the Federal Register and makes effective as to all persons a new airworthiness directive (AD) part of which was previously made effective as to all know U.S. owners and operators of Boeing Vertol 234 series helicopters by individual telegrams. The AD requires initial and repetitive bore-scope inspections of main rotor head vertical hinge pins and a one-time eddy current and magnetic particle inpsection. Failure of a main rotor head vertical hinge pin could result in possible loss of the helicopter.

EFFECTIVE DATE: March 31, 1986, as to all persons except those persons to whom it was made immediately effective by telegraphic AD T85–23–51 issued November 20, 1985, which contained parts of this amendment.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register effective March 31, 1986.

Compliance: As prescribed in the body of the AD.

ADDRESSES: The applicable service information may be obtained from Boeing Vertol Company, Boeing Center, P.O. Box 1858, Philadelphia, Pennsylvania 19142. A copy of the documents is contained in the Rules Docket, Office of the Regional Counsel, FAA, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas 76106.

FOR FURTHER INFORMATION CONTACT: Joseph E. Chrastil, ANE–172, New York Aircraft Certification Office, Federal Aviation Administration, 181 South Franklin Avenue, Valley Stream, New York 11581, telephone number (516) 791–6221.

SUPPLEMENTARY INFORMATION: On November 20, 1985, telegrahic AD T85–23–51 was issued and made effective immediately to all known U.S. owners and operators of Boeing Vertol Model 234 helicopters. The AD required an initial and daily repetitive bore-scope inspection of main rotor head vertical hinge pins, Part Number (P/N) 114R2172–1, and removal and replacement of any vertical hinge pin found cracked.

The AD was prompted by the reported failure, in flight, of a main rotor head vertical hinge pin on a U.S. Army CH–47D helicopter, after which a precautionary landing was made. During fleet inspection, another CH–47D vertical hinge pin was found cracked. The same parts, P/N 114R2172–1, are installed on the civil Model 234 helicopter. Inspection of the two vertical pins showed that the failed surface developed a crack during manufacture. Subsequently it was determined that a one-time eddy current and magnetic particle inspection should be accomplished which would also eliminate the need for any further daily bore-scope inspection. This AD incorporates these additional inspections.

Since it was found that immediate correction was required, notice and public procedure thereon were impracticable and contrary to public interest, and good cause existed to make the AD effective immediately by individual telegram issued November 20, 1985 to all known U.S. owners and operators of Boeing Vertol Model 234 helicopters. These conditions still exist and the AD is revised as noted and hereby published in the Federal Register as an amendment to § 39.13 of the Federal Aviation Regulations to make it effective as to all persons.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "**FOR FURTHER INFORMATION CONTACT.**"

List of Subjects 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety, and Incorporation by reference.

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the FAR as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new AD:

Boeing Vertol Company: Applies to Boeing Vertol Model 234 series helicopters certificated in any category.

Compliance is required as indicated unless already accomplished.

To prevent possible hazards in flight associated with a cracked main rotor head vertical hinge pin, accomplish the following:

(a) Prior to further flight, conduct a visual inspection of the forward and aft main rotor head vertical hinge pins, P/N 114R2172–1, internal surface with a light assisted bore-scope for cracks.

(b) After the initial inspection of paragraph (a), repeat the inspection prior to the first flight of each day.

(c) Within the next 150 hours' time in service from March 31, 1986, conduct an eddy current inspection of the internal surfaces of the forward and aft main rotor head vertical hinge pins, P/N 114R2172–1, in accordance with the instructions contained in Boeing Vertol Document D210–12069–1 titled "Eddy Current Inspection Requirements for Detection of Cracks in P/N 114R2172, Vertical Hinge Pins." Upon accomplishment of this paragraph, the daily bore-scope inspection of paragraph (b) may be eliminated.

(d) Within the next 500 hours' time in service from March 31, 1986, remove from the helicopter the main rotor head vertical hinge pins and conduct a magnetic particle inspection in accordance with Boeing Airplane Company document BAC 5424 titled "Magnetic Particle Inspection" Class B.

(e) Remove from service vertical hinge pins found cracked and replace with a serviceable part prior to further flight.

(f) Any alternate method of compliance with the AD which provides an equivalent level of safety may be used when approved by the Manager, New York Aircraft Certification Office, Federal Aviation Administration, 181 South Franklin Avenue, Valley Stream, New York 11581.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Boeing Vertol Company, Boeing Center, P.O. Box 1858, Philadelphia, Pennsylvania 19142. These documents may also be examined at the Office of the Regional Counsel, FAA Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas 76106.

This amendment becomes effective March 31, 1986, as to all persons except those to whom it was made immediately effective by telegraphic AD T85–23–51 issued November 20, 1985, which contained part of this amendment.

Issued in Fort Worth, Texas, on March 3, 1986.

C. R. Melugin, Jr.,
Director, Southwest Region.

14 CFR Part 39

[Docket No. 85–ASW–32, Amdt. 39–5254]

Airworthiness Directives; Societe Nationale Industrielle Aerospatiale (SNIAS) Model AS 332 Series Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the **Federal Register** and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective as to all known U.S. owners and operators of all SNIAS AS 332 series helicopters by individual priority letters. The AD requires installation of a placard which advises the flightcrew that all flight operations at temperatures below +3 °C in the presence of ice crystals, rain, mist, drizzle, dense clouds, snow, or sleet are prohibited. The AD is needed to prevent engine failure which could result in a forced landing. Subsequently, modifications which alleviate the limitations of the above placard have been devised and are mandated by this AD. Also, it has been determined that only certain configurations of the SNIAS Model AS 332 helicopter are subject to the requirements of the AD. The limitations section of the AD is revised accordingly.

EFFECTIVE DATE: March 19, 1986.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of March 19, 1986.

Compliance: As indicated in the body of the AD.

ADDRESSES: The applicable service bulletins may be obtained from Aerospatiale Helicopter Corporation, 2701 Forum Drive, Grand Prairie, Texas 75051, ATTN: Customer Support.

A copy of each of the service documents pertinent to this AD is contained in the Rules Docket, Office of the Regional Counsel, FAA, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas 76106.

FOR FURTHER INFORMATION CONTACT: John Varoli, Manager, Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, Brussels, Belgium, APO NY 09667, telephone number 513.38.30; or Wilbur F. Wells, Aircraft Certification Division, ASW–100, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, telephone (817) 877–2551.

SUPPLEMENTARY INFORMATON: On October 30, 1985, priority letter AD 85–22–09 was issued and made effective immediately as to all known U.S. owners and operators of all SNIAS AS 332 helicopters. The AD requires installation of a placard which advises the flightcrew that all flight operations in ambient temperatures below +3 °C in the presence of ice crystals, rain, mist, drizzle, dense clouds, snow, or sleet are prohibited. This limitation was prompted by a report of a dual engine failure (flameout) of an AS 332 helicopter operating in atmospheric conditions involving one or more of the icing phenomena listed by the placard described above.

Since it was found that immediate corrective action was required, notice and public procedure thereon were impracticable and contrary to public interest, and good cause existed to make the AD effective immediately by individual priority letters issued October 30, 1985, to all known U.S. owners and operators of SNIAS AS 332 helicopters. These conditions still exist and the AD is hereby published in the **Federal Register** as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

Since issuance of priority letter AD 85–22–09, it has been determined that the restrictions of AD 85–22–09 are not applicable to helicopters with certain engine inlet configurations; therefore, the applicability section of this AD is revised to exempt those helicopters. In addition, the manufacturer has developed and tested other engine inlet modifications and adjustments which enable the engines to operate satisfactorily in the icing conditions which prompted issuance of the original priority letter AD. These modifications and adjustments are required for safety and are mandated by this AD in accordance with a schedule defined in the body of this AD. Upon accomplishment of these actions, the restrictions imposed by the original priority letter AD are removed.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "**FOR FURTHER INFORMATION CONTACT.**"

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the FAR as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983) 14 CFR 11.89.

2. By adding the following new AD:

Societe Nationale Industrielle Aerospatiale (SNIAS): Applies to SNIAS Model AS 332 C or CL helicopters fitted with engine stubframe Part Number (P/N) 332 A 58.00.12.00 and Model AS 332 L or L1 helicopters fitted with engine stubframe P/N 332 A 58.00.13.00, certificated in any category.

Compliance is required as indicated, unless already accomplished.

(a) Compliance required within 10 hours' time in service after the effective date of this AD. To avoid operating conditions where ice ingestion into the engines may cause engine failure, permanently attach a placard, stencil, or decal to the instrument panel in full view of the flightcrew which includes the following

VOL

1986
UMI

limitations statement: ALL FLIGHT OPERATIONS BELOW PLUS 3 DEGREES CELSIUS IN THE PRESENCE OF ICE CRYSTALS, RAIN, MIST, DRIZZLE, DENSE CLOUDS, SNOW, OR SLEET ARE PROHIBITED.

(b) Modify and adjust the engine air inlets of applicable helicopters as specified below:

(1) Within 200 hours' time in service after the effective date of this AD but not later than March 31, 1986, accomplish the engine air intake modifications prescribed by Aerospatiale Service Bulletin No. 53.62 (corresponds to Modification AMS 332 A 07.22.752).

(2) Within 400 hours' time in service after the effective date of this AD but not later than March 31, 1986, accomplish the engine intake alignment inspections and adjustments prescribed by Aerospatiale Service Bulletin No. 71.07 (corresponds to Modification AMS 332 A 07.22.702).

(c) Upon accomplishment of the requirements of paragraph (b), the limitations placard, stencil, or decal required by paragraph (a) may be removed.

Note 1.—This AD conforms in part to French AD 85-169-20(B), Revision 1, dated December 17, 1985.

Note 2.—For the requirements regarding recording compliance and method of compliance with this AD in the aircraft's permanent maintenance records, see FAR § 91.173.

(d) Upon request, an alternate means of compliance which provides an equivalent level of safety may be used when approved by the Manager, Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, Brussels, Belgium, APO NY 09667, or by the Manager, Aircraft Certification Division, FAA, Southwest Region, ASW-100, P.O. Box 1689, Fort Worth, Texas 76101, telephone (817) 877-2581.

(e) The aircraft may be flown in accordance with FAR §§ 21.197 and 21.199 to a base where the requirements of paragraph (b) of this AD may be accomplished.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Aerospatiale Helicopter Corporation, 2701 Forum Drive, Grand Prairie, Texas 75051, ATTN: Customer Support. These documents may also be examined at the Office of the Regional Counsel, Federal Aviation Administration, Southwest Region, Room 158, Building 3B, 4400 Blue Mound Road, Fort Worth, Texas 76106.

This amendment becomes effective March 19, 1986.

Issued in Fort Worth, Texas, on March 3, 1986.

C.R. Melugin, Jr.,

Director, Southwest Region.

14 CFR Part 71

[Airspace Docket No. 85-ANM-34]

Amend Transition Areas; Gunnison, CO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action provides additional controlled airspace from 700 feet and 1,200 feet above the surface for aircraft executing a new instrument approach at the Gunnison Airport. The area will be shown on aeronautical charts enabling pilots to circumnavigate the area or, otherwise, comply with instrument flight rules (IFR) during instrument flight conditions.

EFFECTIVE DATE: 0901 UTC, June 5, 1986.

FOR FURTHER INFORMATION CONTACT: Ted Melland, Airspace & Procedures Specialist, ANM-533, Federal Aviation Administration, Docket No. 85-ANM-34, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168, Telephone: (206) 431-2530.

SUPPLEMENTARY INFORMATION:

History

On January 31, 1986, the FAA proposed to amend § 71.181 of the Federal Aviation Regulations (14 CFR Part 71) to amend the Gunnison, Colorado, transition areas (51 FR 3991).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations provides controlled airspace for aircraft executing a new instrument approach to Gunnison, Colorado, Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Transition areas, Aviation safety.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

2. By amending § 71.181 as follows:

Aspen, Colorado—[Amended]

That airspace extending upward from 700 feet above the surface within 9.5 miles northwest and 6 miles southeast of the Gunnison VORTAC 045° and 225° radials extending from 12 miles northeast to 19 miles southwest of the VORTAC and within a 16.5 mile radius of the VORTAC clockwise between the 254° and 294° radials; and that airspace extending upward from 1,200 feet above the surface within a 23-mile radius of the VORTAC clockwise between the 204° and 275° radials.

Issued in Seattle, Washington, on March 7, 1986.

David E. Jones,

Manager, Air Traffic Division, Northwest Mountain Region.

BILLING CODE 8120-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 948

West Virginia Permanent Regulatory Program; Approval of Amendment

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: OSMRE is announcing the approval of a proposed amendment submitted by the State of West Virginia as a modification to its permanent regulatory program (hereinafter referred to as the West Virginia program), which was conditionally approved by the Secretary of the Interior under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment consists of a letter and supporting documents from West Virginia dated November 11, 1985 discussing the State's anticipated withdrawals from the special reclamation fund, which is part of the alternative bonding system, for general administrative expenses not related to bond forfeiture site reclamation.

After considering all comments received during the public comment period ending February 13, 1985, and after conducting a thorough review of the proposed amendment, the Director has determined that the submission meets the requirements of SMCRA and the Federal regulations and he is, therefore, approving it. The Federal rules at 30 CFR Part 948 codifying decisions concerning the West Virginia program are being amended to implement this action. This final rule is being made effective immediately in order to expedite the State program amendment process and to encourage States to conform their programs to the Federal standards without undue delay; consistency of the State and Federal standards is required by SMCRA.

EFFECTIVE DATE: March 20, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. James C. Blankenship, Jr., Director, Charleston Field Office, Office of Surface Mining Reclamation and Enforcement, 603 Morris Street, Charleston, West Virginia 25301, Telephone: (304) 347-7158.

SUPPLEMENTARY INFORMATION:

I. Background and Submission of Amendment

On March 3, 1980, West Virginia submitted its proposed permanent regulatory program to the Secretary of the Interior. On October 22, 1980, following a review of the proposed amendment in accordance with 30 CFR Part 732, the Secretary approved the proposed program in part and disapproved it in part (45 FR 69249-69271). West Virginia resubmitted its proposed program on December 19, 1980. On January 21, 1981, the Secretary conditionally approved the resubmitted program. Information concerning the general background of the permanent program submission, as well as the Secretary's findings, the disposition of comments and an explanation of the initial conditions of approval of the West Virginia program, can be found in the January 21, 1981 **Federal Register** (46 FR 5915-5956).

Since then, the West Virginia program has been amended several times, including a July 11, 1985 amendment approving the West Virginia Energy Act (WVEA), with certain exceptions (50 FR 28316-28324). WVEA 22A-3-11(g) provides that all special reclamation taxes collected as part of West Virginia's alternative bonding program shall be deposited in the special reclamation fund for use in reclaiming bond forfeiture sites where the site-specific bond proves insufficient. However, it also authorizes the Commissioner to "expend such amounts as are reasonably necessary to implement and administer the provisions of this chapter and chapters twenty-two-a and twenty-two-b of this code." This provision would allow expenditures from the fund for general administrative purposes not related to reclamation on forfeiture sites and for expenses associated with noncoal programs.

The Secretary orginally approved West Virginia's alternative bonding system, as contained in the revised program submission of December 19, 1980, on the condition that the State obtain an actuarial study showing that the special reclamation fund would always contain sufficient monies to meet all anticipated needs. On October 29, 1982, West Virginia submitted the required study (Administrative Record No. WV 456), and, after reviewing the study, the Secretary, removed condition on March 1, 1983 (48 FR 9447-9451). However, this study did not consider the impact on the fund of authorizing expenditures for general administrative purposes or for noncoal programs.

Therefore, in approving the WVEA, the Director required West Virginia to submit, no later than October 11, 1985, a new analysis demonstrating that the special reclamation fund could withstand all authorized administrative

VOL
51
ISS
54
MR
20
1986
UMI

expense withdrawals without hampering the State's ability to reclaim all bond forfeiture sites in a timely manner and in accordance with their approved reclamation plans. On November 11, 1985, West Virginia submitted a letter containing an analysis of the fund's current financial status and explaining the State's current intentions regarding administrative expense withdrawals. The letter was accompanied by quarterly financial reports for the special reclamation fund covering the period of October 1, 1982 through September 30, 1985, and by tables summarizing the collection history and status of civil penalties and forfeited bonds, and the estimated reclamation liabilities for unreclaimed sites for which bonds had been forfeited and collected (Administrative Record No. WV 694).

The January 1, 1986 **Federal Register** (51 FR 1520–1521) announced receipt of these materials and requested public comment on their adequacy. The public hearing scheduled for February 3, 1986 was not held since no one requested to testify in such a forum. The public comment period closed on February 13, 1986.

II. Director's Findings

In accordance with SMCRA and 30 CFR 732.17, the Director finds that the proposed amendment, as submitted by West Virginia on November 11, 1985, meets the requirements of SMCRA and 30 CFR Chapter VII, as discussed below.

Section 509(c) of SMCRA and the Federal regulations at 30 CFR 800.11(e) provide that the Secretary, acting through OSMRE, may approve an alternative bonding system if (1) it will assure that the regulatory authority will have sufficient money available to complete the approved reclamation plans for any areas which may be in default at any time and (2) it will provide a substantial economic incentive for the permittee to comply with all reclamation provisions. As discussed in Finding 18.1 of the January 21, 1981 **Federal Register** (46 FR 5926) and Finding 7 of the March 1, 1983 **Federal Register** (48 FR 8448), the Secretary has determined that the West Virginia alternative bonding system, as orginally approved, meets these objectives and purposes. However, section 22A–3–11(g) of the WVEA, which became effective on July 11, 1985, authorizes expenditures from the fund of such amounts as are reasonably necessary to implement and administer Chapters 22A and 22B of the WVEA. Since the actuarial study upon which OSMRE based its 1983 approval did not consider the effects of administrative expense withdrawals unrelated to bond forfeitures, the Secretary, in approving the WVEA, required that the State submit a comprehensive financial analysis demonstrating that such withdrawals would not hamper the State's ability to complete the approved reclamation plans of all areas which may be in default at any time in a timely manner.

In its response on November 11, 1985, West Virginia states that the bulk of the Department of Energy's administrative expenses would be incurred under Chapter 22 of the WVEA, costs for which the statute does not authorize withdrawals from the special reclamation fund. In addition, the letter stated that West Virginia would not use fund monies to cover noncoal administrative expenses (Chapter 22B).

Over the fund's three years of operation, annual income from bond forfeitures, civil penalties and coal severance tax revenues has averaged $1,835,000 and annual expenditures have averaged $1,550,000, creating an average annual increase in current assets of $285,000. As of September 30, 1985, the fund's current assets totaled in excess of $5,000,000. Current liabilities as of that date include the reclamation of 81 sites for which bond has been forfeited, totaling 1,666 acres. Based on previous experience, the State estimates that the reclamation work required for these sites will cost approximately $3,000,000, leaving the fund with a net balance of $2,000,000 in the current assets account.

The letter further states that West Virginia interprets the term "reasonably necessary" as preventing withdrawals which would jeopardize the fund's solvency, and that such withdrawals are not expected to exceed ten percent of the total current assets. Thus, under the September 30, 1985 conditions, West Virginia would be able to withdraw approximately $500,000, leaving a net current assets balance of $1,500,000. Since State law provides that collection of the coal severance tax, which is the fund's largest and most stable source of income, averaging $900,000 per year, will cease when the fund's net current assets exceed $2,000,000 and will not resume until the balance in that account dips below $1,000,000, the Director finds that a withdrawal of the proposed magnitude will not alter the amount of funds available for reclamation purposes in the next fiscal year and that it will not hamper the State's ability to fulfill reclamation commitments on bond forfeiture sites. Therefore, the Director finds that the financial analysis submitted by West Virginia satisfies the requirements of 30 CFR 948.16(b) for fiscal year 1985–86.

However, income and liabilities from bond forfeitures and income from civil penalties are subject to substantial fluctuation as is interest income on fund assets. Given the magnitude of the current anticipated administrative expense withdrawals and the uncertainty of future income and liabilities, the Director finds that, before any further withdrawals for administrative expenses unrelated to bond forfeitures may be made, the State either must perform a withdrawal-specific financial analysis for each fiscal year similar to that approved in this amendment or must conduct a comprehensive study of the fund's future performance under this new set of assumptions. If the study or analysis indicates that administrative expense withdrawals would hamper the fund's ability to achieve its objectives, the withdrawals would not be permitted.

III. Public Comments

No comments from the public were received by the close of the comment period of February 13, 1986.

Pursuant to section 503(b) of SMCRA and 30 CFR 732.17(h)(10)(i), comments were also solicited from various Federal agencies. Of the agencies which responded (the National Park Service, the U.S. Army Corps of Engineers, the U.S. Fish and Wildlife Service, the Mine Safety and Health Administration and the U.S. Department of Energy), none elected to comment on the proposed amendment.

IV. Director's Decision

The Director, based on the above finding and West Virginia's commitments to prohibit all noncoal administrative expense withdrawals and to limit other general administrative expenses to ten percent of the fund's current assets on an annual basis, is approving the November 11, 1985 amendment to the West Virginia program as being sufficient to demonstrate that withdrawals of the specified magnitude from the special reclamation fund for non-forfeiture-related administrative expenses in fiscal year 1985–86 will not hamper the State's ability to promptly complete the approved reclamation plans of all areas which may be in default at any time. Accordingly, he is removing and reserving the required amendment codified at 30 CFR 948.16(b). However, in approving the amendment, the Director is requiring that, before any such withdrawals may be made in future years, West Virginia must make a

similar demonstration on fiscal year basis or conduct an actuarial study demonstrating that the fund can withstand all such projected withdrawals without impairing its reclamation capability with respect to either extent of work or timeliness. The Federal rules at 30 CFR Part 948 are being amended to implement this decision.

Procedural Determinations

1. Compliance With the National Environmental Policy Act

The Secretary has determined that pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. Executive Order No. 12291 and the Regulatory Flexibility Act

On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7 and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a regulatory impact analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. Paperwork Reduction Act

The rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 948

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: March 14, 1986.

James W. Workman,

Deputy Director, Operations and Technical Services, Office of Surface Mining.

PART 948—WEST VIRGINIA

30 CFR Part 948 is amended as follows:

1. The authority citation for Part 948 continues to read as follows:

Authority: Pub. L. 95–87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

2. 30 CFR 948.15 is amended by adding paragraph (i) to read as follows:

§ 948.15 Approval of regulatory program amendments.

* * * * *

(i) The financial analysis and supporting documentation submitted by West Virginia on November 11, 1985 is approved as being adequate to demonstrate that sufficient money will be available in the special reclamation fund both to complete the approved reclamation plans for any areas that may be in default at any time and to cover the general administrative expense withdrawals proposed for fiscal year 1985–86. This amendment also prohibits all withdrawals for noncoal administrative expenses and limits all administrative expense withdrawals to an amount which cumulatively does not exceed ten percent of the fund's current assets as of September 30, 1985.

Before making any withdrawals in subsequent fiscal years to cover administrative expenses unrelated to bond forfeitures, West Virginia must submit, for OSMRE concurrence, a comprehensive analysis demonstrating that sufficient money will be available in the special reclamation fund both to promptly complete the approved reclamation plans for any areas that may be in default at any time and to cover the administrative expense withdrawals proposed under section 22A–3–11(g) of the Code of West Virginia.

§ 948.16 [Amended]

3. 30 CFR 948.16 is amended by removing and reserving paragraph (b).

BILLING CODE 4310-05-M

DEPARTMENT OF DEFENSE

Department of the Navy

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972; USS Bunker Hill

AGENCY: Department of the Navy, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), to reflect that the Secretary of the Navy has determined that USS BUNKER HILL (CG 52) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS without interfering with its special function as a naval cruiser. The intended effect of this rule is to warn mariners in waters where 72 COLREGS apply.

EFFECTIVE DATE: March 10, 1986.

FOR FURTHER INFORMATION CONTACT: Captain Richard J. McCarthy, JAGC, U.S. Navy Admiralty Counsel, Office of the Judge Advocate General, Navy Department, 200 Stovall Street, Alexandria, VA 22332–2400. Telephone number: (202) 325–9744.

SUPPLEMENTARY INFORMATION: Pursuant to the authority granted in 33 U.S.C. 1605, the Department of the Navy amends 32 CFR Part 706. This amendment provides notice that the Secretary of the Navy has certified that USS BUNKER HILL (CG 52) is a vessel of the Navy which, due to its speical construction and purpose, cannot comply fully with 72 COLREGS: Annex I, section 3(a), pertaining to the location of the forward masthead light in the forward quarter of the ship, and Annex I, section 3(a), pertaining to the horizontal distance between the forward and aft masthead lights. Full compliance with the above-mentioned 72 COLREGS provisions would interfere with the special functions and purposes of the vessel. The Secretary of the Navy has also certified that the above-mentioned lights are located in closest possible compliance with the applicable 72 COLREGS requirements.

Moreover, it has been determined, in accordance with 32 CFR Parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary, and contrary to public interest since it is based on technical findings that the placement of lights on this vessel in a manner differently from that prescribed herein will adversely affect the vessel's ability to perform its military functions.

List of Subjects in 32 CFR Part 706

Marine safety, Navigation (water), and Vessels.

PART 706—[AMENDED]

Accordingly, 32 CFR Part 706 is amended as follows:

BILLING CODE 3810-AE-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[COTP Honolulu Regulation 86-01]

Security Zone Regulations; Outer Apra Harbor, Guam, Marianas Islands

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: This Coast Guard is establishing a security zone around the U.S. Navy vessel USS PROTEUS which will be moored at mooring buoy no. 951 located at 13°26′51″ N, 144°38′13.8″ E, in Outer Apra Harbor, Guam, Marianas Islands. The security zone will extend for a distance of 200 yards in all directions from USS PROTEUS. The zone is needed to safeguard USS PROTEUS against destruction from sabotage or other causes of similar nature. Entry into this zone is prohibited unless authorized by Captain of the Port.

EFFECTIVE DATE: This regulation becomes effective on April 29, 1986. It terminates on May 9, 1986 unless sooner terminated by the Captain of the Port.

FOR FURTHER INFORMATION CONTACT: LT R.E. Tinker, (671) 339-6110, at USCG Marianas Section Office, Guam.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was not published for this regulation. Publishing an NPRM or delaying its effective date would be contrary to the public interest since immediate action is needed to prevent destruction of USS PROTEUS.

Drafting Information

The drafters of this regulation are LT R.E. Tinker, project officer for the Captain of the Port, and LCDR S.R. Campbell, project attorney, Fourteenth Coast Guard District Legal Office.

Discussion of Regulation

The Navy has requested that a security zone be established. The incident requiring this regulation will begin on April 29, 1986 when the USS PROTEUS will moor at mooring buoy no. 951 in Outer Apra Harbor, Guam. Since mooring buoy no. 951 is a Navy maintained mooring buoy, and is located in excess of 500 yards from the main shipping channel, there should be no adverse impact on harbor use due to this security zone. USS PROTEUS will moor at the buoy to undertake routine maintenance work, and the security zone will be terminated when the USS PROTEUS leaves the moorage upon completion of this work. This regulation is issued pursuant to 50 U.S.C. 191 as set out in the authority citation for all of Part 165.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Regulation

In consideration of the foregoing, Subpart D of Part 165 of Title 33, Code of Federal Regulations, is amended as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05-1(g), 6.04-1, 6.04-6 and 33 CFR 160.5.

2. A new § 165.T1401 is added to read as follows:

§ 165.T1401 Security Zone: OUTER APRA HARBOR, GUAM

(a) *Location.* The following area is a security zone: In Outer Apra Harbor, Guam, when the USS PROTEUS is moored to mooring buoy no. 951 located at 13°26′51″ N, 144°38′13.8″ E, a security zone will extend in all directions from the vessel for a distance of 200 yards.

(b) *Effective date.* This regulation becomes effective on April 29, 1986. It terminates on May 9, 1986 unless sooner terminated by the Captain of the Port.

(c) *Regulations.* In accordance with the general regulations in § 165.33 of this part, entry into the zone is prohibited unless authorized by the Captain of the Port. Section 165.33 also contains other general requirements.

Dated: March 7, 1986.

C.W. Gray,

Captain, U.S. Coast Guard, Captain of the Port Honolulu, Hawaii.

POSTAL SERVICE

39 CFR Part 111

Annual Fee; Third-Class Bulk Rates

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This final rule change amends section 641 of the Domestic Mail Manual concerning annual third-class bulk fees. The change will make it clear that when a bulk third-class mailing is made under the permit imprint system, only the individual or organization whose permit imprint is shown on the mailing piece itself and on the mailing statement must pay the annual bulk mailing fee. Currently, a bulk fee must be paid for the person or organization actually entering mailings at the bulk rates at a post office, regardless of the method of postage payment.

EFFECTIVE DATE: April 21, 1986.

FOR FURTHER INFORMATION CONTACT: Ms. Cheryl Beller, (202) 268-5166.

SUPPLEMENTARY INFORMATION: On February 3, 1986, the Postal Service published in the **Federal Register**, for comment, a proposed rule concerning section 641 of the Domestic Mail Manual. 51 FR 4189-90. The change was proposed to clarify the applicability of the requirement for payment of bulk fees.

No written comments were received. Therefore, the Postal Service hereby adopts the following final regulation on this subject as an amendment to the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See CFR 111.1.

List of Subjects in 39 CFR Part 111

Postal Service.

PART 111—[AMENDED]

1. The authority citation for 39 CFR Part 111 is revised to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 404, 407, 408, 3001-3011, 3201-3219, 3403-3405, 3621, 5001; 42 U.S.C. 1973cc-13, 1973cc-14.

PART 6—THIRD-CLASS MAIL

640 Authorizations and Permits

2. Revise 641 to read as follows:

641 Annual Fee—Bulk Rates

Except when a third-class bulk mailing is made under the permit imprint system, each person or organization that enters mailings at the regular or special bulk third-class rates must pay an annual bulk mailing fee at each post office where one or more mailings will be deposited (see 612.1). Persons or organizations paying this fee may enter mail of their clients as well as their own mail. When a third-class bulk mailing is made under the permit imprint system, the person or organization whose permit imprint is on the mailing piece must put his or its permit number on the mailing statement and must pay the annual bulk mailing fee. The annual bulk mailing fee must be paid at or before the time of the first bulk rate mailing of each calendar year. Note: This fee is separate from the fee that must be paid for a permit to mail under the permit imprint system (see 145.2).

A transmittal letter making this change in the pages of the Domestic Mail Manual will be published and will be transmitted to subscribers automatically. This change will be published in the **Federal Register** as provided in 39 CFR 111.3.

W. Allen Sanders,

Associate General Counsel, Office of General Law and Administration.

BILLING CODE 7710-12-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-4-FRL-2988-3; MS-004]

Approval and Promulgation of Implementation Plans; Mississippi; Revised New Source Review Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: On November 17, 1981, the State of Mississippi adopted a revision to its State Implementation Plan regarding nonattainment areas. This revision specifies the conditions that a new facility which is a major stationary source or a major modification must satisify in order to receive a permit to construct in a nonattainment area or in an area that impacts a nonattainment area. This revision was submitted to EPA for approval on November 25, 1981. EPA has reviewed this submittal and found that it satisfies the requirements of 40 CFR 51.18(k) as promulgated on May 13, 1980, and is therefore approving Mississippi's revised plan as it applies to sources impacting areas which are not attaining the National Ambient Air Quality Standards. Since there are no designated nonattainment areas in Mississippi, EPA is deferring action on the part of the plan covering sources locating in such areas.

EFFECTIVE DATE: This action will be effective on April 21, 1986.

ADDRESSES: Copies of the materials submitted by Mississippi may be examined during normal business hours at the following locations:

Public Information Reference Unit,
  Library Systems Branch,
  Environmental Protection Agency, 401
  M Street, SW., Washington, DC 20460.
Air Programs Branch, EPA Region IV,
  345 Courtland Street, NE., Atlanta,
  Georgia 30365.

  L Street, NW., Room 8401,
  Washington, DC.
Mississippi Department of Natural
  Resources, Bureau of Pollution
  Control, Post Office Box 10385,
  Jackson, Mississippi 39205.

FOR FURTHER INFORMATION CONTACT: Al Yeast of EPA Region IV's Air Programs Branch, at the above listed address and phone (404) 881-2864 (FTS 257-2864).

SUPPLEMENTARY INFORMATION: Section 172 of the Clean Air Act requires states to adopt regulations which prevent the construction or operation of new or modified major sources in areas which have been designated as not attaining the National Ambient Air Quality Standards (NAAQS), except under certain conditions, as described in section 173. Sections 110(a)(2)(D) and 165(A)(3)(B) require state plans to prohibit sources in areas attaining the NAAQS from causing or contributing to violations on NAAQS.

On May 14, 1980, and August 7, 1980, EPA promulgated to its regulations which govern review of the sources described above. The May 13, 1980, **Federal Register** notice (45 FR 31304) required States to modify their SIP to: (1) Require new sources locating in all portions of designated nonattainment areas to undergo nonattainment review; (2) preclude sources outside designated nonattainment areas from causing or exacerbating violations; and (3) preclude sources from significantly impacting newly discovered nonattainment areas. The August 7, 1980, **Federal Register** notice (45 FR 52676) required Part D SIPs to be more stringent for some modified sources in nonattainment areas, and decreased the number of new sources, and the number of some modified sources, covered by the regulations.

On November 17, the Mississippi Commission on Natural Resources adopted an amendment to Mississippi Regulation APC-S-2, "Permit Regulations for Construction and/or Operation of Air emission Equipment."

This regulation specifies the conditions that a new facility which is a major stationary source or major modification must satisfy in order to receive a permit to construct in a nonattainment area or in an area that impacts a nonattainment area.

Additionally, the regulation affects sources locating in or near areas where an air quality standard is being or will be exceeded but for which no nonattainment area implementing plan has been adopted by Mississippi. Under section 2.4.8.3, the Mississippi regulation applies EPA's Emission Offset Ruling (40 CFR 51.18, Appendix S) to any facility that is a major source or major modification which locates in or near an area where NAAQS is being or will be exceeded, but for which no Mississippi nonattainment plan has been adopted. It also regulates under section 2.4.8.2, sources locating in designated nonattainment areas where a plan has been adopted. Mississippi has clarified in a letter dated November 25, 1985, that section 2.4.8.3 applies to sources in Mississippi which impact designated nonattainment areas in other states even if a Part D nonattainment plan has been adopted by the neighboring state.

On July 2, 1982, EPA proposed to approve Mississippi's submittal as part of the state implementation plan (47 FR 28976). On August 17, 1982, the United States Court of Appeals for the District of Columbia Circuit vacated a portion of EPA's regulation under which Mississippi's regulations were being approved. Specifically, the court disallowed the use of a plantwide definition of source in nonattainment areas, a definition which causes fewer

VOL
51
ISS
54
MR
20
1986
UMI

construction projects to be subject to review than EPA's previous version of the definition. Because Mississippi's regulations employ the plantwide definition, approval of the regulations was delayed until resolution of appeal of the Circuit Court decision.

On June 25, 1984, the U.S. Supreme Court upheld the plantwide definition, making it possible for EPA to proceed to approve state regulations employing it, provided a demonstration is made that use of the plantwide definition does not interfere with attainment of the National Ambient Air Quality Standards (NAAQS) or reasonable further progress.

Since the time of the proposed approval, however, the attainment status in Mississippi has changed. The one nonattainment area (Laurel) which would have been affected by the requirements under Part D of the Act, was redesignated to attainment on August 27, 1985. Thus, the only Act requirements affecting the Mississippi submittal are 110(a)(2)(D) and 165(a)(3)(B), which are implemented by 40 CFR 51.18(k).

Under the current version of the federally approved SIP, sources affected by 40 CFR 51.18(k) are not covered by the Mississippi regulations. In such cases, these sources are regulated by the state under Appendix S to 40 CFR 51.18, entitled Emission Offset Interpretative Ruling. Under the regulations submitted by Mississippi, the Interpretative Ruling is adopted by reference to cover the same set of sources.

The Interpretative Ruling satisfies all requirements of 40 CFR 51.18(k). (See 45 FR 31310, first column.) Since the Mississippi submittal fully complies with 40 CFR 51.18(k), and since the adoption of the new regulations causes no change in the way sources outside nonattainment areas are treated, EPA is today fully approving Mississippi's submittal as satisfying the requirements of 40 CFR 51.18(k).

The specific portions of the Mississippi submittal which are being approved are: Regulation APC–S–2, sections 2.4.8.1, 2.4.8.3 and 2.4.8.4. Section 2.4.8.3 applies to any major source which locates in or impacts an area where NAAQS is exceeded, but for which the State of Mississippi has not submitted a nonattainment area implementation plan. These areas include (a) a newly designated nonattainment area in Mississippi, (b) any designated nonattainment area outside Mississippi which is impacted by a source in Mississippi, (c) an area which is violating NAAQS, but has not yet been designated nonattainment, and (d) an area which would violate NAAQS due to the new or modified source.

Since there are currently no designated nonattainment areas in Mississippi, Regulation APC–S–2, section 2.4.8.2 no longer applies to any area. When such an area is designated in the future, EPA's rules may be different than now, and 2.4.8.2 may not be adequate. Therefore, EPA is deferring action on 2.4.8.2 until such time as an area is designated nonattainment.

On July 8, 1985, EPA promulgated final regulations concerning credit for stack heights in conducting air quality simulation modelling. EPA policy requires that, in order for EPA to approve any new source review regulations, states must be able to implement the substantive requirements of those regulations for sources covered by the new source review program. Mississippi has stated in a letter to EPA dated November 25, 1985, that the Bureau of Pollution Control can enforce the EPA regulation.

Final Action

EPA has reviewed the submitted material and found it to meet the provisions of 40 CFR Part 51. Therefore, EPA is today approving the State's submittal as satisfying the requirements of an acceptable plan.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by 60 days from today. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

The Office of Management and Budget has exempted this final rule from the requirements of Section 3 of Executive Order 12291.

Incorporation by reference of the State Implementation Plan for the State of Mississippi was approved by the Director of the Federal Register on July 1, 1982.

[FPMR Amendment E-26]

Property Management; Transfer of Regulations Pertaining to Management of Government-Owned and -Leased Motor Vehicles

AGENCY: Federal Supply Service, GSA.

ACTION: Final rule.

SUMMARY: The General Services Administration in an effort to consolidate policies and procedures governing the management of Government-owned and -leased motor vehicles has redesignated certain sections that appear in Subchapter E to Subchapter G. Revisions to these sections are made pursuant to recommendations by the Interagency Motor Equipment Management Committee and comments from other Federal agencies.

EFFECTIVE DATE: March 20, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Larry Frisbee, Federal Supply Service, Fleet Management Division, (703/557–1288).

SUPPLEMENTARY INFORMATION: GSA has determined that this rule is not a major rule for the purpose of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for and consequences of this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternate approach involving the least net cost to society.

BILLING CODE 6820-24-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 2720

[Circular No. 2578]

Conveyance of Federally-Owned Mineral Interests; Amendment to the Conveyance Procedure

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking amends the existing regulations on conveyance of federally-owned mineral interests by simplifying the processing of applications to acquire the federally-owned mineral interests. These changes, for the most part, are derived from experience gained in implementing the existing regulations.

EFFECTIVE DATE: April 21, 1986.

ADDRESS: Suggestions or inquiries should be sent to: Director (320), Bureau of Land Management, Main Interior Bldg., Room 3643, 1800 C Street NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: David Hemstreet (202) 343–8693.

SUPPLEMENTARY INFORMATION: Proposed rulemaking amending the existing regulations on conveyance of federally-owned mineral interests was published in the **Federal Register** on February 7, 1985 (50 FR 5269), with a 60-day comment period. During the comment period, comments were received from 12 sources, 4 from business interests, 6 from Federal agencies and 2 from private nonprofit organizations.

General Comments

The comments generally were favorable to the changes made by the proposed rulemaking, with several of the comments recommending changes to sections of the existing regulations that were not included in the proposed rulemaking. The recommended changes to sections of the existing regulations not considered by the proposed rulemaking cannot be made part of the final rulemaking because the public has not had an opportunity to review and comment on the changes, but those changes will be considered during any future amendment of part 2720.

One general comment asked what effect this rulemaking would have on pending applications. The changes made by the proposed rulemaking and adopted by this final rulemaking will be applicable to all pending applications, except those that have essentially been completed, and the issuance of a patent is all that remains to vest title to the federally-owned mineral interests in the surface owner. Except for the provision for the segregation of lands covered by an application, the amendments covered by this rulemaking are clarifications of the existing regulations and make only minor changes in the processing procedure for an application. Therefore, the final rulemaking would have little impact on the processing of pending applications.

Four comments suggested that the definition of the term "known mineral values" found in § 2720.0–5(b) of the existing regulations is too ambiguous and should be amended. The suggestions for amendment ranged from changing two words in the existing text to a total revision of the definition. Since this defintion was not included in the proposed rulemaking, no change has been made in it in the final definition. In response to the comments, the definition of this term will be reviewed and, if appropriate, a change will be made the next time Part 2720 is amended.

As a streamlining measure, one comment recommended that the final rulemaking provide that a $500 deposit be required with each application which would eliminate the need for the authorized officer to request a deposit after the application is filed. This requirement would be a substantive change in the existing regulations, a change that would require public comment before its adoption. Since the provision was not included in the proposed rulemaking for public review and comment, it cannot be included in the final rulemaking.

VOL
51
ISS
54
MR
20
1986
UMI

Another comment suggested that the final rulemaking include a definition of the term "nominal value". In classifying lands as prospectively valuable for a mineral, it is recognized that the degree of value may range from zero to a near certainty, depending on such factors as the nature of the rocks on the lands, extent of dissection by erosion and proximity to production or previously drilled exploratory holes. The term "nominal" as used by the Department of the Interior in relation to mineral value, since at least 1967, denotes a degree of value near the zero end of the scale. Since the determination of nominal value is a matter of judgment, it is appropriate that the standard used in reaching that judgment be included in the Bureau of Land Management Manual, rather than including it in the regulations. The final rulemaking has not adopted this suggestion.

Two comments suggested that the regulations should contain separate guidelines for use in connection with locatable, salable and leasable minerals. Those offering the comments expressed the view that the term "prospectively valuable" was being misused: (1) When assessing locatable minerals; (2) in situations where there is no market for salable minerals; and (3) the presumption of value of leasable minerals derived from generalized maps of sedimentary basins without regard to more specific factual information. This suggestion is being considered for inclusion in the Bureau of Land Management manuals, where it is more appropriate. The final rulemaking has not adopted the suggestion.

Specific Comments

One comment suggested a change in the definition of the term "proof of ownership" contained in the proposed rulemaking. The comment made the point that the only information needed is the identity of the surface owner of record which could be met by a certified copy of a document from the county tax assessor showing the current surface owner of record. The key element in the definition of the term "proof of ownership" is the phrase ". . . evidence of title acceptable in local realty practice by attorneys and title examiners. . . ." The remainder of the definition is only one form of evidence that is universally acceptable. The definition does not attempt to include all such acceptable documents. If a certification by the county tax assessor showing the current surface owner of record is acceptable to attorneys and title examiners in local realty practice, it will meet the requirements of the definition. The final rulemaking has not adopted the suggested change.

All of the comments pointed out that the Federal Land Policy and Management Act provides for the conveyance of federally reserved mineral interests that do not contain known mineral values without a determination of interference or beneficial use. This point is well taken and the final rulemaking has been corrected to properly reflect the law. One of the comments suggested that the final rulemaking should contain more discussion of and a definition of what constitutes interference or preclusion. The comment questioned whether nonmineral development included the use of lands for plant sites, waste dumps, tailing sites, etc. The comment went on to ask how much discretion does the authorized officer have in making the determination of interference or preclusion? Each case will be unique, with a different set of facts, making it impractical to attempt to define what constitutes interference or preclusion so that it covers every case. The facts presented with an application dictate the action to be taken by the authorized officer, with his decision of whether interference or preclusion exists being dependent upon those facts. Mineral extraction plant sites, waste dumps, tailing sites and other such mining related activities would not be considered nonmineral development. Sale of federally reserved mineral interests of known value would be inappropriate for these purposes. Such development should be placed on lands having no known mineral value. If a surface owner insists upon placing such facilities on lands with known mineral values that have been reserved by the United States, it will be at that surface owner's risk.

A comment suggested that the word "hypothecation" that appears in § 2720.6 of the proposed rulemaking be changed to the word "hypothesis" in the final rulemaking. The comment pointed out that the word "hypothecation" means to pledge without delivery of title and is not appropriate. The suggestion is well taken and the final rulemaking contains the word "hypothesis".

A final comment on the policy section of the proposed rulemaking asked whether the proposed rulemaking dealt only with sale of federally reserved mineral interests or included exchanges of such interests. The proposed and final rulemakings cover only the sale of federally reserved mineral interests, with the exchange of public lands and the interests therein, including mineral interests, covered by the regulations in 43 CFR Part 2200.

A comment on the provisions of § 2720.1-1 of the proposed rulemaking suggested that the final rulemaking be amended to simply state that pending the issuance of the conveyance document for the mineral interests, the mineral interests will not be available for leasing. The comment reasoned that the term "segregate" had a special meaning in the oil and gas program of the Bureau of Land Management, which is to separate or divide a lease. The term "segregate" is used throughout the various Parts of Subchapter B of Title 43 of the Code of Federal Regulations with a meaning that is consistent with its use in the proposed rulemaking; therefore, the final rulemaking makes no change in its use of the term.

A comment recommended that the final rulemaking contain language specifically requiring that the applicant pay the cost of publication of the notice of realty action. This recommendation has not been adopted by the final rulemaking because §§ 2720.1-3(b) and 2720.3(a) of the existing regulations make the applicant responsible for all administrative costs incurred by the United States in connection with the processing of an application for the conveyance of federally-owned mineral interests.

A comment stated that publication in the **Federal Register** was not necessary to effect segregation of the interest in lands covered by the application. The comment went on to suggest that the final rulemaking provide that segregation became effective upon filing of an application for conveyance of federally-owned mineral interests. The final rulemaking has made no change in the publication requirement because the segregation of lands without proper publication has been criticized in the past as being inconsistent with section 5 of the Federal Register Act (44 U.S.C. 1505). Publication of the notice of segregation in the **Federal Register** assures that constructive notice is given to all parties of interest.

One comment interpreted the segregation provision of the proposed rulemaking as segregating the lands covered by an application from all forms of application, including conveyance of federally-owned mineral interests applications. Since the notice segregating the federally-owned mineral interests will be published after receipt of an application, the filing of the application will have no segregative effect. No change has been made in the final rulemaking in response to this comment.

Several comments opposed the requirement in the proposed rulemaking for a metes and bounds survey because it was an unnecessary departure from longstanding procedure and precedent. It was suggested that there may be gaps and overlaps between metes and bounds descriptions that would be unmanageable. These comments also expressed the view that the use of legal subdivisions and aliquot parts is subject to the least amount of error. Section 209(b) of the Federal Land Policy and Management Act (43 U.S.C. 1719(b)) provides for the conveyance of federally-owned mineral interests only to the existing or proposed record owner of the surface. While the use of legal subdivisions and aliquot parts is normally the method used to describe ownership, there are situations where a metes and bounds description in the only accurate way to describe ownership. This is especially true when lands are divided and sold by metes and bounds descriptions. The final rulemaking has been amended to require that the survey evidence be acceptable to the authorized officer. Any survey evidence submitted will be reviewed by the Chief of Cadastral Survey for the State to make certain that the description closes and does not overlap other lands that are not owned by the applicant.

A final comment on the requirement in the proposed rulemaking for survey evidence suggested that the language be changed from ". . . and a showing in the applicant. . ." to ". . . and a showing by the applicant. . . ." This suggestion has not been adopted by the final rulemaking because the word "in" modifies the word "ownership" and the preferred usage is to say ownership in rather than ownership by.

Four of the comments strongly suggested retention of the 90-day period during which the authorized officer is to determine whether an application meets the requirements for further processing and to determine the amount of the deposit required and so inform the applicant. Those comments expressed the view that the 90-day requirement is the only thing in the regulations that assures an applicant of prompt consideration of an application. The final rulemaking retains the 90-day requirement now contained in the existing regulations.

One of the comments on § 2720.1-3 of the proposed rulemaking suggested that the references to the U.S. Geological Survey contained in the section be deleted because the functions described are now handled by the Bureau of Land Management. The final rulemaking has adopted this suggestion because the change is an administrative recognition of changes in the functions of the two bureaus that have already occurred.

The principal author of this final rulemaking is David C. Hemstreet, Division of Lands, Bureau of Land Management, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

The information collection requirements contained in this final rulemaking have been cleared by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1004-0153.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and that it will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

The changes made by this final rulemaking will simplify the conveyance of federally-owned mineral interests and speed the processing of applications for the conveyance of federally-owned mineral interests. The changes will impact and benefit all entities equally because the conveyance of federally-owned mineral interests is open to all existing or proposed surface owners, regardless of their size.

List of Subjects in 43 CFR Part 2720

Administrative practice and procedure, Public lands—mineral resources, Public lands—sales.

PART 2720—[AMENDED]

Under the authority of sections 209 and 310 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1719, 1740), Part 2720, Group 2700, Subchapter B, Chapter II of Title 43 of the Code of Federal Regulations is amended as set forth below.

February 24, 1986

J. Steven Griles,

Assistant Secretary of the Interior.

1. The "Note" appearing immediately after the heading for Group 2700 is revised to read:

Note.—The information collection requirements contained in Parts 2720 and 1740 of Group 2700 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance numbers 1004-0153 and 1004-0012, respectively. The information is being collected to permit the authorized officer to determine if disposition of Federally-owned mineral interests should be made and to determine if disposition of public lands should be made for recreation and public purposes. This information will be used to make these determinations. A response is required to obtain a benefit.

2. The authority citation for part 2720 continues to read:

Authority: Secs. 209 and 310 of Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.)

§ 2720.0-5 [Amended]

3. Section 2720.0-5 is amended by adding a new paragraph (d) to read:

(d) Proof of ownership means evidence of title acceptable in local realty practice by attorneys and title examiners and may include a current title attorney's opinon, based on a current abstract of title prepared by a bonded title insurance or title abstract company doing business in the locale where the lands are located.

4. A new section 2720.0-6 is added to read:

§ 2720.0-6 Policy.

As required by the Federal Land Policy and Management Act, conveyance of federally reserved mineral interest shall be made only upon a determination of no know value or if it can be clearly demonstrated that the mineral reservation is interfering with or precluding appropriate nonmineral development of the lands and that nonmineral development is a more beneficial use than mineral development. Allegation, hypothesis or speculation that such conditions could or may exist at some future time shall not be sufficient basis for conveyance. Failure to establish by convincing factual evidence that the requisite conditions of interference or preclusion presently exist, and that nonmineral development is a more beneficial use, shall result in the rejection of an application.

§ 2720.1-1 [Amended]

5. Section 2720.1-1 is amended by designating the introductory text as paragraph (a), redesignating the existing paragraphs (a) and (b) as paragraphs (a) (1) and (2) and adding a new paragraph (b) to read:

(b) Publication in the *Federal Register* of a notice of the filing of an application under this part shall segregate the mineral interests owned by the United States in the public lands covered by the application to the extent that they will not be subject to appropriation under the public land laws, including the mining laws. The segregative effect of the application shall terminate either

ISS 54
MR 20
1986
UMI

upon issuance of a patent or other document of conveyance to such mineral interests, upon final rejection of the application or 2 years from the date of filing of the application which ever occurs first.

§ 2720.1-2 [Amended]

6. Section 2720.1–2(d)(3) is amended by removing the phrase "to the applicant; and" at the end thereof and replacing it with the phase "and a showing of ownership in the applicant, with supporting survey evidence acceptable to the authorized officer, which may consist of a metes and bounds survey prepard and certified by a civil engineer or land surveyor licensed under the laws of the State in which the lands are located; and".

§ 2720.1-3 [Amended]

7. Section 2720.1–3 is amended by:

A. Amending paragraph (b)(2) by removing from where it appears in the first sentence thereof the phrase "after he has obtained the approval of the U.S. Geological Survey" and by removing from where it appears in the second sentence thereof the phrase "locatable and saleable minerals prepared by the Bureau of Land Management and mineral resources evaluation reports on leasable minerals prepared by the U.S. Geological Survey" and replace it with the phrase "minerals prepared by the Bureau of Land Management";

B. Amending paragraph (c) by removing from where it appears the phrase "after having obtained the approval of the U.S. Geological Survey";

C. Amending paragraph (d) by removing from where it appears the phrase", with the approval of the U.S. Geological Survey,"; and

D. Amending paragraph (e) by removing from where it appears in the first sentence the phrase", after the authorized officer has obtained the approval of the U.S. Geological Survey", by removing from where it appears in seventh sentence the phrase "and with the approval of the plan of operations by the U.S. Geological Survey" and by also removing the phrase "and the U.S. Geological Survey", and by removing from where it appears in the eleventh sentence the phrase "leasable mineral resources to the U.S. Geological Survey and that needed for determination of the economic value of locatable and salable mineral resources" and replace it with the phrase "mineral resources".

BILLING CODE 4310-84-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 672

[Docket No. 51180-5180]

Fishery Conservation and Management; Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of inseason adjustment.

SUMMARY: NOAA announces the reapportionment of amounts of pollock apportioned to domestic annual processing (DAP) and reserve amounts of flounders and the "other species" category to the total allowable level of foreign fishing (TALFF) under provisions of the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP). This action is necessary to provide sufficient bycatch for the foreign longline fishery on Pacific cod. It is intended as a management measure that promotes full utilization of Alaska groundfish.

DATES: This notice is effective March 17, 1986. Comments on this action are invited until April 1, 1986.

ADDRESSES: Send comments to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, AK 99802. The aggregate data upon which this adjustment is based will be available for public inspection during business hours at the Alaska Regional Office, NMFS, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska.

FOR FURTHER INFORMATION CONTACT: Janet Smoker (Resource Management Specialist, NMFS), 907–586–7230.

SUPPLEMENTARY INFORMATION: The regulations implementing the FMP at § 672.20(c) authorize the apportionment of surplus amounts of the reserve and the domestic annual harvest (DAH) to TALFF if the Director, Alaska Region, NMFS (Regional Director), after consulting with the North Pacific Fishery Management Council (Council), has determined that these amounts will not be harvested by domestic fishermen during the remainder of the year. Interim initial specifications for Gulf of Alaska groundfish (51 FR 956, January 9, 1986) were modified later (51 FR 5198, February 12, 1986), and pollock reserves were reapportioned to joint venture processing (JVP) by another action (51 FR 7446, March 4, 1986). DAP and JVP together comprise TALFF.

The Regional Director has determined that the current TALFF specifications of pollock and flounders in the Western and Central areas in the Gulf of Alaska and "other species" Gulf-wide are insufficient to provide appropriate bycatch amounts for the Pacific cod TALFFs in the Western and Central areas, and that it is necessary immediately to increase those amounts to avoid disruption to the foreign fishery. He also has determined that the amounts to be reapportioned from DAP and reserves will not be taken by U.S. fishermen. Consequently, 100 metric tons (mt) of pollock in the Western/Central area is reapportioned from DAP to TALFF, and 40 mt of flounders in the Western area, 10 mt of flounders in the Central area, and 100 mt of "other species" Gulf-wide are reapportioned from their respective reserves to TALFF.

TABLE 1.—GULF OF ALASKA REAPPORTIONMENT FROM DAH AND RESERVE TO TALFF. (FIGURES ARE IN METRIC TONS) DAH=DAP+JVP.

50 CFR Part 642

[Docket No. 50587-6042]

Fishery Conservation and Management; Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule; change in total allowable catch, permit requirements, and bag limits for the Atlantic migratory group of king mackerel.

SUMMARY: The Secretary of Commerce issues a notice of changes in the total allowable catch (TAC), permitting requirements, and bag limits for the Atlantic migratory group of king mackerel in accordance with the framework procedure under Amendment 1 to the Fishery Management Plan for the Coastal Migratory Pelagic Resources of the Gulf of Mexico and the South Atlantic. This notice reduces TAC and allocations for Atlantic migratory group king mackerel based on recent catch data, requires permits for commercial vessels, and bag limits for recreational fishermen. The intended effects are to protect the Atlantic migratory group of king mackerel and still allow catches by the important recreational and commercial fisheries that are dependent on this species and to implement a permit requiremet for commercial vessels for the purpose of improved management.

EFFECTIVE DATE: March 17, 1986.

FOR FURTHER INFORMATION CONTACT: Donald W. Geagan, 813–893–3722.

SUPPLEMENTARY INFORMATION: The king mackerel fishery is regulated under the Fishery Management Plan for the Coastal Migratory Pelagic Resources of the Gulf of Mexico and the South Atlantic (FMP) and final regulations (50 CFR Part 642). An amendment to the FMP (Amendment 1) was prepared jointly by the Gulf of Mexico and South Atlantic Fishery Management Councils (Councils) and implemented September 22, 1985 (50 FR 34840, August 28, 1985). On January 8, 1986 (51 FR 769) a notice of preliminary changes in the total allowable catch, permitting requirements, and bag limits for the Atlantic migratory group of king mackerel in accordance with the framework procedure under Amendment 1 to the FMP was published for public comment. The comment period ended January 23, 1986.

The preamble to the preliminary notice contained a description of the need and rationale for implementing the changes in TAC, permitting requirements, and bag limits. These discussions are not repeated here.

Comments and Responses

Seventeen comments on the preliminary notice were received from seven commenters including fishermen, a seafood technologist, a recreational fishing organization, a marina operator, and a boat manufacturer.

Sale of Recreational Catches

A recreational fishing organization and a seafood technologist stated that recreational fishermen should not be allowed to sell their catch because they cannot ensure a quality product since they are either unfamiliar with proper storage techniques or unable to adequately care for their catch. Both commenters also stated that allowing the sale of recreational catches encourages recreational fishermen to compete with commercial fishermen for the fish and market. NOAA does not agree. Purchasers of the catch determine the quality, thus fishermen with less than adequate quality fish will be unable to sell their catch. The bag limit on recreational fishermen should prevent any significant competition with the unrestricted catch of an individual permitted to fish under the commercial quota.

Quotas and Allocations

A recreational fishing organization stated that the 18 percent reduction in total allowable catch of the Atlantic migratory group was insufficient to prevent the collapse of the resource because the best available scientific information was not used. NOAA does not agree. NOAA acknowledges there are data deficiencies, but concludes that the Councils used the best scientific information available. Allowable catches will be adjusted annually, on a pre-season basis, as additional information is gathered.

One commenter opposed any restrictions because he did not believe that the Councils' decisions are sound and based on the best scientific information available. NOAA disagrees. As stated above, the Councils utilized the best scientific data available.

Two commenters opposed quotas and allocations because of negative effects on tournaments. One commenter suggested a special concession for major tournaments. The Councils fully considered the impact of the allocations and quotas on tournaments and determined that tournament participants must share the burden for the conservation of king mackerel. NOAA agrees with the Councils' decision.

Bag Limits

One recreational fisherman questioned whether a size limit rather than a bag limit would achieve the same purpose. The Councils considered the advantages and disadvantages associated with size and bag limits. Since king mackerel are migratory, the Councils selected the bag limit because this allows the residents of different States to participate in this fishery in a fair and equitable manner. A size limit favors the areas where the larger fish occur during migration. NOAA agrees with the Councils' decision in selecting the bag limit.

One recreational fisherman questioned how the bag limit will be enforced. Based on comments from Federal and State law enforcement personnel, the Councils concluded that the bag limit was enforceable. NOAA also concluded that this measure was enforceable. The bag limit will be enforced by Federal agencies such as the U.S. Coast Guard and National Marine Fisheries Service and by State agencies through Federal/State cooperative agreements.

One recreational fisherman questioned whether any government body could unilaterally impose such a rule without public participation in the rule-making process. The Councils that developed these measures are composed of representatives from the coastal States' governments, the recreational and commercial fishing communities, and the Federal government. As required by the Magnuson Act, the Councils obtained public participation through fourteen public hearings held on Amendment 1 under which this notice action has been developed. During these hearings, the Councils solicited public comments on the use of bag limits for the recreational fishery in the area of the Atlantic migratory group. The public had opportunity also to comment during the 15-day public review period for this notice action that ended January 23, 1986.

VOL 51
ISS 54
MR 20
1986
UMI

A recreational fisherman inquired as to why there was no mention of restrictions on the west coast of Florida (including the Keys) and the Gulf of Mexico. This notice action is applicable only to the Atlantic migratory group. In Amendment 1, the Councils previously reviewed the status of the Gulf of Mexico king mackerel migratory group and concluded that this group is overfished. As a result the total allowable catch was reduced by 22 percent.

A recreational fisherman did not believe that the recreational sector could catch enough king mackerel to overfish the Atlantic migratory group and therefore, should not be included with commercial net vessels. A sport fishing organization recommended that the taking of king mackerel be restricted to hook-and-line commercial and rod and reel recreational fishermen. Historically, the recreational and commercial sectors have taken 62.9 and 37.1 percent, respectively, of the total harvest. The Councils reviewed this information and concluded that both sectors must be managed to prevent overfishing of the Atlantic group. NOAA agrees with the Council's decision.

A recreational fisherman inquired as to the commercial quota amount, the identity of the enforcing agency, and the foreign catch inside the fishery conservation zone (FCZ). The Councils reviewed the best available scientific information and set the commercial quota at 3.59 million pounds as measured by the commercial sales reported by dealers. The quota will be enforced by NMFS, the U.S. Coast Guard, and State agencies through the Federal/State cooperative agreements. Since the domestic sectors catch the entire optimum yield, there is no surplus available for foreign fishing. Any foreign vessel fishing for king mackerel in the FCZ is in violation of the Magnuson Act. Furthermore, such violation is unlikely since all foreign vessels fishing in the FCZ must have a NMFS observer aboard. NOAA agrees with the Councils' decision regarding the commercial quotas.

Changes From the Preliminary Notice

Section 642.4

Paragraph (b) is revised to allow commercial king mackerel fishermen to submit one application for permits to fish either or both the Atlantic migratory group and the Gulf migratory group. This will lessen the paperwork burden on fishermen. Permits for fishing the two migratory groups will be issued during the two months prior to the start of the respective migratory groups' fishing year.

Paragraph (g) is modified to require that a copy of the executed (signed) bill of sale be available for inspection aboard a newly purchased permitted vessel while the new owner is awaiting issuance of a new permit. This will assist in enforcement of the permitting requirement under paragraph (a) and reduce the possibility for inconvenience to the vessel owner in the event he is inspected prior to receipt of his new permit.

Section 642.7

Paragraph (a)(2) is revised by deleting the reference to § 642.22 since closures under this section are addressed in other paragraphs of § 642.7. Paragraphs (a)(17), (19), and (20) are modified to reflect the amended designations for paragraphs (c), (d), and (e) of § 642.21. Paragraph (a)(28) is added to clarify that king mackerel harvested by recreational fishermen may not be sold after closure of the respective king mackerel group allocation or quota under § 642.21. Paragraphs (a)(29) and (30) are added for application of paragraphs at § 642.28 (e) and (f).

Section 642.24

Paragraph (c) is corrected by changing the word "abroad" to aboard" wherever it occurs in the paragraph.

Section 642.28

Paragraph (c) is revised for clarification and the reference to persons fishing under the bag limit selling their fish has been deleted. Paragraph (d) is added to address the selling of king mackerel harvested under the bag limit.

Paragraph (e) is added to clarify that fishermen may not combine the bag and possession limits applicable to the FCZ and State waters.

Paragraph (f) is added to identify the operator of a vessel as the person responsible for the cumulative bag limit of king mackerel applicable to the vessel. This conforms with the responsibilities of vessel operators described under § 642.2 Definitions.

Changes to the Permit Application Process

Due to procedural delays, applications for 1986–1987 commercial fishing permits to fish the Atlantic migratory group of king mackerel or to fish the Atlantic and Gulf migratory groups of king mackerel will be received until May 19, 1986. The Regional Director or his designee will issue a 1986–1987 commercial fishing permit to fish Atlantic migratory group king mackerel, after a permit application is submitted as specified above. The Atlantic migratory group king mackerel 1986–1987 fishing year will still begin April 1, 1986. Commercial fisherman may fish commercially for Atlantic migratory group king mackerel without a permit during the permit application period, ending May 19, 1986.

Other Matters

This action is taken under the authority of 50 CFR 642.27 and is taken in compliance with Executive Order 12291. This action is covered by the supplemental regulatory impact review and supplemental regulatory flexibility analysis which concluded that the authorizing regulations could have a significant economic impact on a substantial number of small entities.

This rule contains a collection of information requirement subject to the Paperwork Reductions Act. The collection of this information has been approved by the office of Management and Budget, OMB Control Number 0648–0097.

List of Subjects in 50 CFR Part 642

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: March 17, 1986.

Joseph W. Angelovic,

Deputy Assistant Administrator For Science and Technology, National Marine Fisheries Service.

For reasons set forth in the preamble, 50 CFR Part 642 is revised as follows:

PART 642—COASTAL MIGRATORY PELAGIC RESOURCES OF THE GULF OF MEXICO AND THE SOUTH ATLANTIC

1. The authority citation for Part 642 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In Part 642, the Table of Contents is amended by revising the heading for § 642.21 from "Quotas" to "Quotas and allocations".

3. Section 642.2 is amended by revising the definition of "Charter vessel" to read as follows:

§ 642.2 Definitions.

* * * * *

Charter vessel (includes headboats) means a boat or vessel whose captain or operator is licensed by the U.S. Coast Guard to carry paying passengers and whose passengers fish for a fee. Charter vessels with commercial permits to fish Atlantic migratory group king mackerel are under charter when there are more

than three (3) persons aboard including captain and crew.

* * * * *

4. Section 642.4 is amended by revising paragraphs (a), (b) introductory text, (b)(7), (d), (f) and (g), and adding a new paragraph (b)(8) to read as follows:

§ 642.4 Permits and fees.

(a) *Applicability* (1) Owners or operators of fishing vessels which fish for king mackerel under the commercial quotas (§ 642.21) are required to obtain an annual vessel permit.

(2) Owners or operators of charter vessels and headboats that fish for Gulf migratory group king mackerel are excluded from eligibility for a vessel permit unless they will charter only in the Atlantic migratory group area.

(3) Owners or operators of charter vessels may obtain a permit to fish Atlantic migratory group king mackerel provided they adhere to bag limits while under charter.

(b) *Application for permits.* An application for a permit must be submitted and signed by the owner or operator of the vessel. Applications for permits to fish both the Atlantic and Gulf migratory groups of king mackerel or for a permit to fish only the Atlantic migratory group of king mackerel must be submitted to the Regional Director or his designee within 60 days prior to April 1 each year. Applications for permits to fish only the Gulf migratory group of king mackerel must be submitted to the Regional Director or his designee 60 days prior to July 1 of each year. Owners or operators of newly registered or documented vessels may submit an application at any time during a fishing year provided it is received by the Regional Director within 60 days after registration or documentation. In cases of demonstrated hardship the Regional Director may accept applications at other times. Permit applicants must provide the following information:

* * * * *

(7) Any other information concerning vessel, gear characteristics and fishing area requested by the Regional Director; and

(8) The migratory group of king mackerel that will be fished.

* * * * *

(d) *Issuance.* The Regional Director or his designee will issue a permit to the applicant only during February and March of each year to fish Atlantic migratory group king mackerel and May and June of each year to fish Gulf migratory group king mackerel, after permit applications are submitted according to paragraph (b) of this section. The Regional Director may issue permits at other times to newly registered or documented vessels, or in case of demonstrated hardship. Until the permit is received, fishermen must comply with the bag limits under § 642.28 and have a copy of an executed bill of sale per § 642.4(g).

* * * * *

(f) *Duration.* A permit is valid only for the period of the year for which it is issued (July 1–June 30 for the Gulf migratory group and April 1–March 31 for the Atlantic migratory group) unless revoked or suspended pursuant to Subpart D of 15 CFR Part 904.

(g) *Transfer.* A permit issued under this section is not transferable or assignable except on sale of the vessel to a new owner. A permit is valid only for the fishing vessel for which it is issued. New owners purchasing a permitted vessel to fish under the Gulf or Atlantic migratory groups' quotas must comply with the provisions of paragraph (b) of this section. The application must be accompanied by an executed (signed) bill of sale. New owners who have purchased a permitted vessel may fish with the preceding owner's permit until a new permit has been issued, but for a period not to exceed 60 days from date of purchase. Until a new permit is received, a copy of the executed (signed) bill of sale must be aboard the vessel and available for inspection by an authorized officer.

* * * * *

5. Section 642.6 is amended by revising paragraph (a) introductory text to read as follows:

§ 642.6 Vessel identification.

(a) *Official number.* Each vessel of the United States engaged in fishing for king mackerel under a commercial quota and the permit specified in § 642.4 must—

* * * * *

6. Section 642.7 is amended by revising existing paragraphs (a) (2), (19), (20), (21), (22), and (25); revising the reference that reads "§ 642.21(b)" to "§ 642.21(c)"in paragraph (a)(17); changing the period at the end of paragraph (a)(27) to a semicolon and adding new paragraphs (a) (28), (29), (30), and (31), to read as follows:

§ 642.7 [Amended]

(a) * * *

(2) Fish for king or Spanish mackerel in violation of any area closures or season closures as specified in § 642.26;

* * * * *

(19) Fish for king or Spanish mackerel in the FCZ with purse seines after the quotas specified in § 642.21(c) and (e) have been reached and closure has been invoked as specified in § 642.22 (Table 2);

(20) Fish for or have in possession aboard Spanish mackerel in or from the FCZ or purchase, sell, barter, trade or accept in trade, Spanish mackerel after the total allowable catch specified in § 642.21(d) is reached and closure has been invoked as specified in § 642.22 (Table 2);

(21) Land, consume at sea, sell, or have in possession at sea or at time of landing king mackerel in excess of the bag limits specified in § 642.28 except as provided for under § 642.21;

(22) Fish for king mackerel from the Gulf and Atlantic migratory groups in the FCZ as defined in § 642.29 under the quotas specified in § 642.21(a) without a permit as specified in § 642.4;

* * * * *

(25) Land king mackerel in other than an identifiable form as specified in § 642.28(b);

* * * * *

(28) Possess king mackerel harvested from the FCZ under the recreational allocation set forth at § 642.21(b) after closure has been invoked as specified in § 642.22;

(29) Sell king mackerel harvested under the recreational bag limits in § 642.28(a) except as specified in § 642.28(d);

(30) Combine the bag and possession limits for king mackerel under § 642.28(a) with bag and possession limits applicable to State waters as specified under § 642.28(e); or

(31) Operate a vessel that fishes king mackerel in the FCZ with king mackerel aboard in excess of the cummulative bag limit, based on the number of persons aboard, applicable to the vessel, as specified in § 642.28(f).

* * * * *

7. Section 642.21 is amended by revising the last two sentences of paragraph (a), redesignating existing paragraphs (b) through (e) as (c), (d), (e) and (i), and adding a new paragraph (b) to read as follows:

§ 642.21 Quotas and allocations.

(a) *Commercial quotas for king mackerel.* * * * The commercial allocation for the Atlantic migratory group of king mackerel is 3.59 million pounds per fishing year. A fish is counted against the commercial quota or allocation when it is first sold (Table 2).

(b) *Recreational allocations for king mackerel.* The recreational allocation for the Atlantic migratory group of king mackerel is 6.09 million pounds per fishing year.

* * * * *

VOL 51
ISS 54
MR 20
1986
UMI

8. Section 642.22 is amended by designating the existing paragraph as (a), amending paragraph (a) by inserting the reference "§ 652.21(a), (c), and (e)" in place of "§ 642.21" throughout the paragraph, and adding a new paragraph (b) as follows:

§ 624.22 Closures.

* * * * *

(b) The Secretary, by publication of a notice in the **Federal Register**, will close the recreational fishery for king mackerel of the Atlantic migratory group when the allocation for that group under § 642.21(b) is reached or is projected to be reached.

§ 642.24 [Amended]

9. In § 642.24, paragraph (c) is amended by changing the word "abroad" to "aboard" wherever it occurs.

10. Section 642.28 is revised to read as follows:

§ 642.28 Bag and possession limits.

(a) *Recreational allocation bag limits.* Persons who fish for king mackerel from the Gulf or Atlantic migratory group (see Figure 2) in the FCZ, except those fishing under the permits and quotas specified in § 642.4; § 642.21(a); and § 642.24(c), are limited to the following:

(1) *Gulf migratory group.* (i) Possessing three (3) king mackerel per person per trip, excluding the captain and crew or possessing two (2) king mackerel per person per trip, including the captain and crew, whichever is the greater, when fishing from a charter vessel.

(ii) Possessing two (2) king mackerel per person per trip when fishing from other vessels.

(2) *Atlantic migratory group.* Possessing three (3) king mackerel per person per trip.

(b) All king mackerel must be landed in an identifiable form as to number and species (with the understanding that head and tail can be removed).

(c) (1) After a closure under § 642.22(a) is invoked for the quota(s) (specified in § 642.21(a)) for either or both Gulf allocation zone(s), vessels permitted under § 642.4 may not fish for Gulf migratory group king mackerel in that zone(s) under the bag limit specified in paragraph (a) of this section.

(2) Charter vessels permitted to fish under the commercial quota of Atlantic migratory group king mackerel may fish under the bag limit specified in (a)(2) of this section provided they are under charter (more than three (3) persons aboard including captain and crew) and the recreational fishing allocation for Atlantic migratory group king mackerel under § 642.21(b) has not been closed under § 642.22(b).

(d) Recreational fishermen may sell their catch of Gulf and Atlantic migratory group king mackerel taken under the bag limits in paragraph (a) of this section unless the respective king mackerel migratory group allocation or quota in § 642.21 has been closed under § 642.22. King mackerel sold by recreational fishermen are counted against the appropriate commerical allocation or quota in § 642.21(a) for the area where they are in effect.

(e) Persons who fish for king mackerel in the FCZ may not combine the bag and possession limits of this part with any bag or possession limits applicable to State waters.

(f) The operator of a vessel that fishes for king mackerel in the FCZ is responsible for the cumulative bag limit, based on number of persons aboard, applicable to that vessel.

11. Part 642 is amended by designating Tables 1 and 2 and Figures 1 through 3 as Appendix A to the part. Table 2 is amended by revising the "King Mackerel—Atlantic" line and adding a new "King Mackerel—Atlantic Recreational" line to read as follows:

TABLE 2.—KING AND SPANISH MACKEREL QUOTAS AND TOTAL ALLOWABLE CATCH (TAC) FOR WHICH CLOSURES ARE INVOKED FOR SPECIFIC MIGRATORY GROUPS OR ALLOCATION ZONES OR GEAR TYPES [1]

Migratory group(s)	Fishing year	Gear	Allocation zone	Fishing year quota/TAC (million lbs)	Prohibition on sale and/or catch invoked when—
King Mackerel:					
Atlantic Commercial	1 Apr–31 Mar	All types	Entire range [2]	3.590	Sales from migratory group are projected to reach quota.
Atlantic Recreational	1 Apr–31 Mar	All types	Entire range [2]	6.080	Catches from migratory group are projected to reach allocation.

[1] See Figure 2 for dilineation of migratory group ranges and allocation zones.
[2] The range of migratory groups varies by season (§ 642.29)-See Figure 2.

BILLING CODE 3510-22-M

Proposed Rules

Federal Register
Vol. 51, No. 54
Thursday, March 20, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 927

[Docket No. AO-99-A5]

Pears Grown in Oregon, Washington, and California; Marketing Agreement and Order

AGENCY: Agricultural Marketing Service USDA.

ACTION: Proposed rule.

SUMMARY: This notice invites written exceptions on a proposed amendment of the marketing agreement and Marketing Order 927 (7 CFR Part 927), covering Beurre D'Anjou, Beurre Bosc, Winter Nelis, Doyenne du Comice, Beurre Easter, and Beurre Clairgeau varieties of pears (winter pears) grown in Oregon, Washington, and California. The proposal would revise the size and composition of the Control Committee, limit the tenure of Control Committee members, change the varieties of winter pears covered under the order, authorize public advisors, add authority for research and development programs on a varietal basis, provide for periodic referenda on the order, and provide for certain other minor changes intended to improve program administration.

DATE: Written exceptions to this recommended decision must be received by April 4, 1986.

ADDRESS: Interested persons may file written exceptions to this decision with the Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, DC 20250. Two copies of all written exceptions should be submitted, and they will be made available for public inspection during regular business hours.

FOR FURTHER INFORMATION CONTACT: James Wendland, Acting Chief, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, Washington, DC 20250, telephone 202-447-5053.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of sections 556 and 557 of Title 5 of the United States Code and therefore is excluded from the requirements of Executive Order 12291.

Small businesses. The Regulatory Flexibility Act (Pub. L. 96-354), effective January 1, 1981, seeks to ensure that, within the statutory authority of a program, the regulatory and information requirements are tailored to the size and nature of small businesses. Interested persons were invited to present evidence at a hearing on the probable regulatory and informational impact of the proposed rule on small businesses.

During the fiscal year ending June 30, 1985, 96 handlers regulated under M.O. 927 handled winter pears for fresh market with an estimated crop value of $65.5 million. The average value per handler was approximately $680,000. Given an appropriate definition of a small business concern (i.e., for purposes of review pursuant to the Regulatory Flexibility Act, an agricultural services firm with average annual receipts not exceeding $3,500,000), almost all of the handlers of winter pears would fall within that definition. Thus, few handlers, if any, can be considered large or predominant in a relative or absolute sense.

The Agricultural Marketing Agreement Act requires the application of uniform rules to regulated handlers. Since handlers covered under M.O. 927 are predominantly small businesses, the order itself is tailored to the size and nature of these small businesses.

Further, while the amendment recommended herein would impose some requirements on affected small businesses and the number of such may be substantial, and added burden should not be significant in light of the potential benefits that should be derived by such small businesses.

Most of the substantive proposals would not have a significant impact on small businesses' recordkeeping and reporting burdens. One of the proposals in this rulemaking would authorize the funding of promotional programs on a varietal basis. Because this would provide added flexibility in the collection and use of assessment funds, various segments of the industry would be able to focus more clearly on their research and promotion goals and to more effectively pool their resources to mount promotional campaigns. Small businesses could especially benefit as they are the least likely to be in a position to initiate and maintain such marketing expansion projects individually.

The overall impact of the proposed amendment upon other small businesses is more difficult to evaluate. Some such businesses, including retail food stores, restaurants, and others that sell winter pears to the public in various forms, could experience slightly increased costs due to potentially higher winter pear price levels under the amendment. However, if an increased volume of winter pears were to be shipped as a result of varietal promotional efforts, greater returns to growers, handlers and other marketers could result. This might offset potential promotional expenses enough to benefit all groups, including consumers. However the magnitude of such added costs is difficult to quantify and is speculative. Moreover, these potential added costs could well be counterbalanced by the advantages to small businesses that are winter pear growers who will benefit from the proposed amendment.

Based on the foregoing, it is hereby determined and certified that this action will not have a significant economic impact on a substantial number of small entities. A comment period of 15 days is provided. A longer period would unnecessarily delay the amendatory process and prevent the proposed changes from being implemented by the industry in time for the 1986 marketing season.

Preliminary statement: Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to the proposed further amendment of marketing agreement and Order No. 927 regulating the handling of winter pears grown in Oregon, Washington, and California, and of the opportunity to file written exceptions thereto. Copies of this decision may be obtained from William J. Doyle whose address is listed above.

This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), hereinafter referred to as the "act," and the applicable rules of practice and procedure governing the formulation of marketing agreements and orders (7 CFR Part 900).

VOL 51
ISS 54
MR 20
1986
UMI

On June 20, 1985, a public hearing was held on proposed further amendment the marketing agreement, as amended, and Order No. 927, as amended. The hearing was held in Portland, Oregon, pursuant to the provisions of the act and the applicable rules of practice. Notice of this hearing was published in the Federal Register on June 11, 1985 (50 FR 24531). The notice of hearing contained a proposal by the Winter Pear Control Committee, which operates under the order, to amend the order to authorize varietal promotion and paid advertising, revise the size and composition of the Control Committee, change the varieties of winter pears included under the order, limit the tenure of committee members, provide for periodic continuance referenda, and make certain minor administrative changes. The notice included a proposal by the Fruit and Vegetable Division, Agricultural Marketing Service, USDA, authorizing it to make any necessary conforming changes.

Material issues: The material issues presented on the record of the hearing are: (1) Whether the Control Committee should be authorized under the order to engage in marketing promotion and paid advertising to promote the marketing, distribution and consumption of winter pears by types or varieties; (2) whether changes in the size, composition and voting procedures of the Control Committee should be authorized; (3) whether the order should be amended to change the varieties and subvarieties of winter pears covered; (4) whether a limit should be established on the tenure of Control Committee members; (5) whether periodic continuance referenda should be held on the order; and (6) whether certain minor administrative changes and conforming changes should be made to the order if any of these proposals were to become effective.

Findings and conclusions: The findings and conclusions on the material issues, all of which are based on the evidence adduced at the hearing and the record of it, are as follows:

(1) The order should be amended, as hereinafter set forth, to include authority for marketing promotion and paid advertising to promote the marketing, distribution, and consumption of winter pears on the basis of types or varieties. Such authority is provided under section 8c(6)(I) of the act.

Authority for generic marketing promotion and paid advertising of winter pears was added under the order on November 28, 1984. Certain testimony during that rulemaking proceeding also favored the promotion of winter pears on a varietal basis. However, this was inadequately supported and the order, as amended, did not provide for promotion on a varietal basis. On March 22, 1985, the industry requested that a public hearing be held to consider amending the order to add varietal promotion authority.

The hearing record indicates that the proposal would effectuate the declared purpose of the act by making the program more responsive to industry marketing needs. Varietal promotion authority would permit producers and handlers of different winter pear varieties to pursue marketing strategies tailored specifically to the marketing conditions that each specific variety or industry group faces. This could be desirable if new cultivars are developed and come into commercial production, since producers of these hybrids or crosses could fund projects solely directed toward informing consumers of their qualities and availability. Similarly if a particular variety were especially plentiful during a particular season, producers of that variety could develop and fund a program directed solely toward marketing this type of pear. In essence the proposed authority provides flexibility in marketing promotion and advertising under the order.

To effectuate this authority §§ 927.41 and 927.52 of the order should be amended to permit supplemental assessments based upon specific winter pear varieties. As proposed in the notice such supplemental assessments would be authorized whenever 80 percent of the votes cast by committee members on behalf of a variety support such levies. Hearing evidence supports supplemental assessment authority but not the requirement in the notice that 80 percent of all votes cast must be in support of an assessment levy for it to become effective. Witnesses testified that obtaining an 80 percent majority could be difficult, because even among producers of the same variety members may hold contrasting views on the need for supplemental promotions. Testimony indicated that recommendations for supplemental assessments should require 75 percent of the applicable number of votes of that variety to be valid. Such percentage is reasonable and should assure that adequate support exists for the imposition of a supplemental assessment on handlers of that variety. Evidence in the record also makes clear that handlers of any winter pear varieties or subvarieties covered under the order would be required to pay the base assessment rate recommended by the Control Committee and set by the Secretary, regardless of whether a supplemental assessment rate is subsequently levied on a particular variety.

Another revision proposed to effectuate varietal promotion authority is to amend § 927.47 to specify that funds spent for a particular variety of pears should approximate funds collected for the variety. Testimony indicates that this would safeguard promotion funds by ensuring that funds from assessments on one variety do not subsidize projects of other varieties. However, testimony indicates that the language should be strengthened further to make this mandatory rather than permissive as contained in the proposal. This would provide an additional degree of protection against the inappropriate use of funds. It is intended that the level of promotional expenditures for each varietal type would be required to be approximately the same as the assessment revenue collected for that varietal type of winter pears, including any unspent revenue from prior years. In addition, supplemental assessment income which remains unspent at the end of a season may be set aside in a reserve fund for the applicable variety, to be spent for promoting that variety in future seasons.

Another revision would modify § 927.52 to provide Control Committee members a procedural basis to vote to recommend supplemental varietal assessments. As proposed, committee decisions on the establishment or modification of a supplemental rate of assessment for an individual variety of pears would be made in the same manner as are decisions pertaining to grade, size, and quality recommendations. A vote would be allocated to each member and an additional volume vote would be allocated to each member on the basis of each 25,000 boxes of a particular variety that were marketed from the member's district.

One witness pointed out that certain varieties proposed for inclusion under the order (Seckels and Forelles) are produced in such small quantities that such a method of voting would result in unrepresentative tallies. For example, because no district currently produces and markets over 25,000 boxes of Forelles annually, each district would be entitled to one vote, even though only two districts account for most of the production. That witness proposed an alternative method of voting for Seckel and Forelles Varieties which allocates an additional vote for each 2,500 boxes of production in each district. This method would ensure that each district's vote was proportional to its production of Seckels and Forelles and is recommended for inclusion in the proposed amendment. Testimony

indicates that this alternative basis for volume votes is intended to be used for varietal votes on supplemental assessments, however, it would also be appropriate to use this method for votes on other varietal matters, including grade and size regulation recommendations. It is recognized, however, that the method of computing votes, including the proposed alternative method, does not provide flexibility in addressing changing conditions, especially any growth or decline in production of any winter pear varieties. Because such change in the industry is likely, it would be inappropriate to establish procedural methods for computing the votes for specified winter pear varieties that could become obsolete within a few years. Therefore, the committee should be authorized to authorized to consider other methods of allocating volume votes. One suggestion offered at the hearing would base votes on the percentage of production in a district compared to the whole production area. Other suggestions may also have merit. Of course, the committee may conclude that the proposed two-tiered system would be most practical at present. In any event, based upon the testimony presented at the hearing, the control committee should be provided additional authority to recommend to the Secretary alternative procedures to allocate each district additional votes based upon production, to be considered and implemented by means of informal rulemaking.

(2) The order should be amended, as hereinafter set forth, to authorize changes in the number of producer/handler members, the allocation of committee membership by district and the voting procedures of the Control Committee.

Testimony indicates that winter pear production has shifted over the years. California production has declined to less than three percent of the total of Oregon, Washington and California. Conversely production in the Wenatchee and Mid-Columbia districts has increased to the extent that each now account for about a third of total production. The current order entitles each district to one producer member and one handler member on the Control Committee. As a result the committee has become less representative of the industry in recent years.

The proposal would combine the two California districts, the Placerville District and the Santa Clara District, into one, designated as the California District, which would encompass the entire State of California. As stated above, winter pear production in California has declined significantly, and producers and handlers are similarly fewer in number. Because of this, and testimony which indicates that winter pear producers and handlers throughout California have similar concerns with regard to marketing order issues, one Control Committee producer member and one handler member from the State would be able to take positions representative of California as a whole.

The proposal would also enlarge the Control Committee to 14 member positions (from the current 12). The Medford, Yakima and California districts would each be allocated one producer and one handler position, and the Wenatchee and Mid-Columbia districts would each be allocated two producer and two handler positions. This would apportion membership on the committee as closely as possible to average winter pear production in each district and yet ensure each district representation on the committee.

Testimony indicates that committee quorum and voting procedures should also be changed to reflect the larger control committee size. It is appropriate that ten of the 14 members be present to constitute a quorum for conducting committee business. This is nearly equivalent to the present ratio, where nine member quorum is required of a twelve member committee.

The order currently provides in § 927.33 that decisions of the Control Committee shall be made by a majority of those voting, but not less than 7 concurring votes. As proposed in the hearing notice, decisions would be made by the concurring votes of 80 percent of those voting, but not less than 10 concurring votes. A substantial amount of testimony indicates that these requirements regarding all decisions except those made pursuant to § 927.50, might be too restrictive and would hamper committee operations. As no testimony was received regarding the need for a change in appropriate level of concurrence which should be required for decisions made pursuant to § 927.50, this provision remains unchanged. On other decisions, most witnesses testified that the concurring votes of 75 percent of those voting should be required. Further, reducing by five percent, to 75 percent, the concurrence necessary for committee action could potentially change the outcome of a vote when 12, 13 or 14 members (or alternates acting as members) are voting. For example, if an 80 percent concurrence were required in voting, three voting members or alternates could veto all actions. While all members are likely to continue to serve responsibly, it seems prudent and in the interests of effective decisionmaking to require that only 75 percent of those voting must concur in committee decisions.

The second requirement for committee decisions proposed, that of ten concurring votes, was opposed by a large number of those testifying at the hearing. These witnesses noted that this provision would require a unanimous affirmative vote for action if only ten members or alternates attended a meeting. Evidence suggests that this is an unreasonable requirement. Thus, no minimum number of concurring votes is specified.

(3) The order should be amended, as hereinafter set forth, to authorize changes in the varieties and subvarieties covered under the program.

Presently § 927.4 which defines pears under the order, includes Beurre Easter and Beurre Clairgeau varieties. However, testimony indicates that these varieties have been declining in commercial importance for many years, and currently have minimal commercial value relative to other varieties. Therefore, these varieties should be deleted from coverage under the order.

Testimony indicates that production of two other varieties, Forelle and Seckel, has become commercially significant within the States of Oregon and Washington and should be added to the list of varieties subject to regulation under the order. Additionally, producers of these varieties have indicated interest in developing and funding research and development projects. Forelle and Seckel variety pears grown in California are presently covered under Marketing Order No. 917, which is applicable to pears, peaches and plums grown in California, and therefore pears of these two varieties grown in California should not be included under Marketing Order 927.

Testimony also indicates that similar gradual changes in the relative prominence or commercial importance of various winter pear varieties is likely to occur in the future. In the event such changes occur the Control Committee and the producers of the affected varieties may elect to be included, or perhaps excluded, from coverage under the order. As proposed in the notice, effectuating such a change in coverage would require a formal rulemaking proceeding. It would be desirable to accomplish this without such formal rulemaking in the interests of time and expense, but only upon the recommendation of the control committee and the approval of the Secretary. It is also intended that

VOL
51
ISS
54
MR
20
1986
UMI

producers of the affected varieties be polled as to their preferences in such matters and that the results of each such poll be submitted to the Secretary before any action to change coverage is undertaken. Section 927.4 should therefore be changed accordingly. It is understood, however, that any newly added coverage of any varieties would be applicable only to fruit produced in the State of Oregon and Washington, because varieties produced in California, other than those enumerated under Order 927, are covered under Order 917.

Testimony also indicates that a new § 927.13 subvariety should be added to the order. Under this provision each new subvariety developed from a cross of fall and winter pears would be classified as to parentage to clarify whether it would be covered under the program. Further, each new subvariety coverded under the program would be classified under a varietal group for the purpose of votes conducted by the Control Committee on supplemental promotion funding. Since the commercial production of new varieties and subvarieties is likely to develop over a number of seasons, producers and the Control Committee would have ample opportunity to determine whether particular varieties or subvarieties would be covered under the program. Upon determination by the Control Committee pursuant to § 927.33 that a particular variety or subvariety should be covered, the committee would request approval of the Secretary. Upon such approval the committee would notify all producers and handlers.

As a conforming change the title of the order should be modified to read "Winter Pears Grown in Oregon, Washington and California." This title would more closely identify the intent and coverage of the order.

(4) The order should be amended, as hereinafter set forth, to change the terms of office of Control Committee members and to establish a limit on the tenure of Control Committee members.

Testimony indicates that changing the terms of office of Control Committee members and alternates to two years from the current one year and providing for staggered terms of office will improve administration of the program. Expanding the term of office should provide the opportunity for members and alternates to become more familar with order operations which should enhance their contributions to the administration of the order. By staggering the terms of committee positions, particularly those within a district, the industry is ensured that knowledgeable persons will always be on the committee in each district.

It is recommended that this be accomplished by dividing the industry into odd and even-numbered year groups, and § 927.27 should be amended to provide that seven committee members and their alternates shall be nominated in even-numbered years and seven members and their alternates be nominated in odd-numbered years. To effectuate this change, nominations in 1987 should select one half of the committee membership for a one-year term of office and the remaining membership for a two-year term of office.

A reasonable schedule to nominate committee members and their respective alternates in 1987 would be as follows:

District	Position	Term
Medford	Grower	2 years.
	Handler	1 year.
Hood River-White Salmon-Underwood	Grower	2 years.
	Grower	1 year.
	Handler	2 years.
	Handler	1 year.
Wenatchee	Grower	2 years.
	Grower	1 year.
	Handler	2 years.
	Handler	1 year.
Yakima	Grower	2 years.
	Handler	1 year.
California	Grower	2 years.
	Handler	1 year.

All nominations subsequent to the 1987 nominations would be for two-year terms of office.

In recognition of the Secretary's 1982 "Guidelines For Fruit, Vegetable, and Specialty Crop Marketing Orders," industry witnesses also testified in support of limiting the length of time that committee members may serve to three consecutive two-year terms. Testimony indicates that such a limitation on tenure could help bring additional persons into active roles in the administration of the program. A number of clarifications were made in the course of the hearing on how the provision would be administered. Testimony indicates that the limitation should not be applied retroactively, but rather it would apply to those selected to full terms after the provision became effective. Also the limitation is intended to apply only to members, not to alternates. Additionally, persons no longer eligible to serve as members could serve as alternates and could also serve as members again after they had not served in that capacity for two years. Testimony indicates, however, that the Secretary should retain the authority to exempt an individual from the tenure limitation if the position would otherwise remain vacant for lack of eligible nominees or eligible persons willing to serve. Nonetheless it would seem clear that such an exception would be made only in special and unusual circumstances and should not be expected as a matter of course.

(5) The order should be amended, as hereinafter set forth, to require referenda to be held relative to continuance of the order within every six-year period.

The order provides that the Secretary shall terminate the program if a majority of all producers favor termination and such majority produced more than 50 percent of the winter pears for market. Since less than 50 percent of all growers usually participate in a referendum, it is difficult to determine producer support for termination of an order. In order to provide a basis for determining whether producers favor continuance of the order, a new paragraph (d) should be added to § 927.78 to authorize continuance referenda.

The results of such referenda should be based on the number of producers participating. Such requirements should be the same percentages set forth in section 8(c)(8) of the act with respect to producer approval of the issuance of a marketing agreement and order. This requires approval by two-thirds of the producers voting in the referendum or by producers who have produced two-thirds of the volume of production voted during a presentative period. This is an appropriate basis for ascertaining whether winter pear growers favor continuation of the program. In the event that the requisite majority of producers, by number or volume of production represented in the referendum, do not approve continuation of the order, the Secretary should consider termination of the order but would not be required to terminate. In evaluating the merits of termination, the Secretary should not only consider the results of the continuance referendum but also should consider all other relevant information concerning the operation of the order and the relative benefits and disadvantages to growers, handlers and consumers in order to determine whether continued operation of the order would tend to effectuate the declared policy of the act. In this regard, the Secretary may solicit input from the public through meetings, press releases, or any other means. In any event, section 8c(16)(B) requires the Secretary to terminate the order whenever the Secretary finds that a majority of all producers favor termination and such majority produced more than 50 percent of the winter pears for market. To be effective, termination of the order should be announced on or before the

last day of a fiscal year. This date precedes the beginning of committee operations for a new fiscal year and is considered to be appropriate under the circumstances. Current paragraph (d) of § 927.78 should be redesignated as paragraph (e).

Hearing evidence supports this amendment to the order since it would provide winter pear producers with the opportunity periodically to indicate their support for or rejection of the order. Testimony indicates that such referenda would help to ensure that the program continues to be accountable to the producers. Such authority would also obligate producers to periodically evaluate their program and so involve them more closely in its operation.

(6) The order should be amended to authorize certain minor administrative and conforming changes, as hereinafter set forth.

Testimony supports a number of minor administrative changes proposed to improve administration of the program. None of these would result in changes in coverage or objectives of the program.

Testimony indicates that revising § 927.9 to authorize the Control Committee to recommend an alternative fiscal period to the Secretary could provide desirable flexibility. For example should payment or accounting practices change, it may be desirable to revise the fiscal period accordingly. This proposal would allow such a change, if approved by the Secretary, to be more simply accomplished through informal rulemaking in lieu of present authority, which would require formal rulemaking procedures.

Evidence indicates that § 927.26 should be amended to allow nominees to indicate in writing their willingness to serve on the Control Committee at the same time that they submit a statement of their qualifications for the position to the Secretary. Presently nominees are required to file written acceptance after selection by the Secretary. This proposal would reduce the paperwork and postage required in the selection of persons to the control committee.

Testimony also supports adding a new "§ 927.36 Public advisors" which provides specific authority to the Control Committee to appoint public advisors, define their duties, and set their compensation. Since this authority is already implied in § 927.32 (c) and (f), and since the Control Committee has already had the services and counsel of a nonindustry advisor for several years, this proposal merely clarifies the committee's authority.

Witnesses also testified that the Control Committee, with the approval of the Secretary, should be authorized to impose late payment and interest charges upon any handler who fails to pay an assessment within the time prescribed by the committee. This change is intended to encourage prompt payment of assessments. Testimony indicates that this is a good business practice and could help ensure that payment problems do not arise in the future. Provision for late payment and interest charges would allow the committee to defray additional costs incurred in preparing and mailing handler invoices for late assessment payments and interest charges on borrowed funds should borrowing become necessary to meet a shortfall in assessment income. Evidence also supports a related proposal, which would allow the committee to accept advance assessment payments from handlers prior to the commencement of shipments, which would then be credited to the handler's accounts. This would help to ensure that funds were available to the Control Committee to carry out desired activities. Witnesses testified that any advance payment of assessments would be entirely voluntary. Further, if it were determined by the Secretary to be permissible, the Control Committee might provide a monetary incentive to handlers to make such advance payments. Such payment discounts, if approved, would be available to all handlers on a pro rata basis.

Rulings on Briefs of Interested Persons

At the conclusion of the hearing, the Administrative Law Judge fixed July 19, 1985, as the final date for interested persons to file proposed findings and conclusions and written arguments or briefs based on the evidence received at the hearing. None were filed during this period.

General findings. Upon the basis of the record, it is found that:

(1) The findings hereinafter set forth are supplementary and in addition to the previous findings and determinations which were made in connection with the issuance of the marketing agreement and order and each previously issued amendment thereto. Except insofar as such findings an determinations may be in conflict with the findings and determinations set forth herein, all of said prior findings and determinations are hereby ratified and affirmed;

(2) The proposed marketing agreement and order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(3) The marketing agreement and order, as hereby proposed to be further amended, regulate the handling of Beurre D'Anjou, Beurre Bosc, Winter Nelis, and Doyenne du Comice varieties of winter pears grown in the States of Oregon, Washington, and California, and other varieties of winter pears, including Forelle and Seckel, grown in the States of Oregon and Washington, in the same manner as, and are applicable only to persons in the respective classes of commerical and industry activity specified in, the marketing agreement and order upon which hearings have been held;

(4) The marketing agreement and order, as amended, and as hereby proposed to be further amended, are limited in their application to the smallest regional production area which is practicable, consistent with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(5) There are no differences in the production and marketing of said varieties of pears grown in the production area which make necessary different terms and provisions applicable to different parts of such area; and

(6) All handling of said varieties of pears grown in the production area as defined in the marketing agreement and order, as amended, and as hereby proposed to be further amended, is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

List of Subjects in 7 CFR Part 927

Marketing agreement and order, Oregon, Washington, California, Pears, Beurre D'Anjou, Beurre Bosc, Winter Nelis, Doyenne du Comice, Forelle, and Seckel.

Recommended Further Amendment of the Marketing Agreement and Order

The following amendment of the marketing agreement and order, as amended, is recommended as the detailed means by which the foregoing conclusions may be carried out:

1. The authority citation for 7 CFR Part 927 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

PART 927—BEURRE D'ANJOU, BEURRE BOSC, WINTER NELIS, DOYENNE DU COMICE, BEURRE EASTER, AND BEURRE CLAIRGEAU VARIETIES OF PEARS GROWN IN OREGON, WASHINGTON, AND CALIFORNIA

The proposed amendment, set forth below, has not received the approval of the Secretary of Agriculture.

Proposal No. 1

Revise § 927.4 to read:

Section 927.4 Pears.

"Pears" means and includes any and all of the Beurre D'Anjou, Beurre Bosc, Winter Nelis, and Doyenne du Gomice varieties of pears grown in Oregon, Washington, and California and any other winter pear varieties or subvarieties that are recognized by the Control Committee and approved by the Secretary, including the Forelle and Seckel varieties, that are commercially grown in the States of Oregon and Washington.

Proposal No. 2

Revise § 927.9 to read:

Section 927.9 Fiscal period.

"Fiscal period" means the period beginning July 1 of any year and ending June 30 of the following year or such annual beginning and ending dates as may be approved by the Secretary pursuant to recommendations by the Control Committee.

Proposal No. 3

Amend § 927.11 by removing paragraph (f) and by revising paragraph (e) to read:

Section 927.11 District.

* * * * *

(e) California District shall include all of the State of California.

Proposal No. 4

Add a new § 927.13 to read:

Section 927.13 Subvariety.

"Subvariety" means and includes any mutation, sport, or other derivation of any of the varieties covered in § 927.4 which is recognized by the Control Committee and approved by the Secretary. Recognition of a subvariety by the Control Committee shall include classification within a varietal group for the purposes of votes conducted under § 927.52.

Proposal No. 5

Revise § 927.20 to read:

Section 927.20 Establishment and membership.

A Control Committee, consisting of 14 individual persons as its members, is hereby established to administer the terms and provisions of this subpart as specifically provided in §§ 927.20 through 927.35. There shall be two alternates, designated as the "first alternate" and the "second alternate," respectively, for each member of the committee. Seven members of the Control Committee and their respective alternates shall be growers of pears, and seven members and their respective alternates shall be handlers of pears. Each district shall be represented on the Control Committee by one grower member and one handler member except that the Hood River-White Salmon-Underwood District and the Wenatchee District shall be represented on the committee by two grower members and two handler members.

Proposal No. 6

Revise § 927.26 to read:

Section 927.26 Qualifications.

Any person prior to or within 15 days after selection as a member or as an alternate for a member of the Control Committee shall qualify by filing with the Secretary a written acceptance of the person's willingness to serve.

Proposal No. 7

Revise § 927.27 to read:

Section 927.27 Term of office.

The term of office of each member and alternate member of the committee shall be for two years beginning July 1 and ending June 30: *Provided*, That the terms of office of one-half the initial members and alternates shall end June 30, 1988; and that beginning with the 1987–88 marketing year, no member shall serve more than three consecutive two-year terms unless specifically exempted by the Secretary. Members and alternate members shall serve in such capacities for the portion of the term of office for which they are selected and have qualified and until their respective successors are selected and have qualified. The terms of office of successor members and alternates shall be so determined that one-half of the total committee membership ends each June 30.

Proposal No. 8

Revise paragraph (a) of § 927.33 to read:

Section 927.33 Procedure of Control Committee.

(a) Quorum and voting. A quorum at a meeting of the Control Committee shall consist of ten members, or alternates then serving in the place of any members. Except as otherwise provided in § 927.52, all decisions of the Control Committee at any meeting shall require the concurring vote of at least 75 percent of those members present, including alternates then serving in the place of any members.

* * * * *

Proposal No. 9

Add a new § 927.36 to read:

Section 927.36 Public advisors.

The Control Committee may appoint such public advisors as it deems appropriate and determine the compensation and define the duties of such advisors.

Proposal No. 10

Revise § 927.41 to read:

Section 947.41 *Assessments.*

(a) Assessments will be levied only upon the handler who first handles pears which subsequently are shipped from the State of Oregon, the State of Washington, or the State of California. Each handler shall pay, upon demand, assessments on all pears handled by such handler as the pro rata share of the expenses which the Secretary finds are reasonable and are likely to be incurred by the Control Committee during a fiscal period. The payment of assessments for the maintenance and functioning of the Control Committee may be required under this part throughout the period it is in effect irrespective of whether particular provisions thereof are suspended or become inoperative.

(b) Based upon a recommendation of the Control Committee or other available data, the Secretary shall fix the rate of assessment that handlers shall pay on all pears handled during each fiscal period, and may also fix supplemental rates of assessment on individual varieties or subvarieties to secure sufficient funds to provide for projects authorized under § 927.47. At any time during the fiscal period when it is determined on the basis of a committee recommendation or other information that a different rate is necessary for all pears or for any varieties or subvarieties, the Secretary may modify a rate of assessment and such new rate shall apply to any or all varieties or subvarieties that are shipped during the fiscal year.

(c) The Control Committee may impose a late payment charge on any handler who fails to pay any assessment within the time prescribed by the committee. In the event the handler thereafter fails to pay the amount outstanding, including the late payment charge, within the prescribed time, the Control Committee may impose an additional charge in the form of interest on such outstanding amount. The amount of such late payment charge and rate of interest, shall be prescribed by the Control Committee, with the aproval of the Secretary.

(d) In order to provide funds to carry out the functions of the Control Committee prior to commencement of shipments in any season, handlers may make advance payments of assessments, which advance payments shall be credited to such handlers and the assessments of such handlers shall be adjusted so that such assessments are based upon the quantity of each variety of pears handled by such handlers during such season. Further, payment discounts may be authorized by the Control Committee upon the approval of the Secretary to handlers making such advance assessment payments.

Proposal No. 11

Revised § 927.47 to read:

Section 927.47 Research and development.

The Control Committee, with the approval of the Secretary, may establish or provide for the establishment of production research or marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption of pears. Such projects may provide for any form of marketing promotion, including paid advertising. The expense of such projects shall be paid from funds collected pursuant to § 927.41. Expenditures for a particular variety of pears shall approximate the amount of assessments collected for that variety of pears.

Proposal No. 12

Revised § 927.52 to read:

Section 927.52 Prerequisites to committee recommendations.

(a) Decisions of the Control Committee with respect to any recommendations to the Secretary pursuant to the establishment or modification of a supplemental rate of assessment for an individual variety of pears shall be made by an affirmative vote of not less than 75 percent of the applicable total number of votes, computed in the manner hereinafter described in this section, of all committee members. Decisions of the Control Committee pursuant to the provisions of § 927.50 shall be made by an affirmative vote of not less than 80 percent of the applicable total number of votes, computed in the manner hereinafter prescribed in this section, of all committee members.

(b) With respect to a particular variety of pears, the applicable total number of votes shall be the aggregate of the votes allotted to the members of the committee in accordance with the following: Each member shall have one vote as an individual and, in addition, shall have an equal share of the vote of the district represented by such member; and such district vote shall be computed by the Control Committee as soon as practical after the beginning of each fiscal period on either (1) the basis of one vote for each 25,000 boxes (except 2,500 boxes for Forelle and Seckel varieties) of the average quantity of such variety produced in the particular district and shipped therefrom during the immediately preceding three fiscal periods to destinations outside the State in which produced; or (2) such other basis as the Control Committee may recommend and the Secretary may approve. The votes so allotted to a member of the committe may be cast by such member on each recommendation relative to the variety of pears on which such votes were computed.

Proposal No. 13

Revise paragraphs (c) and (d) and add a new paragraph (e) to § 927.78 to read:

Section 927.78 Termination.

* * * * *

(c) The Secretary shall terminate the provisions of this subpart at the end of any fiscal period whenever the Secretary finds that such termination is favored by a majority of the growers of pears who, during such fiscal period, have been engaged in the area in the production of pears for market: *Provided*, That such majority have produced for market during such period more than 50 percent of the volume of pears produced for market in the area; but such termination shall be effective only if announed on or before the last day of the then current fiscal year.

(d) The committee shall recommend to the Secretary within every six-year period beginning on the date this section becomes effective that a referendum be conducted to ascertain whether continuance of this subpart is favored by producers. The Secretary may terminate the provisions of this subpart at the end of any fiscal year in which the Secretary has found that continuance of this subpart is not favored by producers who, during a representative period determined by the Secretary, have been engaged in the production for market of pears in the production area: *Provided*, That termination of the order shall be effective only if annonced on or before the last day of the then current fiscal year.

(e) The provisions of this part shall, in any event terminate whenever the provisions of the act authorizing them cease to be in effect.

Dated: March 12, 1986.

James C. Handley,

Administration.

VOL 51
ISS 54
MR 20
1986
UMI

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision adopts, on an expedited basis, mandated amendments to the Middle Atlantic and 43 other Federal milk marketing orders. The order changes would increase the Class I differentials in 35 orders and provide a specific minimum Class I differential for each of the 44 orders for a two-year period. The order changes were mandated by Congress through the enactment of the Food Security Act of 1985 (Pub. L. 99–198).

The order changes must be effective by May 1, 1986 for milk received on and after that date. Accordingly, a recommended decision and the opportunity to file exceptions thereto have been omitted. A hearing on implementation of these provisions was held January 28, 1986.

FOR FURTHER INFORMATION CONTACT: Richard A. Glandt, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, DC 20250 (202) 447–4829.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

Prior document in this proceeding:

Notice of Hearing: Issued January 3, 1986; published January 13, 1986 (51 FR 1378).

Preliminary Statement

A public hearing was held upon mandated amendments to the marketing agreements and the orders regulating the handling of milk in the aforesaid marketing areas. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice (7 CFR Part 900), at Alexandria, Virginia on January 28, 1986. Notice of such hearing was issued on January 3, 1986, and published in the Federal Register on January 13, 1986 (51 FR 1378).

Interested parties were given until February 10, 1986, to file post-hearing briefs on the mandated amendments as published in the notice of hearings and on whether the amendments should be considered on an emergency basis.

The material issues on the record of the hearing relate to:

1. Class I differentials mandated by the Food Security Act of 1985; and

2. Omission of a recommended decision and the opportunity to file written exceptions thereto.

Findings and Conclusions

The following findings and conclusions on the material issue are based on evidence presented and the record thereof:

1. Class I Price Differentials Mandated by the Food Security Act of 1985

Each of the 44 Federal marketing orders should be amended to provide minimum Class I price differentials for a two-year period, and subsequently unless modified by amendment to the order involved.

The Class I milk price (the highest priced use-classification) under each order is established each month by adding a specified dollar amount to the Minnesota-Wisconsin manufacturing grade milk prices (M–W price) for the second preceding month. These specific amounts, which are provided in the orders but not defined, are commonly referred to throughout the industry as "Class I differentials" or "fluid differentials." It is these differentials that the Food Security Act of 1985 establishes at higher levels in 35 of the orders and fixes at a minimum level in each of the 44 orders.

The Food Security Act of 1985, Title I, Dairy, Subtitle C—Milk Marketing Orders, amends Section 8c(5)(A) of the Agricultural Adjustment Act (7 U.S.C. 608c(5)(A)), reenacted with amendments by the Agricultural Marketing Agreement Act (Act). This new law (Pub. L. 99–198) mandates that the present 44 Federal milk marketing orders be amended, and that these amendments be applicable to milk received on and after May 1, 1986. The Food Security Act of 1985 increases Class I differentials in 35 of the 44 orders and provides a specific minimum Class I differential for each of the 44 orders for a two-year period.

Official notice was taken at the public hearing held January 28, 1986, of Federal Milk Order Market Statistics for April 1985 and the Code of Federal Regulations for each of the 44 orders for the purpose of showing the present Class I differentials. The present Class I differentials, shown below, were taken from Table I on page 9 of the Federal Milk Order Market Statistics for April 1985. The new mandated Class I differentials that appear below are taken from the Congressional Record (official notice taken) dated December 17, 1985, at page H 12255.

Federal marketing order	Class I differentials		Increase
	Effective May 1, 1986	Before May 1, 1986	
Middle Atlantic	$3.03	$2.78	$0.25
New England	3.24	3.00	.24
New York-New Jersey	3.14	2.84	.30
Upper Florida	3.58	2.85	.73
Georgia	3.08	2.30	.78
Tennessee Valley	2.77	2.10	.67
Tampa Bay	3.88	2.95	.93
Southeastern Florida	4.18	3.15	1.03
Chicago Regional	1.40	1.26	.14
Southern Illinois	1.92	1.53	.39
Ohio Valley	2.04	1.70	.34
Eastern Ohio-Western Pennsylvania	1.95	1.85	.10
Southern Michigan	1.75	1.60	.15
Michigan Upper Peninsula	1.35	1.35	0
Louisville-Lexington-Evansville	2.11	1.70	.41
Indiana	2.00	1.53	.47
Central Illinois	1.61	1.39	.22
Greater Kansas City	1.92	1.74	.18
Nebraska-Western Iowa	1.75	1.60	.15
Upper Midwest	1.20	1.12	.08
Black Hills, South Dakota	2.05	1.95	.10
Eastern South Dakota	1.50	1.40	.10
Iowa	1.55	1.40	.15
Alabama-West Florida	3.08	2.30	.78
New Orleans-Mississippi	3.85	2.85	1.00
Greater Louisiana	3.28	2.47	.81
Memphis, Tennessee	2.77	1.94	.83
Nashville, Tennessee	2.52	1.85	.67
Paducah, Kentucky	2.39	1.70	.69
Fort Smith, Arkansas	2.77	1.95	.82
Southwest Plains	2.77	1.98	.79
Central Arkansas	2.77	1.94	.83
Lubbock-Plainview, Texas	2.49	2.42	.07
Oregon-Washington	1.95	1.95	0
Puget Sound-Inland	1.85	1.85	0
Texas	3.28	2.32	.96
Central Arizona	2.52	2.52	0
Texas Panhandle	2.49	2.25	.24
Western Colorado	2.00	2.00	0
Southwestern Idaho-Eastern Oregon	1.50	1.50	0
Great Basin	1.90	1.90	0
Eastern Colorado	2.73	2.30	.43
Rio Grande Valley	2.35	2.35	0
Lake Mead	1.60	1.60	0

The new Class I differentials shown above for the New England, New York-New Jersey, and Michigan Upper Peninsula orders are the same as those that appeared in the notice of hearing signed January 3, 1986. For the New England market, the above differential of $3.24 is the differential for plant location zone 1. For the New York-New Jersey market, the differential of $3.14 is the differential for the 1 to 10 mile freight zone. For the Michigan Upper Peninsula market, the Class I differential of $1.35 applies to Zone 2.

The Class I prices for these three orders, however, are not announced at those locations. In the New England market, the Class I price is announced for plant location zone 21 and the price is increased in 10-mile increments so that the price is 72 cents higher for Zone 1. In the New York-New Jersey market, the Class I price is announced for the 201–210 mile freight zone and the price is increased in 10-mile increments so that the price is 59 cents higher for the 1 to 10 mile freight zone. In the Michigan Upper Peninsula market, the Class I

price is announced for Zone 1 and is increased 20 cents for Zone 2.

The order language adopted to implement the new differentials continues to announce the prices at the pricing zones that are presently used in the New England, New York-New Jersey, and Michigan Upper Penninsula orders. These amounts, when adjusted as indicated previously, reflect the Class I differentials that appear in the preceding table and in the Congressional Record. The Department's interpretation in this regard was supported in testimony at the hearing and in briefs filed after the close of the hearing.

Shown below is the Congressional rationale for these minimum two-year Class I differentials. The following paragraphs appear on pages 22 through 24 of the "Report of the Committee on Agriculture" to accompany H.R. 2100. Official notice of this report was taken at the hearing.

"Federal Milk Marketing Orders

"The Federal milk marketing order program is authorized by the Agriculture Marketing Agreement Act of 1937, as amended. Federal orders are part of a broad program of marketing arrangements and whereby the Secretary of Agriculture is authorized to stabilize market conditions by issuing regulations which apply to handlers of milk and its products. The program is designed to achieve this orderly marketing by establishing terms and conditions which all affected milk processors must follow in dealing with producers. In 1984, over two-thirds of all milk sold to plants and dealers, and over 80 percent of the fluid grade deliveries in the United States were regulated by federal milk marketing orders.

"Orders establish minimum prices which must be paid by handlers to farmers for milk used in various ways. The current minimum order prices for milk used in fluid form are, however, in many cases inadequate to cover the cost of supplying the fluid market. This has resulted in payments by handlers greater than the minimum order price in order to assure an adequate supply of milk for the fluid market. The variability of 'cover-order charges' has caused instability that the federal milk order program was designed to alleviate.

"The last major changes made by the Department of Agriculture to Class I price differentials were in the late 1960's. Since costs, including transportation, assembly, and handling, ~~have increased~~ substantially during that time, the Committee feels it is necessary to adjust the fluid milk differentials in 35 of the 44 federal milk orders so that the prevailing minimum order prices will better cover the cost of supplying these markets. This action will reduce the need for over-order payments and provide equity among handlers supplying the market.

* * * * *

"The bill provides for differential adjustments under the provisions of the Agricultural Marketing Agreement Act of 1937, which sets up the milk marketing orders in 44 marketing order areas. The bill requires that specified minimum levels be set for a two-year period following enactment of this law. It limits the adjustments to the highest use classification of milk under the current orders.

"In the implementation of the minimum prices for highest use classification of milk, the Secretary is also required to make necessary location adjustments within each order in order to assure that the new adjustments are effective throughout the order. In addition, the Secretary is required to address the varied locations of delivery of milk throughout each marketing order.

"The purpose of the Agricultural Marketing Agreement Act of 1937 is to use milk marketing orders as instruments for stabilizing marketing conditions for fluid milk. The Act of 1937 also states that minimum prices established by orders shall be uniform as to all handlers subject only to adjustments for (1) volume, market and production differentials customarily applied by the handlers subject to such an order, (2) the grade or quality of milk purchased, and (3) the location at which delivery of such milk, or any classification thereof, is made to such handlers.

"Furthermore, under the Agricultural Adjustment Act of 1949, Provisions require that milk be supported at specified prices establishment by the Secretary in accordance with the law. Under the prices support program, the objective was the establishment of the prices necessary in order to maintain an adequate supply of milk to meet current needs and to maintain the productive capacity to meet anticipated future needs.

"It is noted that the 1983–1984 diversion program exacerbated milk supply deficiencies in certain areas of the country. The prevailing minimum Federal order prices do not reflect the cost of moving milk from surplus to deficit areas. The result is therefore an ineffectiveness of the Order System to assure an adequate supply of milk for fluid use in deficient areas. The proposed marketing order minimums included in title I will facilitate the acquisition of an adequate supply of milk for fluid use in those deficit areas.

"The proposed changes in the marketing order minimums will more fully address the cost of transferring milk from the surplus areas to the deficit areas which in turn will assist in providing a more uniform price to handlers or uniform payments to producers. At the moment, there are three major problems with respect to the operation of the Federal order systems: (1) Minimum Federal order Class I prices are not adequate to attract the necessary supply to meet the Class I needs in deficit areas; (2) handlers who must go outside their territory to acquire additional milk incur greater costs for milk than handlers who obtain all of their milk from the local area; and (3) those producers who assume the responsibility of supplying the needs of the market have to pay the costs of transporting supplemental milk, resulting in producers not receiving uniform prices.

"There have been expressed concerns that implementation of minimum Class I prices would set a precedent in regard to management of Orders. The Secretary has not made permanent adjustments since the late 1960's The Act does not suggest that milk be locally produced nor that it come from any specific area. It only requires that milk be attracted to those locations where it is needed for fluid use. The manner in which to attract milk is through adjusted prices. In deficit areas, that means that price must be high enough to cause it to be moved from where it is being produced to where it is needed. Class I differentials under the orders are not high enough to do this under today's cost of transportation. It now costs about 3.4 cents per hundredweight per ten miles to move milk; however when the Class I differentials under Federal orders were established, It was at a rate of about 1.5 cents per hundredweight per ten miles. Despite this dramatic increase in transportation costs, the minimum prices have not been permanently increased."

Early in the hearing, Counsel for the Milk Foundation of Indiana raised an objection to the Notice of Hearing as improper on the basis that the Food Security Act of 1985 did not mandate changes in the Class I differentials. Instead, it was argued, the new law ". . . requires changes in the quality, volume, production and market differentials customarily applied by the handlers . . ." under clauses (1) and (2) of section 8c(5)(A) of the Agricultural Marketing Agreement Act of 1937. The objection maintained that Class I prices are established under the first part of the first sentence in section 8c(5)(A), not under Clauses 1 and 2. Thus, it was argued, ". . . the notice is defective because it purports to support the Class I differentials between markets on a congressional mandate that is, in fact, contrary to the plain meaning of this statutory language." The objection to the Notice of Hearing was overruled by the presiding Administrative Law Judge, who ruled that the record would not be closed at that point because of the legal issue raised by Counsel. The same position was held in the brief filed on behalf of the Milk Foundation of Indiana.

The Administrative Law Judge's ruling to keep the record open was correct. We believe it is clear from the preceding quoted paragraphs that the Congress intended that Class I differentials (and, thus, Class I milk prices) be increased in 35 of the 44 Federal milk orders. This is unmistakably clear in the third quoted paragraph, which refers to both the "Class I price differentials" and "fluid milk differentials." It is concluded that the Notice of Hearing was proper and the Congress indeed has mandated that the orders must be amended to provide the minimum differentials specified in

the Food Security Act of 1985, Subtitle C, section 131(a).

At the hearing held on January 28, 1986, ten witnesses testified in opposition to the mandated Class I differentials. Two of these witnesses represented the States of Wisconsin and Minnesota. The other witnesses represented either proprietary handlers or cooperative associations from almost all regions of the country. Their opposition, in many cases, went beyond the issue of the mandated Class I differentials. In general, their opposition to these new Class I differentials can be characterized as follows:

1. The Federal order rulemaking process was not followed;

2. Milk supplies at this time are more than sufficient; therefore, any price increase can not be justified;

3. These new Class I differentials are arbitrary, inconsistent and without any economically justifiable basis;

4. There is a wide disparity in the new Class I differentials as they relate to transportation costs from Eau Claire, Wisconsin;

5. Congress in drafting the Food Security Act of 1985, referred to the wrong section of the Agricultural Marketing Agreement Act, as amended, when creating these new Class I differentials;

6. The new Class I differentials discriminate against dairy farmers in Wisconsin, Minnesota and other midwest areas;

7. The new Class I differentials will cause permanent inefficient milk production in higher cost production regions such as the southeast at the expense of the low cost regions in the upper midwest;

8. The new Class I differentials discriminate against producers of Grade B milk and between Grade A producers because the new differential increases vary from zero to $1.03;

9. The new Class I differentials in the three northeastern Federal orders will disrupt orderly marketing because the rate of increase in these three Class I differentials was not the same; and

10. Fluid milk distributors regulated by the Indiana milk order and by several orders in the southeast will be at a competitive disadvantage in competing with milk distributors regulated by surrounding markets.

Several witnesses indicated that a national hearing should be called before these new Class I differentials are implemented. In their view, there were several important issues that should be resolved, such as improvement in price alignments and better methods to move Class I milk to population centers, before these new Class I differentials are implemented.

The Department believes that it is under a legal obligation to implement these new Class I differentials as drafted and within the time frame prescribed by Congress. Consequently, the Department has chosen not to comment on the merits of the testimony in opposition.

Testimony at the hearing and proposed findings in briefs filed by various persons also concerned the effective date of the mandated differentials and the period of time that the differentials should remain in effect.

The orders must be amended so that the Class I differentials are effective by May 1, 1986. The Department believes, therefore, that the amendment action must be completed no later than April 4, 1986, so that the May 1986 Class I prices that are scheduled to be announced on that date will reflect the new Class I differentials. This timetable carries out the provision of the new law that "The amendment made by this section shall take effect on the first day of the first month beginning more than 120 days after the date of enactment of this Act." The date of enactment was December 23, 1985.

As required by the Act, the minimum differentials will remain in effect through April 30, 1988, and will then continue in effect thereafter until amended. Any such amendments would have to be based on evidence obtained at a public hearing.

It was argued that the order amendments should be structured such that the differentials would terminate automatically at the end of the minimum two-year period specified in the law. One view was that at that time the differentials should be those now provided in the orders. Another view urged that a hearing be set at least 90 days prior to the end of the two-year period to review the effects of the higher differentials.

Automatic termination of the differentials cannot be provided. The new law requires that the differentials remain in effect until amended. Even if this were not the case, there is no basis for concluding at this time, and on the basis of this hearing, what the appropriate differentials should be some two years in the future.

There is no need to incorporate in the amendments a provision that specifies a hearing. If a hearing appears warranted near the end of the two-year period, the industry can request one at that time.

Another view expressed in most of the opposing testimony and in briefs was that changes in the location adjustments to reflect the locations at which delivery of milk of the highest use classification must be made effective at the same time that the minimum Class I differentials become effective. Similarly, some persons urged that any changes in location adjustments should be terminated at the same time as the differentials, if they are terminated.

This proceeding does not involve location adjustments. However, it should be noted that proposals to change location adjustments have been solicited from the industry, and four regional hearings have been solicited from the industry, and four regional hearings have been scheduled. These proceedings will be handled as quickly as possible. Congress did not specify the location adjustments to be used. Therefore, these hearings are the only way to determine what changes, if any, should be made.

One view expressed was that changes should not be made to the location adjustment provisions of the orders. Instead, it was urged that a national hearing be called to consider implementing transportation pools. Another view stated that cooperatives should deal with price aligment problems through over-order charges. Both views are beyond the scope of this proceeding and, therefore, no further discussion is warranted.

Testimony presented at the hearing and proposed findings in briefs contended that the Secretary, in implementing the Class I differentials must adopt any other amendments necessary to ensure that the resulting orders, as amended, will ensure that minimum prices will be uniform as to all handlers and that no order establishes a trade barrier. To this end, it was urged that a Notice of Hearing be issued promptly entertaining proposals for the following:

1. Whether existing definitions in any order should be changed to include new geographic territory or exclude existing geographic territory;

2. Whether the Department should require Class I milk to be priced according to the order in the market in which the milk is sold, rather than the order in which the plant has its largest amount of route dispositions;

3. Whether existing definitions of "pool plant" should be changed, including but not limited to the percentage of receipts disposed of as route dispositions necessary for classification as a pool plant;

4. Whether, consistent with the *minimum* Class I differentials established in the Food Security Act, existing Class I differentials in some markets should be changed to conform

with economic realities created by new Class I differentials in other markets; and

5. Whether any other changes to existing orders are necessary to adjust to the new Class I differentials.

It is not possible in this decision, on the limited basis of this proceeding, to respond to the issues set forth above. It should be noted, however, that the hearings on location adjustments, previously mentioned, may address the issues of price uniformity and trade barriers.

A brief filed on behalf of Foremost Dairies, contented that the new differentials will cause misalignment of prices between the Texas and Lubbock-Plainview orders. Accordingly, the brief urges increasing the Class I differential at Lubbock to $3.38 instead of $2.49.

This request is denied. The only issue in this proceeding is implementation of the minimum Class I differentials mandated by the Food Security Act of 1985.

At the hearing, several witnesses and an attorney for a regional cooperative association questioned the need to hold a public hearing to implement these Class I differentials. The Department's rules and regulations require the holding of a public hearing prior to amending any Federal milk order. The hearing provided an opportunity for the industry to express views on whether the orders should exist with the Class I differentials mandated by Congress. Also, the rulemaking process gives producers an opportunity to approve or reject the orders as proposed to be amended.

2. Omission of a Recommended Decision and the Opportunity To File Written Exceptions Thereto

The due and timely executive of the functions of the Secretary under the Act imperatively and unavoidably require the omission of a recommended decision and an opportunity for written exceptions with respect to issue No. 1.

The Food Security Act of 1985 provides that the Secretary must implement these new Class I differentials on the first day of the first month beginning more than 120 days after the date of the enactment of this Act. The Department has interpreted this mandate to mean that the 44 orders should be amended so that the specified differentials will be incorporated in the minimum order Class I prices to be applicable to milk received on and after May 1, 1986. The 44 orders presently provide that the Class I price is announced on the fifth day of the month to apply to the following month (advanced pricing). As previously indicated, the Class I differential is part of the Class I price.

The hearing notice stated that evidence would be taken to determine whether conditions exist that would warrant omission of a recommended decision under the rules of practice and procedure.

A witness for the Department testified with considerable specificity as to the procedures that must be followed by the Department in amendment proceedings and the approximately minimum time required between the time the hearing is closed and the publication of the Final Rule (Order Amending the Order). It is reasonable to conclude from the testimony that there is not sufficient time to provide for a recommended decision and the opportunity to file exceptions and meet the date mandated for implementation of the specified differentials.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

At the hearing, and in a brief filed after the close of the hearing, Counsel for Malone and Hyde, and Southeastern Dairies made a motion that the record of this proceeding remain open pending completion of hearings on location adjustments. The presiding Administrative Law Judge ruled that the record would be closed at the close of the hearing. The motion also urged the Secretary to rule that Section 131 of the Food Security Act of 1985 requires location adjustments and that the Class I differentials be effected on the same date as such location adjustments. These matters have been dealt with earlier in this decision.

General Findings

The findings and determinations hereinafter set forth supplement those that were made when the aforesaid orders were first issued and when they were amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) The tentative marketing agreements and the orders, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effetuate the declared policy of the Act as amended by the Food Security Act of 1985; and

(b) The tentative marketing agreements and the orders, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, marketing agreements upon which a hearing has been held.

Marketing Agreement and Order

Annexed hereto and made a part hereof are two documents, a Marketing Agreement regulating the handling of milk, and an Order amending the order regulating the handling of milk in the aforesaid marketing areas, which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the attached marketing agreement, be published in the **Federal Register**. The regulatory provisions of the marketing agreement are identical with those contained in the orders as hereby proposed to be amended by the attached order which is published with this decision.

Determination of Producer Approval and Representative Period

November 1985 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the orders, as amended and as hereby proposed to be amended, regulating the handling of milk in the aforesaid marketing areas, except the New York-New-Jersey, Eastern Ohio-Western Pennsylvania, Louisville-Lexington-Evansville, and Memphis, Tennessee, marketing areas, is approved or favored by producers, as defined under the terms of the orders (as amended and as hereby proposed to be amended), who during such representative period were engaged in the production of milk for sale within the aforesaid marketing areas.

Referendum Order to Determine Producer Approval; Determination of Representative Period; and Designation of Referendum Agent

It is hereby directed that referendums be conducted and completed on or before the 25th day from the date this decision is issued, in accordance with the procedure for the conduct of referenda (7 CFR 900.300 *et seq.*), to determine whether the issuance of the attached orders as amended and as

VOL 51 ISS 54 MR 20 1986 UMI

hereby proposed to be amended, regulating the handling of milk in the New York-New Jersey, Eastern Ohio-Western Pennsylvania, Louisville-Lexington-Evansville, and Memphis, Tennessee, marketing areas are approved or favored by producers, as defined under the terms of the orders (as amended and as hereby proposed to be amended), who during the representative period were engaged in the production of milk for sale within the aforesaid marketing areas.

The representative period for the conduct of such referendums is hereby determined to be November 1985, except that September 1985 shall be the representative period for the New York-New Jersey order.

The agent of the Secretary to conduct such referendums is hereby designated to be Norman, K. Garber (New York-New Jersey), C. Mack Endsley (Eastern Ohio-Western Pennsylvania), Arnold M. Stallings (Louisville-Lexington-Evansville), and Richard E. Arnold (Memphis, Tennessee).

List of Subjects in 7 CFR Chapter X

Milk marketing orders, Milk, Dairy products.

Signed at Washington, DC., on: March 14, 1986.

Alan T. Tracy,

Acting Assistant Secretary, Marketing and Inspection Services.

Order[1] Amending the Orders, Regulating the Handling of Milk in Certain Specified Marketing Areas

Findings and Determinations

The findings and determinations hereinafter set forth supplement those that were made when the orders were first issued and when they were amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the aforesaid marketing areas. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said orders as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act as amended by the Food Security Act of 1985; and

(2) The said orders as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, marketing agreements upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof, the handling of milk in each of the specified marketing areas shall be in conformity to and in compliance with the terms and conditions of the orders, as amended, and as hereby amended, as follows:

The authority citation for 7 CFR Chapter X continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

PART 1004—MILK IN THE MIDDLE ATLANTIC MARKETING AREA

1. In § 1004.50, paragraph (a) is revised to read as follows:

§ 1004.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $3.03

* * * * *

PART 1001—MILK IN THE NEW ENGLAND MARKETING AREA

1. In § 1001.50, paragraph (a) is revised to read as follows:

§ 1001.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof the Class I price in Zone 21 shall be the basic formula price for the second preceding month plus $2.52. Through April 30, 1988, and thereafter until amended, the differential value for Zone 1 shall be $3.24.

* * * * *

PART 1002—MILK IN THE NEW YORK-NEW JERSEY MARKETING AREA

1. In § 1002.50a, paragraph (a) is revised to read as follows:

§ 1002.50a Class prices.

* * * * *

(a) For Class I–A milk, from the effective date hereof the Class I price in the 201–210 mile freight zone shall be the basic formula price for the second preceding month plus $2.55. Through April 30, 1988, and thereafter until amended, the differential value in the 1–10 mile freight zone shall be $3.14.

* * * * *

PART 1006—MILK IN THE UPPER FLORIDA MARKETING AREA

1. In § 1006.50, paragraph (a) is revised to read as follows:

§ 1006.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $3.58.

* * * * *

PART 1007—MILK IN THE GEORGIA MARKETING AREA

1. In § 1007.50, paragraph (a) is revised to read as follows:

§ 1007.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $3.08.

* * * * *

PART 1011—MILK IN THE TENNESSEE VALLEY MARKETING AREA

1. In § 1011.50, paragraph (a) is revised to read as follows:

§ 1011.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $2.77.

* * * * *

PART 1012—MILK IN THE TAMPA BAY MARKETING AREA

1. In § 1011.50, paragraph (a) is revised to read as follows:

§ 1012.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $3.88.

* * * * *

---

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

PART 1013—MILK IN THE SOUTHEASTERN FLORIDA MARKETING AREA

1. In § 1013.50, paragraph (a) is revised to read as follows:

§ 1013.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $4.18.

* * * * *

PART 1030—MILK IN THE CHICAGO REGIONAL MARKETING AREA

1. In § 1030.50, paragraph (a) is revised to read as follows:

§ 1030.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1986, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $1.40.

* * * * *

PART 1032—MILK IN THE SOUTHERN ILLINOIS MARKETING AREA

1. In § 1032.50, paragraph (a) is revised to read as follows:

§ 1032.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $1.92.

* * * * *

PART 1033—MILK IN THE OHIO VALLEY MARKETING AREA

1. In § 1033.51, paragraph (a) is revised to read as follows:

§ 1033.51a Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $2.04.

* * * * *

PART 1036—MILK IN THE EASTERN OHIO-WESTERN PENNSYLVANIA MARKETING AREA

1. In § 1036.50, paragraph (a) is revised to read as follows:

§ 1036.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $1.95.

* * * * *

PART 1040—MILK IN THE SOUTHERN MICHIGAN MARKETING AREA

1. In § 1040.50, paragraph (a) is revised to read as follows:

§ 1040.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus § 1.75.

* * * * *

PART 1044—MILK IN THE MICHIGAN UPPER PENINSULA MARKETING AREA

1. In § 1044.51, paragraph (a) is revised to read as follows:

§ 1044.51 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof, the Class I price in Zone 1 shall be the basic formula prices for the second preceding month plus $1.15. For plants located in Zone 1(a) the price shall be the price specified for Zone 1 less 10 cents; for plants located in Zone 2 the price shall be the price specified for Zone 1 plus 20 cents. Through April 30, 1988, and thereafter until amended, the differential value for Zone 2 shall be $1.35 and for plants located outside the marketing area and west of Lake Michigan, the price (subject to § 1044.53) shall be that specified for Zone 1 and for plants located outside the marketing area and east of Lake Michigan, the price (subject to § 1044.53) shall be that specified for Zone 2.

* * * * *

PART 1046—MILK IN THE LOUSIVILLE-LEXINGTON-EVANSVILLE MARKETING AREA

1. In § 1046.50, paragraph (a) is revised to read as follows:

§ 1046.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus §2.11.

* * * * *

PART 1049—MILK IN THE INDIANA MARKETING AREA

1. In § 1049.50, paragraph (a) is revised to read as follows:

§ 1049.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $2.00.

* * * * *

PART 1050—MILK IN THE CENTRAL ILLINOIS MARKETING AREA

1. In § 1050.50, paragraph (a) is revised to read as follows:

§ 1050.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second precding month plus $1.61.

* * * * *

PART 1064—MILK IN THE GREATER KANSAS CITY MARKETING AREA

1. In § 1064.50 paragraph (a) is revised to read as follows:

§ 1064.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second precding month plus $1.92.

* * * * *

PART 1065—MILK IN THE NEBRASKA—WESTERN IOWA MARKETING AREA

1. In § 1065.50, paragraph (a) is revised to read as follows:

§ 1065.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $1.75.

* * * * *

PART 1068—MILK IN THE UPPER MIDWEST MARKETING AREA

1. In § 1068.50, paragraph (a) is revised to read as follows:

§ 1068.50 Class prices

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $1.20.

PART 1126—MILK IN THE TEXAS MARKETING AREA

1. In § 1126.50, paragraph (a) is revised to read as follows:

§ 1126.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $3.28.

* * * * *

PART 1131—MILK IN THE CENTRAL ARIZONA MARKETING AREA

1. In § 1131.50. paragraph (a) is revised to read as follows:

§ 1131.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $2.52.

* * * * *

PART 1132—MILK IN THE TEXAS PANHANDLE MARKETING AREA

1. In § 1132.50, paragraph (a) is revised to read as follows:

§ 1132.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $2.49.

* * * * *

PART 1134—MILK IN THE WESTERN COLORADO MARKETING AREA

1. In § 1134.50. paragraph (a) is revised to read as follows:

§ 1134.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $2.00.

* * * * *

PART 1135—MILK IN THE SOUTHWESTERN IDAHO-EASTERN OREGON MARKETING AREA

1. In § 1135.50. paragraph (a) is revised to read as follows:

§ 1135.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1986, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plust $1.50.

* * * * *

PART 1136—MILK IN THE GREAT BASIN MARKETING AREA

1. In § 1136.50. paragraph (a) is revised to read as follows:

§ 1136.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $1.90.

* * * * *

PART 1137—MILK IN THE EASTERN COLORADO MARKETING AREA

1. In § 1137.50. paragraph (a) is revised to read as follows:

§ 1134.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $2.73.

* * * * *

PART 1138—MILK IN THE RIO GRANDE VALLEY MARKETING AREA

1. In § 1138.50. paragraph (a) is revised to read as follows:

§ 1138.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $2.35.

* * * * *

PART 1139—MILK IN THE LAKE MEAD MARKETING AREA

1. In § 1139.50. paragraph (a) is revised to read as follows:

§ 1139.50 Class prices.

* * * * *

(a) *Class I price.* From the effective date hereof through April 30, 1988, and thereafter until amended, the Class I price shall be the basic formula price for the second preceding month plus $1.60.

BILLING CODE 3410-02-M

---

7 CFR Part 1135

[Docket No. AO-380-A5]

Milk in the Southwestern Idaho-Eastern Oregon Marketing Area; Decision on Proposed Amendments to Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision adopts several amendments to the Southwestern Idaho-Eastern Oregon Federal milk order. The changes would relax the standards required under the order for distributing plants, supply plants, and producers to participate in the marketwide pool. The percentage of a pool distributing plant's total receipts that must be accounted for as route dispositions would be reduced from 40 to 25 percent. The amount of its receipts that a pool supply plant would be required to ship to pool distributing plants also would be reduced from 40 to 25 percent. The requirement that at least one day's production of milk be physically received at a pool plant during each of the months of September through February in order for the rest of the producer's milk to be eligible for unlimited diversion would be changed to a requirement that one day's production of each producer's milk must be physically received at a pool plant for three consecutive months on a one-time basis. The limit on the percentage of a handler's milk that may be diverted to nonpool plants would be changed from 70 percent in the months of September through February and 80 percent in other months to 80 percent in all months.

The amendments were proposed by Dairymen's Creamery Association, a cooperative association representing nearly two-thirds of the dairy farmers supplying milk to the Southwestern Idaho-Eastern Oregon market, and are based on the record of a public hearing

VOL 51
ISS 54
MR 20
1986
UMI

held at Boise, Idaho, on October 16, 1985. The amendments are necessary to reflect current marketing conditions and to assure orderly marketing in the Southwestern Idaho-Eastern Oregon marketing area. Cooperative associations will be polled to determine whether producers favor the issuance of the amended order.

FOR FURTHER INFORMATION CONTACT: Constance M. Brenner, Marketing Specialist, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, DC 20250 (202) 447–7311.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of section 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

The Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. The amended order will promote more orderly marketing of milk by producers and regulated handlers, and will tend to ensure the use of efficient milk marketing practices.

Prior documents in this proceeding:

Notice of Hearing: Issued August 29, 1985; published September 4, 1985 (50 FR 35829).

Recommended Decision: Issued February 6, 1986; published February 12, 1986 (51 FR 5199).

Preliminary Statement

A public hearing was held upon proposed amendments to the marketing agreement and the order regulating the handling of milk in the Southwest Idaho-Eastern Oregon marketing area. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice (7 CFR Part 900), at Boise, Idaho, on October 16, 1985. Notice of such hearing was issued on August 29, 1985, and published September 4, 1985 (50 FR 35829).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Administrator, Agricultural Marketing Service, on February 6, 1986, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues, findings and conclusions, rulings, and general findings of the recommended decision are hereby approved and adopted and are set forth in full herein.

The material issues on the record of the hearing relate to:

1. Pool plant qualification requirements.
   (a) Distributing plant.
   (b) Supply plant.
2. Diversion of producer milk.
   (a) Producer delivery requirement.
   (b) Limitation on diversions to nonpool plants.
3. Continued suspension of producer delivery requirement and limitation on diversions to nonpool plants.
4. Correction of published Class I price computation procedure.

Findings and Conclusions

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. Pool Plant Qualification Requirements

Dairymen's Creamery Association proposed that the pool plant qualification requirements be relaxed for both distributing and supply plants. Those requirements are discussed in the following findings.

(a) *Distributing plant.* The total route distribution requirement that must be met by distributing plants to qualify for pool status under the order should be reduced from 40 to 25 percent of the plant's total receipts of fluid milk products. The change was proposed by Dairymen's Creamery Association (DCA), and was supported at the hearing by spokesmen for DCA and Associated Dairies, a distributing plant operator with two distributing plants pooled under the order. The DCA representative introduced statistics showing that all of the producer milk of DCA, Mountain Empire Dairymen's Association (MEDA) and one long-term contract producer, representing over 80 percent of the producer milk on the market, is pooled on the basis of Associated Dairies' route dispositions. He testified further that, as Associated Dairies' fluid milk sales represent less than half of the Class I sales under the order, the Class I utilization of milk pooled through Associated Dairies is much less than the 16 percent currently experienced by the market as a whole.

The witness stated that the two Associated Dairies' plants currently receive more milk than is needed at either plant for milk products processed there in order to assure that all of the DCA and MEDA milk will be eligible for pooling. He introduced an exhibit that showed an average of over 2,500,000 pounds of milk per month delivered to Associated Dairies and transferred back out to nonpool plants during the period from January 1984 through August 1985. This practice, he testified, resulted in the failure of one of the two Associated Dairies' plants to meet the order's route disposition requirements for pooling during the summer of 1985, and necessitated the suspension of the limits on diversions of producer milk directly to nonpool plants to assure the continued pooling of the two cooperatives' milk supplies.

The president of Associated Dairies testified in favor of the proposed amendment to reduce the pooling standard for distributing plants. He stated that DCA is a half owner of Associated Dairies, and that Associated Dairies cooperates with DCA in helping to assure that a maximum amount of DCA's and MEDA's milk is eligible for pooling by maximizing receipts of the cooperatives' milk at Associated Dairies. In doing so, he said, Associated Dairies has incurred added costs, increased the potential for shrinkage in the milk for which they are held accountable, and caused additional work in their accounting and office operations. The witness also stated that in transferring unneeded milk to handlers with whom they had no prior dealings, Associated Dairies had encountered some cashflow problems because of delays in payments for milk. The Associated Dairies' witness testified that an increase in Class II use has contributed to the difficulty of maintaining pool status for the handler's two plants. He stated that a contract to supply ice cream mix to a number of fast-food outlets in the Northwest has created an imbalance in the relationship between Class I and Class II sales within Associated Dairies' operations. The witness indicated that as Class II sales increase it will become more difficult to dispose of at least 40 percent of Associated Dairies' receipts as Class I route dispositions, and urged adoption of the reduced percentage requirements.

Statistics introduced at the hearing by the Southwestern Idaho-Eastern Oregon market administrator's office show that the percentage of producer milk used in Class I in the market since the effective date of the order in 1981 has ranged from 13 to 24 percent. In the 18 months immediately preceding the hearing, the Southwestern Idaho-Eastern Oregon Class I use percentage at no time reached 20 percent. At the present time, Class I use in the market is increasing, but at a lesser rate than production. As a result, the percentage of the total producer milk used in Class I is declining.

Adoption of the proposed increases in the limits on the amount of milk that may be delivered directly to nonpool plants would allow DCA and Associated Dairies to reduce the amount of producer milk received at Associated's plants to a quantity more in line with Associated's requirements, and thereby increase the percentage of such receipts used in Class I. However, in the Associated Dairies' operation, Class II use apparently is accounting for a growing percentage of the handler's fluid milk receipts. Therefore, Associated Dairies is likely to continue to experience difficulty in meeting the pool plant qualification requirements since much of the milk received at Associated's plants will be needed for use in Class II products.

The current provision that requires a distributing plant to distribute on routes 40 percent of its fluid milk receipts is not consistent with the intent of the marketwide pooling provisions of the order, since it threatens the pooling status of a large proportion of the milk supply associated with the market. It is appropriate to adjust the requirement downward to better reflect the market's present balance between the supply of and demand for fluid milk. Accordingly, DCA's proposal to reduce from 40 to 25 percent the percentage of a distributing plant's fluid milk receipts that must be distributed on routes in order for the distributing plant to qualify for pooling should be adopted.

(b) *Supply plant.* The minimum delivery requirement to qualify a supply plant for pool status under the order should be reduced from 40 to 25 percent of the plant's receipts. The receipts to be included in calculation of a supply plant's pool qualification should continue to include producer milk diverted from the plant by the plant operator.

The proposal to lower the monthly delivery requirement for supply plants from 40 to 25 percent was made by Dairymen's Cooperative Association and supported by Associated Dairies. Mountain Empire Dairymen's Association, the operator of the only supply plant pooled under the order, did not testify at the hearing or file a post-hearing brief.

The witness for the proponent testified that the supply plant operated by MEDA at Meridian, Idaho, represents the primary supply of milk for Associated Dairies' Boise plant. He also stated that the supply plant is the only other pool outlet for MEDA and DCA producer milk in addition to the Associated Dairies distributing plant at Twin Falls that receives deliveries of DCA member milk direct from farms. In order to assure that the supply plant is pooled, he said, milk is move first to the supply plant and then to the Boise distributing plant or to a DCA nonpool manufacturing plant at Caldwell. The witness stated that some uneconomic handling is associated with pooling milk through the supply plant. In a post-hearing brief filed by DCA, it was pointed out that the milk supply has increased by 31 percent since 1981, causing a much higher volume of milk to be transferred to nonpool manufacturing pants. The brief stated that a reduction in the supply plant shipping standard would asist the cooperative in attaining orderly, efficient pooling of its milk supply. Although DCA had proposed the removal of diversions of producer milk to nonpool plants from the receipts to be included when computing the supply plant's qualification for pooling, the witness did not address that portion of the proposal in his testimony.

The amount of milk that a supply plant is required to ship to pool distributing plants in order to qualify for pooling should be reduced from 40 to 25 percent of its receipts of fluid milk. The reduced percentage would bring the supply plant pool qualification requirement into closer conformity with the market's percentage of Class I use. As stated by proponent witness in relation to the distributing plant qualification percentage, the Associated Dairies-DCA-MEDA group represents over 80 percent of the producer milk on the market, but less than 50 percent of the market's Class I sales. A requirement that the supply plant through which much of the group's milk is pooled ship 40 percent of its receipts to distributing plants when the marketwide percentage of producer milk used in Class I products is less than 20 percent could only result in excessive levels of unnecessary and uneconomic handling and hauling of milk between plants solely for the purpose of qualifying milk for pooling. In the absence of any support from proponent for the portion of the DCA proposal that would remove diverted milk from receipts in the computation of supply plant pool qualification, that part of the proposal should not be considered.

2. Diversion of Producer Milk

Dairymen's Creamery Association proposed that the producer milk definition in the order be amended to reduce the number of deliveries of a dairy farmer's milk that must be physically received at pool plants if the rest of the farmer's milk is to be eligible for diversion to nonpool plants, and to increase the percentage of a handler's total milk supply that may be diverted directly from farms to nonpool plants. The president of DCA testified that four years' experience in pooling milk under the order has shown these order provisions to be unnecessarily burdensome on handlers and producers in light of the low Class I use percentage of the market and the increasing supply of milk. The proposed amendments are discussed in the following paragraphs.

(a) *Producer delivery requirement.* The requirement that at least one day's production of each producer's milk be physically received at a pool plant during each of the months of September through February in order for the rest of the producer's milk to be diverted to nonpool plants as producer milk should be relaxed. Instead, one day's production of each producer's milk should be received at a pool plant for three consecutive months on a one-time basis, as proposed by DCA.

The DCA controller testified that the order's present "touch-base" requirements place an unneeded burden on handlers and producers. He stated that compliance with the provisions causes unnecessary handling and hauling of producer milk to assure that it is received at pool plants as required by the order. The witness pointed out that the milk of producers located closer than others to pool plants can be delivered to those plants more economically than the milk of producers located farther away from the pool plants. At the same time, he noted, it is costly and inefficient to displace the milk of nearby producers to a distant nonpool plant when the milk of more distant producers must be moved to the pool plant solely for purposes of pool qualification.

The witness testified that the proposed requirement that new producers deliver at least one day's production per month to pool plants for three consecutive months will demonstrate that producers who wish their milk to be pooled actually are able to supply milk to meet the fluid needs of the market. The witness expressed his belief that once a producer's ability to supply the market has been established, there is no longer any need for the producer to prove that ability as long as he remains associated with the market. A requirement that a producer continue to demonstrate his ability to supply the market, he stated, serves only to increase the cost to producers of supplying the market by requiring unnecessary and uneconomic hauling and handling. The witness suggested, however, that if a producer is not pooled under the Southwestern Idaho-Eastern Oregon order for a period of 60 consecutive days, the producer should be required to demonstrate his

VOL 51 ISS 54 MR 20 1986 UMI

willingness and ability to once again supply the market by again fulfilling the proposed three-month delivery requirement.

In support of DCA's proposal to relax the order's limitations on the diversion of producer milk from producers' farms directly to nonpool plants, the witness submitted an exhibit showing the amounts of producer milk moved unnecessarily to pool plants solely to qualify it for pooling, and the amount that failed to qualify for pooling, for each month of January 1984 through August 1985. During the months of September through February, when the "touch-base" provisions of the order were in effect, the amount of milk per day that failed to qualify for pooling averaged over 40 percent higher than the daily average amount of milk that went unpooled during the months of March through August.

The "touch-base" requirement proposed by DCA should represent an adequate standard for individual producers to meet in order to qualify their milk for unlimited diversion to nonpool plants. There is no indication in the record of the hearing that relaxation of the individual producer delivery requirements would attract additional unneeded supplies of milk to the market. A producer located at some distance from the marketing area would still have to maintain a close association with the market. If the milk of such producer were not pooled on the Southwestern Idaho-Eastern Oregon market for a period of 60 days, the producer would have to requalify his milk for unlimited diversions.

It is apparent from the witnesses' testimony that the present "touch-base" requirements of the order are overly burdensome. Producers are required to demonstrate an association with the fluid market that substantially exceeds the market's demand for milk to be used in fluid products. As a result, the uneconomic hauling and handling required to comply with the provisions of the order are unnecessarily burdensome to producers and cooperative associations supplying the market. Accordingly, DCA's proposed changes to the individual producer delivery standards should be adopted. For easier administration, however, the proposed 60-day period off the market after which a producer's milk would have to be requalified should be changed to two months.

(b) *Limitation on diversions to nonpool plants.* The limit on the percentage of a handler's milk that may be diverted from producers' farms directly to nonpool plants should be changed from 70 percent in the months of September through February and 80 percent in other months to 80 percent in all months.

Dairymen's Creamery Association proposed that the diversion limits of the order be relaxed to enable cooperative associations and proprietary handlers to more easily handle milk supplies in excess of the market's fluid needs. The DCA controller cited market statistics that show milk production increasing substantially while Class I use has increased at a lesser rate. He stated that the growing imbalance between production and fluid use has caused increasing difficulties in assuring that all Grade A producer milk in the area and available for pooling will actually be pooled without incurring severe handling and hauling costs. The witness emphasized that all of the milk of DCA and MEDA producers that is pooled on the Southwestern Idaho-Eastern Oregon market is associated with the market on the basis of Associated Dairies' fluid milk sales. He stated that the DCA and MEDA milk represents over 60 percent of the milk pooled on the market, while Associates Dairies' represents less than half of the market's Class I disposition.

Given the Southwestern Idaho-Easter Oregon marketwide average Class I utilization of approximately 16 percent for the first eight months of 1985, the Class I use percentage of all the DCA and MEDA milk pooled on the basis of Associated Dairies' fluid milk disposition would Final Decision—Southwestern Idaho Eastern Oregon be less than 10 percent. The level of Class I use in the market is clearly not high enough to justify a requirement that 30 percent of all producer milk be received at pool plants during the months of September through February. In order that the milk of producer members of DCA and MEDA who have been supplying the fluid needs of the market since its inception in 1981 is not to be excluded from the pool or the cooperatives are not to undertake unnecessary, inefficient and burdensome hauling and handling practices to assure that their member producers' milk is pooled, the diversion limits should be relaxed in accordance with DCA's proposal.

3. *Continued Suspensions of Producer Delivery Requirement and Limitation on Diversions to Nonpool Plants*

There is no need at this time for a further suspension of the order's diversion limits and "touch-base" requirement. At the time of the hearing, the diversion limits and producer delivery requirements had been suspended for the months of September 1985 through February 1986. The DCA witness testified that suspension of the provisions would be necessary until the order is amended. However, the order does not require each individual producer's milk to be received at pool plants during the period of March through August, and allows 80 percent, rather than 70 percent, of a handler's supply of producer milk to be diverted to nonpool plants. On cross-examination, the witness stated that DCA will be able to operate under the provisions of the order without incurring the costs of unnecessary hauling during the months of March through August 1986. There is no reason to believe that the process of amending the Southwestern Idaho-Eastern Oregon milk order will not be complete well before September 1986. Therefore, the suspensions currently in effect through February 1986 need not be extended.

4. *Correction of Published Class I Price Computation Procedure*

The instructions currently contained in the order for computing the Class I price should be changed to reflect the findings and conclusions of the final decision published December 7, 1982 (47 FR 54978). The language of § 1135.50(a) should read "The Class I price shall be the basic formula price for the second preceding month plus $1.50." Due to a typographical error in the final order, published December 20, 1982 (47 FR 57445), § 1135.50(a) in the Code of Federal Regulations (CFR) reads "The Class I price shall be the basic formula price for the preceding month plus $1.50." This error must be corrected by means of a docket in order to be corrected in the CFR. This proceeding is an appropriate opportunity for making the correction.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General Findings

The findings and determinations hereinafter set forth supplement those that were made when the Southwestern

Idaho-Eastern Oregon order was first issued and when it was amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Rulings on Exceptions

No exceptions were received.

Marketing Agreement and Order

Annexed hereto and made a part hereof are two documents, a marketing agreement regulating the handling of milk, and an order amending the order regulating the handling of milk in the Southwestern Idaho-Eastern Oregon marketing area, which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the attached marketing agreement, be published in the **Federal Register.** The regulatory provisions of the marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which is published with this decision.

Determination of Producer Approval and Representative Period

January 1986 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the order, as amended and as hereby proposed to be amended, regulating the handling of milk in the Southwestern Idaho-Eastern Oregon marketing area is approved or favored by producers, as defined under the terms of the order (as amended and as hereby proposed to be amended), who during such representative period were engaged in the production of milk for sale within the aforesaid marketing area.

List of Subjects in 7 CFR Part 1135

Milk marketing orders, Milk, Dairy products.

Signed at Washington, DC, on March 14, 1986.

Alan T. Tracy,

Acting Assistant Secretary, Marketing and Inspection Services.

Order [1] Amending the Order Regulating the Handling of Milk in the Southwestern Idaho-Eastern Oregon Marketing Area

Findings and determinations

The findings and determinations hereinafter set forth supplement those that were made when the order was first issued and when it was amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Southwestern Idaho-Eastern Oregon marketing area. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area; and the minimum prices specified in the order as hereby amended are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order Relative to Handling

It is therefore ordered that on and after the effective date hereof, the handling of milk in the Southwestern Idaho-Eastern Oregon marketing area shall be in conformity to and in compliance with the terms and conditions of the order, as amended, and as hereby amended, as follows:

The provisions of the proposed marketing agreement and order amending the order contained in the recommended decision issued by the Administrator, Agricultural Marketing Service, on February 6, 1986, and published in the **Federal Register** on February 12, 1986 (51 FR 5199), shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein.

PART 1135—MILK IN THE SOUTHWESTERN IDAHO-EASTERN OREGON MARKETING AREA

1. The authority citation for CFR Part 1135 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. In § 1135.7, the first sentence of paragraph (a)(2) and the text in paragraph (b) preceding (b)(1) are revised to read as follows:

§ 1135.7 Pool plant.

* * * * *

(a) * * *

(2) Total route disposition (except filled milk) during the month equal to not less than 25 percent of such receipts.

* * * * *

(b) A supply plant from which during the month the volume of fluid milk products, except filled milk, transferred to pool distributing plants is 25 percent or more of the Grade A milk received at the plant from dairy farmers (including producer milk diverted from the plant by the plant operator but excluding producer milk diverted to the plant pursuant to § 1135.13), subject to the following conditions:

* * * * *

3. In § 1135.13, paragraph (f) (1), (2), (3), (4), and (5) are revised to read as follows:

§ 1135.13 Producer milk.

* * * * *

(f) * * *

---

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

VOL
51
ISS
54
MR
20
1986
UMI

(1) Milk of a dairy farmer who was not a "producer" in the preceding two months shall not be eligible for diversion until one day's production of milk is physically received at a pool plant;

(2) During each of a dairy farmer's first three months as a "producer" under this order, and after any period of two months or longer that a dairy farmer is not a "producer" under this order, milk of the dairy farmer shall not be eligible for diversion unless during the month one day's production of milk of such dairy farmer is physically received as producer milk at a pool plant;

(3) The total quantity of milk diverted by a cooperative association during any month may not exceed 80 percent of the producer milk that the cooperative association causes to be delivered to or diverted from pool plants during the month. Two or more cooperative associations may have their allowable diversions computed on the basis of the combined deliveries of the producer milk which the associations cause to be delivered to pool plants or diverted from pool plants during the months if each association has filed a request in writing with the market administrator on or before the first day of the month the agreement is to be effective. This request shall specify the basis for assigning over-diverted milk to the producer deliveries of each cooperative according to a method approved by the market administrator;

(4) The total quantity of milk diverted during the month by a proprietary bulk tank handler described in § 1135.9(d) may not exceed 80 percent of the producer milk that the handler causes to be delivered to or diverted from pool plants during the months;

(5) The operator of a pool plant may divert for its account any milk that is not under the control of a cooperative association or a proprietary bulk tank handler that diverts milk during the month pursuant to paragraphs (f) (3) and (4) of this section. The total quantity so diverted during any month may not exceed 80 percent of the producer milk received at or diverted from such pool plant during the month that is eligible to be diverted by the plant operator; and

* * * * *

4. In § 1135.50, paragraph (a) is revised to read as follows:

§ 1135.50 Class prices.

* * * * *

(a) The Class I price shall be the basic formula price for the second preceding month plus $1.50.

[FR Doc. 86-6060 Filed 3-19-86; 8:45 am]

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 166

[Docket No. 85-017]

Swine Health Protection

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the regulations in 9 CFR Part 166 (referred to below as the regulations) which contain provisions concerning swine health protection. Specifically, this document would require the cancellation of the license held by the operator of a garbage treatment facility that treats no garbage for 3 consecutive months, and would also provide a mechanism for a licensee to request cancellation of his or her license. These proposed amendments appear to be necessary to eliminate unnecessary visits by Department inspectors to inactive facilities, and would save the Department an unnecessary expenditure of workhours.

DATES: Written comments concerning this proposed rule must be received on or before May 19, 1986.

ADDRESSES: Written comments should be submitted to Thomas O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Comments should state that they are in response to Docket Number 85-017. Written comments received may be inspected at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. L.W. Schnurrenberger, VS, APHIS, USDA, Room 820, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8487.

SUPPLEMENTARY INFORMATION: Any person who operates a treatment facility for garbage to be treated and fed to swine is required to do so under a license issued by the Deputy Administrator. Such facilities are inspected by a Department inspector on a periodic, unannounced basis. Presently, the regulations contain no provisions for cancellation of an operator's license after a facility ceases to treat garbage. This can consequently cause an unnecessary expenditure of Department resources in maintaining files on inactive facilities and in scheduling and carrying out unnecessary inspections. Therefore, this document proposes that an operator's license shall be canceled when the operator's facility has treated no garbage for a period of 3 consecutive months.

This document also proposes that before a license is so canceled, the Veterinarian in Charge will inform the licensee in writing of the reasons for the proposed cancellation. It proposes also that in those instances where there is a conflict as to the facts, the licensee shall, upon request, be afforded a hearing to resolve such conflict, in accordance with rules of practice which shall be adopted for the proceeding.

Additionally, this document would provide a mechanism by which a licensee can voluntarily have his or her license canceled. To have a license so canceled, the licensee would request cancellation of his or her license in writing. The Veterinarian in Charge would then cancel the license and notify the person of the cancellation in writing.

This document would also provide that a licensee whose license is canceled because of a facility that has ceased to treat garbage may reapply for a license at any time, but will have to follow the procedures for applying for a new license as provided for in present § 166.10.

This document would delete the definitions of "Administrator", "Birds" and "Department" from the regulations, because the terms "Administrator" and "Birds" are not used elsewhere in the regulations and the term "Department" would be deleted from the regulations by this proposal. It would also change the language throughout the regulations that refers to "Area Veterinarian in Charge" to language that refers to "Veterinarian in Charge." This change appears to be necessary because the Department presently uses the term "Veterinarian in Charge" to refer to each of its employees formerly referred to as an "Area Veterinarian in Charge." This change in nomenclature reflects the fact that presently most Veterinarians in Charge are assigned to supervise and perform the official work of Veterinary Services in only one State, rather than in a larger geographical region as in the past.

Miscellaneous

This document would also make certain nonsubstantive changes in the regulations for purposes of clarity.

Executive Order 12291 and Regulatory Flexibility Act

This rule would be issued in conformance with Executive Order 12291 and has been determined to be not a "major rule". Based on information compiled by the Department, it has been

determined that this rule would have an effect on the economy of less than 100 million dollars; would not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographical regions; and would not have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The proposed cancellation provisions in this document would apply only to those facilities that have already become inactive, and any person who has a license canceled pursuant to this proposal would be eligible to reapply for a license to operate the facility again immediately after any such cancellation.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

In accordance with section 3507 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the information collection provisions that are included in this rule have been approved by the Office of Management and Budget (OMB) and have been given the OMB control number 0579-0065.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. (See 7 CFR Part 3015, Subpart V).

List of Subjects in 9 CFR Part 166

African swine fever, Animal Diseases, Foot-and-mouth disease, Garbage, Hog cholera, Hogs, Swine vesicular disease, Vesicular exanthema of swine.

PART 166—SWINE HEALTH PROTECTION

Accordingly, 9 CFR Part 166 would be amended as follows:

1. The authority for 9 CFR Part 166 would continue to read:

Authority: 7 U.S.C. 3802, 3803, 3804, 3808, 3809, 3811; 7 CFR 2.17, 2.15 and 371.2(d)

2. Section 166.1 would be amended by deleting the definitions for "Administrator", "Birds" and "Department".

3. Section 166.1 would be amended by revising the definitions of the word "Inspector" and the terms "Animal and Plant Health Inspection Service (APHIS)" "Deputy Administrator" and "State Animal Health Official" to read:

§ 166.1 Definitions in alphabetical order.

Animal and Plant Health Inspection Service. Animal and Plant Health Inspection Service, United States Department of Agriculture.

Deputy Administrator. The Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service, United States Department of Agriculture, or any other official to whom authority is delegated to act for the Deputy Administrator.

Inspector. Any individual employed by the United States Department of Agriculture or by the State for the purposes of enforcing the Act and this part.

State animal health official. The individual employed by a State who is responsible for livestock and poultry disease control and eradication programs or any other official to whom authority is delegated to act for the State animal health official.

4. In Part 166, all references to "Area Veterinarian in Charge" would be changed to read "Veterinarian in Charge", and in § 166.1, the definition of "Area Veterinarian in Charge" would be revised to read:

Veterinarian in Charge. The veterinary official of Veterinary Services, Animal and Plant Health Inspection Service, United States Department of Agriculture, who is assigned by the Deputy Administrator to supervise and perform the animal health activities of the Animal and Plant Health Inspection Service in the State concerned or any other official to whom authority is delegated to act for the Veterinarian in Charge.

§ 166.2 [Amended]

5. In paragraph (b) of § 166.2, the reference to "of dissemination" would be changed to "or dissemination".

6. In paragraph (c) of § 166.2, the word "Federal" would be deleted.

§ 166.4 [Amended]

7. In paragraph (b) of § 166.4, the reference to "§ 166.13 of this part" would be changed to "§ 166.14".

§ 166.5 [Amended]

8. In paragraph (b) of § 166.5, the reference to "§ 166.13(b)" would be changed to "§ 166.14(b)".

§ 166.6 [Amended]

9. In § 166.6, the reference to "§ 166.13(b)" would be changed to "166.14(b)".

§ 166.8 [Amended]

10. In § 166.8, the reference to "§ 166.13(c)" would be changed to "§ 166.14(c)".

§ 166.9 [Amended]

11. In paragraph (d) of § 166.9, the reference to "(one)" would be deleted.

§ 166.10 [Amended]

12. In paragraph (c)(1) of § 166.10, the word "his" would be changed to "the" both times it appears.

13. In paragraph (c)(2) of § 166.10, the word "his" would be changed to "the" and the term "authorized representative of the Secretary" would be changed to "inspector".

14. In paragraph (d) of § 166.10, the word "Federal" and the reference to "(one)" would be deleted.

§ 166.11 [Amended]

15. In paragraph (b) of § 166.11, the word "Federal" would be deleted and the word "he" would be change to "the Deputy Administrator".

16. In paragraph (d) of § 166.11, the word "his" would be changed to "such person's" both times it appears and the reference to "(one)" would be deleted.

§ 166.12 [Amended]

17. In paragraph (c) of § 166.12, the reference to "(thirty)" would be deleted.

18. In paragraph (d) of § 166.12, the reference to "authorized representative of the Department" would be changed to "inspector".

§ 166.13 [Amended]

19. In paragraph (a) of § 166.13, the reference to "§§ 71.10(b) and 71.11 to Title 9, Code of Federal Regulations", would be changed to "§§ 71.10(b) and 71.11 of this chapter".

20. In paragraph (b) of § 166.13, the words "as defined in Part 160 or this chapter" would be inserted immediately after the words "accredited veterinarian", the reference to "§ 166.13(a)" would be changed to "paragraph (a) of this section", and the reference to "State Animal Health Official" would be changed to "State animal health official".

21. In paragraph (c) of § 166.13, the reference to "§ 166.13(a)" would be changed to "paragraph (a) of this section".

22. In paragraph (d) of § 166.13, the reference to "Department of Agriculture" would be changed to the

VOL 51
ISS 54
MR 20
1986
UMI

United States Department of Agriculture".

§ 166.14 [Amended]

23. In paragraph (d) of § 166.14, the reference to "USDA" would be changed to "United States Department of Agriculture".

24. In paragraph (e) of § 166.14, the reference to "the public" would be changed to "The public", the references to "U.S." would be changed to "United States" each time it appears, and the references to "(APHIS)", "(USDA)" and "(usually the State Veterinarian)" would be deleted.

§§ 166.13, 166.14 and 166.15 [Redesignated from §§ 166.12, 166.13 and 166.14]

25. Present §§ 166.12, 166.13, and 166.14 would be redesignated as §§ 166.13, 166.14, and 166.15 respectively and a new § 166.12 would be added to read as follows:

§ 166.12 Cancellation of licenses.

(a) The Veterinarian in Charge shall cancel the license of a licensee when the Veterinarian in Charge finds that no garbage has been treated for a period of 3 consecutive months at the facility operated by the licensee. Before such action is taken, the licensee of the facility will be informed in writing of the reasons for the proposed action and be given an opportunity to respond in writing. In those instances where there is a conflict as to the facts, the licensee shall, upon request, be afforded a hearing in accordance with rules of practice which shall be adopted for the proceeding.

(b) Any licensee may voluntarily have his or her license canceled by requesting such cancellation in writing and sending such request to the Veterinarian in Charge.[1] The Veterinarian in Charge shall cancel such license and shall notify the licensee of the cancellation in writing.

(c) Any person whose license is canceled in accordance with paragraph (a) or (b) of this section may apply for a new license at any time by following the procedure for obtaining a license set forth in § 166.10

Done at Washington, DC., this 17th day of March 1986.

J.K. Atwell,

Deputy Administrator, Veterinary Services.

[FR Doc. 86-6139 Filed 3-19-86; 8:45 am]

BILLING CODE 3410-34-M

FEDERAL RESERVE SYSTEM

12 CFR Part 227

[Reg. AA; Docket No. R-0570]

Unfair or Deceptive Acts or Practices; Exemption Application From the State of Wisconsin

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice of intent to make an exemption determination.

SUMMARY: The Board has received from the state of Wisconsin an application for an exemption from the Boards Credit Practices Rule, Subpart B of Regulation AA (Unfair or Deceptive Acts or Practices). The rule prohibits banks from entering into consumer credit obligations that contain certain prohibited provisions, from using a certain late charge practice, and from obligating a cosigner prior to providing a required notice explaining the cosigner's obligations. The Board is publishing notice of the Wisconsin application, with an opportunity for public comment, in accordance with § 227.16(b) of Regulation AA. That section provides that the exemption procedures detailed in Appendix B to Regulation Z (Truth in Lending, 12 CFR Part 226) are to be followed in applying for an exemption from the Credit Practices Rule.

DATE: Comments must be received on or before April 24, 1986.

ADDRESS: Comments should be mailed to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, or delivered to the 20th Street courtyard entrance, 20th Street, between C Street and Constitution Avenue NW., Washington, DC between 8:45 a.m. and 5:15 p.m. weekdays. Comments should include a reference to Docket No. R-0570. Comments may be inspected in Room B-1122 between 8:45 a.m. and 5:15 p.m. weekdays.

FOR FURTHER INFORMATION CONTACT: Adrienne D. Hurt, Susan J. Kraeger, or Heather L. Hansche, Staff Attorneys, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202) 452-3867; or Earnestine Hill or Dorothea Thompson, Telecommunications Device for the Deaf (TDD) at (202) 452-3544.

SUPPLEMENTARY INFORMATION:

(1) Background

In April 1985 the Board adopted its Credit Practices Rule, 12 CFR 227 (50 FR 16695), thereby amending its Regulation AA (Unfair or Deceptive Acts or Practices). The Board's rule, which became effective on January 1, 1986, followed the adoption by the Federal Trade Commission (FTC) of its Credit Practices Rule in March 1984 (49 FR 7740), effective March 1, 1985.[1] The Board's rule applies to all banks and their subsidiaries. Staff guidelines—in question and answer format—designed to aid banks in complying with the Credit Practices Rule were issued in November 1985 (50 FR 47036).

The Credit Practices Rule prohibits banks from entering into any consumer credit obligation that contains a confession of judgment clause, a waiver of exemption, an assignment of wages, or a nonpossessory, nonpurchase money security interest in certain types of household goods. The rule prohibits the enforcement of these provisions in a consumer credit obligation purchased by a bank.

The rule also prohibits a practice known as "pyramiding of late charges." Under the pyramiding provision, a bank is prevented from assessing multiple late charges based on a single delinquent payment that is subsequently paid. In addition, the rule prohibits a bank from misrepresenting a cosigner's liability and requires the bank to give a cosigner, prior to becoming obligated in a consumer credit transaction, a disclosure notice which explains the nature of the cosigner's obligations and liabilities under the contract.

Administrative enforcement of the rule for banks may involve actions under section 8 of the Federal Deposit Insurance Act (12 U.S.C. 1818), including the issuance of cease and desist orders and the imposition of penalties of up to $1,000 per day for violation of an order.

(2) Wisconsin's Exemption Application

The state of Wisconsin, through its Banking Commissioner, has applied to the Board for an exemption from the Board's Credit Practices Rule.[2] The

application contains copies of the Wisconsin Consumer Act and relevant administrative rules, a comparison of the provisions of the Credit Practices Rule and the Wisconsin statutory provisions, and copies of the Banking Commissioner's Annual Reports to the Governor and Legislature on the Wisconsin Consumer Act for three separate years. The application also contains information about the enforcement activities of the Division of Consumer Credit in the Office of the Commissioner of Banking.

The Board's rule (§ 227.16) states that, in applying for an exemption from its Credit Practices Rule, the procedures to be followed are the same as those detailed in Appendix B to Regulation Z (Truth in Lending, 12 CFR Part 226) for applying for an exemption from the regulation. In accordance with those procedures, the Board is publishing for comment notice of its intent to make an exemption determination on the Wisconsin application. The notice summarizes the Wisconsin exemption application, and includes a comparison of the relevant provisions of Wisconsin law and the Board's Credit Practices Rule. In order to avoid undue delay in expediting final action on the Wisconsin exemption request, the notice is being published for a 30 day comment period. Subject to the Board's Rules Regarding Availability of Information (12 CFR Part 261), copies of the Wisconsin application are available from the Board in Washington or from the Federal Reserve Banks of Chicago and Minneapolis.

Section 227.16 of the Credit Practices Rule provides that if a state applies for an exemption from a provision of the rule, such an exemption may be granted if the Board determines that: (i) There is a state requirement or prohibition in effect that applies to any transaction to which a provision of the Credit Practices Rule applies: and (ii) the state requirement or prohibition affords a level of protection to consumers that is substantially equivalent to, or greater than, the protection afforded by the rule's provision. If the Board makes such a determination, the prohibition or requirement in the Board's rule will not be in effect in the state to the extent specified by the Board in its determination, for as long as the state effectively administers and enforces the state requirement of prohibition. The effect of an exemption is that banks and their subsidiaries (other than federally chartered institutions) that are subject to the Board's rule will be subject solely to state law and enforcement.

Applicable state law provisions need not be the same as the comparable federal requirement in order to meet the rule's substantially equivalent standard. Variations, however, should not deprive consumers of the protections provided by federal law. An analysis of the state's enforcement activities focuses on the ways in which a state demonstrates a commitment to enforcement and administration of the state's law; factors such as staffing, training activities, examination and administrative procedures, and other indicators of enforcement efforts may be considered, as well as the existence under the state law of any private right of action by aggrieved consumers.

(3) A Comparison of the Wisconsin Consumer Act and the Board's Credit Practices Rule

The state of Wisconsin asserts that the Wisconsin Consumer Act and the state enforcement scheme meet the standards for exemption contained in the Board's Credit Practices Rule, and requests and exemption on that basis. A comparison of the Wisconsin Consumer Act (as described in the Wisconsin application) and the Board's Credit Practices Rule is set forth below. In particular, the Board solicits comments on the following:

- The degree to which differences in coverage between the Wisconsin law and the Board's rule affect the level of protection afforded by Wisconsin law;
- The degree to which differences in treatment of waivers of exemption under the Wisconsin law and the Board's rule affect the level of protection afforded by Wisconsin law;
- The degree to which differences in the definitions of household goods protected by the Wisconsin law and the Board's rule affect the level of protection afforded by Wisconsin law;
- The degree to which differences in the cosigner provisions of the Wisconsin law and the Board's rule affect the level of protection afforded by Wisconsin law;
- Whether the penalty provisions and other remedies available for violations of Wisconsin law afford a level of protection substantially equivalent to, or greater than, that afforded by the Board's rule; and
- Whether Wisconsin administers and enforces its law effectively.

A. Coverage

Section 421.301(10) of the Wisconsin Consumer Act provides that the consumer credit transactions covered by the act include credit sales, loans, leases, and transactions made under open-end credit plans. Section 421.301(17) of the Wisconsin law provides that the act covers consumers who are natural persons and who acquire real or personal property, services, money or credit for personal, family, household or agricultural purposes. The Credit Practices Rule covers consumer credit obligations other than loans made for the purchase of real property (§ 227.12(a)). It does not cover consumer leases or loans made for agricultural purposes.

Sections 421.301(10) and 421.301(30) of the Wisconsin Consumer Act provide that the act covers: (1) Consumer credit transactions in which a finance charge is or may be assessed; or (2) if finance charges will not be assessed, credit transactions that are repaid in two or more installments (where any installment other than the downpayment is more than twice the amount of any other installment excluding the downpayment), or credit transactions that are repaid in more than four installments. The Credit Practices Rule covers all consumer credit transactions regardless of the number of installments in the repayment period, or whether a finance charge is assessed (§ 227.11(b)).

The Wisconsin Administrative Code (§ 80.06) provides that only credit that is used primarily for personal, family, household or agricultural purposes is covered by the act. The code indicates that "primarily" means 50% or more. The Credit Practices Rule also covers consumer credit transactions made primarily for personal, family or household use; term "primarily," however, is not defined. (Staff Guidelines, Q12(a)-1.)

Section 421.202(6) of the Wisconsin Consumer Act provides that consumer transactions that are in excess of $25,000 are not covered by the act. The Credit Practices Rule does not exclude consumer transactions over $25,000 from the rule's coverage. The dollar amount of the transaction, however, is one of the factors that can be considered in determining whether a transaction is for a business purpose rather than a consumer purpose. (Staff Guidelines, Q12(a)-2.)

B. Confession of Judgment

The Wisconsin Consumer Act prohibits a creditor from taking or accepting from a consumer a warrant or power of attorney or other authorization allowing the creditor, or other person acting for the creditor, to confess judgment on behalf of the consumer (§ 422.405). If a contract contains a

---

[1] Under section 18(a)(1)(B) and section 5(a)(1) of the Federal Trade Commission Act (FTC Act), the FTC is authorized to promulgate rules that define and prevent "unfair or deceptive acts or practices" in or affecting commerce with respect to extensions of credit to consumers. Section 18(f) of the FTC Act provides that whenever the FTC promulgates a rule prohibiting practices which it has deemed to be unfair or deceptive, the Board, with certain limited exceptions, must adopt a substantially similar rule prohibiting such practices by banks. The Federal Home Bank Board (FHLBB) is also required under section 18(f) to adopt a rule substantially similar to that of the FTC for institutions that are members of the Federal Home Loan Bank System: the FHLBB did so in May 1985 (50 FR 19325), with its rule also taking effect on January 1, 1986.

[2] The state of Wisconsin has submitted similar applications to the FTC and to the FHLBB, in order to obtain exemptions from the Credit Practices

Continued

Rules of those agencies. The Wisconsin exemption request to the FTC has been published for comment in the Federal Register (50 FR 46082), but no final determination by the FTC has as yet been made.

VOL
51
ISS

1986
UMI

confession of judgment, the consumer may, in a private action, void the contract, retain the goods or service provided without any further obligation to pay, and obtain a refund of all monies paid to the creditor (§ 425.305).

The Credit Practices Rule prohibits a confession of judgment in a consumer credit obligation where the consumer waives his or her procedural due process rights prior to the institution of a legal proceeding on the underlying obligation (§ 227.13(a)). The rule does not prohibit a power of attorney in a mortgage loan obligation or deed of trust for purposes of foreclosure; nor does the provision affect a power of attorney given to expedite the transfer of pledged securities or the disposal of repossessed collateral, or to allow prompt cancellation of insurance in an insurance premium finance contract. (Staff Guidelinees, Q13(a)–1.)

C. Waiver of Exemption

The Credit Practices Rule prohibits the inclusion of an executory waiver or a limitation of a state property exemption in a consumer credit obligation, unless the property serves as security for the obligation (§ 227.13(b)). Under the Wisconsin Consumer Act, a certain portion of a consumer's earnings and certain personal and real property are exempt from execution (§ 425.106). Section 421.106(1) of the act provides, in general, that a consumer may not waive or agree to forego rights or benefits under the act, except as the act otherwise provides; there is no provision of that act which expressly enables a consumer to waive a property exemption, and the state asserts that such a waiver would be unenforceable.

Section 425.107(1) of the Wisconsin Consumer Act provides that, with respect to a consumer credit transaction, if a court finds any aspect of the transaction unconscionable, in addition to remedies and penalties provided by statute, the court either will refuse to enforce the transaction or it will modify any unconscionable aspect of the transaction. Under § 427.107(3)(e), if the terms of a transaction require consumers to waive legal rights, such may be considered by a court in determining unconscionability. If a contract is deemed unconscionable, in addition to being unenforceable in whole or in part, the creditor is subject to a penalty of $100 and any actual damages including incidental and consequential damages sustained by the consumer (§§ 425.107(5) and 425.303). In addition, the state indicates that under its § 426.104 authority to review consumer credit contract forms, a form that contains a provision waiving the consumer's right to claim any exemption for personal or real property contained in the act would not be approved.

D. Assignment of Wages

The Wisconsin Consumer Act prohibits an assignment of earnings for payment, or as security for payment, of a consumer credit obligation, unless the assignment is revocable at will by the consumer (§ 422.404(1)). Section 80.361 of the Wisconsin Administrative Code requires a creditor who takes a permissible assigment of earnings to provide the consumer with a notice of the assignment's revocability. If a creditor takes a prohibited wage assignment, the creditor is subject to a penalty of twice th amount of the finance charge (not less than $100 or more than $1,000), or the consumer's actual damages, whichever is greater, in an action brought by the consumer (§ 425.304).

The Credit Practices Rule prohibits a wage assignment in a consumer credit obligation unless the assignment is revocable, is a payroll deduction or preauthorized payment plan, or applies to wages already earned (§ 227.13(c)). The Wisconsin Consumer Act does not expressly address payroll deduction or preauthorized payment plans. The state indicates, however, that payroll deduction plans would be permissible under the act as long as the consumer may revoke them at any time; such plans would include any preauthorized transfer of a consumer's wages from an employer to a particular creditor. With regard to a preauthorized transfer of an amount from a consumer's checking account to a particular creditor, the state doubts that such a preauthorized transaction would have to be revocable because a consumer's checking account would not fall within the definition of earnings a defined in § 421.301(18) of the act.

E. Security Interest in Household Goods

Section 422.417(1)(a) of the Wisconsin Consumer Act provides that, in general, a seller may only take a security interest in the goods sold. If, however, the extension of credit is for $500 or more, the seller may take (1) a security interest in property upon which goods sold are installed or annexed, and (2) a security interest in property upon which services sold are performed (§ 422.417(1)(b)). Under § 422.417(3) of the act, a lender that is not a seller may not take a security interest, other than a purchase money security interest, in certain specifically enumerated household goods. In addition, a lender is prohibited from taking a security interest in real property other than a purchase money security interest, if the credit obligation is less than $1,000. If a lender takes a security interest prohibited by § 422.417, it is subject to a penalty of twice the amount of the finance charge (not less than $100 or more than $1,000), or the actual amount of the damages sustained by the consumer, whichever is greater, in a private action brought by the consumer (§ 425.304).

The Credit Practices Rule prohibits banks from entering into or enforcing consumer credit obligations containing nonpurchase money security interests in specifically enumerated household goods. The rule places no limitations on the lender's ability to take security interests in real property. The list of specific items that are considered protected household goods differs somewhat under the Credit Practices Rule (§ 227.12(d)) and the Wisconsin Consumer Act (§ 442.417(3)(a)). Specifically, unlike the Credit Practices Rule, Wisconsin law does not protect the categories "china" and "personal effects," nor does it protect a television set. In addition, the rule protects the broad classification "appliances," while the act only protects a refrigerator, heating stove and cooking stove. Similarly, the rule protects the broad category, "furniture" (which includes all household furnishings except antiques), while the act limits protection to a dining table and chairs, beds, and a couch and chairs. Both laws specifically protect clothing and kitchenware, as well as linens (referred to as bedding in the Wisconsin Consumer Act) and crockery (referred to as utensils in the Wisconsin Consumer Act).

F. Unfair or Deceptive Practices Involving Cosigners

Under the Credit Practices Rule, before a cosigner becomes obligated for an extension of credit to a consumer, a bank must notify the cosigner in writing of the nature of his or her obligation (§ 227.14(a)(2)). The rule contains a prescribed disclosure statement. A bank must provide a cosigner statement which is substantially similar to that in the rule (§ 227.14(b)(2)). Under the rule the cosigner notice must be clear and conspicuous, and may be contained in a separate document or in the documents evidencing the credit obligation. The Wisconsin Consumer Act requires that a creditor provide a cosigner either with a written notice called "An Explanation of Personal Obligation" or a copy of the documents evidencing the consumer's obligation (§ 422.305(1)). If the notice is given, it must be printed in at least 10-point type, and substantially similar to

the one detailed in the Wisconsin law (§ 422.305(2)).

The notice required by the Credit Practices Rule states: (1) That the cosigner may have to pay the full amount of the debt and late fees or collection costs; (2) that the creditor can collect from the cosigner without first trying to collect from the borrower; (3) that the same collection remedies may be used against the cosigner as against the borrower; (4) that the notice is not the contract that makes the cosigner liable; (5) that if the debt goes into default that fact could become a part of the cosigner's credit history; and (6) the cosigner should think carefully before becoming obligated.

The notice contained in the Wisconsin Consumer Act states: (1) The parties to the contract, the date, the purpose of the credit and the amount of the credit; (2) the cosigner's obligation to pay even though the cosigner may not be entitled to any of the goods or services or the loan proceeds provided to the borrower; (3) the fact that the cosigner may be sued even though the borrower may be able to pay; (4) the fact that the notice is not the agreement that makes the cosigner liable; and (5) the fact that the cosigner is entitled to a free copy of any document the cosigner signs endorsing the transaction. In addition, the Wisconsin notice contains an acknowledgment to be executed by the cosigner upon receipt of the notice.

The Credit Practices Rule specifically prohibits a bank from misrepresenting the nature and extent of cosigner liability to any person (§ 227.14(a)(1)). Misrepresentation of cosigner liability is not specifically prohibited by the Wisconsin Consumer Act. Section 423.301 of the act does in general, however, prohibit false, misleading or deceptive statements with regard to consumer credit transactions. The state contends that directly or indirectly misrepresenting the nature or extent of a cosigner's liability would violate that section of the act. In addition, consumer credit contracts may not include terms which deprive cosigners of any rights provided to consumers under the act, nor may creditors charge cosigners for fees and charges which could not be imposed upon the consumer (§ 422.420). Under Wisconsin law, it is an unconscionable practice to unfairly take advantage of the lack of knowledge, ability, experience or capacity of consumers (§ 425.107(3)(a)), and it is an unfair collection practice for a creditor to attempt to enforce a right with knowledge that the right does not exist (§ 427.104(1)(j)).

If a cosigner does not receive a copy of the consumer credit obligation or a copy of the cosigner disclosure, the cosigner may recover, in a private action, the greater of twice the amount of the finance charge (not less than $100 or more than $1,000) or actual damages (§ 425.304). With regard to an unfair collection practice, the creditor may be liable for twice the amount of the finance charge (not less than $100 or more than $1,000) and the actual damages sustained by the consumer, including damages caused by emotional distress, in a private action brought by the consumer (§ 427.105).

G. Late Charges

Under the Credit Practices Rule, a bank is prohibited from collecting a late charge on a payment when the only delinquency is attributable to a late charge assessed on an earlier installment, and the payment is a full payment made on its due date or within the applicable grace period (§ 227.15). In an open-end credit plan where the bank discloses late charges to the consumer as they are imposed and informs the consumer of the full amount that the consumer must pay for the applicable period in order to remain current on the account, the rule's provision on late charges does not come into play. (Staff Guidelines, Q15–6).

The Wisconsin law prohibits the pyramiding of late charges in separate provisions governing open-end and closed-end credit. Section 422.202(2m)(a) provides that, in connection with an open-end credit plan, an unpaid late charge may not be included in any outstanding balance for the purpose of calculating the minimum payment due in a subsequent billing cycle. Section 422.203(2) of Wisconsin law provides that, with regard to closed-end credit, all payments must be applied first to current installments due, and then to delinquent installments for purposes of determining whether a delinquency charge may be assessed. Under this accounting procedure, if a consumer pays the full amount of the current installment on its due date or within the grace period, no late charge can be assessed on this payment even though all or part of a previous installment is unpaid and even though the unpaid installment is comprised of principal, interest or late charges. If a lender pyramids late charges, the lender is subject to a penalty equal to the greater of twice the amount of the finance charge (not less than $100 or more than $1,000), or the actual damages sustained by the consumer, in an action brought by the consumer (§ 425.304).

H. Enforcement

The Wisconsin Consumer Act is administered by the Commissioner of Banking. The Office of the Commissioner of Banking is funded through program revenues that include funds obtained through examinations and funds obtained by collecting fees from creditors pursuant to § 426.202 of the Wisconsin Consumer Act. The Commissioner is authorized to receive and act on complaints, adopt administrative rules, review and approve contract forms, commence administrative proceedings, and institute judicial proceedings through the state's Department of Justice. Administrative rules to interpret and carry out the purposes of the act were adopted in 1973. Where the Banking Commissioner reviews and approves contract forms used by creditors in consumer credit transactions—a function handled by the Commissioner's legal staff—such approval affords creditor protection from civil liability under the Wisconsin Consumer Act.

The Division of Consumer Credit has a field staff of five examiners who conduct on-site examinations of the consumer credit practices of all state banks, loan companies and motor vehicle dealers licensed to sell motor vehicles on credit. Bank examinations constitute between 15–20% of all of the examinations conducted by the Division of Consumer Credit, and range in length from one to five days. Currently, the time between the examination of each state bank is approximately 24 months. During the years 1983 and 1984, consumer credit examiners conducted an average of 134 bank examinations each year. Wisconsin asserts that its examination and approval procedures result in a high level of compliance with the Wisconsin Consumer Act.

Where compliance cannot be obtained through administrative enforcement, the Banking Commissioner may commence suit to enforce the act through the state of Wisconsin's Department of Justice (§ 426.104(1)(a)). In such an action a civil penalty of not less than $100 and not more than $1,000 for each violation may be recovered. If a violation is knowing and willful, a civil penalty of not less than $1,000 and not more than $10,000 for each violation may be recovered. (§ 426.301.)

(4) Comments Requested

Interested persons are invited to submit written comments on the state of Wisconsin's application for an exemption from the Board's Credit Practices Rule. After the close of the

VOL 51
ISS 54
MR 20
1986
UMI

comment period, based upon its own analysis and analysis of the comments received, the Board will publish in the **Federal Register** notice of the final action on the exemption request.

List of Subjects in 12 CFR Part 227

Banks, Banking, Consumer protection, Credit, Federal Reserve System, Finance.

By order of the Board of Governors of the Federal Reserve System, March 17, 1986.

BILLING CODE 6210-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CCGD09 86-01]

Drawbridge Requirements; Black River, OH

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of the Lorain County Engineer, Elyria, Ohio, the Coast Guard is considering a change to the operating regulations governing the Erie Avenue Bridge, mile 0.6 over the Black River at Lorain, Ohio, by permitting the number of openings to be limited during certain times and by permitting the bridge to remain closed at certain other times unless advance notice is given to open the draw for the passage of vessels. This change is being considered because of land traffic tie-ups during the day and a decrease of requests to have the bridge opened at night and during the winter months. This action should alleviate the traffic tie-ups and will relieve the bridge owner of the burden of having a perons constantly available to open the draw while still providing for the reasonable needs of navigation.

DATE: Comments must be received on or before May 5, 1986.

ADDRESSES: Comments should be mailed to Commander (obr), Ninth Coast Guard District, 1240 East Ninth Street, Cleveland, Ohio 44199. The comments and other materials referenced in this notice will be available for inspection and copying at 1240 East Ninth Street, Room 2083D, Cleveland, Ohio. Normal office hours are between the hours of 6:30 a.m. and 3:00 p.m., Monday through Friday, except legal holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Robert W. Bloom, Jr., Chief, Bridge Branch, telephone (216) 522-3993.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, comments, data or arguments. Persons submitting comments should include their name and address, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal. Persons desiring acknowledgment that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Commander, Ninth Coast Guard District, will evaluate all communications received and determine a course of final action on this proposal. The proposed regulations may be changed in light of comments received.

Drafting Information

The drafters of this notice are Fred H. Mieser, project officer, and Lt R.A. Pelletier, project attorney.

Discussion of Proposed Requirements

Presently, the Erie Avenue bridge opens on a signal and bridgetenders are required to be in constant attendance at the bridge.

From April 1 though November 30, the proposed requirements would allow the bridge owner to open the draw for pleasure craft only on the hour and half-hour from 7 a.m. to 6 p.m., with no openings for pleasure craft during the peak vehicular traffic times of 8 a.m., 3 p.m., 4 p.m. and 5 p.m., Monday through Friday, except legal holidays. On Saturdays, Sundays and legal holidays, the draw would be required to open for pleasure craft only on the hour and half-hour between the hours of 11 a.m. and 6 p.m. From 11 p.m. to 7 a.m., seven days a week and legal holidays, no bridgetender would be required to be in attendance and the draw would open for pleasure craft and commerical vessels if at least a one hour advance notice is given.

From December 1 through March 31, the bridge would not be manned and the bridge would be required to open on signal if at least a twelve hour advance notice is given.

At all times, the bridge would be required to open on signal as soon as possible for the passage of public vessels of the United States, state or local government vessels used for public safety and vessels in distress.

This change has been requested by the Lorain County Engineer because random bridge openings for the passage of high masted pleasure craft cause land traffic tie-ups. Traffic counts taken at the bridge show an average amount of vehicles passing over the bridge, Monday through Friday, to be from 213 to as many as 412 vehicles in a 15 minute period and from 21 to 376 vehicles in a 15 minute period on Saturdays and Sundays. Bridgetender logs show that there are as few as six minutes between bridge openings for the passage of high masted pleasure craft. Also, requests for opening the draw between the hours of 11 p.m. and 7 a.m. during the navigation season and all times during the winter months are so minimal that removing the bridgetenders during these periods of time should meet the reasonable needs of navigation.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulations and non-significant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. Commercial vessels would be unaffected except when the bridge is unattended. During the periods of time when the bridge is unattended, there is little or no significant navigation on the river. The periods of time when the bridge opens for the passage of pleasure craft on a regulated schedule should help relieve the problem of land traffic tie-ups due to the random openings of the draw while still allowing recreational boaters to navigate the river. Since the impact of this proposal is expected to so minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Proposed Requirements

In consideration of the foregoing, it is proposed that Part 117 of Title 33 of the Code of Federal Regulations be amended as follows:

PART 117—DRAWBRIDGE REQUIREMENTS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; and 49 CFR 1.46(c)(5) and 33 CFR 1.05-1(g).

2. It is proposed that Part 117 be amended by adding a new section, § 117.850, under the listing for the State of Ohio to read as follows:

§ 117.850 Black River.

The draw of the Erie Avenue bridge, mile 0.6 at Lorain, shall open on signal excepts as follows:

(a) From April 1 through November 30—

(1) From 7 a.m. to 6 p.m., Monday through Friday, except legal holidays, the draw need open only on the hour and half-hour for pleasure craft; however, the draw need not open for pleasure craft at 8 a.m., 3 p.m., 4 p.m. and 5 p.m.

(2) From 11 a.m. to 6 p.m., Saturdays, Sundays and legal holidays, the draw need open only on the hour and half-hour for pleasure craft.

(3) From 11 p.m. to 7 a.m., seven days a week and legal holidays, no bridgetender is required to be in constant attendance and the bridge shall open on signal if at least a one hour advance notice is given.

(b) From December 1 through March 31, the draw shall open on signal if at least a twelve hour advance notice is given.

(c) At all times, the draw shall open as soon as possible for public vessels of the United States, state or local government vessels used for public safety and vessels in distress.

Dated: March 11, 1986.

A. M. Danielsen,

Rear Admiral, U.S. Coast Guard Commander, Ninth Coast Guard District.

[FR Doc. 86-6171 Filed 3-19-86; 8:45 am]

BILLING CODE 4910-14-M

---

33 CFR Part 183

[CGD 85-098]

Boating Safety; Fuel System Standard

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: The Coast Guard proposes to amend its regulations on fuel systems for recreational boats by incorporating SAE Standard J1527DEC85 instead of SAE Standard J30C in Subpart J of Part 183. Under the proposal, the definitions and performance requirements for "USCG Type A" and "USCG Type B" fuel hose would be changed because the increasing level of aromatics in fuel and the use of alcohols has raised safety questions over the permeation rates and longevity of hose meeting only the minimum requirements of the present standard incorporated by reference. The intended effect of the proposed amendments is to specify four grades of fuel hose that are more resistant to alcohol permeation. Hoses used for fuel fill and vent lines would not have to offer as high a degree of resistance to alcohol permeation as hoses used for fuel distribution lines. Additional editorial changes would be made to Subpart A of Part 183 to reflect changes in the applicability of the part and to the names and addresses of organizations whose standards are incorporated by reference in Subpart J.

DATES: Comments must be received on or before June 18, 1986.

ADDRESSES: Comments should be submitted to Commandant (G-CMC/21), [CGD 85-098], U.S. Coast Guard, Washington, DC 20593. Comments will be available for examination at the Marine Safety Council (G-CMC/21), Room 2110, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593, between 8 a.m. and 4 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Alston Colihan, Office of Boating, Public and Consumer Affairs (G-BBS/43), U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593 (202) 426-1065, between 8 a.m., and 4 p.m. Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION: Interested persons are invited to submit written views, data or arguments. Persons submitting comments should include their names and addresses, identify this notice [CGD 85-098] and give reasons for their comments. Receipt of comments will be acknowledged if a stamped self-addressed postcard or envelop is enclosed.

The proposal may be changed in view of the comments received. All comments received will be considered before final action is taken on this proposal. Copies of all written comments received will be available for examination by interested persons at the Marine Safety Council address noted above. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Discussion of the Proposed Amendment

The National Boating Safety Advisory Council was consulted and its opinions and advice have been considered in the formulation of these amendments. The Council voted in favor of a proposed rule for changing the incorporation by reference from SAE Standard J30C to SAE Standard J1527DEC85 in the Fuel System Standard. The transcripts of the proceedings of the National Boating Safety Advisory Council at which this rule was discussed are available for examination in Room 4304, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC. The minutes of the meetings are available from the Exectitive Director, National Boating Safety Advisory Council, c/o Commandant (G-BBS), U.S. Coast Guard, Washington, DC 20593.

The increasing level of aromatics and the use of alcohols in fuel has raised safety questions over the permeation rates and longevity of hose meeting only the minimum requirements of the Society of Automotive Engineers (SAE) Standard J30C, incorporated by reference in § 183.506 of the Fuel Systems Standard. While alcohol boosts the octane level of gasoline, it also attacks rubber fuel hoses. Nitrile rubber fuel hoses, the most common fuel hose material used for a number of years, suffer increased swelling and elongation when soaked in alcohol-gasoline blends. Tests indicate that ethanol blended fuels may double the permeation rate in marine fuel hoses and methanol blended fuels may increase permeation by as much as two and one-half times. Under the proposal, SAE Standard J1527DEC85 would replace the existing reference to SAE Standard J30C. SAE Standard J1527DEC85 establishes a permeation rate for fuel distribution lines which is one-sixth of that specified for hose meeting SAE Standard J30C. These hoses are designated Class 1 and are marked USCG Type A1 or B1. SAE Standard J1527DEC85 also establishes a permeation rate for fuel fill and tank vent hoses which is one-half of that specified for hose meeting SAE Standard J30C. The permeation rate for these hoses is less stringent because normally they do not hold fuel for more than a few minutes. These hoses are designated Class 2 and are marked USCG Type A2 or Type B2. Manufacturers installing fill and vent lines therefore would be permitted to use either USCG Type A1, B1, A2 or B2 hoses depending upon other conditions specified in the regulations.

In SAE Standard J1527DEC85 the permeation rate is expressed in terms of the amount of fuel lost through the walls of the hose in 24 hours. Class 1, for fuel distribution lines, permits 100 grams of fuel loss per square meter of inside surface of the hose. Class 2, for fill and vent hoses, permits 300 grams. American Society for Testing and Materials (ASTM) Reference fuel "C" is used for the testing.

Since applicable portions of the Federal Boat Safety Act of 1971 has been recodified as Chapter 43 of Subtitle II of Title 46 of the United States Code

VOL 51
ISS 54
MR 20
1986
UMI

(U.S.C.), § 183.1 would be revised to show that Part 183 prescribes standards and regulations for boats and associated equipment to which 46 U.S.C. 4302 applies. The authority citation for Part 183 is being revised to reflect the recodification.

A new § 183.5 would be added which lists material approved for incorporation by reference in Part 183. Material currently approved for incorporation by reference is listed in the Finding Aids section of Chapter I of Title 33, which is not a part of the regulations. Editorial changes would be made to reflect the correct name of the organization which publishes AMCA Standard 210-74, the Air Movement and Control Association; the correct address for the Institute of Electrical and Electronic Engineers, Inc. which publishes IEEE Standard 45; and the correct address for the National Fire Protection Association which publishes NFPA No. 70.

Section 183.505 contains definitions for "USCG Type A" and "USCG Type B" fuel hose. Under the proposal, "USCG Type A1 and Type A2" and "USCG Type B1 and Type B2", which refer to different degrees of resistance to permeation, would replace the existing references in §§ 183.505, 183.528, 183.532, 183.540, 183.558, 183.568 and 183.590.

Regulatory Evaluation

These proposed regulations are considered to be non-major under Executive Order No. 12291 and non-significant under the DOT Regulatory Policies and Procedures (44 FR 11034; Feb. 26, 1979). The economic impact of this proposal has been found to be so minimal that further evaluation is unnecessary. It is estimated that the proposal to change the incorporation by reference in the Fuel Systems Standard from SAE Standard J30C to SAE Standard J1527DEC85 and the definitions for "USCG Type A" and "USCG Type B" fuel hose would result in an increased cost for fuel hose of approximately $.20 per foot. It is further estimated that 100,000 new boats would be affected annually by this rulemaking and that the average boat contains about 10 feet of fuel hose. Therefore, this rule, if promulgated, would result in a total annual cost to the industry of $200,000 or approximately $2.00 per boat. Since this rule, if promulgated, would reduce the possibility of fires and explosions caused by fuel hoses which leak fuel or vapor due to alcohol permeation, the Coast Guard considers this a minimal increase in the cost of manufacturing a boat.

Since the impact of this proposal is expected to be minimal, the agency certifies that it will not have a significant economic impact on a substantial number of small entities.

List of Subjects for 33 CFR Part 183

Marine safety.

In consideration of the foregoing, the Coast Guard proposes to amend Part 183 of Title 33, Code of Federal Regulations to read as follows:

PART 183—BOATS AND ASSOCIATED EQUIPMENT

1. The authority citation for Part 183 is revised to read as follows (all other authority citations in the Subparts of Part 183 are removed):

Authority: 46 U.S.C. 4302; 49 CFR 1.46.

2. § 183.1 is revised to read as follows:

§ 183.1 Purpose and applicability.

This part prescribes standards and regulations for boats and associated equipment to which 46 U.S.C Chapter 43 applies and to which certification requirements in Part 181 of this subchapter apply.

3. Part 183 is amended by adding a new § 183.5 to subpart A to read as follows:

§ 183.5 Incorporation by reference.

(a) Certain materials are incorporated by reference into this part with the approval of the Director of the Federal Register. The Office of the Federal Register publishes a table, "Material Incorporated by Reference", which appears in the Finding Aids section of this volume. The table contains citations of the particular sections of this part where the material is incorporated and the date of the approval by the Director of the Federal Register. To enforce any edition other than the one listed in paragraph (b) of this section, notice of change must be published in the **Federal Register** and the material made available. All approved material is on file at the Office of the Federal Register, Washington, DC 20408, and at the United States Coast Guard Boating Safety Division, Washington, DC 20593.

(b) The materials approved for incorporation by reference in this part are:

4. Section 183.505 is amended by removing the definitions for "USCG Type A Hose", and "USCG Type B Hose" and by adding the following new definitions.

§ 183.505 Definitions

* * * * *

"USCG Type A1" hose means hose that has a permeation rating of 100 grams or less fuel loss per square meter of interior surface and meets the performance requirements of:

(1) SAE Standard J1527DEC85 and the fire test in § 183.590; or

(2) Underwriters' Laboratories, Inc. (UL) Standard 1114.

"USCG Type A2" hose means hose that has a permeation rating of 300 grams or less fuel loss per square meter of interior surface and meets the performance requirements of SAE Standard J1527DEC85 and the fire test in § 183.590;

"USCG Type B1" hose means hose that has a permeation rating of 100 grams or less fuel loss per square meter of interior surface and meets the performance requirements of SAE Standard J1527DEC85.

"USCG Type B2" hose means hose that has a permeation rating of 300 grams or less fuel loss per square meter of interior surface and meets the

performance requirements of SAE Standard J1527DEC85.

5. § 183.528, paragraph (b) is revised to read as follows:

§ 183.528 Fuel stop valves.

* * * * *

(b) If tested in accordance with the fire test under § 183.590, a fuel stop valve installed in a fuel line system requiring metallic fuel lines or "USCG Type A1" or "USCG Type A2" hose must not leak fuel.

6. In § 183.532 paragraph (b) is revised to read as follows:

§ 183.532 Clips, straps and hose clamps.

* * * * *

(b) If tested in accordance with the fire test under § 183.590, a clip, strap or hose clamp installed on a fuel line system requiring metallic fuel lines or "USCG Type A1" or "USCG Type A2" hose must not separate under a one pound tensile force.

7. In § 183.540, paragraphs (a) and (b)(1) are revised to read as follows:

§ 183.540 Hoses: Identification.

(a) Each "USCG Type A1," USCG Type A2," "USCG Type B1," and "USCG Type B2" hose must be identified by the manufacturer by a marking on the hose.

(b) * * *

(1) The statement "USCG TYPE (insert A1 or A2 or B1 or B2)."

* * * * *

8. In § 183.558, paragraph (a) and paragraph (b)(1) and the introductary text of (b) (2) are revised to read as follows:

§ 183.558 Hoses and connections.

(a) Each hose between the fuel pump and the carburetor must be "USCG Type A1" hose.

(b) * * *

(1) "USCG Type A1" or "USCG Type A2" hose; or

(2) "USCG Type A1" or "USCG Type A2" or "USCG Type B1" or "USCG Type B2" hose, if no more than five ounces of fuel is discharged in 2½ minutes when:

* * * * *

9. In § 183.568, paragraph (c) introductary text is revised to read as follows:

§ 183.568 Anti-siphon protection.

* * * * *

(c) Provided that the fuel tank top is below the level of the carburetor inlet, be metallic fuel lines meeting the construction requirements of § 183.538 or "USCG Type A1" hose, with one or two manual shutoff valves installed as follows:

* * * * *

10. In § 183.590, paragraph (a)1) is revised to read as follows:

§ 183.590 Fire test.

(a) * * *

(1) Fuel stop valves, "USCG Type A1" or "USCG Type A2" hoses, clips, straps and hose clamps are tested in a fire chamber.

* * * * *

Dated: March 17, 1986.

T.T. Matteson,

Rear Admiral (Lower Half), U.S. Coast Guard, Chief, Office of Boating, Public and Consumer Affairs.

Corps of Engineers, Department of the Army

33 CFR Parts 323 and 326

Proposal To Amend Permit Regulations for Controlling Certain Activities in the Waters of the United States

AGENCY: Army Corps of Engineers, DOD.

ACTION: Proposed rule.

SUMMARY: The Department of the Army is proposing to amend 33 CFR Part 326 to reflect the sequence of enforcement actions, to clarify ambiguous procedures and language, and to provide district engineers with the flexibility needed to resolve violations in the most effective manner and to be able to concentrate existing staff resources on the most critical enforcement actions. Some procedures in this part would be revised to provide for a more practical approach to certain enforcement problems. The Army is also proposing changes to 33 CFR Part 323 in response to recent court decisions. These changes reflect the Army's policy regarding *de minimis* or incidental soil movement occurring during normal dredging operations.

DATE: Written comments must be received by April 21, 1986.

ADDRESS: Office of the Chief of Engineers, ATTN: DAEN-CWO-N, Washington, DC 20314-1000.

FOR FURTHER INFORMATION CONTACT:

Mr. Chuck Foster

or

Mr. Jack Chowning, Regulatory Branch, (202) 272-0199.

SUPPLEMENTARY INFORMATION:

Proposed Changes

Part 323—Permits for Discharges of Dredged or Fill Materials Into Waters of the United States

Section 323.2(j): A sentence would be added to this section to clarify our longstanding policy that *de minimis* or incidental soil movement occurring during normal dredging operations, such as the drippings from a dragline bucket, are not considered to be a discharge of dredged material for purposes of section 404. This policy was formally announced in Regulatory Guidance Letter 81-4, issued on June 3, 1981. All the guidance letters issued in 1981 expired December 31, 1983. To the extent that the decision of the U.S. District Court for the Northern District of Ohio in *Reid* v. *Marsh,* No. C-81-690 (N.D. Ohio, 1984), could be construed as including a holding inconsistent with this longstanding Corps of Engineers interpretation of section 404, we believe that it can be explained by our failure to express the *de minimis* rule clearly in Corps regulations. Thus the proposed rule includes a provision clearly stating that *de minimis* or incidental soil movement occurring during normal dredging operations do not require 404 permits.

Part 326—Enforcement

Title: The title of this part would be shortened from "Enforcement, Supervision and Inspection" to simply "Enforcement."

Section 326.1: This section would be modified to provide a general outline of Part 326.

Section 326.2: This section would be added to identify the general policy objective of the Corps' enforcement program.

Section 326.3: This section would generally include the procedures previously found in §§ 326.2 and 326.3. Most of the changes relate to improving clarity, organization and flexibility. However, the revisions in this section would also provide new legal options for enforcing the orders, directives, and decisions of district engineers; and a provision for interim protective measures where simply stopping the illegal work in progress would be inappropriate.

Section 326.4: This section would generally include procedures previously found in § 326.5. In § 326.4(c), we would introduce revisions to fully implement section 404(s) of the Clean Water Act.

Section 326.5: This section would generally include the procedures previously found in § 326.4. These procedures would be rewritten to make

VOL
51
ISS
54
MR
20
1986
UMI

clear the discretionary nature, under the relevant statutes, of the district engineer's selection of the appropriate legal action to pursue. Further, § 326.5(e) would be added to allow district engineers to close case records on those violations that do not warrant legal action or the processing of a permit. Typically, enforcement actions on such minor violations, not involving repeat offenders, can be resolved with appropriate correspondence.

Note 1.—The Department of the Army has determined that the proposed regulation revisions do not contain a major proposal requiring the preparation of a regulatory analysis under E.O. 12291.

Note 2—The term "he" and its derivatives used in these regulations are generic and should be considered as applying to both male and female.

List of Subjects

33 CFR Part 323

Navigation, Water pollution control, Waterways.

33 CFR Part 326

Investigations, Intergovernmental relations, Law enforcement, Navigation, Water pollution control, Waterways.

Dated: March 6, 1986.

Approved:

Robert K. Dawson,

Assistant Secretary of the Army (Civil Works).

Accordingly, the Department of the Army proposes to amend 33 CFR Parts 323 and 3261 as set forth below:

PART 323—PERMITS FOR DISCHARGES OF DREDGED OR FILL MATERIAL INTO WATERS OF THE UNITED STATES

1. The authority citation for 33 CFR Part 323 continues to read:

Authority: 33 U.S.C. 1344.

2. Section 323.2 is amended by revising paragraph (j) to read:

§ 323.2 Definitions.

* * * * *

(j) The term "discharge of dredged material" means any addition of dredged material into the waters of the United States. The term includes, without limitation, the addition of dredged material to a specified discharge site located in waters of the United States and the runoff or overflow from a contained land or water disposal area. Discharges of pollutants into waters of the United States resulting from the onshore subsequent processing of dredged material that is extracted for any commercial use (other than fill) are not included within this term and are subject to section 402 of the Clean Water Act even though the extraction and deposit of such material may require a permit from the Corps of Engineers. The term does not include plowing, cultivating, seeding and harvesting for the production of food, fiber, and forest products; see § 323.4 for the definitions. The term does not include *de minimis* or incidental soil movement occurring during normal dredging operations, such as the drippings from a dragline bucket, backhoe, clamshell, or other similar types of equipment.

* * * * *

3. Part 326 is revised to read:

PART 326—ENFORCEMENT

Sec.
326.1 Purpose.
326.2 Policy.
326.3 Unauthorized activities.
326.4 Supervision of authorized activities.
326.5 Legal action.

Authority: 33 U.S.C. 401 et seq.; 33 U.S.C. 1344; 33 U.S.C. 1413.

§ 326.1 Purpose.

This regulation prescribes enforcement policies (Section 326.2) and procedures applicable to activities performed without required Department of the Army permits (Section 326.3) and to activities not in compliance with the terms and conditions of issued Department of the Army permits (Section 326.4). Procedures for initiating legal actions are prescribed in § 326.5.

§ 326.2 Policy.

Enforcement, as part of the Corps' overall regulatory program, is based on a policy of regulating the waters of the United States by discouraging activities that have not been properly authorized and by requiring corrective measures, where appropriate, to ensure those waters are not misused and to maintain the integrity of the program. There are several methods discussed in the remainder of this part which can be used either singly or in combination to implement this policy, while making the most effective use of the enforcement resources available.

§ 326.3 Unauthorized activities.

(a) *Surveillance*. To detect unauthorized activities requiring permits, district engineers should make the best use of all available resources. Corps employees; members of the public; and representatives of state, local, and other Federal agencies should be encouraged to report suspected violations. Additionally, district engineers should consider developing joint surveillance procedures with Federal, state, or local agencies having similar regulatory responsibilities, special expertise, or interest.

(b) *Initial investigation.* District engineers should take steps to investigate suspected violations in a timely manner. The scheduling of investigations will reflect the nature and location of the suspected violations, the anticipated impacts, and the most effective use of inspection resources available to the district engineer. These investigations should confirm whether a violation exists, and if so, will identify the extent of the violation and the parties responsible.

(c) *Formal notification to parties responsible for violations.* Once the district engineer has determined that a violation exists, he should take appropriate steps to notify the responsible parties.

(1) If the violation involves a project that is not complete, the district engineer's notification should be in the form of a cease and desist order prohibiting any further work pending resolution of the violation in accordance with the procedures contained in this part. See subparagraph (4) below for exception to this procedure.

(2) If the violation involves a completed project, the district engineer's notification should normally direct the parties responsible not to initiate any additional work before obtaining required Department of the Army authorizations.

(3) All notifications should identify the relevant statutory authorities and will direct the responsible parties to submit any additional information that the district engineer may need at that time to determine what initial corrective measures, if any, are required; further information may be requested, as needed, in the future.

(4) In situation which would, if a violation were not involved, qualify for emergency procedures pursuant to 33 CFR 325.2(e)(4), the district engineer may decide it would not be appropriate to direct that the unauthorized work be stopped. Therefore, in such situations, the district engineer may, at his discretion, allow the work to continue, subject to appropriate limitations and conditions as he may prescribe, while the violation is being resolved in accordance with the procedures contained in this part.

(5) When an unauthorized activity requiring a permit has been undertaken by American Indians (including Alaskan natives, Eskimos, and Aleuts, but not including Native Hawaiians) on reservation lands or in pursuit of specific treaty rights, the district

engineer should use appropriate means to coordinate proposed directives and orders with the Assistant Chief Counsel for Indian Affairs (DAEN–CCI).

(6) When an unauthorized activity requiring a permit has been undertaken by an official acting on behalf of a foreign government, the district engineer should use appropriate means to coordinate proposed directives and orders with the Office, Chief of Engineers, ATTN: DAEN–CCK.

(d) *Initial corrective measures.* (1) The district engineer should, in appropriate cases, depending upon the potential impacts of the unauthorized completed work, solicit the views of the Environmental Protection Agency; the U.S. Fish and Wildlife Service; the National Marine Fisheries Service, and other Federal, state, and local agencies to facilitate his decision on what initial corrective measures are required. If the district engineer determines as a result of his investigation, coordination, and preliminary evaluation that initial corrective measures are required, he should issue an appropriate order to the parties responsible for the violation. In determining what initial corrective measures are required, the district engineer should consider whether serious jeopardy to life, property, or important public resources (see 33 CFR 320.4) may be reasonably anticipated to occur during the period required for the ultimate resolution of the violation. In his order, the district engineer will specify the initial corrective measures required and the time limits for completing this work. In unusual cases where initial corrective measures substantially eliminate all current and future detrimental impacts resulting from the unauthorized work, further enforcement actions should normally be unnecessary. For all other cases, the district engineer's order should normally specify that compliance with the order will not foreclose the Government's options to initiate appropriate legal action or to later require the submission of a permit application.

(2) An order requiring corrective measures that resolve the violation may also be issued by the district engineer in situations where an application for an after-the-fact permit cannot be accepted or where such acceptance would not be appropriate (see § 326.3(3)). However, such orders will be issued only when the district engineer has reached an independent determination that such measures are necessary and appropriate.

(e) *After-the-fact permit applications.* (1) Following the completion of any required initial corrective measures, the district engineer will accept an after-the-fact permit application unless he determines that one of the exceptions listed in subparagraphs i–v below is applicable. Applications for after-the-fact permits will be processed in 33 CFR Parts 320–325. Situations where no permit application will be processed or where the acceptance of a permit application must be deferred are as follows:

(i) No permit application will be processed for initial corrective measures (§ 326.3(d)) undertaken at the direction of the district engineer.

(ii) No permit application will be processed when restoration of the waters of the United States has been completed that eliminates current and funture deterimental impacts to the statisfaction of the district engineer.

(iii) No permit application will be accepted in connection with a violation where the district engineer determines that legal action is appropriate (§ 326.5(a)) until such legal action has been completed.

(iv) No permit application will be accepted where a Federal, state, or local authorization or certification, required by Federal law, has already been denied.

(v) No permit application will be accepted nor will the processing of an application be continued when the district engineer is aware of litigation that has been initiated by other Federal, state, or local regulatory agencies, unless he determines that concurrent processing of an after-the-fact permit application is clearly appropriate.

(2) Upon completion of his review in accordance with 33 CFR Parts 320–325, the district engineer will determine if a permit should be issued, with special conditions if appropriate, or denied. In reaching a decision to issue, he must determine that the work involved is not contrary to the public interest, and if section 404 is applicable, that the work also complies with the Environmental Protection Agency's section 404(b)(7) guidelines. If he determines that a denial is warranted, his notification of denial should prescribe any final corrective actions required and should establish a reasonable period of time for the applicant to complete such actions unless he determines that further information is required, the final corrective measures may be specified at a later date. If an applicant refuses to undertake prescribed corrective actions ordered subsequent to permit denial or refuses to accept a conditioned permit, the district engineer may initiate legal action in accordance with § 326.5.

(f) *Combining steps.* The procedural steps in this section are in the normal sequence. However, these regulations do not prohibit the streamlining of the enforcement process through the combining of steps.

(g) *Coordination with EPA.* In all cases where the district engineer is aware that EPA has issued an order under section 309 of the Clean Water Act or that EPA has referred, or is preparing to refer, a violation to the Department of Justice, he should consult with EPA, as appropriate, to attempt to avoid conflict.

§ 326.4 Supervision of authorized activities.

(a) *Inspections.* District engineers should take reasonable measures to inspect permitted activities to insure that these activities comply with specified terms and conditions. To supplement inspections by their enforcement personnel, district engineers should encourage their other personnel; members of the public; and interested state, local, and other Federal agency representatives to report suspected violations of Corps permits. To facilitate inspections, district engineers may, in appropriate cases, require that copies of ENG Form 4336 be posted conspicuously at the sites of authorized activities and will make available to all interested persons information on the terms and conditions of issued permits. The U.S. Coast Guard will inspect permitted ocean dumping activities pursuant to section 107(c) of the Marine Protection, Research and Sanctuaries Act of 1972, as amended.

(b) *Inspection expenses.* The expenses incurred in connection with the inspection of permitted activities will normally be paid by the Federal Government unless daily supervision or other unusual expenses are involved. In such unusual cases, the district engineer may condition permits to require permittees to pay inspection expenses pursuant to the authority contained in section 9701 of Pub. L. 97–258 (33 U.S.C. 9701). The collection and disposition of inspection expense funds obtained from applicants will be administered in accordance with the relevant Corps regulations governing such funds.

(c) *Non-compliance.* If a district engineer determines that a permittee has violated the terms or conditions of the permit and that the violation is sufficiently serious to require an enforcement action, then normally he should: (1) First contact the permittee; (2) request corrected plans reflecting actual work, if needed; and (3) attempt to resolve the violation. Resolution of the violation may take the form of the permitted project being voluntarily brought into compliance or of a permit

1986
UMI

modification (33 CFR 325.7(b)). If a mutually agreeable solution cannot be reached, a written order requiring compliance should normally be issued and delivered by personal service. Issuance of an order is not, however, a prerequisite to legal action. If an order is issued, it will specify a time period of not more than 30 days for bringing the permitted project into compliance, and a copy will be sent to the appropriate state official pursuant to section 404(s)(2) of the Clean Water Act. If the permittee fails to comply with the order within the specified period of time, the district engineer may consider using the suspension/revocation procedures in 33 CFR 325.7(c) and/or he may recommend legal action in accordance with § 326.5.

§ 326.5 Legal action.

(a) *General.* For cases the district engineer determines to be appropriate, he will recommend criminal or civil actions to obtain penalties for violations, compliance with the orders and directives (§§ 326.3(c–d) and 326.4(c)) he has issued, or other relief as appropriate. Appropriate cases for criminal or civil action include, but are not limited to, violations which, in the district engineer's opinion, are willful, repeated, or flagrant.

(b) *Preparation of case.* If the district engineer determines that legal action is appropriate, he will prepare a litigation report or such other documentation that he and the local U.S. Attorney have mutually agreed to, which contains an analysis of the information obtained during his investigation of the violation or during the processing of a permit application and a recommendation of appropriate legal action. The litigation report or alternative documentation will also recommend what, if any, restoration or mitigative measures are required and will provide the rationale for any such recommendation.

(c) *Referral to the local U.S. Attorney.* Except as provided in paragraph (d) below, district engineers are authorized to refer cases directly to the U.S. Attorney. Because of the unique legal system in the Trust Territories, all cases over which the Department of Justice has no authority will be referred to the Attorney General for the Trust Territories. Information copies of all letters of referral shall be forwarded to the appropriate division counsel, the Office, Chief of Engineers, ATTN: DAEN–CCK, and the Office of the Assistant Secretary of the Army (Civil Works).

(d) *Referral to the Office, Chief of Engineers.* District engineers will forward litigation reports through division offices with recommendations to the Office, Chief of Engineers, ATTN: DAEN–CCK, for all cases that quality under the following criteria:

(1) Significant precedential or controversial questions of law or fact;

(2) Discharges of dredged or fill materials into the waters of the United States that are not interstate waters or navigable waters of the United States or part of a surface tributary system to these waters;

(3) Requests for elevation to the Washington level by the Department of Justice;

(4) Violations of section 9 of the Rivers and Harbors Act of 1899;

(5) Violations of section 103 the Marine Protection, Research and Sanctuaries Act of 1972;

(6) All cases involving vioaltions by American Indians (original of litigation report to DAEN–CCI with copy to DAEN–CCK) on reservation lands or in pursuit of specific treaty rights;

(7) All cases involving violations by officials acting on behalf of foreign governments; and

(8) Cases requiring action pursuant to subparagraph (e) below.

(e) *Legal option not available.* In cases where the local U.S. Attorney declines to take legal action, it would be appropriate for the district engineer to close the enforcement case record unless he believes that the case warrants special attention. In that situation, he may forward a litigation report to the Office, Chief of Engineers, ATTN; DAEN–CCK, for direct coordination through the Office of the Assistant Secretary of the Army (Civil Works) with the Department of Justice. Further, the case record should not be closed if the district engineer anticipates that further administrative enforcement actions, taken in accordance with the procedures prescribed in this part, will identify remedial measures which, if not complied with by the parties responsible for the violation, will result in appropriate legal action at a later date.

Notices

Federal Register
Vol. 51, No. 54
Thursday, March 20, 1986

This Section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 86–012]

Viruses, Serums, Toxins, and Analogous Products; Amendment of the Virus-Serum-Toxic Act of 1913

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This document gives notice of new licensing requirements under the Virus-Serum-Toxic Act of 1913, 21 U.S.C. 151–158. The Act was amended by the Food Security Act of 1985, approved December 23, 1985. The amendment requires that, unless exempted, all producers of veterinary biological products shipping such products anywhere in the United States or exporting them, must be licensed by the Department of Agriculture.

FOR FURTHER INFORMATION CONTACT: Dr. David F. Long, Chief Staff Veterinarian, Veterinary Biologics Staff, VS, APHIS, USDA, Room 834, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8674.

SUPPLEMENTARY INFORMATION: Effective December 23, 1985, it is unlawful for any person, not exempted by regulation, to ship a veterinary biological product anywhere in the United States, or to export such product unless that product is prepared "under and in compliance with regulations prescribed by the Secretary of Agriculture, at an establishment holding an unsuspended and unrevoked license issued by the Secretary of Agriculture . . .". The amendment to the Virus-Serum-Toxin Act provides that, in the case of a person preparing a veterinary biological product solely for intrastate commerce or for export during the 12-month period ending December 23, 1985, such product will not be considered to be in violation of the Act as a result of its not being produced under license until the 1st day of the 49th month following December 23, 1985, that is, until January 1, 1990.

This notice is issued to inform the biologics industry and other interested persons that the 4-year exemption granted under the Act is not automatic and must be claimed by the person, or corporation affected in the form and manner prescribed by the Secretary. All such claims for the exemption must be made by the 1st day of the 13th month following December 23, 1985, which is January 1987.

The Department is in the process of developing rules which specifically address the exemption process and other requirements under the Act. Pending issuance of these rules and in order to facilitate implementation of the new amendments and the 4-year exemption provision, a person, firm, or corporation may claim the exemption by filing an application for an establishment license and a product license for each product which qualifies for the exemption. The filing of such applications shall be deemed by the Department to satisfy the statutory requirements for claiming the exemption. Rules and regulations with respect to licensing may be found at 9 CFR 101.1 *et seq.* Application forms, along with instructions and assistance, may be obtained by calling or writing to Dr. David A. Espeseth, Senior Staff Veterinarian, Veterinary Biologics Staff, VS, APHIS, USDA, Room 829, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8245.

Done at Washington, DC, this 17th day of March 1986.

J.K. Atwell,

Deputy Administrator, Veterinary Services.

[FR Doc. 86–6138 Filed 3–19–86; 8:45 am]

BILLING CODE 3410–34–M

Soil Conservation Service

Environmental Statements; Dorchester Village RC&D Measure Plan, Georgia

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Dorchester Village RC&D Measure Plan, Liberty County, Georgia.

FOR FURTHER INFORMATION CONTACT: B.C. Graham, State Conservationist, Soil Conservation Service, Federal Building, Box 13, 355 East Hancock Avenue, Athens, Georgia 30601; telephone: 404–546–2273.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, B.C. Graham, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The project concerns are flooding which causes economic losses and social well being losses to area residents. The planned works of improvement include two flood prevention channels.

The Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency, Federal, State, and local agencies, and interested parties. Basic data developed during the environmental assessment are on file and may be reviewd by contacting Mr. B.C. Graham. A limited number of copies of the environmental assessment are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.901—Resource Conservation and Development—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials)

Dated: March 12, 1986.

B.C. Graham,

State Conservationist.

Environmental Statements; South Delta Watershed, MS

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of Intent to Prepare an Environmental Impact Statement.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is being prepared for the South Delta Watershed, Humphreys, Sharkey, and Yazoo Countries, Mississippi.

FOR FURTHER INFORMATION CONTACT: A.E. Sullivan, State Conservationist, Soil Conservation Service, 1321 Federal Building, 100 West Capitol Street, Jackson, Mississippi 39269, telephone 601-965-5205.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project may cause significant local, regional, or national impacts on the environment. As a result of these findings, A.E. Sullivan, State Conservationist, has determined that the preparation and review of an environmental impact statement are needed for this project.

The project concerns a plan for watershed protection, flood prevention, and drainage. Alternatives under consideration to reach these objectives include systems for conservation land treatment and channel improvement.

A draft environmental impact statement will be prepared and circulated for review by agencies and the public. The Soil Conservation Service invites participation and consultation of agencies and individuals that have special expertise, legal jurisdiction, or interest in the preparation of the draft environmental impact statement. Further information on the proposed action may be obtained from A.E. Sullivan, State Conservationist, at the above address.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904—Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with state and local officials)

Dated: March 13, 1986.

A.E. Sullivan,

State Conservationist.

BILLING CODE 3410-16-M

COMMISSION ON CIVIL RIGHTS

Colorado Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Subcommittee of the Colorado Advisory Committee to the Commission will convene at 1:00 p.m. and adjourn at 9:00 p.m., on April 11, 1986, at the Holiday Inn, 800 Camino Del Rio, Durango, Colorado. The purpose of the meeting is to conduct a community forum to gather information on problems related to Hispanic dropouts.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Maxine Kurtz or William Muldrow, Acting Director of the Rocky Mountain Regional Office at (303) 844-2211, (TDD 303/844-3031). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, March 14, 1986.

Ann E. Goode,

Program Specialist for Regional Programs.

[FR Doc. 86-6111 Filed 3-19-86; 8:45 am]

BILLING CODE 6335-01-M

Florida Advisory Committee; Meeting Amendment

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Florida Advisory Committee to the Commission previously scheduled for April 3, 1986, convening at 1:00 p.m. and adjourning at 6:00 p.m., at the Biscayne Bay Marriott Hotel, Miami, Florida has a new meeting date and time.

The meeting location will remain the same. The date of the meeting will be April 25, 1986, convening at 10:30 a.m. and adjourning at 4:00 p.m.

Dated at Washington, DC, March 14, 1986.

Ann E. Goode,

Assistant Staff Director for Regional Programs.

[FR Doc. 86-6112 Filed 3-19-86; 8:45 am]

BILLING CODE 6335-01-M

Maine Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Maine Advisory Committee to the Commission will convene at 7:00 p.m. and adjourn at 9:00 p.m. on April 10, 1986, at the Holiday Inn, Board Room, Western Avenue, Augusta, Maine. The purpose of the meeting is to continue discussion of the proposed project concept on the civil rights of Maine Indians.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Richard Morgan or Jacob Schlitt, Director of the New England Regional Office at (617) 223-4671, (TDD 617/223-0344). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, March 14, 1986.

Donald A. Deppe,

Program Specialist for Regional Programs.

[FR Doc. 86-6109 Filed 3-19-86; 8:45 am]

BILLING CODE 6335-01-M

Missouri Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Missouri Advisory Committee to the Commission will convene at 11:00 a.m. and adjourn at 9:00 p.m. on April 9, 1986, and convene at 8:30 a.m. and adjourn at 12:00 noon on April 10, 1986, at the City Hall, Daniel Boone Building, 3rd Floor, 701 East Broadway, Columbia, Missouri. The purpose of the meeting is to review the status of civil rights in Missouri and engage in future program planning.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Morrie Zimring or Melvin Jenkins Director of the Central

States Regional Office at (816) 374-5253, (TDD 816/374-5009). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, March 14, 1986.

Donald A. Deppe,

Program Specialist for Regional Programs.

Washington Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Washington Advisory Committee to the Commission will convene at 1:00 p.m. and adjourn at 4:00 p.m. on April 7, 1986, at the Federal Building, Room 2886, 915 Second Avenue, Seattle, Washington. The purpose of the meeting is to engage in future program planning.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Roger Manseth or Susan McDuffie, Director of the North Western Regional Office at (206) 442-1245, (TDD 206/442-4744). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, March 17, 1986.

Ann Goode,

Program Specialist for Regional Programs.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 9-86]

Proposed Foreign-Trade Zone—Franklin County, OH, Within the Columbus Customs Port of Entry; Application and Public Hearing

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Rickenbacker Port Authority, a political subdivision of the State of Ohio, requesting authority to establish a general-purpose foreign-trade zone in Franklin County, Ohio, within the Columbus Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on March 7, 1986. The applicant is authorized to make this proposal under section 1743.11 of the Ohio Revised Code.

The proposed foreign-trade zone involves the 1642-acre Rickenbacker Air Industrial Park, located at Alum Creek Road and Route 317 in southeastern Franklin County. The project has existing warehouse buildings as well as open space for firms requiring their own facilities. Diversified/Turner Company, which is the airpark developer, has been designated to operate the zone.

The application contains evidence of the need for zone services in the Columbus area. Several firms have indicated an interest in using zone procedures for general warehousing and for handling products such as truck chassis, utility vehicles and pharmaceuticals. No manufacturing approvals are being sought at this time. Such requests would be made to the Board on a case-by-case basis.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: John J. Da Ponte, Jr. (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; John F. Nelson, District Director, U.S. Customs Service, North Central Region, 6th Floor, Plaza Nine Building, 55 Erieview Plaza, Cleveland, Ohio 44114; and Colonel Robert B. Wilson, District Engineer, U.S. Army Engineer District Huntington, 502 8th Street, Huntington, West Virginia 25701.

As part of its investigation, the examiners committee will hold a public hearing on April 16, 1986, beginning at 9:00 a.m., in the Main Conference Room of the Columbus Area Chamber of Commerce Building, 37 North High Street, Columbus.

Interested parties are invited to present their views at the hearing. Persons wishing to testify should notify the Board's Executive Secretary in writing at the address below or by phone (202/377-2862) by April 9. Instead of an oral presentation, written statements may be submitted in accordance with the Board's regulations to the examiners committee, care of the Executive Secretary, at any time from the date of this notice through May 16, 1986.

A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

Port Director's Office, U.S. Customs Service, Port Columbus Int'l Airport, 4600 17th Avenue, Rm 221, Columbus, Ohio 43219.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Rm 1529, 14th and Pennsylvania, NW., Washington, DC 20230.

Dated: March 14, 1986.

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-M

International Trade Administration

[Case No. OEE-2-85]

Werner Scheele et al.; Export Privileges

In the matter of Werner Scheele, individually and doing business as CHB COMPUTER HARDWARE VERTRIEBS GmbH a/k/a CHB GmbH and COMSERV GmbH and COMSERV COMPUTER LEASING GmbH with addresses at 427 Langenberger Strasse, 4300 Essen 14, Federal Republic of Germany and 449-451 Langenberger Strasse, 4300 Essen 14, Federal Republic of Germany, BENGT ANDERSSON, individually with an address at Bodalsvagen 20 XII, Lidingo, Sweden, and doing business as BEA Computer, Vasagatan 15-17, S-111 20 Stockholm, Sweden and Beacom International AB, Vasagatan 15-17, S-111 20 Stockholm, Sweden, VEB Deutrans International, Sassnitzgatan 2, 231 00 Trelleborg, Sweden, respondents.

Decision and Order

By letter dated February 17, 1986, Werner Scheele, on behalf of himself and CHB Computer Hardware Vertriebs GmbH, also known as CHB GmbH, and Comserv Computer Leasing GmbH (hereinafter collectively referred to as "Scheele") appealed the renewal of the temporary denial order ("TDO") issued against them by the Deputy Assistant Secretary for Export Enforcement on February 6, 1986 (51 FR 5389 (February 13, 1986)). The appeal was filed in the Office of Administrative Law Judges on February 28, 1986. In accordance with § 388.19 of the Export Administration Regulations (15 CFR Parts 368 through

399 (1985)) (the "Regulations"),[1] the Office of Export Enforcement, International Trade Administration, United States Department of Commerce (the "Department") timely submitted its response to Scheele's appeal.

In its Response, the Department, without indicating reasons therefor, stated that it did not oppose Scheele's request that the TDO be vacated. The Administrative Law Judge, finding no sufficient basis for maintaining a TDO, also recommended that the TDO be vacated. The Department has stated that it does not intend to file a request for renewal of the TDO on or before March 19, 1986.

Accordingly, pursuant to the authority granted to me by § 388.19 of the Regulations, I hereby vacate, effective immediately, the TDO issued on February 6, 1986, against Werner Scheele, individually and doing business as CHB Computer Hardware Vertriebs GmbH, a/k/a/ CHB GmbH, Comserv GmbH, and Comserv Computer Leasing GmbH, all of Essen, Federal Republic of Germany, and against Bengt Andersson of Lidingo, Sweden, individually and doing business as BEA Computer and Beacom International AB of Stockholm, Sweden, and against VEB Deutrans International of Trelleborg, Sweden. This Order sets forth the sole basis for my decision in this proceeding and shall be published in the **Federal Register**.

Dated: March 13, 1986.

Paul Freedenberg,

Assistant Secretary for Trade Administration.

[C-201-009]

Iron-Metal Construction Castings From Mexico; Final Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice of final results of countervailing duty administrative review.

SUMMARY: On October 24, 1985, the Department of Commerce published the preliminary results of its administrative review of the countervailing duty order on certain iron-metal construction castings from Mexico. The review covers the period December 1, 1982 through March 31, 1983 and eight programs.

We gave interested parties an opportunity to comment on the preliminary results. After considering all of the comments received, the Department has determined the bounty or grant during the period of review to be 0.08 percent *ad valorem*, a rate the Department considers to be *de minimis*.

EFFECTIVE DATE: March 20, 1986.

FOR FURTHER INFORMATION CONTACT: Christopher Beach or Stephen Nyschot, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On March 2, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (48 FR 8834) a final determination and countervailing duty order on certain iron-metal construction castings from Mexico. We began this review of the order under our old regulations on May 28, 1983, and sent a questionnaire to the Mexican government on that day. After the promulgation of our new regulations, a group of Mexican exporters, on September 13, 1985, requested that we complete the administrative review, in accordance with section 355.10(a) of the Commerce Regulations. We published the new initiation and preliminary results of administrative review on October 24, 1985 (50 FR 43262). We have now completed the administrative review, in accordance with section 751 of the Tariff Act of 1930.

Scope of the Review

Imports covered by the review are shipments of Mexican iron-metal construction castings, including manhole covers, rings and frames, catch basin frames and grates, cleanout covers and grates, meter boxes, and valve boxes. These castings are commonly called municipal or public works castings. Such merchandise is normally classifiable under items 657.0950 and 657.0990 of the Tariff Schedules of the United States Annotated ("TSUSA"). However, alloyed municipal castings are currently classifiable under TSUSA items 657.2540 and 657.2550. After reviewing the petition and the Department's final determination in this case, we do not find any indication of an intent to limit the scope of the order to non-alloyed castings. Therefore, we determine that the order covers municipal or public works castings, whether or not alloyed.

The review covers the period December 1, 1982 through March 31, 1983 and eight programs: (1) FONEI; (2) FOGAIN; (3) state tax incentives; (4) CEDI; (5) CEPROFI; (6) FOMEX; (7) import duty reductions and exemptions; and (8) FOMIN.

Analysis of Comments Received

We gave interested parties an opportunity to comment on the preliminary results. At the request of the petitioners, we held a public hearing on December 9, 1985.

Comment 1: The petitioners argue that the Department's verification report describes three different methodologies for calculating the benefits from the state tax incentives. The widely differing benefits calculated indicate that those methods are inconsistent. The program involves an exemption from a state tax based on wages, and labor costs should not differ greatly among foundries producing similar castings by similar methods. Further, the Department did not use the amount of exemption that it verified existed for Fundiciones Tijuana. Finally, the Department's practice of weight-averaging each firm's benefit according to its share of exports to the U.S., instead of allocating all firms' benefits over total Mexican exports to the U.S., undervalues the total *ad valorem* benefit because of the Department's greater use of the rounding of numbers. The rounding effectively eliminates the benefits to small producers. This is particularly important in a case like this where the aggregate net bounty or grant is close to the 0.5 percent cutoff for *de minimis* rates.

Department's Position: While lacking parallel data for all firms, the Department used the same methodology for all firms in calculating the benefit from state tax incentives. The Baja California state tax on wages and salaries is by statute equal to 75 percent of the one percent federal housing tax, which is in turn tied to wages and salaries. Five companies were eligible for an exemption from this tax during the period of review. The Mexican government reported that only one of them used the program during the period of review. We conducted verifications at three of the five firms and found that all three used the program. We obtained and verified and actual amount of federal housing taxes that Fundiciones Tijuana paid during the review period and that Arechiga Sarinana paid in 1982. However, we were not able to obtain data on housing taxes from the third verified firm, B.C. 76. Therefore, we used that company's total federal tax liability as a substitute for its housing tax liability. For the two eligible firms that we did not verify, we have now chosen the highest *ad valorem* rate among the

---

[1] Parts 387 and 388 of the Regulations were recently amended and republished. *See* 50 FR 53130 (December 30, 1985).

three verified firms and then weight-averaged the two additional rates with the three verified rates according to each firm's share of exports to the U.S.

Labor costs may differ greatly in absolute terms among foundries because the work forces vary substantially in size. Nonetheless, the proportion of the work force (and therefore of the exemption) to the total production of two of the three verified firms is similar. We could not judge the labor costs for B.C. 76, where we had to rely on the total federal tax liability as the basis for our calculations rather than on the federal housing tax liability.

We agree that we used the wrong figure for Fundiciones Tijuana's federal housing tax liability and have recalculated the benefit using the verified amount. In the preliminary results, we used the full 12-month exemption for Arechiga Sarinana. To calculate the benefit for the review period, we have now used one-third of the 1982 figure. Finally, in our weight-averaging in the preliminary results, we calculated the weights for the two unverified firms by using each firm's exports expressed in dollars and total Mexican exports to the U.S. expressed in pesos. We have now used dollar figures for both. After making these adjustments, we determine the total bounty or grant from the program to be 0.04 percent *ad valorem*.

We fail to see how rounding eliminates the benefits to small producers from the aggregate net subsidy. Both the benefit (the numerator) and the exports (the denominator) are correspondingly small. Thus, there is no increased likelihood that benefits of small producers (in contrast to those of large producers) will be eliminated from the calculation. Even extending the numbers in our calculations to six decimal places does not change the total bounty or grant from the program.

Comment 2: The petitioners contend that the Government of Mexico's questionnaire response shows three loans under the FOGAIN program, but that the Department included only two of the loans in its calculations.

Department's Position: We agree and have now included benefits from the third loan, which Arechiga Sarinana obtained in 1980. At that time, the highest rate available under FOGAIN was 21 percent. Using the long-term loan methodology described in the preliminary results, we determine the benefit from all three loans to be 0.02 percent (see also Comment 7).

Comment 3: The petitioners contend that the commerical benchmark for preferential loans should include the effects of prepayment of interest, commissions, and compensating balances. Further, the Department should evaluate the preferential loans in light of payment holidays for such loans.

Department's Position: We agree that the comparison of effective preferential loan terms to effective commercial loan terms is the most appropriate method for measuring the benefit from preferential loans. However, when we do not have information on such practices as prepayment of interest, grace periods, compensating balances, or fees and commissions, we must often rely on a comparison of nominal interest rates. The terms of the FONEI and FOGAIN loans that we examined in this case do not include payment holidays on interest. Furthermore, we have no evidence that prepayment of interest, commissions, or compensating balance requirements are uniform commercial practices in Mexico. Therefore, we have used nominal interest rates to measure the benefits from the FONEI and FOGAIN programs.

Comment 4: The petitioners contend that the benefits from the FOMEX loans found countervailable during the original investigation extend into the current review period because the life of the loans themselves extend into the review period.

Department's Position: We disagree. We consider the benefit from preferential loans to occur when a company realizes the interest saving or "cash-flow" effect. We determined that the exporters did not receive any benefits from FOMEX loans during the current review period because no interest or principal payments on FOMEX loans came due during the period for either new FOMEX loans during the review period or old FOMEX loans still outstanding during the period.

Comment 5: The petitioners state that the Department failed to investigate the use of import duty reductions and exemptions with regard to machinery or parts imported prior to the review period. The Department should allocate such benefits over the useful life of the imported equipment.

Department's Position: We disagree. We consider the benefit from import duty reductions to occur at the time of receipt. A firm realizes the "cash-flow" effect at the time of importation because that is the time it would have had to pay the import duty. The Department has verified that manufacturers of iron-metal construction castings did not receive any import duty reductions or exemptions for imports of machinery or equipment during the period of review. *See* notice of final results of administrative review of countervailing duty order on portland hydraulic cement and cement clinker from Mexico (50 FR 51732, December 19, 1985).

Comment 6: The petitioners contend that, during the period examined in the original investigation as well as the period currently under review, actions of the Mexican government caused the deferral of payments of private loans from U.S. banks. Such rescheduling of foreign debt constitutes a bounty or grant.

Department's Position: The only program during the review period for the rescheduling of private debt in Mexico was the Trust Fund for Coverage of Risks ("FICORCA"). The Department found this program not countervailable in its final affirmative countervailing duty determination on unprocessed float glass from Mexico (49 FR 23097, June 4, 1984). Because we had previously found this program not countervailable, we did not consider it in this review.

Comment 7: The exporters contend that the Department did not use the correct commercial interest rate benchmark for calculating the benefit of one of the FOGAIN loans.

Department's Position: We agree. Arechiga Sarinana obtained two FOGAIN loans in November 1981. We should have used the same 22 percent commercial interest rate benchmark for both loans, the highest rate available under FOGAIN at the time. Using that rate, we have now calculated the benefit from the FOGAIN loans to be 0.02 percent.

Comment 8: The exporters contend that the Department improperly allocated the benefits from FOGAIN and FONEI loans over the value of exports rather than the value of production. The Department has previously determined that FOGAIN and FONEI loans are domestic, rather than export, bounties or grants and that benefits attributable to such loans should be allocated over total sales, rather than export sales. The Department should have used the value of total production as the basis for allocation.

Department's Position: We do not have total sales data. In the preliminary results, we used export sales as the best information for total sales but have now chosen total production to be the best information available. We determine the total benefit from FONEI to be 0.02 percent *ad valorem*. The FOGAIN benefit remains the same because Arechiga Sarinana received the only benefits under FOGAIN and the firm's total exports equalled its total production.

Comment 9: The exporters contend that the Department should revoke the

1986
UMI

order. Under the terms of the "Understanding Between the United States and Mexico regarding Subsidies and Countervailing Duties" ("the Understanding") signed on April 23, 1985, Mexico became a "country under the Agreement," as defined in section 701(b) of the Tariff Act. As such, section 303 of the Tariff Act no longer applies to any products from Mexico, and Mexico is entitled to an injury test under section 701 before the Department may impose countervailing duties on any products, including castings.

Alternatively, if the Department persists in holding that section 303 applies to this case, section 303 prohibits the Department from assessing countervailing duties on duty-free products without an affirmative finding of injury if the United States has an international obligation to provide such an injury test. Contrary to the Department's stated belief, the Understanding does require the injury test for pre-existing orders. The Department's distinction between "investigations in progress" (the phrase contained in the Understanding) and existing order would render article 5 of the Understanding superfluous in light of section 102(a) of the Trade Agreements Act of 1979 ("the TAA") and disregard the teachings of the Court of Appeals for the Federal Circuit ("CAFC") in *Al Tech Specialty Steel Corporation* vs. *United States* (754 F. 2d 632 (1984)).

Finally, the United States in the Understanding granted Mexico "most-favored-nation" ("MFN") status. The MFN clause of the Understanding creates an international obligation on the United States to apply the same procedures in countervailing duty proceedings on Mexican products as for products from other countries. The products as for products covered by this order are by U.S. statute duty-free. In two instances involving duty-free products covered by section 303 countervailing duty orders, the Department has refused or preliminarily refused to impose duties. In *Certain Fasteners from India* (47 FR 44129; October 6, 1982), the Department revoked the portion of the order covering duty-free fasteners. In *Carbon Steel Wire Rod from Trinidad and Tobago* (50 FR 19561; May 9, 1985), the Department tentatively determined to revoke the oder because the products became duty-free. The circumstances of those cases are very similar to those of this case and Mexico must receive no less favorable treatment.

Department's Position: We continue to believe that we cannot revoke this countervailing duty order on the basis of the Understanding. While it is true that the United States Trade Representative determined on April 23, 1985, that Mexico became a "country under the Agreement" (50 FR 18335; April 30, 1985), the application of that status was limited by article 5 of the Understanding to countervailing duty proceedings which had not progressed to the issuance of a final determination (and simultaneous order). We have confirmed with the principal U.S. negotiators that the intent of article 5 was to exclude from the application of the Understanding, and hence application of "country under the Agreement" status, orders existing before April 23, 1985. Section 303 continues to apply to such orders.

As to the argument that even if section 303 applies, the Understanding is an international obligation requiring an injury test, once again article 5 precludes application to pre-April 23, 1985 orders. We agree with the exporters that our reading of article 5 provides only the injury test provided by section 102(a) of the TAA; we do not agree that such a reading renders article 5 superfluous. The Understanding states its own limitations. Furthermore, we are in no way disregarding the determination of the CAFC in *Al Tech.* The use of the phrase "investigations in progress" in the Understanding, despite the discussion in the Department's memorandum of October 9, 1985, was not meant to refer to the use of the phrase "investigation" in the TAA or in the TAA amendments to the Tariff Act, and therefore the CAFC discussion of the term "investigation" in *Al Tech* is irrelevant here. The phrase "investigations in progress" is a bilaterally negotiated phrase with clear meaning to the U.S. negotiators.

Finally, the MFN argument cannot be sustained for the same reasons as in the above two arguments. In both *Certain Fasteners from India* and *Carbon Steel Wire Rod from Trinidad and Tobago* (regardless of the ultimate outcome), the countries involved have a clear claim, as GATT members, to the injury test. The only claim of the Government of Mexico is the Understanding, which the U.S. negotiators precluded from applying to pre-April 23, 1985 orders.

For additional information, see notice of final results of administrative review of countervailing duty order on portland hydraulic cement and cement clinker from Mexico (50 FR 51732, December 19, 1985).

Final Results of Review

After reviewing all of the comments received, we determined the total bounty or grant to be 0.06 percent *ad valorem* for the period of review. The Department considers any rate less than 0.50 percent *ad valorem* to be *de minimis.*

The Department will instruct the Customs Service not to assess countervailing duties for shipments of the merchandise entered, or withdrawn from warehouse, for consumption on or after December 16, 1982, the date of our affirmative preliminary determination (47 FR 56377), and exported on or before March 31, 1983.

The Department will instruct the Customs Service to waive cash deposits of estimated countervailing duties, as provided by section 751(a)(1) of the Tariff Act, on all shipments of the merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. This deposit waiver shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1) and § 355.41 of the Commerce Regulations (19 CFR 355.10; 50 FR 32550, August 13, 1985).

Dated: March 14, 1986.

DoD Advisory Group on Electron Devices; Advisory Committee Meeting

SUMMARY: Working Group C (Mainly Opto Electronics) of the DoD Advisory Group on Electron Devices (AGED) announces a closed session meeting.

DATE: The meeting will be held at 0900, Tuesday, 15 April 1986.

ADDRESS: The meeting will be held at Palisades Institute for Research Services, Inc., 2011 Crystal Drive, Suite 307, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Gerald Weiss, AGED Secretariat, 201 Varick Street, New York, 10014.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide the Under Secretary of Defense for Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group C meeting will be limited to review of research and development programs which the military propose to initiate with industry, universities or in their laboratories. This opto-electronic device area includes such programs as imaging devices, infrared detectors and lasers. The review will include classified program details throughout.

In accordance with section 10(d) of Pub. L. No. 92-463, as amended (5 U.S.C. App. II section 10(d) (1982)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly, this meeting will be closed to the public.

Dated: March 17, 1986.

Department of the Navy

Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Naval Research Advisory Committee will meet on April 22-23, 1986, at the Supervisor of Shipbuilding, Conversion and Repair, Pascagoula, Mississippi. The meeting will commence at 9:00 a.m. and terminate at 5:00 p.m. on April 22 and commence at 8:15 a.m. and terminate at 3:30 p.m. on April 23. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to provide update briefings for the Committee members on research and development relative to ship construction. The agenda for the meeting will consist of briefings on naval research and development applications related to ship construction, as well as a tour of the facilities of the shipyard. These briefings and tours will contain classified information that is specifically authorized under criteria established by Executive order to be kept secret in the interest of national defense and is in fact properly classified pursuant to such Executive order. The classified and nonclassified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting contact: Commander T.C. Fritz, U.S. Navy, Office of the Chief of Naval Research (Code OONR), 800 North Quincy Street, Arlington, VA 22217-5000. Telephone number (202) 696-4870.

Dated: March 7, 1986.

William F. Roos, Jr.,

Lieutenant, JAGC, U.S. Naval Reserve, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

DEPARTMENT OF ENERGY

National Petroleum Council U.S. Refinery Capability Task Group Meeting

Notice is hereby given that the U.S. Refinery Capability Task Group will meet in April 1986. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The U.S. Refinery Capability Task Group will be addressing a current study of the capability of the U.S. refining industry. Its analysis and findings will be based on information and data to be gathered by the various task groups.

The U.S. Refinery Capability Task Group will hold its thirteenth meeting on Thursday, April 3, 1986, starting at 8:30 a.m., in the California Room of the Union Oil Center, 1201 West Fifth Street, Los Angeles, California.

The tentative agenda for the U.S. Refinery Capability Task Group meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Review of the work of the Task Group.
3. Discussion of any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the U.S. Refinery Capability Task Group is empowered to conduct the meeting in a fashion that

VOL 51
ISS 54
MR 20
1986
UMI

will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the U.S. Refinery Capability Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Ms. Pat Dickinson, Office of Oil, Gas, Shale and Coal Liquids, Fossil Energy, 301/353-2430, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E-190, DOE Forrestal Building, 1000 Independence Avenue SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on March 17, 1986.

Donald L. Bauer,

Acting Assistant Secretary for Fossil Energy.

Economic Regulatory Administration

Proposed Consent Order With Atlantic Richfield Co.

AGENCY: Economic Regulatory Administration, of Energy.

ACTION: Notice of cancellation of public hearing regarding proposed consent order with Atlantic Richfield Company.

SUMMARY: The Economic regulatory Administration of the Department of Energy hereby cancels the public hearing regarding the Proposed Consent Order with Atlantic Richfield Company which was scheduled for Friday, March 21, 1986, in Washington, DC [51 FR 5394, February 13, 1986]. As stated in the notice, the deadline for requests to make presentations was 5:00 p.m. on March 17, 1986. Two requests to make presentations were received, but were subsequently withdrawn.

FOR FURTHER INFORMATION CONTACT: Robert Heiss, Economic Regulatory Administration, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 252-6727.

Issued in Washington, DC on March 18, 1986.

M.C. Lorenz,

Special Counsel, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 86-18-NG]

Chieftain International, Inc.; Application to Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration Energy.

ACTION: Notice of application for blanket authorization to import natural gas from Canada for short-term and spot sales.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on March 7, 1986, of an application filed by Chieftain International, Inc. (Chieftain), an affiliate of Chieftain Development Co. Ltd. (Chieftain Development), for blanket authorization to import up to 10 Bcf of natural gas annually for a two-year period beginning on the date of first delivery. The gas would be supplied by Chieftain Development or other Canadian suppliers located in the Province of Alberta and sold on a short-term or spot basis to U.S. purchasers, including gas distributors, pipelines, electric utilities, and industrial or agricultural users. Chieftain would also act as a broker or agent on behalf of U.S. purchasers and/or Canadian suppliers. The specific terms of each import and sale would be negotiated on an individual basis including the price and volumes. Chieftain proposes to make quarterly reports to the ERA.

The application is filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATE: Protests, motions to intervene or notices of intervention, as applicable, and written comments are to be filed no later than 4:30 p.m., on April 21, 1986.

FOR FURTHER INFORMATION CONTACT:

Chuck Boehl, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, U.S. Department of Energy, Forrestal Building, Room GA-076, 1000 Independence Avenue SW., Washington, DC 20585, (202) 252-6050.

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue SW., Washington, DC 20585, (202) 252-6667.

SUPPLEMENTARY INFORMATION: The decision on this application will be made consistent with DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene, or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076-A, RG-23, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585. They must be filed no later than 4:30 p.m. e.s.t., April 21, 1986.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Chieftain's application is available for inspection and copying in the Natural Gas Division Docket Room, GA-076, at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on March 13, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[ERA Docket No. 86-17-NG]

Community Gas Acquisition, Inc.; Application To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, Energy.

ACTION: Notice of application for blanket authorization to import natural gas from Canada for short-term and spot sales.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on March 6, 1986, of an application filed by Community Gas Acquisition, Inc. (Community), a District of Columbia non-profit corporation, for a blanket authorization to import up to 300 Bcf of natural gas for a two-year period beginning on the date of first delivery. The gas would be supplied by various Canadian pipelines, producers, and producer groups and sold on a short-term or spot basis to U.S. purchasers, including local distribution companies, industrial and commercial end-users, and residential cooperatives. Community requests authorization to import for its own account as well as for the accounts of its foreign supplier clients and U.S. purchaser clients. The specific terms of each import and sale would be negotiated on an individual basis, including the price and volumes. Community proposes to make quarterly reports to the ERA.

The application was filed with the ERA pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATE: Protests, motions to intervene, or notices of intervention, as applicable, and written comments are to be filed no later than 4:30 p.m., on April 21, 1986.

FOR FURTHER INFORMATION CONTACT:

Tom Dukes, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA-076, 1000 Independence Avenue SW, Washington, DC, 20585, (202) 252-9590

Diane Stubbs, Office of General Counsel, Natural Gas and Mineral Leasing, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue SW, Washington, DC, 20585, (202) 252-6667.

SUPPLEMENTARY INFORMATION: The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their respopses on the issue of competitiveness as set forth in the policy guidelines. The applicant has asserted that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076, RG-23, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585. They must be filed no later than 4:30 p.m. e.s.t., April 21, 1986.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Federal Energy Regulatory Commission

[Docket No. GP86-15-000]

Jeems Bayou Production Corp., Martin A No. 1 Well, FERC JD No. 84-20414; Petition To Reopen and Vacate Final Well Category Determination and Request for Withdrawal of Application

Issued March 14, 1986.

Take notice that on November 20, 1985, Jeems Bayou Production Corporation filed with the Commission pursuant to § 275.205 of the Commission's regulations a petition to reopen and vacate a final well category determination under section 102 of the Natural Gas Policy Act of 1978 (NGPA) for the Martin A No. 1 well located in DeSoto Parish, Louisiana, and to withdraw its application for the determination.

Any person desiring to be heard or to protest this petition should file a motion to intervene or protest in accordance with Rules 214 or 211 of the Commission's rules of practice and procedure. All motions to intervene or protests should be submitted to the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20460, not later than 30 days following publication of this notice in the Federal Register. All protests will be considered by the Commission but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene in accordance with Rule 214. Copies of this petition are on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CI86-253-000]

Natural Gas Companies; Application of Kerr-McGee Corporation for Certificate of Public Convenience and Necessity for Abandonment and Pre-granted Abandonment and for Expedited Consideration

March 17, 1986.

Take notice that on March 7, 1986, Kerr-McGee Corporation (Kerr-McGee) pursuant to sections 4 and 7 of the Natural Gas Act, 15 U.S.C. 717(c) and 717(f) (1982) Parts 157 and 284 of the Regulations of the Federal Energy Regulatory Commission (Commission), 18 CFR Parts 157 and 284 (1986), and § 2.77 of the Commission's Regulations, 18 CFR 2.77 (1986) applied for a Certificate of Public Convenience and Necessity (1) authorizing sales for resale of natural gas by Kerr-McGee in interstate commerce from the sources of production listed on Appendix A attached to said application; (2) authorizing the sale for resale of natural gas by Kerr-McGee attributable to other interest owners having an interest in the same production; (3) authorizing partial abandonment and pre-granted abandonment of certain sales as described herein; (4) authorizing transportation by interstate pipelines (and pre-granted abandonment of the same) where and if necessary, under section 7(c) of the NGA, 15 U.S.C. 717f(c), to effectuate the delivery of gas sold thereunder; and (5) authorizing transportation by interstate pipelines, local distribution companies, and Hinshaw pipelines as set forth in said Application. The authority is requested to be effective no later than April 1, 1986 for a two and one-half year period commencing on the date of issuance of a Commission Order approving same.

If approved, Kerr-McGee states that it will be authorized to sell gas released by Kerr-McGee's interstate pipeline purchaser (Transco) listed on Appendix A attached to said application from contractual commitment which is: (1) Subject to the maximum lawful price established by section 102(d) of the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. 3319; and (2) subject to substantially reduced takes without payment to Kerr-McGee. Kerr-McGee states that the authority will also enable it to make sales for resale in interstate commerce of the gas so released to any and all customers having the ability to purchase such gas on the open market and have gas, as well as gas which is released by Kerr-McGee's interstate pipeline customers but which is outside the Commission's NGA jurisdiction, transported to such customers.

Kerr-McGee states that the grant of authority applied for will further the policies and objectives of the Commission set forth in its Final Rule issued in *Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol,* Docket No. RM85-1-000 (Oct. 9, 1985) (Order No. 436), the Commission's decision in *Felmont Oil Corporation and Essex Offshore, Inc.,* 33 F.E.R.C. (CCH) ¶ 61,333 (1985) and in *Pennzoil Producing Co., et al.,* Docket No. CI86-54-000 (March 5, 1986).

Any person desiring to be heard or to make any protests with reference to said applications should on or before 15 days after the date of publication of this notice in the Federal Register, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. SA85-1-001]

Magma Copper Co.; Petition for Temporary Exemption and Interim Relief From Incremental Pricing

Issued: March 17, 1986.

Take notice that on November 12, 1985, Magma Copper Company (Magma) filed with the Commission, pursuant to section 206(d) of the Natural Gas Policy Act of 1978 (NGPA) a petition for a one-year extension of temporary relief, commencing with the January 1986 billing period, from the incremental pricing regulations which impose a surcharge on the natural gas purchased for use in its copper mining, smelting, and refining facility located in Arizona. Magma was granted temporary relief for a one-year period, commencing with the January 1985 billing period, by order of the Director, Office of Pipeline and Producer Regulation, issued January 2, 1985. On November 29, 1985, Magma petitioned under § 381.106 of the Commission's regulations for waiver of the filing fee prescribed by § 381.401 of such regulations.

In support of its petition, Magma states that due to continued price deflation in the copper market and increased costs of production, it is suffering cash out-of-pocket losses.

Magma states that without continued exemption from the incremental pricing regulations its losses will increase. Magma requested interim relief from the incremental pricing regulations pending action on its petition for temporary exemption. Interim relief was granted by the Director on December 24, 1985.

The procedures applicable to the conduct of this proceeding are set forth in rules 1101-1117 (Subpart K) of the Commission's rules of practice and procedure. Any person desiring to participate in this proceeding must file a motion to intervene in accordance with Rule 1105. All motions to intervene must be filed within 15 days after publication of this notice in the Federal Register.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-6162 Filed 3-19-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CI86-12-001]

Natural Gas Companies; Application for Modification of Order Permitting and Approving Limited-Term Abandonments and Granting Certificates; Mesa Petroleum Co.

March 17, 1986.

Take notice that on March 10, 1986, Mesa Operating Limited Partnership (Mesa), pursuant to section 7 of the Natural Gas Act (NGA), 15 U.S.C. 717f, and Parts 154 and 157 of the Federal Energy Regulatory Commission's (Commission) regulations thereunder (18 CFR Parts 154 and 157), filed an application requesting that in Docket No. CI86-12-000 the Commission modify Paragraph (A) of its Order Permitting and Approving Limited-Term Abandonments and Granting Certificates issued October 29, 1985 by substituting March 31, 1987 for March 31, 1986 therein, all as more fully shown in the application which is on file with the Commission and open to public inspection.

Mesa states that the circumstances that called forth Mesa's application filed on October 7, 1985 and supported issuance of the Commission's October 29, 1985 Order will continue past the March 31, 1986 termination date prescribed in Paragraph (A) of the October 29, 1985 Order to at least until March 31, 1987. If the limited-term abandonment and certificate authorization granted by the November 1, 1985 Order is extended past March 31, 1986, Mesa states that it could continue existing spot market sales and make additional sales.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than normal for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protests with reference to said application should on or before March 27, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 8716-001]

New Hope Hydro Partners; Surrender of Preliminary Permit

March 14, 1986

Take notice that the New Hope Hydro Partners, Permittee for the Union Mills Project No. 8716, has requested that the preliminary permit be terminated. The preliminary permit for Project No. 8716 was issued on July 11, 1985, and would have expired on June 30, 1987. The project would have been located on the Delaware River, in Bucks County, Pennsylvania.

The Permittee filed the request on March 10, 1986, and the preliminary permit for Project No. 6716 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday, or holiday as described in 18 CFR 385.2007, in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP85-13-011]

Northwest Pipeline Corp.; Compliance Filing

March 14, 1986.

Take notice that on March 10, 1986, Northwest Pipeline Corporation (Northwest) tendered for filing the following tariff sheets to be a part of its FERC Gas Tariff, Original Volume No. 1-A:

First Revised Sheet No. 313
First Revised Sheet No. 314
First Revised Sheet No. 415

According to § 381.103(b)(2)(iii) of the Commission's regulations (18 CFR 381.103(b)(2)(iii)), the date of filing is the date on which the Commission receives the appropriate filing fee, which in the instant case was not until March 12, 1986.

On July 12, 1985, Northwest tendered for filing and acceptance Original Volume No. 1-A pursuant to Northwest's Offer of Settlement in the above-referenced docket which was approved by Commission order dated May 31, 1985. The Commission issued an order, dated February 28, 1986, approving Northwest's Original Volume No. 1-A subject to the filing of the revised tariff sheets above.

Northwest requests an effective date of May 1, 1985, for the tendered tariff sheets which is the effective date of the rates approved by the Commission order dated May 31, 1985. [*Northwest Pipeline Corp.,* 31 FERC ¶ 61,263 (1985)] and Volume No. 1-A Tariff approved February 28, 1986.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 24, 1986. (18 CFR 385.214, 385.211). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-6165 Filed 3-19-86; 8:45 am]

BILLING CODE 6717-01-M

VOL 51 ISS 54 MR 20 1986 UMI

[Docket No. RP86-56-000]

Northwest Pipeline Corp.; Proposed Change in FERC Gas Tariff

March 13, 1986.

Take notice that on March 4, 1986, Northwest Pipeline Corporation (Northwest) tendered for filing Second Revised Sheet No. 68 to be a part of its FERC Gas Tariff, Original Volume No. 2. According to § 381.103(b)(2)(iii) of the Commission's regulations (18 CFR 381.103(b)(2)(iii)), the date of filing is the date on which the Commission receives the appropriate filing fee, which in the instant case was not until March 10, 1986.

Rate Schedule X–24 is the San Juan Gathering Agreement (Gathering Agreement) dated January 31, 1974, as amended between Northwest and El Paso Natural Gas Company (El Paso). The Gathering Agreement is also on file with the Federal Energy Regulatory Commission (Commission) as Rate Schedule X–31 of El Paso's FERC Gas Tariff, Third Revised Volume No. 2.

Northwest and El Paso entered into a Letter Agreement (Agreement) dated December 27, 1985, providing for market responsive production control. Each party also agreed to waive (not charge or collect) the gathering charge set forth in Article IX of the Gathering Agreement. Second Revised Sheet No. 68 incorporates such agreement to waive the gathering charge.

El Paso has already tendered its companion filing, with respect to Rate Schedule X–31; therefore, Northwest requests waiver of § 154.22 in order to allow an effective date of March 31, 1986, which is the anticipated effective date of the El Paso filing, in order to maintain continuity of the respective tariffs. While Northwest believes that no further waiver of the Commission's regulations are required to make this filing effective as proposed, Northwest requests that the Commission grant any waivers it may deem necessary for the acceptance of this proposed filing.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 24, 1986. (18 CFR 385.214, 385.211). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP86-57-000]

Northwest Pipeline Corp.; Proposed Change in Gathering Rates

March 13, 1986.

Take notice that on March 7, 1986, Northwest Pipeline Corporation ("Northwest") submitted for filing, to be a part of its FERC Gas Tariff, Original Volume No. 2, and Original Volume No. 1–A the following tariff sheets:

Original Volume No. 2—Second Revised Sheet No. 2.2 and Tenth Revised Sheet No. 2–B
Original Volume No. 1–A—Second Revised Sheet No. 201

Northwest states that the purpose of the filing is to establish a minimum rate for gathering services applicable to all of Northwest's gathering areas and to limit the amount of gathering credit which would be received under its Rate Schedule T–5 for transportation services where a related charge is made for gathering services by Northwest. There is no change in Northwest's previously effective maximum gathering rates.

The proposed effective date of the tendered tariff sheets is May 1, 1986.

A copy of this filing has been served on all jurisdictional and affected customers and all affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 20, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. G-13059-000, et al.]

Sun Exploration & Production Co. et al.; Applications for Certificates, Abandonments of Service and Petitions to Amend Certificates[1]

March 17, 1986.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before March 31, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. ES86-30-000, et al.]

Iowa Public Service Co. et al.; Electric Rate and Corporate Regulations Filings

Take notice that the following filings have been made with the Commission:

1. Iowa Public Service Company

[Docket No. ES86-30-000]

March 17, 1986.

Take notice that on March 10, 1986, Iowa Public Service Company (Applicant), filed an application seeking an order pursuant to section 204 of the Federal Power Act, authorizing it to issue and sell, in one or more public offerings or private placements, prior to December 31, 1987, fixed rate debt in aggregate principal amount of not more than the $140 million and exempting the issuance from competitive bidding requirements.

Comment date: March 28, 1986, in accordance with Standard Paragraph E at the end of this notice.

2. Kansas Gas and Electric Company

[Docket No. ES86-29-000]

March 17, 1986.

Take notice that on March 7, 1986, Kansas Gas and Electric Company (Applicant), filed an application with the Federal Energy Regulatory Commission, pursuant to section 204 of the Federal Power Act, seeking an Order authorizing the issuance of up to $50,000,000 principal amount of one or more series of its first mortgage bonds.

Comment date: March 27, 1986, in accordance with Standard Paragraph E at the end of this notice.

3. Niagara Mohawk Power Corporation

[Docket No. ER86-342-000]

March 14, 1986.

Take notice that Niagara Mohawk Power Corporation (Niagara Mohawk), on March 10, 1986, tendered for filing as an initial rate schedule, an agreement between Niagara Mohawk and the Power Authority of the State of New York (PASNY) dated July 30, 1985.

VOL 51
ISS 54
MR 20
1986
UMI

Niagara Mohawk states that this agreement establishes the rate for transmitting power and energy from PASNY to the Niagara Frontier Transportation Authority (NFTA) utilizing Niagara Mohawk's existing transmission facilities. Niagara Mohawk presently has on file an agreement with PASNY designated Rate Schedule FERC 19 for, among other services, supplying and transmitting power and energy from PASNY's Niagara Project over Niagara Mohawk's transmission facilities to PASNY's municipal and cooperative customers and certain industrial customers for Niagara Mohawk. The rate for the transmission service under the proposed initial rate schedule would be set at the rate for transmission service provided under Niagara Mohawk's Rate Schedule FERC 19.

Copies of this filing were served upon the following:

Power Authority of the State of New York, 10 Columbus Circle, New York, NY 10019

Public Service Commission, State of New York, Three Rockefeller State Plaza, Albany, NY 12223

Niagara Mohawk requests waiver of the Commission's notice requirements so as to allow the proposed initial rate schedule to become effective on July 1, 1985.

Comment date: March 28, 1986, in accordance with Standard Paragraph E at the end of this notice.

4. Pacific Gas and Electric Company

[Docket No. ER86-343-000]

March 17, 1986.

Take notice that Pacific Gas and Electric Company (PGandE) on March 10, 1986, tendered for filing as an initial rate schedule a DWR Letter Agreement for emergency transmission service by PGandE for the State of California Department of Water Resources (DWR).

The Agreementl provides for emergency transmission service over PGandE's Diablo Canyon Generation Tie Lines from September 21, 1983 to October 5, 1983, a period when regular service being rendered to DWR under the Comprehensive Agreement, as amended, (FERC Rate Schedule No. 77), was interrupted because of wind damage to transmission towers between Gates and Midway substations. The transmission rate of 1.08 mills/kWh is a negotiated rate for generation tie services. Transmission losses between the Table Mountain Substation and Midway Substation for energy transmitted using this service shall be the 1.7 percent transmission loss factor for Backbone.

PGandE has requested a waiver of the Commission's usual notice requirement so as to permit an immediate effective date of September 21, 1983. PGandE also has requested a waiver of the usual notice requirement in § 35.15 of the Commission's Regulations so as to permit termination of the rate schedule on October 5, 1983, as provided in the Letter Agreement.

Copies of the filing and proposed termination were served upon DWR and the California Public Utilities Commission.

Comment date: March 28, 1986, in accordance with Standard Paragraph E at the end of this notice.

5. Pacific Gas and Electric Company

[Docket No. ER86-350-000]

March 14, 1986.

Take notice that on March 11, 1986, Pacific Gas and Electric Company (PGandE) tendered for filing proposed changes to Rate Schedule FERC No. 85. These changes are to certain rates, terms and conditions concerning those services rendered by PGandE under the agreement entitled "Interconnection Agreement Between Pacific Gas and Electric Company and the City of Santa Clara" (the Interconnection Agreement) which has been filed as part of Rate Schedule FERC No. 85. These changes are embodied in two bilateral agreements:

- "Agreement For An Implementation Procedure For Certain 1984 and 1985 Rate Adjustments under the 1984–1985 Appendix A to the Interconnection Agreement between Pacific Gas and Electric Company and the City of Santa Clara" (Implementation Agreement).
- Revised Appendix A (rate appendix) to the Interconnection Agreement.

The Implementation Agreement embodies the agreement between PGandE and the City of Santa Clara (Santa Clara) on the procedure and mechanism designed to recover amounts due PGandE from Santa Clara and Santa Clara from PGandE as a result of certain California Public Utilities Commission and Federal Energy Regulatory Commission decisions, under the provisions of the Appendix A to the Interconnection Agreement presently on file with the Commission.

The proposed changes to the rates, terms and conditions in revised Appendix A for services provided by PGandE to Santa Clara extend and modify the present rate agreement between PGandE and Santa Clara and provide for an interim rate arrangement for the Diablo Canyon Nuclear Power Plant. Using 1986 billing determinants the rate change would result in an estimated revenue increase of $537,938.

Copies of this filing were served upon Santa Clara and the Public Utilities Commission of the State of California.

Comment date: March 28, 1986, in accordance with Standard Paragraph E at the end of this notice.

6. South Carolina Public Service Authority

[Docket No. ES86-32-000]

March 17, 1986.

Take notice that on March 12, 1986, South Carolina Public Service Authority (Applicant) filed an application seeking an order authorizing the issuance of up to $600,000,000 in Electric System Expansion Revenue Bonds, Refunding series at one or more times. The Authority asks, in the alternative, an order dismissing the asspplication for lack of jurisdiction. The bonds are to be sold at negotiated sales with a single underwriting group for all sales.

Comment date: April 7, 1986, in accordance with Standard Paragraph E at the end of this notice.

7. UNITIL Power Corp., Concord Electric Company, Exeter & Hampton Electric Company

[Docket No. EL86-28-000]

March 17, 1986.

Please take notice that on March 12, 1986, UNITIL Power Corp., of Bedford, New Hampshire, Concord Electric Company of Concord, New Hampshire, and Exeter & Hampton Electric Company, of Exeter, New Hampshire, filed an Petition for a Declaratory Order in the docket referred to above.

Petitioners seek a declaration by the Commission that: (1) The New England Electric Power Pool Agreement entitles Petitioners, who are members of that Pool, to receive transmission and subtransmission service from Public Service Company of New Hampshire for power from pool-planned units under the terms of that Agreement; and (2) the existing transmission tariff filed with this Commission by Public Service Company of New Hampshire entitles Petitioners to receive transmission and subtransmission service, for power from non-pool units, under the terms of that tariff. In the alternative, to the extent that such relief is not forthcoming by October 1, 1986, Petitioners request an order under section 202(c) of the Federal Power Act compelling transmission as may be required to prevent a power emergency.

The Petitioners have served Public Service Company of New Hampshire and the Public Utility Commission of New Hampshire.

Comment date: March 28, 1986, in accordance with Standard Paragraph E at the end of this document.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-6159 Filed 3-19-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RM85-1-000]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol; Colorado Interstate Gas Company, Order Granting Request for Clarification

Issued: March 17, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

On February 12, 1986, Colorado Interstate Gas Company (CIG) filed a request for clarification of the transitional provisions of Order No. 436 with respect to transportation under section 311 of the Natural Gas Policy Act.[1] Specifically, CIG requests clarification that the natural gas transportation service commenced for Mountain Industrial Gas Company (MIC)[2] on behalf of Pacific Lighting Gas Supply Company (Pacific Lighting)[3] falls within the scope of the transitional provisions of Order No. 436.

On August 30, 1985, CIG commenced transportation services for MIC on behalf of Pacific Lighting under section 311 and Part 284 of the Commission's regulations. Service was commenced pursuant to an oral agreement. CIG filed a summary report of the transaction on September 3, 1985, pursuant to the applicable reporting requirements of then existing § 284.4(b).[4] On September 30, 1985, CIG filed a request for waiver of the 30-day filing requirement for the initial full report required under § 284.106(a). CIG subsequently filed this initial report on November 4, 1985.

Section 284.105 of the regulations promulgated by Order No. 436 provides that any NGPA section 311 transportation service authorized and commenced on or before October 9, 1985, may be continued, with several exceptions, under the terms and conditions that applied prior to November 1, 1985, until the earlier of October 9, 1987, or the end of the expiration of the term of contract.

The Commission has previously clarified that the transitional provisions of § 284.105 are applicable to service which commenced pursuant to a verbal agreement prior to October 9, 1985, as long as the parties to the transaction complied with all applicable reporting requirements.[5] The Commission has further clarified that transportation service which was commenced under the self-implementing procedures of § 284.102 prior to October 9, 1985, in which the initial report was filed five days late, yet prior to October 9, 1985, qualified for transitional treatment under § 285.105.[6]

In the instant case, CIG commenced the transportation service, filed the then-required 48 hour report, and filed a request for a waiver of the 30-day filing requirement for the initial full report required under § 284.106(a), all prior to October 9, 1985. CIG subsequently filed the initial report on November 4, 1985. The Commisison finds that CIG's transportation service on behalf of Pacific Lighting was authorized and commenced under the self-implementing procedures of § 284.102 prior to October 9, 1985. The service thus qualifies under the transitional provisions of section 284.105 of the Commission's Regulations.

By the Commission.

Kenneth F. Plumb,

Secretary.

[Docket No. RM85-1-000 (Parts A-D)]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (Industrial Groups); Order Granting Request for Clarification

Issued: March 17, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

On November 1, 1985, the Industrial Groups[1] filed a request for two clarifications and one modification of certain of the transitional provisions of the transportation regulations issued October 9, 1985 in Order No. 436.[2] Since the filing of the request, Order No. 436–A has been issued, disposing of numerous applications for rehearing of the original order.[3] We consider the requests *seriatim* in light of both orders:

(1) The first request involves a situation where a transportation service for high-priority end uses was authorized and commenced prior to October 9, 1985, but the pipeline processed the transaction under the notice and protest procedures of §§ 157.205 and 157.209(e) of the Regulations, notwithstanding the self-implementing authorization available under § 157.209(a)(1). In several similar situations, we have held that transportation for high-priority end users was authorized automatically under § 157.209(a)(1) with the commencement of service, irrespective of the procedures actually followed, and thus qualifies for continuing transportation authorization under § 284.223(g)(1). *See Midwest Solvents Co. (Order Granting Rehearing),* 33 FERC ¶ 61,395 (1985); *Southern Natural Gas Co.,* 33 FERC ¶ 61,444 (1985); *Battle Creek Gas Co.,* 33 FERC ¶ 61,450; and *Michigan Paperboard Co.,* 34 FERC

[2] Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol, Order No. 436, 50 FR 42408 (October 18, 1985); Technical Corrections issued October 24, 1985.

[3] *Id.*, Order No. 436–A, 50 FR 52217 (December 23, 1985), III FERC Statutes and Regulations ¶ 30,675 (December 12, 1985).

VOL 51
ISS 54
MR 20
1986
UMI

¶ 61,046 (1986). The same conclusion is applicable here.

(2) In their second request, the Industrial Groups seek clarification that if a pipeline files a non-discriminatory access statement, it may initiate new transportation transactions under Order Nos. 319, 234–B and 60, and under section 311 of the NGPA.

First, it is important to note that the statement of intent not to discriminate was required only for continuing transportation under previous Order No. 234–B arrangements. Order Nos. 436 and 436–A provide that any pipeline could continue to provide transportation services after November 1, 1985, under a blanket certificate issued pursuant to Order No. 234–B, if the pipeline filed a non-discriminatory access statement before that date.

However, to be able to continue to provide such transportation services after December 16, 1985, § 284.223(g)(3)(i) of the Regulations requires that the pipeline file for a new blanket certificate under § 284.221 before that time. Only three pipeline companies, Mid-Louisiana Gas Company, Columbia Gulf Transmission Company and Columbia Gas Transmission Corporation, in fact made the requisite filings within the time specified and are thus authorized to continue to provide transportation for Order No. 234–B transactions under the transitional provisions. Each has since been issued a new blanket certificate.

Since December 16, 1985, several additional pipelines have applied for new blanket certificates under Subpart G of Part 284 of the Regulations. Applications by Gas Gathering Corporation and Valley Gas Transmission, Inc. have been granted at this time, while others remain pending. These applications are effective only on issuance of the certificate and do not qualify under the transition provisions.

Where a pipeline did not apply for a new blanket certificate by December 16, 1985, it must now have ceased all blanket certificate transportation under Part 157 except for any Order No. 319 transportation initially authorized under previously effective § 157.209(a)(1), as since clarified by the Commission, which may qualify to continue under new § 284.223(g)(1).

Insofar as transportation under NGPA section 311 is concerned, § 284.105 of the Regulations allows any such transactions which were authorized and commenced by October 9, 1985, to continue under the earlier of their full term or October 9, 1987. If a pipeline has undertaken new Section 311 transportation after October 9, 1985, it must continue to provide such transportation on a non-discriminatory basis. However, if the pipeline wishes to avoid the contract demand reduction/conversion conditions of § 284.10, any such section 311 transportation initiated after October 9, 1985, must terminate by July 1, 1986.[4] Additional clarification in this area is provided in Order No. 436–A at mimeo. pp. 48–49 and pp. 257–70, 50 FR 52229 and 52269–52272 (December 23, 1985).

With regard to Order No. 60 transactions, the filing of a statement of notification under § 284.223(g) did not authorize the pipeline to commence new transactions under Order No. 60. Order No. 60 promulgated § 284.221 of our former rules. Section 284.222 of our new rules provides that for a pipeline to commence new transactions of the kind previously authorized by Order No. 60, a pipeline must first apply for and receive a blanket certificate under new § 284.221.[5]

(3) The Industrial Groups request modification of Order No. 436 to permit a pipeline which failed to file a statement of its intention not to discriminate, prior to November 1, 1985, to make such filing after November 1 and thereby reactivate its previous Order No. 234–B transactions for the remainder of the period up to December 16, 1985. This request is not moot. We note that no pipeline sought to file an untimely statement of intention.

By the Commission.

BILLING CODE 6717–01–M

[Docket No. RM85–1–000]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol; Oregon Steel Mills and Northwest Natural Gas Co; Order Dismissing Request for Clarification

Issued March 17, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman, Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

On January 30, 1986, Oregon Steel Mills and Northwest Natural Gas Company filed a joint request for clarification of Order No. 436–A,[1] requesting authority for their transportation arrangement with Northwest Pipeline Company to continue beyond February 15, until its expiration on March 31, 1986, without subjecting Northwest Pipeline to the conditions in § 284.10 of the Regulations after February 15, 1986. On February 14, 1986, the Commission issued Order No. 436–B,[2] authorizing new NGPA section 311 transportation arrangements to continue through June 30, 1986 without triggering the § 284.10 conditions. Accordingly, the petitioners' request for clarification is dismissed as moot.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RM85–1–000]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol; Sohio Petroleum Company; Order Granting Request for Clarification

Issued March 17, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

On January 28, 1986, as supplemented on February 3, 1986, Sohio Petroleum Company (Sohio) filed a request for clarification of § 284.223(g)(1) of the regulations adopted in Order No. 436.[1] Specifically, Sohio requests clarification that new gas wells may be connected to a central delivery point for transportation under the transitional provisions where no modification or amendment to the transportation agreement is required.

The Commission has already clarified that where a transportation arrangement was authorized and service commenced on or before October 9, 1985, commencement of use of a particular receipt or delivery point after that date will not subject the pipeline to §§ 284.8, 284.9, and 284.10, as long as those points were specified in the agreement on or before October 9, 1985.[2]

Sohio also requests "further clarification that grandfathered transportation service is determined without regard to the effective date of a gas purchase or sales contract." That matter was fully clarified in *Hadson Gas Systems, Inc.*, 33 FERC ¶ 61,142 (October 30, 1985), *rehearing denied*, 34 FERC ¶ 61,039 (January 21, 1986), where we held that section 284.105 pertains to transportation arrangements independent of purchase agreements.

Finally, we reiterate that orders clarifying Order No. 436 apply to *all* regulated pipelines and *all* transactions covered by the regulations that are clarified.[3] We expect that transactions coming within the regulations as clarified will proceed without the need for a Commission order in each case.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RM85–1–000 (Parts A–D)]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol; Texcol Gas Services, Inc.; Order Denying Request for Clarification and Denying Waiver

Issued March 17, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabrandt and C.M. Naeve.

On January 16, 1986, Texcol Gas Services, Inc. filed a request for clarification, or alternatively, a waiver of our Regulations such that its transportation arrangement on behalf of Holly Sugar Company would qualify under the transitional rules of Order No. 436.[1]

Texcol, an intrastate pipeline, states that on September 13, 1985, it entered into a gas purchase contract to sell gas to Holly. Texcol also entered into an oral agreement with Texcol Industrial Sales Company (TISCo) to provide transportation for TISCo and Holly. Texcol also began negotiating with Natural Gas Pipe Line Company to transport the gas on its behalf to the Texcol line. Texcol also agreed to construct and operate a five mile, 8-inch connecting pipeline to deliver the gas to Holly. Texcol states that, as of October 9, 1985, it had incurred expenses of $84,000 to prepare for deliveries.

Texcol further states that, when Order No. 436 was issued, Natural ceased negotiations with it. However, Transwestern Pipeline Company has indicated its willingness to provide the interstate transportation under section 311 of the Natural Gas Policy Act of 1978 if it is covered by the transition rules of Order No. 436. Texcol requests clarification that the arrangement is covered by the transition rules, or alternatively, citing *Judel Glassware Co., Inc., et al.*,[2] requests a waiver of the transition rules.

We deny Texcol's request for clarification and waiver. It is evident from Texcol's petition that if Natural agrees to transport the gas, the transportation agreement will be entered into after October 9, 1985. Since the transition rule in section 284.105 requires that the transportation service be authorized and commenced on or before October 9, 1985, Texcol's transaction would not qualify for transitional treatment. Our decision in *Judel* is inapplicable because the standard for grant of a waiver established therein involves construction or expenditures in reliance on an agreement prior to October 9, 1985. Since Texcol never had an agreement with Natural on or before October 9, 1985, it is clear that the construction and expenditures made by Texcol were not in reliance on such an agreement.

By the Commission.

BILLING CODE 6717–01–M

[Docket No. RM85–1–000]

Regulation of Natural Gas After Partial Wellhead Decontrol; Trunkline Gas Company; Order Dismissing Request for Clarification

Issued March 17, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

On February 6, 1986, Trunkline Gas Company filed a petition for clarification of Order Nos. 436 and 436–A.[1] Briefly, Trunkline requests clarification of the treatment of imbalances that accrue solely as a result of authorized deliveries under § 284.10(a). Inasmuch as those issues have now been addressed in our order issued on February 18, 1986,[2] we will dismiss Trunkline's request as moot.

By the Commission.

BILLING CODE 6717–01–M

Office of Hearings and Appeals

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Energy.

ACTION: Notice of implementation of special refund procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy announces the procedures to be followed in refunding to adversely affected parties $256,730.87 obtained as a result of a consent order which the DOE entered into with Martin Oil Service, Inc., a reseller-retailer of motor gasoline located in Blue Island, Illinois. The money is being held in escrow following the settlement of enforcement proceedings brought by the DOE's Economic Regulatory Administration.

DATE AND ADDRESS: Applications for refund of a portion of the Martin consent order fund must be filed in duplicate and must be received within 90 days of publication of this notice in the **Federal Register**. All applications should refer to Case Number HEF–0123 and should be addressed to: Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Nancy L. Kestenbaum, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 252–6602.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(c) of the procedural regulations of the Department of Energy, 10 CFR 205.282(c), notice is hereby given of the issuance of the Decision and Order set out below. The Decision and Order sets forth procedures and standards that the DOE has tentatively formulated to distribute to adversely affected parties $256,730.87 plus accrued interest obtained by the DOE under the terms of a consent order entered into with Martin Oil Service, Inc. The funds were provided to the DOE by Martin to settle all claims and disputes between the firm and the DOE regarding the manner in which the firm applied the federal price regulations with respect to its sales of motor gasoline during the period March 1, 1979 through August 31, 1979. A Proposed Decision and Order tentatively

1986
UMI

establishing refund procedures and soliciting comments from the public concerning the distribution of the Martin consent order funds was issued on October 9, 1985. 50 FR 42081 (October 17, 1985).

The Decision and Order sets forth procedures and standards that the DOE has formulated to distribute the contents of an escrow account funded by Martin pursuant to the consent order. The DOE has decided to accept Applications for Refund from firms and individuals who purchased motor gasoline from Martin. OHA has decided that a two-stage refund process be followed. In the first stage, OHA has determined that a portion of the consent order funds should be distributed to 67 first purchasers who may have been overcharged. In order to obtain a refund, each claimant must either submit a schedule of its monthly purchases from Martin or submit a statement verifying that it purchased motor gasoline from Martin and is willing to rely on the data in the audit files. Certain firms must also make specific demonstrations of injury. In addition, applications for refund will be accepted from purchasers not identified by the DOE audit. These purchasers must provide specific documentation concerning the date, place, price, and volume of product purchased, the name of the firm from which the purchase was made, and the extent of any injury alleged. An applicant claiming $5,000 or less, however, will be required to document only its purchase volumes.

At the Decision and Order published with this Notice indicates applications for refunds may now be filed by customers who purchased motor gasoline from Martin during the consent order period. Applications will be accepted provided they are received no later than 90 days after publication of this Decision and Order in the Federal Register. The specific information required in an Application for Refund is set forth in the Decision and Order.

Dated: March 4, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Decision and Order of the Department of Energy

Implementation of Special Refund Procedures

March 4, 1986.
Name of Firm: Martin Oil Service, Inc.
Date of Filing: October 13, 1983
Case Number: HEF-0123

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special procedures to distribute funds received as a result of an enforcement proceeding in order to remedy the effects of alleged or actual violations of the DOE regulations. *See* 10 CFR Part 205, Subpart V. In accordance with the provisions of Subpart V, on October 13, 1983, ERA filed a Petition for the Implementation of Special Refund Procedures in connection with a consent order entered into with Martin Oil Service, Inc. (Martin).

I. Background

Martin is a "reseller-retailer" of motor gasoline as that term was defined in 10 CFR § 212.31 and is located in Blue Island, Illinois. Based on an audit of Martin's records, ERA issued a Notice of Probable Violation (NOPV) in which it alleged that Martin had committed violations of the Mandatory Petroleum Price Regulations: 10 CFR Part 212, Subpart F. The NOPV stated that between March 1, 1979 and August 31, 1979 Martin committed possible price violations with respect to its sales of motor gasoline.

In order to settle all claims and disputes between Martin and the DOE regarding the firm's sales of motor gasoline during the period covered by the NOPV, Martin and the DOE entered into a consent order on August 31, 1981. The consent order refers to ERA's allegations of overcharges, but notes that there was no finding that violations occurred. Additionally, the consent order states that Martin does not admit that it violated the regulations.

The consent order required Martin to pay a total of $225,652, plus installment interest, in 24 equal monthly installments. The first payment was received on September 17, 1981 and the last on August 15, 1983.[1] This decision concerns the distribution of the funds in the escrow account.

On October 9, 1985, the OHA issued a Proposed Decision and Order (PD&O) setting forth a tentative plan for the distribution of refunds to parties that can make a reasonable demonstration of injury as a result of Martin's alleged violations in its sales of motor gasoline during the consent order period. 50 FR 42081 (October 17, 1985). The PD&O stated that the basic purpose of a special refund proceeding is to make restitution for violations of the DOE regulations.

In order to effect restitution in this proceeding, we tentatively determined that we would rely in part on the information contained in ERA's audit file. We observed that our experience with similar cases supports the use of this approach in Subpart V cases where all or most of the purchasers of a firm's product are identified in the audit file. *See, e.g., Marion Corp.*, 12 DOE ¶ 85,014 (1984) (*Marion*). We also noted that under such circumstances, a more precise determination regarding the identities of the allegedly overcharged first purchasers was possible. At the same time, we recognized that there may have been other purchasers not identified by the ERA audit who may have been injured by the consent order firm's pricing practices during the audit period who would also be entitled to a portion of the consent order funds. Therefore, procedures by which such purchasers could establish a claim were also proposed.

In order to give notice to all potentially affected parties, a copy of the Proposed Decision was published in the Federal Register and comments regarding the proposed refund procedures were solicited. Copies were also sent to various service station dealers' associations. No comments on the proposed procedures were submitted, however.

II. Refund Procedures

The procedural regulations of the DOE set forth general guidelines to be used by OHA in formulating and implementing a plan of distribution for funds received as a result of an enforcement proceeding. 10 CFR Part 205, Subpart V. The Subpart V process may be used in situations where the DOE is unable to readily identify those persons who are likely to have been injured by the alleged overcharges or to easily determine the amount of such persons' injuries. For a more detailed discussion of Subpart V and the authority of OHA to fashion procedures to distribute refunds, *see Office of Enforcement*, 9 DOE ¶ 82,553 (1981), *and Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (*Vickers*).

Our experience with Subpart V cases leads us to believe that the distribution of refunds in this proceeding should take place in two stages. In the first stage, we will attempt to provide refunds to identifiable purchasers of motor gasoline who may have been injured by Martin's pricing practices between March 1, 1979 and August 31, 1979. If any funds remain after all meritorious first-stage claims have been paid, they may be distributed in a second-stage proceeding. *See, e.g., Office of Special Counsel*, 10 DOE ¶ 85,048 (1982) (*Amoco*).

A. Refunds to Identified Purchasers

The basic purpose of a special refund proceeding is to recompense parties who were injured as a result of alleged or actual violations of the DOE regulations. In order to effect a restitution in this proceeding, we have decided to rely in part on the information contained in the DOE's audit files. Our experience with similar cases supports the use of this approach in Subpart V cases where many of the purchasers of a firm's products are identified in the audit file. *See, e.g. Marion Corp.*, 12 DOE ¶ 85,014 (1984) (*Marion*). Under these circumstances, a reasonably precise determination can be made regarding the identity of the allegedly overcharged parties and the amount of alleged overcharges each party suffered.

During the DOE's audit of Martin, 67 first purchasers were identified as having allegedly been overcharged. ERA also alleged overcharges to customers who were not identified. We recognize that the DOE audit files do not necessarily provide conclusive evidence regarding the identity of all possible refund recipients or the appropriate refund for a particular firm. However, the information contained in those audit files may reasonably be used for guidance. *See Armstrong and Associates/City of San Antonio*, 10 DOE ¶ 85,050 at 88,259 (1983). In *Marion*, we stated that "the information contained in the . . . audit file can be used for guidance in fashioning a refund plan which is likely to correspond more closely to the injuries probably experienced than would a distribution plan based solely on a volumetric approach." 12 DOE at 88,031. In previous cases of this type, we have proposed that the funds in the escrow account be apportioned among the direct customers identified by the audit, other direct customers who can show injury, and subsequent repurchasers. *See, e.g., Bob's Oil Co.*, 12 DOE ¶ 85,024 (1984); *Richards Oil Co.*, 12 DOE ¶ 85,150 (1984). The first purchasers identified by the audit, and the portion of the consent order fund which was allotted to each customer by ERA, are listed in the Appendices.

Identification of first purchasers is only the first step in the distribution process. We must also determine whether the first purchasers were injured or were able to pass through the alleged overcharges. Besides considering the information which the audit file provides, we will employ three rebuttable presumptions to determine the level of a purchaser's injury. These presumptions have been used in many previous special refund cases. First, we will not require a detailed demonstration of injury from regulated utilities or agricultural cooperatives that purchased Martin motor gasoline and passed the alleged overcharges associated with that product through to their end-user members. Second, we will presume that purchasers of Martin motor gasoline who are claiming small refunds ($5,000 or less) were injured by the alleged overcharges. Third, in the absence of compelling material, we will adopt a presumption that spot purchasers were not injured. Lastly, we will make a finding that end-users or ultimate consumers of Martin products whose business operations are unrelated to the petroleum industry were injured by the alleged overcharges. Prior OHA decisions provide detailed explanations of the bases of these presumptions and the end-user finding. *E.g., James Petroleum Corp.*, 13 DOE ¶ 85,361 at 88,894–96 (1985). The rationale for these presumptions was also fully explained in the PD&O. 50 FR 42,081 (October 17, 1985). These presumptions will permit claimants to apply for refunds without incurring disproportionate expenses and will enable the OHA to consider the refund applications in the most efficient way possible in view of the limited resources available.

Unlike threshold-type claimants, an applicant which claims a refund in excess of $5,000 will be required to provide a detailed demonstration of its injury. A reseller will be required to demonstrate that it maintained a "bank" of unrecovered product costs in order to show that it did not pass along the alleged overcharges to its own customers. [2] In addition, a reseller claimant must show that market conditions would not permit it to pass through those increased costs. *See, e.g., Triton Oil & Gas Corp./Cities Service Co.*, 12 DOE ¶ 85,107 (1984); *Tenneco Oil Co./Mid-Continent Systems, Inc.*, 10 DOE ¶ 85,009 (1982).

The demonstration of injury for retailer claimants will be different than that reseller applicants. This is appropriate because, during part of the consent order period, *i.e.*, July 16, 1979 through August 31, 1979, motor gasoline retailers established their MLSPs by adding a specified margin to product costs, rather than by reference to May 15, 1973 selling prices and increased banked costs. *See* 10 CFR 212.93; 45 FR 29546 (1980). Since for retailers the banking requirement was eliminated for this period, any blanket requirement that a retailer claimant make a demonstration of injury like that contemplated for resellers, *i.e.*, based on unrecovered "cost banks," would effectively eliminate all retailer claimants for this last part of the consent order period. Therefore, for the part of the consent order period after July 16, 1979, retailers may apply for refunds above the $5,000 threshold without demonstrating the existence of cost banks. [3] Like resellers, retailers will still be required to show that market conditions prevented them from recovering increased product costs. Such a demonstration might be based upon a demonstration of lowered profit margins, decreased market shares, or depressed sales volumes. [4]

As in previous cases, only claims for at least $15 plus interest will be processed. This minimum has been adopted in prior refund cases because the cost of processing claims for smaller amounts outweighs the benefits of restitution. *See, e.g., Uban Oil Co.*, 9 DOE at 85,225. *See also* 10 CFR 205.286(b). The same principle applies here.

On the basis of the information in the record at this time, we will distribute a portion of the escrow funds to those firms listed in Appendices 1 and 4. [5]

---

[1] The consent order fund represents 3.37 percent of the amount of the overcharge originally alleged in the NOPV. The total consent order payment including installment interest amounted to $256,730.87. We have used this figure as the principal amount. As of January 31, 1986, the escrow account contained $354,776, including accrued interest.

[2] This injury requirement reflects the nature of the petroleum price regulations in effect beginning on August 19, 1973, and ending on July 16, 1979 for retailers, and on May 1, 1980 for resellers. Under the original rules, a reseller or retailer of motor gasoline was required to calculate its maximum lawful selling price (MLSP) by summing its selling price on May 15, 1973 with increased costs incurred since that time. A firm which was unable to charge its MLSP in a particular month could "bank" any unrecovered increased product costs, so that those costs could be recouped in a later month, if possible. *See* 10 CFR 212.93; 45 FR 29546 (1980).

[3] The cost bank requirement has been relaxed in other instances reflected the change in the pricing regulations for motor gasoline. *See* Tenneco Oil Co./United Fuels Corp., 10 DOE ¶ 85,005 at 88,017 n.1 (1982) (Tenneco).

[4] Resellers or retailers who claim a refund in excess of $5,000 but who cannot establish that they did not pass through the price increases will be eligible for a refund of up to the $5,000 threshold, without being required to submit further evidence of injury beyond purchase volumes. Firms potentially eligible for greater refunds may choose to limit their claims to $5,000. *See* Vickers, 8 DOE at 85,396. *See also* Office of Enforcement, 10 DOE ¶ 85,029 at 88,125 (1982) (Ada).

[5] Purchasers identified in the ERA audit as having allegedly been overcharged may submit information to show that they should receive refunds larger than those indicated.

Refunds will be authorized for those firms in the amounts indicated, plus accrued interest to the date they receive refunds, provided they make any necessary showing of injury.[6]

B. Refunds to Other Purchasers

There were also some first purchasers who were not identified by the ERA audit. These firms, and downstream purchasers, may have been injured as a result of Martin's pricing practices. If so, they would be entitled to a portion of the consent order funds provided by Martin. To help potential claimants not identified by ERA decide whether to apply for a refund, we propose to use a volumetric presumption. Under this procedure, a successful claimant's refund is determined by multiplying a factor, known as the volumetric refund amount, by the number of gallons of fuel purchased by the claimant.[7] The volumetric refund amount is the average per gallon refund, and in this case equals $.00044409 per gallon.[8] Potential applicants who were not identified by the ERA audit may use this figure to estimate the refunds to which they may be entitled. The volumetric presumption is rebuttable, however. A claimant which believes that it incurred a disproportionate share of the alleged overcharges may submit evidence proving this claim in order to receive a larger refund. *See Standard Oil Co. (Indiana)/Army & Air Force Exchange Service*, 12 DOE ¶ 85,015 (1984). The presumptions and finding noted in Section A above apply also to applications submitted by claimants not identified by ERA. If valid claims exceed the funds available in the escrow account, all refunds will be reduced by a pro rata amount. Actual refunds will be determined after analyzing all appropriate claims.

III. Applications for Refund

We have determined that by using the procedures described above, we can distribute the Martin consent order funds as equitably and efficiently as possible. Accordingly, we will now accept applications for refund from individuals and firms who purchased motor gasoline from Martin between March 1, 1979 and August 31, 1979. As we proposed, a portion of the consent order funds will be distributed to these firms listed in the Appendices 1 and 4 who file applications for refund provided they make any necessary demonstrations of injury. Martin's other eligible customers may also apply for a refund. Firms listed in Appendix 2 may receive refunds if they can rebut the spot purchaser presumption.

No valid addresses are available for those Martin customers listed in Appendix 4. In an attempt to locate these firms, we will provide Martin and various petroleum dealers' associations with copies of this Decision and will publish a notice in the **Federal Register**. We will accept information regarding the identities and present locations of these firms for a period of 90 days from the date of publication of this Decision and Order in the **Federal Register**.[9]

There is no specific application form which must be used. In order to receive a refund, each claimant must submit the following information:

(1) A schedule of its monthly purchases of petroleum products from the applicable consent order firm. An applicant listed in Appendices 1 or 4 may instead submit a statement verifying that it purchased petroleum products from the applicable firm and is willing to rely on the data in the audit file;

(2) Whether the applicant has previously received a refund, from any source, with respect to the alleged overcharges identified in the ERA audit underlying this proceeding;

(3) Whether there has been a change in ownership of the firm since the audit period. If there has been a change in ownership, the applicant must provide the names and addresses of the other owners, and should either state the reasons why the refund should be paid to the applicant rather than to the other owners or provide a signed statement from the other owners indicating that they do not claim a refund;

(4) Whether the applicant is or has been involved as a party in DOE enforcement or private, section 210 actions. If these actions have been concluded the applicant should furnish a copy of any final order issue in the matter. If the action is still in progress, the applicant should briefly describe the action and its current status. The applicant must keep OHA informed of any change in status while its Application for Refund is pending. *See* 10 CFR 205.9(d); and

(5) The name and telephone number of a person who may be contacted by this Office for additional information.

Finally, each application must include the following statement: "I swear [or affirm] that the information submitted is true and accurate to the best of my knowledge and belief." *See* 10 CFR 205.283(c); 18 U.S.C. 1001.

All applications must be filed in duplicate and must be received within 90 days from the date of publication of this Decision and Order in the **Federal Register**. A copy of each application will be available for public inspection in the Public Reference Room of the Office of Hearings and Appeals. Any applicant which believes that its application contains confidential information must indicate this and submit two additional copies of its application from which the information has been deleted. All applications should refer to Case No. Hef–0123 and should be sent to: Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585.

It Is Therefore Ordered That:

(1) Applications for refunds from the funds remitted to Department of Energy by Martin Oil Service, Inc. pursuant to the consent order executed on August 31, 1981, may now be filed.

(2) All applications must be filed no later than 90 days after publication of this Decision and Order in the **Federal Register**.

Dated: March 4, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

BILLING CODE 6450-01-M

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Energy.

ACTION: Notice of implementation of special refund procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding to adversely affected parties $59,995 obtained as a result of a consent order which the DOE entered into with Petroleum Sales and Service, Inc., a reseller-retailer of petroleum products located in Buffalo, New York. The money is being held in escrow following the settlement of enforcement proceedings brought by the DOE's Economic Regulatory Administration.

DATE AND ADDRESS: Comments must be filed within 30 days of publication of this notice in the **Federal Register** and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585. All comments should conspicuously display a reference to case number HEF–0151.

FOR FURTHER INFORMATION CONTACT: Walter J. Marullo, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 252–6602.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(b) of the procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision and Order sets forth procedures and standards that the DOE has tentatively formulated to distribute to adversely affected parties $59,995 plus accrued interest obtained by the DOE under the terms of a consent order entered into with Petroleum Sales and Service, Inc. (PS&S). The funds were provided to the DOE by PS&S to settle all claims and disputes between the firm and the DOE regarding the manner in which the firm applied the federal price regulations with respect to its sales of motor gasoline during the period April 1, 1979, through March 31, 1980

OHA proposes that a two-stage refund process be followed. In the first stage, OHA has tentatively determined that a portion of the consent order funds should be distributed to firms and individuals that purchased PS&S motor gasoline during the consent order period. In order to obtain a refund, each claimant will be required to submit a schedule of its monthly purchases of PS&S motor gasoline and to demonstrate that it was injured by PS&S's pricing practices. The specific requirements for proving injury are set forth in the following Proposed Decision and Order.

Applications for Refund should not be filed at this time. Appropriate public notice will be given when the submission of claims is authorized.

Some residual funds may remain after all meritorious first-stage claims have been satisfied. OHA invites interested parties to submit their views concerning alternative methods of distributing any remaining funds in a subsequent proceeding.

Any member of the public may submit written comments regarding the proposed refund procedures. Such parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice. All comments

---

[6] The share of the Martin escrow fund allocated to each firm listed in the Appendices represents 3.37 percent of the amount each was allegedly overcharged. This allocation is consistent with the terms of the consent order, which settled for 3.37 percent of the amount of the overcharge originally alleged in the NOPV.

[7] A volumetric approach is particularly appropriate in special refund proceedings in which the DOE is unable to identify readily persons who may be eligible to receive refunds. It has proved to be an administratively efficient method for determining what portion of the available settlement funds should be awarded to each successful claimant. It also serves as a useful approximation of injury for those claimants who are unable to quantify their injury.

[8] This figure is obtained by dividing the $30,463.90 not allotted to identified purchasers by the 68,594,227 gallons of motor gasoline sold to purchasers not identified by ERA.

[9] If we are unable to locate any firm listed in Appendix 4, we will reserve any funds allocated to that firm for distribution in a subsequent proceeding.

received in this proceeding will be available for public inspection between 1:00 and 5:00 p.m., Monday through Friday, except Federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E–234, 1000 Independence Avenue, SW., Washington, DC 20585.

Dated: March 13, 1986.

George B. Breznay,
Director, Office of Hearings and Appeals.

Proposed Decision and Order of the Department of Energy

Implementation of Special Refund Procedures

March 13, 1986.
Name of Firm: Petroleum Sales and Service, Inc.
Date of Filing: October 13, 1983
Case Number: HEF–0151

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special procedures to distribute funds received as a result of an enforcement proceeding in order to remedy the effects of actual or alleged violations of the DOE regulations. *See* 10 CFR Part 205, Subpart V. In accordance with the provisions of Subpart V, on October 13, 1983, ERA filed a Petition for the Implementation of Special Refund Procedures in connection with a consent order entered into with Petroleum Sales and Service, Inc. (PS&S).

I. Background

PS&S is a "reseller-retailer" of refined petroleum products, as that term was defined in 10 CFR 212.31, and is located in Buffalo, New York. A DOE audit of PS&S's records revealed possible violations of the Mandatory Petroleum Price Regulations. 10 CFR Part 212, Subpart F. The audit alleged that between April 1, 1979, and March 31, 1980, PS&S committed possible pricing violations amounting to $129,428 with respect to its sales of motor gasoline.

In order to settle all claims and disputes between PS&S and the DOE regarding the firm's sales of motor gasoline during the period covered by the audit, PS&S and the DOE entered into a consent order on September 29, 1981. The consent order refers to ERA's allegations of overcharges, but notes that there was no finding that violations occurred. Additionally, the consent order states that PS&S does not admit that it violated the regulations.

Under the terms of the consent order, PS&S was required, in a series of installments, to deposit $59,995, plus interest, into an interest-bearing escrow account for ultimate distribution by the DOE. PS&S avoided paying any installment interest by remitting the full sum on September 30, 1981.[1]

II. Proposed Refund Procedures

The procedural regulations of the DOE set forth general guidelines to be used by OHA in formulating and implementing a plan of distribution for funds received as a result of an enforcement proceeding. 10 CFR Part 205, Subpart V. The Subpart V process may be used in situations where the DOE is unable to identify readily those persons who likely were injured by alleged overcharges or to ascertain readily the amount of such persons' injuries. For a more detailed discussion of Subpart V and the authority of OHA to fashion procedures to distribute refunds, *see Office of Enforcement*, 9 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (*Vickers*).

Our experience with Subpart V cases leads us to believe that the distribution of refunds in this proceeding should take place in two stages. In the first stage, we will accept claims from identifiable purchasers of motor gasoline who may have been injured by PS&S's pricing practices during the period April 1, 1979, through March 31, 1980. If any funds remain after all mertitorious first-stage claims have been paid, they may be distributed in a second-stage proceeding. *See, e.g., Office of Special Counsel*, 10 DOE ¶85,048 (1982) (*Amoco*).

A. Refunds to Identifiable Purchasers

In the first stage of the PS&S refund proceeding, we propose to distribute the funds currently in escrow to claimants who demonstrate that they were injured by PS&S's alleged overcharges. As we have done in many prior refund cases, we propose to adopt certain presumptions which will be used to help determine the level of a purchaser's injury.

The presumptions we plan to adopt in this case are used to permit claimants to participate in the refund process without incurring inordinate expenses and to enable OHA to consider the refund applications in the most efficient way possible in view of the limited resources available. First, we plan to adopt a presumption that the alleged overcharges were dispersed evenly in all of PS&S's sales of motor gasoline made during the consent order period. In the past, we have referred to a refund process that uses this presumption as a volumetric method. Second, we propose to adopt a presumption of injury with respect to small claims. Third, we plan to adopt a presumption that spot purchasers were not injured by the alleged overcharges. Finally, we are making proposed findings that end users, certain types of regulated firms, and cooperatives were injured by PS&S's pricing practices.

The pro rata, or volumetric, refund presumption assumes that alleged overcharges by a consent order firm were spread equally over all gallons of product marketed by that firm. In the absence of better information, this assumption is sound because the DOE price regulations generally required a regulated firm to account for increased costs on a firm-wide basis in determining its prices. This presumption is rebuttable, however. A claimant which believes that it incurred a disproportionate share of the alleged overcharges may submit evidence proving this claim in order to receive a larger refund. *See, e.g., Sid Richardson Carbon and Gasoline Co. and Richardson Products Co./Siouxland Propane Co.*, 12 DOE ¶ 85,054 at 88,164 (1984), and cases cited therein.

Under the volumetric method we plan to adopt, a claimant will be eligible to receive a refund equal to the number of gallons of PS&S motor gasoline that it purchased during the consent order period times the volumetric factor. The volumetric factor is the average per gallon refund and in this case equals $0.001081 per gallon.[2] In addition, successful claimants will reveive a proportionate share of the accured interest.

The second presumption we plan to use is that purchasers of PS&S motor gasoline seeking small refunds were injured by the firm's pricing practices. There are a variety of reasons for adopting this presumption. *See, e.g., Uban Oil Co.*, 9 DOE ¶ 82,541 (1982).

These firms were in the chain of distribution where the alleged overcharges occurred and therefore bore some impact of the alleged overcharges, at least initially. In order to support a

---

[1] The total value of the PS&S escrow account stood at $91,334.84 as of February 28, 1986.

[2] This figure is computed by dividing the $59,995 received from PS&S by the 55,481,424 gallons of motor gasoline estimated to have been sold by the firm during the consent order period. The volume estimate was derived from data concerning PS&S's purchases of motor gasoline during the first six months of the consent order period. Since the firm has limited storage capacity, it is reasonable to assume that PS&S's sales of motor gasoline were roughly equal to its purchases during a given period. After making this assumption, we then extrapolated from the six month data to arrive at a sales estimate for the entire consent order period. The volumetric factor will be revised; however, if we are able to obtain more precise sales information at a later date.

specific claim of injury, a firm would have to compile and submit detailed factual information regarding the impact of alleged overcharges which took place many years ago. This procedure is generally time-consuming and expensive. With small claims, the cost to the firm of gathering the necessary information and the cost to OHA of analyzing it could exceed both the expected refund and the benefits from any additional precision. As a result, without simplified procedures injured parties could effectively be denied the opportunity to receive a refund.

Under the small-claims presumption, a claimant who is a reseller or retailer would not be required to submit any additional evidence of injury beyond volumes of PS&S motor gasoline purchased if its refund claim is based on purchases below a certain level. Several factors determine the value of this threshold. For example, the cost to the applicant and the government of compiling and analyzing information sufficient to show injury should not exceed the amount of any relevent refund. In this case, where the refund amount is fairly low and the early months of the consent order period are many years past, $5,000 is a reasonable value for the threshold. *See Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069 at 88,210 (1984); *Office of Special Counsel*, 11 DOE ¶ 85,226 (1984) (*Conoco*), and cases cited therein.

A reseller or retailer which claims a refund in excess of $5,000 will be required to document its injury. While there are a variety of methods by which a firm can make such a showing, a firm is generally required to demonstrate (i) that it maintained a "bank" of unrecovered costs, in order to show that it did not pass the alleged overcharges through to its own customers, and (ii) that as a result of market conditions, it did not pass through those increased costs.[3]

A modification of the standard injury requirement is necessary in this proceeding because for 8½ months of the 12-month PS&S consent order period, retailers of motor gasoline were not required to compute MLSPs with reference to May 15, 1973 selling prices and increased costs. *See* 10 CFR 212.93; 45 FR 29546 (1980). Instead, effective July 16, 1979, a retailer was required to calculate its MLSP under a fixed-margin approach set forth in the new rule. Unrecouped increased product costs could no longer be banked for later recovery. *Id.* Consequently, retailers were not required to maintain or compute cost banks during the 8½ month period. As a result, any requirement that a retailer claimant make a demonstration of injury like that contemplated for resellers, *i.e.*, based on unrecovered cost banks, would effectively eliminate all non-threshold retailer claimants for a portion of the consent order period. Therefore, in this proceeding, we will allow retailers which lack banks subsequent to July 16, 1979 to file a claim for a refund which exceeds $5,000.[4] Like resellers, retailers will be required for the entire consent order period to show that market conditions prevented them from recovering those increased product costs, *e.g.*, through a demonstration of reduced profit margins, decreased market shares, depressed sales volumes or competitive disadvantage.[5]

If a reseller or retailer made only spot purchases, we propose that it should not receive a refund since it is unlikely to have been injured. As we have previously stated with respect to spot purchasers:

> [T]hose customers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot market purchases of [the firm's product] at increased prices unless they were able to pass through the full amount of [the firm's] quoted selling price at the time of purchase to their own customers.

Vickers, 8 DOE at 85,396–97. We believe the same rationale holds true in the present case. Therefore, we propose that firms which made only spot purchases from PS&S not receive refunds unless they present evidence which rebuts the spot purchaser presumption and establishes the extent to which they were injured as a result of their purchases of PS&S motor gasoline during the consent order period.

As noted above, we have concluded that end users were injured by the alleged overcharges. Unlike regulated firms in the petroleum industry, members of this group generally were not subject to price controls during the consent order period. They were therefore not required to base their pricing decisions on cost increases or to keep records which would show whether they passed through cost increases. An analysis of the impact of the alleged overcharges on the final prices of goods and services which were not covered by the petroleum price regulations would therefore be beyond the scope of a special refund proceeding. *See Office of Enforcement*, 10 DOE ¶ 85,072 (1983) (*PVM*); *See also Texas Oil & Gas Corp.*, 12 DOE at 88,209 and cases cited therein.[6]

In addition, we propose that firms whose prices for goods and services are regulated by a governmental agency or by the terms of a cooperative agreement not be required to demonstrate that they absorbed the motor gasoline overcharges alleged by ERA. In the case of regulated firms, *e.g.*, public utilities, any overcharges incurred as a result of PS&S's alleged violations of the DOE regulations would routinely be passed through to the utilities' customers. Similarly, any refunds received by such firms would be reflected in the rates they were allowed to charge their customers. Refunds to agricultural cooperatives would likewise directly influence the prices charged to their member customers. Consequently, we propose adding such firms to the class of claimants that are not required to show that they did not pass through to their customers cost increases resulting from alleged overcharges. *See, e.g., Office of Special Counsel*, 9 DOE ¶ 82,538 (1982) (*Tenneco*), *and Office of Special Counsel*, 9 DOE ¶ 82,545 at 85,244 (1982) (*Pennzoil*). Instead, those firms should provide with their application a full explanation of the manner in which refunds would be passed through to their customers and how the appropriate regulatory body or membership group will be advised of the applicant's receipt of any refund money. Sales by cooperatives to nonmembers, however, will be treated the same as sales by any other reseller.

As in previous cases, only claims for at least $15 will be processed. This minimum has been adopted in prior refund cases because the cost of

---

[3] This injury requirement reflects the nature of the petroleum price regulations in effect beginning on August 19, 1973, and ending on July 16, 1979 for retailers, and on May 1, 1980 for resellers. Under the original rules, a reseller or retailer of motor gasoline was required to calculate its maximum lawful selling price (MLSP) by summing its selling price on May 15, 1973, with increased costs incurred since that time. A firm which was unable to charge its MLSP in a particular month could "bank" any unrecovered increased product costs, so that those costs could be recouped in a later month, if possible. *See* 10 CFR 212.93; 45 FR 29546 (1980).

[4] The cost bank requirement has been relaxed in other instances involving the change in the pricing regulations for motor gasoline. *See* Tenneco Oil Company/United Fuels Corporation, 10 DOE ¶ 85,005 at 88,017 n.1 (1982).

[5] Resellers or retailers who claim a refund in excess of $5,000 but who cannot establish that they did not pass through the price increases will be eligible for a refund of up to the $5,000 threshold, without being required to submit evidence of injury beyond purchase volumes. Firms potentially eligible for greater refunds may choose to limit their claims to $5,000. *See* Vickers, 8 DOE at 85,396. *See also* Office of Enforcement, 10 DOE ¶ 85,029 at 88,122 (1982).

[6] If a firm is both a spot purchaser and an end user, it will be treated as an end user and will not be required to make any showing of injury beyond that required of other end users.

processing claims for refunds of less than $15 outweighs the benefits of restitution in those situations. *See, e.g., Uban Oil Co.*, 9 DOE at 85,225. *See also* 10 CFR 205.286(b). The same principal applies here.

If valid claims exceed the funds available in the escrow account, all refunds will be reduced proportionately. Actual refunds will be determined after analyzing all appropriate claims.

B. Applications for Refund

Any purchaser claiming a portion of the consent order funds will be required to file an Application for Refund pursuant to 10 CFR 205.283. In its application, a claimant must include a schedule of its monthly purchases of PS&S motor gasoline as well as all relevant information necessary to support their claim in accordance with the presumptions and findings outlined above. A claimant must also state whether it has previously received a refund, from any source, with respect to the alleged overcharges underlying this proceeding. Each applicant must also state whether there has been a change in ownership of the firm since the audit period. If there has been a change in ownership, the applicant must provide the names and addresses of the other owners, and should either state the reasons why the refund should be paid to the applicant rather than to the other owners or provide a signed statement from the other owners indicating that they do not claim a refund. Finally, an applicant should report whether it is or has been involved as a party in DOE enforcement or private actions filed under section 210 of the Economic Stabilization Act. If these actions have been concluded the applicant should furnish a copy of any final order issued in the matter. If the action is still in progress, the applicant should briefly describe the action and its current status. The applicant must keep OHA informed of any change in status while its Application for Refund is pending. *See* 10 CFR 205.9(d).

C. Distribution of Remaining Consent Order Funds

In the event that money remains after all meritorious claims have been satisfied, residual funds could be distributed in a number of ways in a subsequent proceeding. However, we will not be in a position to decide what should be done with any remaining funds until the initial stage of this refund proceeding has been completed. We encourage the submission by interested parties of proposals which address alternative methods of distributing any remaining funds.

It Is Therefore Ordered That:

The refund amount remitted to the Department of Energy by Petroleum Sales and Service, Inc., pursuant to the consent order executed on September 29, 1981, will be distributed in accordance with the foregoing decision.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[WH-FRL-2988-2]

State and Local Assistance; Grants for Construction of Treatment Works

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of allotment.

SUMMARY: This notice sets forth the allotments to the States of $574.2 million for the municipal wastewater treatment works construction grants program. On December 20, 1985, in Pub. L. No. 99-190, Congress appropriated and made immediately available $600 million for allotment to the States in fiscal year (FY) 1986. As part of the Administration's Balanced Budget and Emergency Deficit Control Act sequestration order for FY 1986, there has been a 4.3 percent reduction to the $600 million, resulting in a revised allotment total of $574.2 million.

Section 205(c)(2) of the Clean Water Act (the Act), as amended by Pub. L. 97-117, provides that sums appropriated through FY 1985 be allotted to the States in accordance with the table in section 205(c)(2). Although the construction grants program's authorization period ended on October 1, 1985, in Pub. L. 99-190 Congress directed that the $600 million to be made immediately available be allotted to the States according to the referenced table; and, in the conference report, Congress directed that the funds be expended subject to the statutory provisions that were in effect during FY 1985.

Through promulgation of this notice, the requirements of the Act are fulfilled and the public is notified of the amounts made available to the States for grants for the construction of municipal wastewater treatment works.

FOR FURTHER INFORMATION CONTACT: Mr. John Olsen, Chief, Program Management Branch, Municipal Construction Division, Office of Municipal Pollution Control, (202) 382-5837.

SUPPLEMENTARY INFORMATION: Pub. L. 99-190 appropriated and made immediately available $600 million to fund the construction grants program in fiscal year (FY) 1986. Congress directed that the funds are to be allotted to the States under section 205 of the Clean Water Act (the Act). Subsequently, as part of the Balanced Budget and Emergency Deficit Control Act sequestration order for FY 1986, there has been a 4.3 percent reduction to the $600 million, resulting in a revised allotment total of $574.2 million. Congress stated in the conference report to Pub. L. 99-190; H.R. Rep. No. 450, 99th Cong., 1st Sess. 359; that it expects to make an additional $1,800,000,000 available at the earliest opportunity after enactment of the Clean Water Act amendments.

As directed by Congress, the funds to be made immediately available for FY 1986 are hereby allotted on the basis of the percentages listed in the table contained in section 205(c)(2). This table complies with section 205(e) of the Act, which requires that all States receive at least one-half of one percent of the total allotment. The percentages in the table were applied to the revised allotment total of $574.2 million to determine actual dollar amounts, which follow.

The conference report to Pub. L. 99-190 directed that funds be subject to the statutory provisions that were in effect during FY 1985. Pub. L. 99-190 contains the following passage relative to the use of these funds: ". . . funds appropriated by this section shall not be limited to phases or segments of previously funded projects."

These allotments are available for obligation until September 30, 1987. After that date, unobligated balances will be reallotted in accordance with the Act and EPA regulated 40 CFR 35.2010. Grants from the allotments may be awarded as of the date that advices of allowance are issued to the EPA Regional Administrators by the Comptroller of EPA.

Dated: March 12, 1986.

Lee M. Thomas,

Administrator.

BILLING CODE 6560-50-M

[OW-1-FRL-2967-3]

Water Pollution Control; Sweedens Swamp, MA; Recommended Determination To Prohibit the Specification of an Area for Use as a Disposal Site; Extension of Time

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: EPA has for good cause extended the time for making a recommendation under section 404(c) of the Clean Water Act concerning a proposal by The Pyramid Companies to fill portions of Sweedens Swamp in Attleboro, Massachusetts, for the purpose of building a shopping mall. The time for making the recommendation has been extended from October 26, 1985 to March 4, 1986.

DATE: Extension of recommendation until March 4, 1986.

FOR FURTHER INFORMATION CONTACT: Douglas Thompson, U.S. EPA, Region I, J.F. Kennedy Building, Boston, MA 02203; (617) 223-5600.

SUPPLEMENTARY INFORMATION:

I. Description of the Section 404(c) Process

The Clean Water Act, 33 U.S.C. 1251 *et seq.*, prohibits the discharge of pollutants, including dredged and fill material, into the waters of the United States (including wetlands) except in compliance with, among other things, section 404. Section 404(c) authorizes EPA to prohibit or restrict the use of waters of the U.S. for the discharge of dredged or fill material, if the Agency determines, after opportunity for a public hearing and consultation with the Corps of Engineers ("Corps") that such use would have an unacceptable adverse effect on certain resources, including wildlife habitat.

Under EPA's implementing regulations (40 CFR Part 231), the Regional Administrator is responsible for initiating the 404(c) process, consulting with the Corps and the prospective discharger, seeking public comment, holding a public hearing if requested, and preparing a recommended decision based on a review of the record.

The Regional Administrator's recommendation is then reviewed at EPA Headquarters, and after further consultation with the Corps and the discharger, is either affirmed, modified, or reversed by the Assistant Administrator for External Affairs. While the regulations specify normal time periods for these steps, it authorizes the Administrator and the Regional Administrator to extend those time periods for good cause and to publish notice of the extension in the **Federal Register**. The regulation does not require advance publication in order for the extension to be effective.

II. Proceedings to Date and Extension of Time in Attleboro, Massachusetts Case

The Pyramid Companies ("Pyramid") proposes to fill 32 acres of forested wetland (known as Sweedens Swamp) in Attleboro, Massachusetts, in order to build a shopping mall.

The Regional Administrator of EPA initiated the instant 404(c) process on July 23, 1985, by notifying the Corps and Pyramid of his intention to issue a proposed determination to prohibit or restrict the use of Sweedens Swamp as a disposal site, based on the belief that the proposed project may have unacceptable adverse effects on wildlife habitat at the site. The proposed determination was signed by the Regional Administrator on August 13, 1985. The public notice of the proposed determination, published in the **Federal Register** on August 21, 1985, established a public comment period from August 21 through October 21, 1985 and scheduled a public hearing in Attleboro on September 26, 1985.

Pursuant to 40 CFR 231.5, the Regional Administrator initially expected to withdraw his proposed determination or forward a recommendation to EPA Headquarters by October 26, 1985. For several reasons, as discussed below, the time for completing the regional recommendation was extended until March 4, 1986. This notice is being published pursuant to 40 CFR 231.8 to inform the public of the good cause for the time extension.

One of the issues on which EPA sought public comment was Pyramid's plan to create artificial wetlands at an offsite location. Pyramid did not make its detailed plans available, however, until near the close of EPA's comment period. On October 18, 1985, the New England Division of the Corps issued a public notice soliciting comment on Pyramid's proposal. A public hearing on the plan was conducted by the Corps on November 18, 1985, and public comments were accepted until November 28, 1985. Because the Corps had sought comments on an issue that was also a subject of EPA's request for comments, the Regional Administrator determined that there was good cause to wait to incorporate the comments submitted to the Corps into EPA's 404(c) record.

Additional causes for the extension of time in preparing the recommendation were the unexpectedly high number of public comments submitted to EPA and the Corps, and the complexity of the issues posed by this case. Over 1,200 comments, totalling thousands of pages, were submitted to EPA during the comment period. Hundreds of other comments were submitted before and after the comment period. All of these were reviewed and evaluated in preparation of the recommendation, a process which took a substantial amount of time.

Also, as described in detail in the recommendation, Pyramid's proposed project and the Corps' notice of intent to issue a permit presented numerous technical, legal, and policy issues of a complexity not anticipated by the 30-day time frame provided by § 231.5. The Regional Administrator required additional time to give full consideration to these issues.

Accordingly, the Regional Administrator determined that all of these reasons constituted good cause for

VOL
51
ISS
54
MR
20
1986
UMI

extending the time for making the regional recommendation from October 26, 1985 to March 4, 1986.

The recommendation has been forwarded to EPA's Assistant Administrator for External Affairs, who is responsible for making the final decision. A copy of the recommendation may be obtained by writing to or calling the person listed above under the section captioned For Further Information Contact.

Dated: March 11, 1986.

Michael R. Deland,

Regional Administrator.

BILLING CODE 6560-50-M

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

March 17, 1986.

Background

On June 15, 1984, the Office of Management and Budget (OMB) delegated to the Board of Governors of the Federal Reserve System (Board) its approval authority under the Paperwork Reduction Act of 1980, as per 5 CFR 1320.9, "to approve of and assign OMB control numbers to collection of information requests and requirements conducted or sponsored by the Board under conditions set forth in 5 CFR 1320.9." Board-approved collections of information will be incorporated into the official OMB inventory of currently approved collections of information. A copy of the SF 83 and supporting statement and the approved collection of information instrument(s) will be placed into OMB's public docket files. The following forms, which are being handled under this delegated authority, have received initial Board approval and are hereby published for comment. At the end of the comment period, the proposed information collection, along with an analysis of comments and recommendations received, will be submitted to the Board for final approval under OMB delegated authority.

DATE: Comments must be received within ten calendar days of the date of publication in the **Federal Register**.

ADDRESS: Comments, which should refer to the OMB Docket number (or Agency form number in the case of a new information collection that has not yet been assigned an OMB number), should be addressed to Mr. William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th and C Streets, NW., Washington, DC 20551, or delivered to room B-2223 between 8:45 a.m. and 5:15 p.m. Comments received may be inspected in room B-1122 between 8:45 a.m. and 5:15 p.m., except as provided in § 261.6(a) of the Board's Rules Regarding Availability of Information, 12 CFR 261.6(a).

A copy of the comments may also be submitted to the OMB desk officer for the Board: Robert Neal, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: A copy of the proposed form, the request for clearance (SF 83), supporting statement, instructions, and other documents that will be placed into OMB's public docket files once approved may be requested from the agency clearance officer, whose name appears below:

Federal Reserve Board Clearance Officer—Martha Bethea—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202-452-3822).

Proposal To Approve Under OMB-Delegated Authority a Revision of the Following Report

1. Report title: Monthly Survey of Selected Deposits and Other Accounts.

Agency form number: FR 2042.

OMB Docket number: 7100-0066.

Frequency: Monthly.

Reporters: Commercial banks, mutual savings banks and FDIC-insured Federal savings banks.

Small businesses are affected.

General description of report: This information collection is voluntary [12 U.S.C. 248(a)(2)] and is given confidential treatment [U.S.C. 552(b)(4)].

These data, which are collected from a sample of commercial banks, mutual savings banks, and FDIC-insured Federal savings banks, are used by the Federal Reserve (1) to analyze and interpret movements in the monetary aggregates, (2) to observe competitive developments between banks and thrift institutions, and (3) to help monitor the earnings position of banks and thrifts.

Board of Governors of the Federal Reserve System, March 17, 1986.

William W. Wiles,

Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Mental Health Small Grant Review Committee Meeting

SUMMARY: This notice sets forth the schedule and proposed agenda of the forthcoming meeting of the Mental Health Small Grant Review Committee. This meeting will be open for discussion of administrative announcements and program developments. The committee will be performing initial review of applications for Federal assistance. Therefore, portions of the meeting will be closed to the public as determined by the Acting Administrator, ADAMHA, in accordance with 5 U.S.C. 552(b)(6) and 5 U.S.C. app. 2 section 10(d). Notice of this meeting is required under the Federal Advisory Committee Act, Pub. L. 92-463.

Committee Name: Mental Health Small Grant Review Committee.

Date and Time: April 18-19, 1:30 p.m.

Place: The Canterbury Hotel, 1733 N Street, NW., Washington, DC 20036.

Status of Meeting:

OPEN—April 18, 1:30-2:30 p.m.

CLOSED—Otherwise.

Contact: Barbara McCracken, Room 9-95, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301) 443-4843.

Purpose: The Committee is charged with initial review of applications for research in all disciplines pertaining to alcohol, drug abuse, and mental health for support of research in the areas of psychology, psychiatry, and the behavioral and biological sciences, with recommendations to the National Advisory Mental Health Council, the National Advisory Council on Alcohol Abuse and Alcoholism, and the National Advisory Council on Drug Abuse.

Summary of meeting and roster of committee members may be obtained from Ms. Helen Garrett, Committee Management Officer, Room 9-95, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443-4333.

Dated: March 14, 1986.

Brenda L. Williamson,

Acting Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Camping and Firearms Use Restriction; Merced River and Folsom Resource Areas, Bakersfield District, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Establishment of Camping and Firearms Use Restriction Order on Public Lands along the Merced River of the Folsom Resource Area, Bakersfield District, CA.

SUMMARY: Persons without commercial permits may camp along the Merced River in designated campsites only, between Bryceburg and Halls Gulch. Each campsite will have a maximum occupancy of 4 adults (16 years and older). Each campsite may have no more than two motor vehicles, or combination of a motor vehicle and a recreational vehicle. Discharge of firearms is prohibited within ½ mile of the center of the river for all public lands along the Merced River. For the purpose of this order, a firearm is defined as under Title 18, U.S.C., Chapter 44, section 921(a)(3). Federal, State and local law enforcement officers are exempt from this order in the course of their official duties. This order goes into effect on March 31, 1986.

DATE: This order is in effect on March 31, 1986.

FOR FURTHER INFORMATION CONTACT: Deane K. Swickard, Folsom Resource Area Manager, Folsom Resource Area Office, 63 Natoma Street, Folsom, California 95630. Telephone: (916) 985-4474.

SUPPLEMENTARY INFORMATION: The purpose of this order is to protect resources of the public land, persons and property, and augment the Camping and Occupancy Restriction Order published in the **Federal Register**, Volume 48, No. 208, October 26, 1983, 49555. Authority for this restriction order is contained in CFR Title 43, Chapter II, Part 8364, Subparts 8364.1 and 8365.1-2(a).

Any person who fails to comply with this restriction order may be subject to a fine not to exceed $1,000 and/or imprisonment not to exceed 12 months. Penalties are contained in CFR Title 43, Chapter II, Part 8360, Subpart 8360.0-7.

D.K. Swickard,

Area Manager.

BILLING CODE 4310-40-M

[A-21787]

Classification of Public Lands; Arizona

AGENCY: Bureau of Land Management (BLM), Interior.

SUMMARY: The city of Mesa proposes to develop a training facility for law enforcement and firefighting personnel within the following described forty acres of public land:

G&SR Meridian, Arizona

T. 2 N., R. 6 E.,
  Sec. 33, SE¼NW¼.

The land has been examined and found suitable for classification for recreation and public purposes under the provisions of the Recreation and Public Purposes Act (R&PP) of June 14, 1926, as amended (44 Stat. 741; 43 U.S.C. 869; 869-4) and the regulations contained in 43 CFR 2740 and 43 CFR 2912.

In addition, the lands are determined to meet general classification criteria of 43 CFR 2410.1(a)(d) and specific public purposes classification criteria of 43 CFR 2430.4(a)(c).

Classification of this land under the provisions of the above cited Recreation and Public Purposes Act segregates them on the date of publication in the **Federal Register** from all appropriations including location under the mining laws, but not from applications under the mineral leasing laws or the Recreation and Public Purposes Act.

For a period of forty-five (45) days, interested parties may submit comments to the District Manager, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

Dated: March 14, 1986.

Marlyn V. Jones,

District Manager.

BILLING CODE 4310-32-M

Environmental Statements; California Vegetation Management; Notice of Intent

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent.

SUMMARY: Notice is hereby given that the Bureau of Land Management with the United States Forest Service as Cooperating Agency will prepare a programmatic Environmental Impact Statement for proposed vegetation management activities on public lands in California and northwest Nevada.

Proposed vegetation management includes chemical, manual, mechanical and prescribed burning control of vegetation which interferes with the survival and growth of commercial tree species, range vegetation, and wildlife habitat; encroaches upon recreation sites, roads and rights-of-way; is considered a fire hazard; or is identified as toxic or noxious to animals or humans.

The control practices would be applied to public lands throughout California and in northwest Nevada. The amount of land being considered for vegetation control annually is 3,000 acres of chemical spraying, 25,000 acres of prescribed burning and 2,500 acres of mechanical treatments.

Chemicals being considered for use include the following: Amitrole; Asulam; Atrazine; Bromacil; 2,4-D; 2,4-DP; Dalapon; Dicamba; Diuron; Fosamine; Glyphosate; Hexazinone; Picloram; Simazine; Tebuthiuron; Triclopyr and Ureabor.

The EIS will be prepared by an interdisciplinary team which will consider the following general issues which were developed from internal issue identification efforts and from the

VOL
51
ISS
54
MR
20
1986
UMI

experiences of other Vegetation Management EIS's:

1. Air Quality
2. Soils
3. Water Resources
4. Vegetation
5. Animals
6. Cultural Resources
7. Visual Resources and Recreation
8. Wilderness and Special areas
9. Socio-Economics
10. Human Health

This programmatic EIS will assess the overall impacts of implementing a vegetation control program. Site specific impacts will be assessed by EAs on specific project proposals to be developed in the future.

Written input will be requested through public mailings and news releases. Input should be received at the address below by May 1, 1986 to be considered in the EIS.

Public meetings have not been scheduled for this scoping process. If it is determined, as a result of public response to this NOI, that public meetings are needed they will be held prior to initiation of Draft EIS preparation.

FOR FURTHER INFORMATION CONTACT: Mark Blakeslee, Vegetation Management EIS Team Leader, Bureau of Land Management, 2800 Cottage Way, Room E–2841, Sacramento, CA 95825 (916) 978–4725.

Dated: March 14, 1986.

Lakeview District Multiple Use Advisory Council; Meeting

Notice is hereby given, in accordance with Pub. L. 92–463 that the Lakeview District Multiple Use Advisory Council will hold a meeting/tour on April 29th 1986. The council will assemble at 7:30 a.m. in the conference room of the Bureau of Land Management office located at 1000 South 9th Street, P.O. Box 151, Lakeview, Oregon 97630. The council will then depart for an all day tour at 8:00 A.M. The tour will take place in High Desert Resource Area. The tour will center on recreation use and rangeland monitoring. The BLM will also brief the council on ongoing program developments including range, wildlife, and land exchanges.

The tour is open to the public. Public wishing to attend must provide their own transportation. Anyone wishing to attend and/or make written or oral statements to the council is requested to contact the District Manager at the above address prior to April 12, 1986. Time will be allowed during lunch for public comments. Summary minutes of the meeting will be available for review and reproduction within 30 days following the tour.

Dated: March 14, 1986.

Jerry Asher,

District Manager.

BILLING CODE 4310–33–M

Roseburg District Advisory Council, Meeting

Notice is hereby given in accordance with Section 309 of the Federal Land Policy and Management Act (as amended), the Roseburg District Advisory Council will meet May 2, 1986. The meeting will convene at 9:30 a.m. in the conference room at the Roseburg District Office, 777 N. W. Garden Valley Blvd., Roseburg, Oregon.

The agenda for the meeting will include:

1. Opening remarks and general business.
2. Introduction of new members and review of the council charter.
3. Election of Chairman and Vice-Chairman.
4. Review of district programs.
5. Briefing regarding BLM land exchange strategy.
6. Public comment period—begins about 11:00 a.m.

Interested persons may make oral statements before the Council or file written statements for the Council's consideration.

Summary minutes of the Council meeting will be maintained in the District Office and available for public inspection during regular business hours within 30 days following the meeting.

Dated: March 12, 1986.

[W–86583]

Wyoming; Proposed Reinstatement of Terminated Oil and Gas Lease

March 12, 1986.

Pursuant to the provisions of Pub. L. 97–451, 96 Stat. 2462–2466, and Regulation 43 CFR 3108.2–3 (a) and (b)(1), a petition for reinstatement of oil and gas lease W–86583 for lands in Niobrara County, Wyoming was timely filed and was accompanied by all the required rentals accruing from the date of termination.

The lessee has agreed to the amended lease terms for rentals and royalties at rates of $5.00 per acre, or fraction thereof, per year and 16⅔ percent, respectively.

The lessee has paid the required $500.00 administrative fee and $106.25 to reimburse the Department for the cost of this Federal Register notice.

The lessee has met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease W–86583 effective June 1, 1985, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Andrew L. Tarshis,

Chief, Leasing Section.

AGENCY: Bureau of Land Management, Miles City District, South Dakota Resource Area Office, Interior.

ACTION: Notice of Realty Action Modified Competitive Sale of Public Land in Stanley County, South Dakota.

SUMARY: The following described lands have been examined and identified as suitable for disposal by sale pursuant to 43 CFR 2710 and under the authority of Title II, sec. 203 of the Federal Land Policy and Management Act of 1976.

Black Hills Meridian

M–66128(SD) appraised value $75.00 per acre.

T. 4N., R. 33 E.,
  Sec. 24, lot 3.

Containing 29.35 acres and located approximately 15 miles southeast of Fort Pierre, South Dakota. Designated bidder is Henry Huckfeldt.

M–66129(SD) appraised value $75.00 per acre.

T. 7N., R. 29 E.,
  Sec. 31, SE¼SE¼.

Containing 40 acres and located 18½ miles northwest of Fort Pierre, South Dakota. Designated bidder is J. Clinton McQuistion.

M–66130(SD) appraised value $75.00 per acre.

T. 7 N., R. 29 E.,
  Sec. 32, E½NW¼.

Containing 80 acres and located 18½ miles northwest of Fort Pierre, South Dakota. Designated bidder is J. Clinton McQuistion.

M–66131(SD) appraised value $75.00 per acre.

T. 7 N., R. 29 E.,
  Sec. 32, W½SW¼.

Containing 80 acres and located 18½ miles northwest of Fort Pierre, South Dakota. Designated bidder is J. Clinton McQuistion.

M–66132(SD) appraised value $75.00 per acre.

T. 7 N., R. 29 E.,
  Sec. 34, NE¼NW¼.

Containing 40 acres and located 17½ miles northwest of Fort Pierre, South Dakota. Designated bidder is J. Clinton McQuistion.

All of the above parcels are isolated from other large blocks of public lands and are difficult and uneconomical to manage. The ditches and canal reservations, as well as all minerals will be reserved to the Federal government in all parcels.

DATES: For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Bureau of Land Management, Miles City District, P.O. Box 940, Miles City, Montana 59301.

FOR FURTHER INFORMATION CONTACT: Information related to the sales, including planning documents and environmental assessment is available for review at the South Dakota Resource Area, 310 Roundup St., Belle Fourche, South Dakota 57717, Telephone Number (605) 892–2526.

SUPPLEMENTARY INFORMATION: The proposed action is consistent with the State, County, and BLM policies and plans and has been discussed with the Stanley County Commission on April 3, 1985.

Bids will be opened on May 21, 1986, at 9 a.m. If not sold, the land will remain available for sale on a continuing basis until a sale is completed. Any sealed bids received will be opened at 9 a.m. each succeeding first and third Wednesdays until the lands are sold or the sale is closed.

Method of Bidding: The land will be sold by sealed bid only on a modified competitive basis. Each bid must be accompanied by a certified check, postal money order, bank draft, or cashier's check made payable to the Bureau of Land Management for not less than one-fifth (20%) of the amount bid.

Modified Bidding: For a period of 30 days following the date of the sale, Henry Huckfeldt and J. Clinton McQuisition, the designated bidders, will be offered the right to meet the highest qualifying bid. The designated bidder must submit a bid of at least the fair market value prior to the sale date in order to be considered under the modified bidding provisions. If he meets the highest bid, the land will be sold to him, and the other bid will be returned. His refusal to meet the highest bid or to submit any bid at all prior to the sale date shall constitute a waiver of such bidding provisions.

Bidder Qualifications: The bidder must be a U.S. citizen or, in the case of a corporation, subject to the laws of any state of the U.S. A state, state instrumentality or political subdivision submitting a bid must be authorized to hold property. Any other entity submitting a bid must be legally capable of holding and conveying lands or interests therein under the laws of the State of South Dakota. Bids must be made by the principal or his agent.

Bid Standards: No bid will be accepted for less than the appraised fair market value. Bids must be individually submitted for each parcel in this notice.

The sealed bid envelope must be addressed as follows:

Cahier—Sealed Bid.
Public Land Sale M– —— (SD)
P.O. Box 31434
Billings, Montana 59107–1434

Final Details: Once a high bidder is accepted, the successful bidder shall submit the remainder of the full bid price within 180 days. Failure to submit the required amount within the alloted time will result in cancellation of the sale and the deposit will be forfeited. All bids will be either returned, accepted or rejected within 60 days of the sale date.

Dated: March 11, 1986.

Bob Teegarden,

Acting District Manager.

BILLING CODE 4310-84-M

Minerals Management Service

Royalty Management Advisory Committee, Production Accounting and Auditing System Onshore Conversion Working Panel; Meeting

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of meeting.

SUMMARY: The Minerals Management Service (MMS), Royalty Management Program, hereby gives notice that the Production Accounting and Auditing System (PAAS) Onshore Conversion Working Panel, established by the Royalty Management Advisory Committee, will meet in Lakewood, Colorado, at the location and on the dates indicated below.

This notice is published in accordance with the Federal Advisory Committee Act (Pub. L. No. 92-463).

The PAAS Onshore Conversion Working Panel will submit recommendations to the Advisory Committee regarding the feasibility and practicality of converting onshore Federal and/or Indian leases to PAAS as well as recommendations regarding the report and findings of the Mineral Lease Information Study. (See Supplementary Information Section below.) The Panel will also advise if there are other alternatives that should be considered.

Location and dates: The PAAS Onshore Conversion Working Panel will meet at the COMPRI Hotel, 137 Union Boulevard, Lakewood, Colorado, March 26-28, 1986.

The Panel will meet from 8 a.m. to 5 p.m. daily. If the meeting is completed in less than the three days scheduled, the Panel will adjourn upon such completion.

The public is invited to attend these meetings and make oral or witten comments. A time will be set aside by the Panel chairperson during which the public will be invited to make oral comments. Written comments should be submitted by April 25, 1986, to the address listed below.

FOR FURTHER INFORMATION CONTACT: Vernon B. Ingraham, Minerals management Service, Royalty management Program, Office of External Affairs, Denver Federal Center, Building 85, P.O. Box 25165, Mail Stop 660, Denver, Colorado 80225, telephone number (303) 231-3360, (FTS) 326-3360.

SUPPLEMENTARY INFORMATION: MMS implemented PAAS for all reporters of offshore lease production and for a select number of reporters of onshore lease production who were included in the pilot phase of the PAAS implementation. Although most of the royalties are generated by Federal oil and gas production from offshore leases, there are relatively few offshore Federal leases and wells compared to onshore Federal leases and wells. A Department of the Interior (DOI) project, the Mineral Lease Information Study, was begun in the fall of 1985 to evaluate the cost effectiveness of PAAS and to recommend whether additional onshore Federal and Indian leases should be converted to PAAS.

The PAAS Onshore Conversion Working Panel is one of six working panels established by the Royalty Management Advisory Committee. The panels are composed of both Advisory Committee members and non-Committee members, and were established to provide the Advisory Committee with analyses of specific issues and proposed recommendations. Panel recommendations will be reviewed by the Advisory Committee, which will then decide what advice and recommendations to give to the DOI and the MMS. Although the panels may meet with DOI or MMS staff members to obtain information they require in conducting their analyses, advice and recommendations of the panel will be made to the Advisory Committee and not to the DOI or the MMS.

Dated: March 14, 1986.

William D. Bettenberg,

Director, Minerals Management Service

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 30765]

Missouri Pacific Railroad Co.; Control and Consolidation Exemption; Jefferson Southwestern Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Exemption.

SUMMARY: The Interstate Commerce Commission exempts Missouri Pacific Railroad Company (MP) from the requirements of 49 U.S.C. 11343 with respect to: (1) The acquisition by MP of sole control of The Jefferson Southwestern Railroad Company (JSW); and (2) the consolidation of MP and JSW through either merger or purchase of assets, subject to standard employee protective conditions.

DATES: This exemption is effective on April 18, 1986. Petitions to stay must be filed by March 31, 1986. Petitions for reconsideration must be filed by April 9, 1986.

ADDRESSES: Send pleadings referring to Finance Docket No. 30765 to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commisison, Washington, DC 20423.
(2) James C. Stroo, 1416 Dodge Street, Omaha, NE 68179.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275-7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289-4357 (DC Metropolitan area), or toll free (800) 424-5403.

Decided: March 10, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley.

N.D.C. Railroad Co., a Division of Horwith Leasing Co., Inc.; Operation Exemption in Northampton, PA

N.D.C. Railroad Company, a division of Horwith Leasing Company, Inc., has filed a notice of exemption to operate Consolidated Rail Corporation's line between milepost 0.1 and approximately milepost 0.6, a distance of approximately 0.5 miles, in Northampton, PA. Any comments must be filed with the Commission and served on Jeffrey Horwith, P.O. Box 7, Route 329, Northampton, PA 18067.

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio.* Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: March 4, 1986.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

BILLING CODE 7035–01–M

[Finance Docket No. 30787]

Willamette Valley Railroad Co.; Merger Exemption; Willamina & Grand Ronde Railroad Co.

Willamette Valley Railroad Co. (WVRC) and Willamina & Grand Ronde Railroad Co. (W&GRR) filed a notice of exemption for W&GRR to merge into WVRC.

WVRC and W&GRR are both controlled by Mr. David P. Root and other members of the Root family. Consummation of the merger will promote corporate simplification and eliminate the expense and burden associated with maintenance of W&GRR as a separate corporate entity. Under the merger plan, W&GRR will be dissolved as a separate corporate entity, and all of its assets and liabilities will be vested in WVRC. No reduction of transportation facilities is contemplated, and no obligations of WVRC will be impaired.

This is a transaction within a corporate family of the type specifically exempted from the necessity of prior review and approval under 49 CFR 1180.2(d)(3). It will not result in adverse changes in service levels, significant operational changes, or a change in the competitive balance with carriers outside the corporate family.

As a condition to use of this exemption any employees affected by the merger will be protected pursuant to *New York Dock Ry.—Control—Brooklyn Eastern District*, 360 I.C.C. 60 (1979).

Decided: March 4, 1986.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

James H. Bayne,

Secretary.

BILLING CODE 7035–01–M

[Docket No. AB–52 (Sub-47)]

The Atchison, Topeka & Santa Fe Railway Co.; Abandonment in Prowers County, CO; Findings

The Commission has issued a certificate authorizing The Atchison, Topeka & Santa Fe Railway Company to abandon its 22.96-mile rail line between Wilson Junction (milepost 30.4) and Hartman (milepost 7.44) in Prowers County, CO. The abandonment certificate will become effective 30 days after this publication unless the Commission also finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and the applicant no later than 10 days from publication of this Notice. The following notation shall be typed in bold face on the lower left-hand corner of the envelope containing the offer: "Rail Section, AB–OFA". Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

James H. Bayne,

Secretary.

BILLING CODE 7035–01–M

DEPARTMENT OF JUSTICE

Pollution Control; Lodging of Consent Decree Pursuant to Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed Consent Decree in *United States* v. *Brandenburg et al. (N.D. Ill.)* Civil Action No. 85 C 4884, was lodged with the United States District Court for the Northern District of Illinois. The proposed Consent Order requires that defendants, Brandenburg Demolition, Inc. and Well Pump company: (1) Comply with all procedural and substantive standards set out in the Environmental Protection Agency's National Emission Standards for Hazardous Air Pollutants (NESHAPS) regulations for asbestos, promulgated pursuant to section 112(c) of the Clean Air Act, 42 U.S.C. of 7412(c), (2) file periodic reports certifying their compliance, and (3) pay a civil penalty for past noncompliance.

The Department of Justice will receive, for a period of thirty (30) days from the publication of this notice, comments on the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Brandenburg et al.*, D.J. reference 90–5–2–1–790.

The proposed Consent Decree may be examined at the office of the United States Attorney, 1500 South Everett Dicksen Bldg., 219 S. Dearborn Street, Chicago, Illinois; at the Region V office of the Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois; and at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1517, 9th Street and Pennsylvania Avenue NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $2.00 payable to the Treasurer of the United States.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Archaeometry (Anthropology Program); Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Archaeometry (Anthropology Program).

Date and Time: April 4, 1986; 9:00 a.m.–5:00 p.m.

Place: National Science Foundation, 1800 G Street, NW., Room 543, Washington, DC 20550.

Type of meeting: Closed.

Contact person: Dr. John Yellen, Program Director, Anthropology Program, Room 320, National Science Foundation, Washington, DC 20550; (202) 357–7804.

Purpose of meeting: To provide advice and recommendations concerning support for archaeometry.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data, such as salaries, and information concerning individuals associated within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF on July 6, 1979.

M. Rebecca Winkler,

Committee Management Officer.

March 17, 1986.

BILLING CODE 7555–01–M

Archaeometry Advisory Panel; Establishment

The Assistant Director for Biological, Behavioral, and Social Sciences has determined that the establishment of the Advisory Panel for Archaeometry is necessary and in the public interest in connection with the performance of duties imposed upon the Director, National Science Foundation (NSF), and other applicable law. This determination follows consultation with the Committee Management Secretariat, General Services Administration.

Name of panel: Advisory Panel for Archaeometry.

Purpose: Primarily, to advise on the merit of proposals for research and research-related purposes submitted to NSF for financial support. The Panel also provides oversight, general advice, and policy guidance to the Anthropology Program.

M. Rebecca Winkler,

Committee Management Officer.

March 17, 1986.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–289–OLA–2; [ASLBP No. 86–526–05–LA]

GPU Nuclear Corp., et al.; Establishment of Atomic Safety and Licensing Board

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register**, 37 FR 28710 (1972), and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established in the following proceeding to rule on petitions for leave to intervene and/or requests for hearing and to preside over the proceeding in the event that a hearing is ordered.

GPU Nuclear Corporation, et al., Three Mile Island Nuclear Station, Unit 1, Facility Operating License No. DPR–50

This Board is being established pursuant to a notice published by the Commission on February 28, 1986 in the **Federal Register** (51 FR 7157–7159), entitled, "Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing." The proposed amendment would modify the Once Through Steam Generator (OTSG) tube repair criteria for TMI–1 in accordance with the Licensees' application dated February 4, 1986.

The Board is comprised of the following administrative judges:

Sheldon J. Wolfe, Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Oscar H. Paris, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

BILLING CODE 7590-01-M

[Docket No. 50-352-OLA, ASLBP No. 86-522-02-LA (Check Valves); Docket No. 50-353-OLA-2, ASLBP No. 86-526-04-LA (Containment Isolation)]

Philadelphia Electric Co. (Limerick Generating Station, Unit 1); Prehearing Conference

March 14, 1986.

Before Administrative Judges: Ivan W. Smith, Chairman; Richard F. Cole; Gustave A. Linenberger, Jr.

On December 18, 1985 the Philadelphia Electric Company applied for two amendments to the Facility Operating License No. NPF-39 for the Limerick Generating Station, Unit No. 1, located in Montgomery County, Pennsylvania. The amendments provide for an extension of time within which the Licensee may perform certain tests on the primary constainment isolation valves and certain reactor instrument lines excess flow check valves. These tests must be performed when the pant is shut down. The amendents would provide a one-time only extension until the scheduled maintenance and surveillance shutdown scheduled on or before May 26, 1986.

By notices in the **Federal Register** on December 26,1985 (50 F.R. 52874) and December 30, 1985 (50 F.R. 53226, 53235), the Commission announced its determination that the proposed amendments involved no significant hazards and provide an opportunity for a public hearing to persons whose interest may be affected by the amendment.

Two petitioners, Robert L. Anthony and Air and Water Pollution Patrol, by its Chairman Frank R. Romano, have petitioned for hearings and have requested leave to intervene in the proceedings.

An Atomic Safety and Licensing Board has been designated to preside over any such hearing. The Board will convene a prehearing conference on the issues raised by the petitions for leave to intervene on Thursday, March 27, 1986, beginning at 9:00 a.m. EST, at Old Customs Courtroom (Room 300), U.S. Customs House, Second and Chestnut Streets, Philadelphia, Pennsylvania.

The public is invited to attend but there will be no opportunity for public participation in the prehearing conference.

Bethesda, Maryland, March 14, 1986.

For The Atomic Safety and Licensing Board.

Ivan W. Smith,

Chairman, Administrative Law Judge.

[FR Doc. 86-6123 Filed 3-19-86; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-482]

Kansas Gas and Electric Co. et al.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-42, issued to Kansas Gas and Electric Company, Kansas City Power and Light Company, and Kansas Electric Power Cooperative, Inc., (the licensees), for operation of the Wolf Creek Generating Station located in Coffey County, Kansas.

The amendment would revise Technical Specifications 3/4.2.1, Figure 3.2-1, Table 2.2-1, Bases Section 3/4.2.1 and Figure B 3/4.2.1 to implement the Relaxed Axial Offset Control (RAOC) mode of operation after fuel burnup of 8000 MWD/MTU (megawatt days/metric ton of uranium) is achieved. This change was requested in the licensees' application for amendment dated January 20, 1986.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission has provided guidance concerning the application of the standards for determining whether a significant hazards consideration exists by providing certain examples (48 FR 14870). Example (iv) states that "a relief granted upon demonstration of acceptable operation from an operating restriction that was imposed because acceptable operation was not yet demonstrated. This assumes that the operating restriction and the criteria to be applied to a request have been established in a prior review and that it is justified in a satisfactory way that the criteria have been met."

The licensee has concluded and the staff agrees, that the proposed amendment fits the guidance provided in example (iv) because it reflects a relaxation in the Axial Flux Difference Specification that had been analyzed and found to be in acordance with the related FSAR analysis. This relaxation is based upon satisfying the NRC approved methodology in Westinghouse Topical Report, WCAP-10216, which requires that the relaxation does not become applicable until the core burnup reaches 8000 MWD/MTU. Accordingly, the staff proposes to determine that the application for amendment does not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Comments may also be delivered to Room 4000, Maryland National Bank Building, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Monday through Friday. Copies of comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC.

By April 21, 1986, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person who interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspects(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitation in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination of the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to B.J. Youngblood: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Jay Silberg, Esquire, Shaw, Pittman, Potts & Trowbridge, 1800 M Street, NW., Washington, DC 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the William Allen White Library, Emporia State University, Emporia, Kansas and the Washburn University School of Law, Topeka, Kansas.

Dated at Bethesda, Maryland, this 14th day of March 1986.

For the Nuclear Regulatory Commission.

Darl Hood,

Acting Director, PWR Project Directorate No. 4, Division of PWR Licensing-A, NRR.

BILLING CODE 7590-01-M

[Docket No. 70-364]

Babcock & Wilcox Volume Reduction Services Facility, Parks Township, PA; Issuance of Environmental Assessment and Proposed Finding of No Significant Impact Amendment of Materials License No. SNM-414

The U.S. Nuclear Regulatory Commission (NRC or Commission) has issued an Environmental Assessment and a Proposed Finding of No Significant Impact in connection with a request to amend NRC Materials License No. SNM-414 which would authorize operation of a low-level radioactive waste Volume Reduction Services Facility (VRSF) at Babcock & Wilcox's plant in Parks Township, Pennsylvania.

Identification of the Proposed Action

Babcock & Wilcox has proposed to operate, as an adjunct to their nuclear service operations, a facility for the purpose of reducing the volume of low-level radioactive waste (LLW) generated by nuclear power utilities and industrial and institutional users of radioactive materials. The VRSF would serve waste generators in the northeast region of the United States, although it would be available to others as well.

Babcock & Wilcox would use a high-force compactor to reduce the volume of non-combustible LLW and a controlled

VOL 51 ISS 54 MR 20 1986 UMI

air incinerator to reduce the volume of combustible LLW, including contaminated oil and scintillation fluids. The expected throughput would be about 470,000 cubic feet per year of non-combustible waste and about 120,000 cubic feet per year of combustible waste, although for purposes of the Environmental Assessment higher throughputs were evaluated. Volume-reduced LLW, in the form of compressed waste drums and stabilized incinerator ash, would be shipped by truck to licensed disposal sites or returned to the waste generators.

Reasons for No Significant Environmental Impact

The reasons why the proposed action will not have a significant effect on the quality of the human environment are as follows:

1. Construction of the VRSF consisted primarily of remodeling of interior building structures and installation of equipment. Thus, no disruption of the environment occurred.
2. Airborne effluents from normal operation of the VRSF would result in concentrations of radionuclides in air less than one percent of the NRC annual limits at the site boundary. The radiation dose to the maximally exposed individual would be substantially less than the limits of the U.S. Environmental Protection Agency's (EPA) Clean Air Act standard, 40 CFR Part 61.
3. Non-radiological airborne effluents from normal operation of the VRSF are expected to be within the limits set by the EPA and the Pennsylvania Department of Environmental Resources.
4. There would be no liquid effluents resulting from operation of the VRSF.
5. Calculated radiation doses resulting from postulated accidents in the VRSF would not, with two possible exceptions, be cause for any protective actions under EPA's Draft Protective Action Guidance. For the exceptions, conservative calculations indicate that evacuation of individuals near the site boundary might have to be considered to minimize exposure.
6. Transportation of LLW to and from the VRSF would not significantly increase the amount of traffic or highway deterioration, nor would the risk from normal or accident conditions in transport be significantly affected.

Summary of Environmental Assessment

In accordance with 10 CFR 51.30, the Environmental Assessment of the Babcock & Wilcox Volume Reduction Services Facility identified the proposed action (as briefly described above) and included a discussion of: Need for the VRSF, alternatives to operation of the VRSF, the environmental impacts of construction and operation of the VRSF and alternatives, a list of agencies and persons consulted, and identification of sources used in preparing the assessment.

With a lack of new LLW disposal sites and an increasing volume of waste being generated by nuclear power utilities and industrial/institutional users of radioactive materials, the need for waste volume minimization and reduction has become apparent. Babcock & Wilcox recognized the need for volume reduction as a commercial venture and proposed the VRSF to help fill that need.

Since the proposed VRSF wold be at the location of an existing plant operating under an NRC license, references to the ongoing activities were used in the environmental assessment, including provisions of the NRC license and a previous NRC environmental impact appraisal. The latter was used extensively in describing the site environment and updated as the result of a site visit and information obtained from local sources.

Information about the VRSF operations, processes and facilities, including methods of waste confinement and effluent control, was obtained from reports and descriptions submitted by Babcock & Wilcox as part of the application for license amendment. This included a topical report, AECC–4–NP–A, accepted by the NRC for referencing in applications by nuclear utility licensees, describing the incinerator proposed to be used in the VRSF.

The quantities and composition of incoming LLW from nuclear power plants and industrial/institutional generators were estimated and verified with those estimated by Babcock & Wilcox. The NRC's estimates of radionuclide composition were used in subsequent determinations of quantities and composition of VRSF end-products and effluent releases. The radiological effects from normal operations including transportation were calculated independently and found to be insignificant. In addition, the non-radiological effects were evaluated, including a review of dioxin formation and destruction in incinerators. However, effluent and environmental monitoring to demonstrate the insignificance of the effects is difficult. Babcock & Wilcox had proposed a monitoring program, and the NRC will require more frequent sampling and additional monitoring for this purpose. The NRC will also require seminanual reports analyzing the correlation among incoming waste, system performance, and emissions as an aid in determining the reliance which can be placed on information contained in incoming shipment manifests and administrative limits on effluents (tritium, carbon-14 and iodine-125).

The impacts of several postulated accidents in VRSF operations and transportation were evaluated in the assessment. Other accidents were not evaluated but were bounded by those that were. The calculated impacts were somewhat higher than those determined by Babcock & Wilcox due to differences in assumptions used. However, in either case, they are conservative estimates, and the projected doses, for a frame of reference, are less than the annual limit for radiation workers.

No alternatives to operation of the VRSF were identified as being clearly superior, either in greater benefit or less impact.

Other Related Environmental Documents

Babcock & Wilcox prepared an Environmental Analysis of the VRSF which was submitted as part of their application for license amendment.

Proposed Finding of No Significant Impact

The Commission's Division of Fuel Cycle and Material Safety has prepared an Environmental Assessment related to the amendment for the operation of the Volume Reduction Services Facility at Babcock & Wilcox's Parks Township site. On the basis of this Assessment, the Commission has concluded that the determined not to prepare an Environmental Impact Statement for the proposed action and has concluded that a Proposed Finding of No Significant Impact is appropriate.

Availability of Proposed Finding of No Significant Impact and Environmental Assessment

This Proposed Finding, the Staff's Environmental Assessment and the Applicant's Environmental Analysis are available for public inspection and copying at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC and at the Local Public Document Room located at the Apollo Memorial Library in Apollo, Pennsylvania.

Dated at Silver Spring, Maryland, this 14th day of March 1986

For the Nuclear Regulatory Commission.

L.C. Rouse,

Chief, Advanced Fuel and Spent Fuel Licensing Branch, Division of Fuel Cycle and Material Safety.

BILLING CODE [illegible]

[Docket No STN. 50–400]

Carolina Power and Light Co. and North Carolina Eastern Municipal Power Agency; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an extension of Construction Permit No. CPPR–158 to Carolina Power and Light Company and the North Carolina Eastern Municipal Power Agency (the Permittees), for the Shearon Harris Nuclear Power Plant, Unit 1 located in Wake County, North Carolina.

Environmental Assessment

Identification of Proposed Action: The extension would change the expiration date of the Construction Permit CPPR–158 from June 1, 1984 to June 30, 1987. The proposed extension is responsive to Carolina Power and Light Company's applications dated March 16, 1984 and January 29, 1986.

The Need for the Proposed Action: The proposed extension is needed because the completion date of Shearon Harris, Unit 1 has been postponed for the following reasons:

1. Revised Energy and Load Forecasts reflecting a slower rate of growth in customer demand than previously projected.
2. Carolina Power and Light Company's Expanded Conservation and Load Management Program.
3. Additional time to allow the permittees to complete construction ensure that commitments and regulatory requirements have been met and to allow for contingencies such as delays in construction or licensing.

Environmental Impacts of the Proposed Action: The proposed extension will not allow any work to be performed that is not already allowed by the existing construction permit. The probability of accidents has not been increased and post-accident radiological releases will not be greater than previously determined, nor does the proposed extension otherwise affect radiological plant effluents. Therefore, the Commission concludes that there are no significant radiological environmental impacts associated with this proposed extension.

With regard to potential non-radiological impacts, the proposed extension involves features located entirely within the restricted area as defined in 10 CFR Part 20. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with this proposed extension.

Alternatives to the Proposed Action: As required by section 102(2)(E) of NEPA (42 U.S.C. 4332(2)(E)), the staff has considered possible alternatives to the proposed action. The only possible alternative to the proposed action is not to renew the construction permit. This alternative would have led to a change in status and would result in a greater impact on Carolina Power and Light Company personnel and the environment (the project is approximately 94% complete).

Alternative Use of Resources: This action involves no use of resources not previously considered in the Final Environmental Statements (construction permit and operating license) for the Shearon Harris Nuclear Power Plant, Unit 1.

Agencies and Persons Consulted: The NRC staff reviewed the permittees' requests and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed extension.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the requests for the extension dated March 16, 1984 and January 29, 1986 which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Wake County Public Library, Fayetteville Street, Raleigh, North Carolina 27601.

Dated at Bethesda, Maryland, this 14th day of March, 1986.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 35-24050; 70-7225]

Consolidated Natural Gas Co.; Proposed Sale and Acquisition of Securities of Proposed Company

March 14, 1986.

Consolidated Natural Gas Company ("Consolidated"), Four Gateway Center, Pittsburgh, Pennsylvania 15222, a registered holding company, has filed an application-declaration with this Commission pursuant to sections 6(a), 7, 9(a), 10 and 12(b) of the Public Utility Holding Company Act of 1935 ("Act") and Rules 43, 45 and 50 thereunder.

Consolidated proposes to form a corporation, to be called CNG Trading Company ("Trading Co."). Trading Co., either alone or in conjunction with others, proposes to broker gas and participate in markets for gas and other hydrocarbons on a spot or longer term basis. It will also transport, exchange, store gas, pool sources of gas for sale and participate as a trader and marketer in spot and futures markets for gas and other hydrocarbons. It will sell to affiliated and non-affiliated utilities and their customers. Consolidated proposes to assist Trading Co., if required, by acting as surety, indemnitor and guarantor for certain of Trading Co.'s activities.

Trading Co. proposes to issue and sell the Consolidated up to 50,000 shares of its common stock, $100 par value, per share. Consolidated proposes to make open account advances of up to $15,000,000 such advances to bear interest at a rate equal to Consolidated's effective cost of short-term funds. The advances will be repaid by Trading Co. as gas is sold. In the event that Trading Co. does not repay the advances within 360 days following the date of advances, authorization is requested to convert such advances into long-term non-negotiable notes and/or common stock or any combination thereof not to exceed $15,000,000 in total. Any such long-term non-negotiable notes of Trading Co. will mature over a period of time to be determined by the officers of Consolidated, with the interest rate at substantially the same effective rate as the related long-term debt of Consolidated. If Consolidated should not issue long-term debt, the interest rate shall be predicated on the prime commercial rate of interest at the Chase Manhattan Bank, N.A., in effect at the time of initial borrowing by Trading Co.

The application-declaration and any amendments thereto are available for public inspection through the Commission's office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by April 7, 1986, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the applicant-declarant at the address above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues for fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 86-6150 Filed 3-19-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 14991; 811-2730]

Broad Oaks Securities, Inc.; Application for an Order Declaring That Applicant Has Ceased To Be an Investment Company

March 14, 1986.

Notice is hereby given that Broad Oaks Securities, Inc. ("Applicant"), Eleven Greenway Plaza, Suite 1919, Houston, TX 77046, registered as an opened, diversified, management investment company under the Investment Company Act of 1940 (the "Act"), filed an application on March 4, 1986, for an order pursuant to section 8(f) of the Act, declaring that Applicant has ceased to be an investment company. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below, and to the Act for the applicable provisions thereof.

According to the application, Applicant is a corporation under the laws of the state of Maryland. Applicant states that its registration statement was filed on February 25, 1977, but that it never became effective. Applicant further states that it has never made a public offering, has no security holders and has retained no assets. Finally, Applicant represents that it is not a party to any litigation or adminstrative proceeding and does not intend to engage in any business activities other than those necessary to effectuate the winding up of its business and affairs.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than April 8, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of the interest, the reasons for the request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicant(s) at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirely E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34-23012; File Nos. 4-281 and S7-433]

Joint Industry Plans; Approval of Amendments to the Consolidated Tape Association Plan and Consolidated Quotation Plan Relating to Concurrent Use Indemnification

The participants in the Consolidated Quotation Plan ("CQ Plan") and the Consolidated Tape Association Plan ("CTA Plan") on October 16, 1985 submitted amendments[1] to the Plan governing the operation of the consolidated quotation reporting system ("CQS") and to the Plan governing the operation of the consolidated transaction system ("CTS").[2]

---

[1] These amendments were submitted pursuant to Rule 11Aa3-2 under the Securities Exchange Act of 1934 ("Act").

[2] The CQ Plan and subsequent amendments are contained in File No. 4-281. The Commission approved the CQ Plan in Securities Exchange Act

Continued

I. Description of the Amendments

The purpose of the amendments is to amend section XI of the CQ Plan and section XI(d) of the CTA Plan to provide indemnification to Plan participants and others from claims with respect to a participant's concurrent use of the CQS or CTS high speed line to make available market data other than as part of the consolidated dissemination of equities quotation or last sale information.

Since 1978, the CQ Plan and CTA Plan have permitted a participant to provide market data not subject to consolidated dissemination to vndors and others over the CQS or CTS high speed line. This avoids the need to maintain separate transmission facilities to vendors and others. In 1983, the Options Price Reporting Authority ("OPRA"), an options organization similar to the CTA and CQ, amended the OPRA Plan to add a provision whereby each OPRA participant indemnifies each other OPRA participant for losses resulting from dissemination of its own market data over OPRA transmission facilities. The proposed amendments to the CQ Plan and the CTA Plan add this requirements to the idemnification requirements of the CQ and CTA Plans.

II. Approval of the Amendments

The Commission solicited comment on the amendments in Securities Exchange Act Release No. 22562 (October 25, 1985), published in 50 FR 45516 (October 31, 1985). No comments were received.

The Commission believes that the proposed amendments appropriately provide for allocation of losses resulting from informaton carried over CQS and CTA to the parties responsible for that information, thereby safeguarding the financial integrity of the CTA and CQS. The Commission therefore finds that approval of the amendment is in furtherance of the purposes of the Act, in the public interest, and appropriate for protection of investors.

Therefore, it is ordered, pursuant to section 11A of the Act and Rule 11Aa3-2(c)(2) thereunder, that the amendments to the CTA and CQ Plans be, and hereby, are approved.

For the Commission by the Division of Market Regulation pursuant to delegated authority. 17 CFR 200.30-3(a)(29).

Dated: March 13, 1986.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

Release No. 16518 (January 22, 1980), 45 FR 6528. The CTA Plan and subsequent amendments are contained in File No. S7-433. The Commission approved the 1980 Restated and Amended CTA Plan in Securities Exchange Act Release No. 16983 (July 10, 1980), 45 FR 49414.

[Release No. 34-23007; File No. 4-208]

Joint Industry Plan; Approval of an Amendment to the Intermarket Trading System Plan Relating to Complaint Procedures for Locked Markets in ITS

The Operating Committee of the Intermarket Trading System ("ITS") in June 1985 submitted to the Commission an amendment to the "Plan for the Purpose of Creating an Intermarket Communication Linkage" ("ITS Plan")[1], pursuant to Section 11A of the Securities Exchange Act of 1934 ("Act") and Rule 11Aa3-2("Rule") thereunder.

I. Description of Amendment

The purpose of the Amendment is to clarify the complaint procedures for responding through ITS to "locked markets",[2] and to otherwise refine the ITS locked market rule. The present rule does not specify when a complaint must be filed, and recognizes a locked market complaint that is filed regardless of whether or not the locking bid or offer still exists.

The Amendment would release the market that locked the quotation from liability if the locking bid or offer is removed prior to the time that a complaint is received. The Amendment also would give the market whose quote was locked the option of requesting satisfaction by either the issuance of a commitment or the removal of the locking bid or offer. A final refinement to the Amendment states that in error situations, a locking market must respond within two minutes of the receipt of a complaint in order to avoid liability for a locked market.

II. Approval of the Amendment

The amendment was noticed for comment and given temporary summary effectiveness in Securities Exchange Act Release No. 22139 (June 12, 1985), published in the Federal Register (50 FR 25640) on June 20, 1986. No comments were received.

The Commission believes that the Amendment represents a positive enhancement to ITS that creates opportunities for more efficient and effective market operations.[3] The Commission finds that approval of the Amendment is in furtherance of the purposes of the Act, in the public interest, and appropriate for the protection of investors.

Therefore, it is ordered, pursuant to section 11A of the Act and Rule 11Aa3-2(c)(2) thereunder, that the Amendment to the ITS Plan be, and hereby is, approved.

For the Commission by the Division of Market Regulation pursuant to delegated authority. 17 CFR 200.30-3(a)(29).

Dated: March 12, 1986.

Shirley E. Hollis,

Assistant Secretary.

[Release No. 34-22999; File No. SR-Amex-85-30]

Self-Regulatory Organizations; American Stock Exchange, Inc.; Order Approving Proposed Rule Change

I. Introduction

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b-4 thereunder,[2] the American Stock Exchange, Inc. ("Amex") filed with the Commission a proposed rule change to list and trade European-style 13-week Treasury bill options ("T-bill options") that would be exercisable only at the time of their expiration.[3] Amex currently trades American-style 13-week T-bill options that can be exercised at any time until their expiration date.

II. Description of Proposal

The Amex proposal would permit the trading of European-style options on 13-week T-bills. Currently, Amex trades American-style 13-week T-bill options. For the most part, the mechanics of European-style T-bill options trading will be the same as American-style T-bill options trading with similar regulatory safeguards. In addition, the

UMI

contract specifications for the proposed European-style T-bill options are similar to those applicable to the American-style T-bill options currently listed on Amex. There are several significant differences, however, between Amex's proposed T-bill options contract and the existing one. First, as a European-style option, the proposed options can be exercised only on their expiration date and not, as is the case with American-style options, at any time during the term of the contract.[4] Second, because of the European-exercise feature of the proposed T-bill options, the T-bills to be delivered upon settlement of an option exercise will remain the same throughout the life of the option.[5]

The Amex proposed that the expiration cycle for European-style T-bill options will be similar to the March expiration cycle now used for American-style T-bill options. Unlike Amex's existing options, however, which always expire on the Saturday following the third Friday of an expiration month, the exact expiration date for European-style T-bill options will vary within each expiration month. Under the proposed rules, excercise settlement dates for the European-style options would be the earliest day of each March, June, September and December expiration month on which one-year T-bills have 13 weeks remaining to maturity.[6] The expiration date would be two business days prior to exercise settlement date in order to allow for the delivery of T-bills with exactly 13 weeks to maturity.[7] Under this proposed expiration plan it would be possible for an option to expire at almost any time during the months of March, June, September and December. In addition, it would be possible for an expiration to actually occur during a prior month if the exercise settlement date occurs very early in one of those months. Generally, option expiration dates will occur at twelve week intervals, with a sixteen week interval between expiration dates occurring occasionally.

Amex's proposed rules also will permit the introduction of a series of T-bill options with up to four different expiration dates at one time. Amex intends, however, to maintain only two expiration dates at one time, replacing expired series with new series having approximately 6 months to expiration at the time of listing.

Amex is also proposing to introduce strike prices with price intervals of only .20 (20 basis points) for its new European-style T-bill options. This would be a change from Amex's currently traded American-style T-bill options which have half point (50 basis points) intervals between strikes. The proposal also would permit the establishment of up to 5 exercise prices when series of options having new expirations are opened for trading. Amex has stated, however, that it intends to establish only three exercise prices when new expirations are added.

Amex's rules also propose to set position limits at 1,500 contracts on each side of the market for European-style T-bills, as opposed to the 1,000 contract limit that applies to Amex's currently traded T-bill options. In addition, Amex is not proposing any exercise limits for the European-style T-bills because they can only be exercised on its expiration date.

The last significant change between Amex's proposed European-style options T-bills market and its existing market in American-style T-bill options will concern the use of T-bill forward or futures prices, rather than T-bill spot prices, as benchmarks for determining whether the European-style T-bill options are in- or out-of-the-money. Under this aspect of Amex's proposal, the in- or out-of-the-money value of each series would be determined by reference to the prevailing market price of a forward or futures contract that has the same delivery requirements of the particular option series involved.[8] Amex has termed the particular forward or futures price relied on for these purposes as the "Treasury Bill Reference Price ("T-Bill Reference Price").[9] Amex's proposed rule provides discretion to decide which particular forward or futures market to rely on for purposes of determining the T-Bill Reference Price.[10] For the most part, however, Amex intends to designate the daily settlement prices of futures contracts traded on the

---

[4] The trading of European-style options on United States securities exchanges is a relatively recent development. Currently, the only two types of European-style options contracts are traded both on the Chicago Board Options Exchange, Inc. ("CBOE"). *See* File No. SR-CBOE-84-31, Securities Exchange Act Release No. 22471 (September 28, 1985), 50 FR 40638, in which the Commission approved a proposal by the CBOE to trade European-style foreign currency options and File No. SR-CBOE-85-34, Securities Exchange Act Release No. 22309 (August 9, 1985), 50 FR 32994, approving a proposal to convert the Standard and Poor's 500 stock index option from an American to a European-style option. Trading in those options commenced on October 1, 1985.

[5] This is because, under the rules of the Options Clearing Corporation ("OCC"), options exercises will be limited to the expiration date of a contract, thereby permitting all such exercises to be settled on a single exercise settlement date. Because all options of the same series will have the same exercise settlement date, and OCC rules will call for exercises to be settled by the delivery of T-bills maturing 13 weeks after the exercise settlement date, the specific maturity date of the T-bills underlying a particular options contract will be known from the time the option commences trading on Amex. *See* Securities Exchange Act Release No. 23004 (March 12, 1986), and Securities Exchange Release No. 22369 (August 28, 1985), 50 FR 36176.

[6] Each exercise settlement date would occur precisely 13 weeks before the maturity date of a one-year T-bill. Because 52-week T-bills are generally issued at 4-week intervals, there will normally be only one such date per month. If two such dates occur during the same month, Amex's rules provide that the earlier of the two dates will be selected. We also note that Amex rules provide that the party obligated to make delivery of the underlying T-bills may choose whether to make delivery on the exercise settlement date or on the following business day, but without a price adjustment for the later delivery. This is the same rule that Amex currently applies to its American-style T-bill options. Amex has submitted a letter to the Commission to clarify that the alternative delivery date is intended to deal with situations where the Federal Reserve Bank wire transfer system becomes overloaded and therefore a timely transfer order is not completed on the settlement date. OCC rules deal with this situation in a slightly different manner. In the event of Federal Reserve wire failure or failure of access to the Federal Reserve wire by the clearing member's correspondent bank, OCC Rule 1411 permits settlement to be made on the next business day such wire is operable. Because Amex rules state that all exercise settlements must be in accordance with OCC rules, the Commission does not believe this difference in language should give rise to interpretive problems: the OCC rules would override any possible broader reading of Amex rules. *See* letter from Nathan Most, Vice President, New Products Development, Amex, to Eneida Rosa, Branch Chief, Division of Market Regulation, dated October 22, 1985.

[7] Because T-bills generally mature on Thursdays, Amex intends to establish Thursdays as exercise settlement dates so that T-bills with exactly 13 weeks to maturity will be delivered upon exercise. Amex states that these dates were selected to coincide with the delivery dates specified for 13-week T-bill futures contracts traded on the Chicago Mercantile Exchange ("CME"). Amex's proposed rules establishing expiration dates two business days before the exercise settlement date would result in options expiring on Tuesdays. In this regard, we note that the Commission today is also approving a related proposed rule change submitted by the OCC that would allow European-style T-bill options to expire on Tuesdays, 2 days prior to the Thursday expiration settlement dates, rather than on the Saturday prior to the exercise settlement date (which is the rule applicable to expirations of T-bill options currently trading on Amex). *See* Securities Exchange Act Release No. 23004 (March 12, 1986).

[8] In this regard, we note that the futures contract would have to have delivery dates that coincide with the T-bill options exercise settlement date and would require delivery of 1,000,000 principal amount of T-bills having 13 weeks to maturity.

[9] The designated T-Bill Reference Price for a particular option series will be used to (1) determine the exercise prices at which new series of options will be opened for trading and (2) determine the applicable minimum margin requirements (because margin requirements are adjusted by out-of-the-money positions being held).

[10] In addition, under the proposed rule Amex would have authority to use forward or futures contracts with somewhat different delivery specifications than those of Amex's T-bill options to extrapolate the correct T-Bill Reference Price.

CME as the T-Bill Reference Price for its corresponding options.[11]

III. Discussion

The Amex proposal to establish a market in European-style T-bill options does not, for the most part, raise novel questions. The Commission previously has approved trading options on T-bills in approving Amex's existing market in American-style T-bill options. In this regard, we note that Amex's existing and proposed T-bill option contracts both require, upon exercise, the delivery of T-bills having 13 weeks remaining to maturity at the time of delivery. Amex's proposed T-bill options market, however, differs in one significant respect from its existing market: the proposed T-bill options only can be exercised at the time of expiration ("European-style options") rather than any time prior to the expiration date ("American-style options") as in the case with Amex's current T-bill options markets.

In reviewing this aspect of Amex's proposal, the Commission notes that, in recently approving CBOE proposals to convert the S&P 500 index option to a European-style option and to establish a European-style foreign currency options market,[12] the Commission recognized that there are advantages and disadvantages to each type of option with purchasers generally benefiting from the American-style options and sellers from European-style options.[13] For European options, the purchaser must rely on the continued existence of a secondary market in the options to be able to close out an option position before expiration. On the other hand, European-style options provide benefits to options writers, because the writers know the options they have written cannot be exercised until expiration. This can facilitate long-range planning and may prove particularly useful for investors in the T-bill options market.

Accordingly, although the European-style T-bill options proposed by Amex may limit the flexibility of options purchasers, the European-style exercise feature may facilitate certain trading strategies. The Commission, however, continues to believe that appropriate disclosure of such options and the unique risks associated with the use of options with this type of exercise restriction is necessary. In this connection, the Commission notes that the Amex in conjunction with the OCC has made the appropriate risk disclosures pertaining to the trading of European-style options in a recently revised options disclosure document ("ODD").[14]

With respect to matters of contract design and delivery specifications, so long as the Commission has no regulatory concerns, it is not inclined to substitute its judgment for the business judgment of the self-regulatory organization. Rather, in matters such as these, the marketplace generally should be permitted to determine whether a particular contract meets the needs of market participants.[15]

After carefully reviewing the contract specifications, the Commission believes that the proposed rules should be approved. As noted above, Amex has decided to trade T-bill options similar to those it currently trades, except for the European exercise feature of the contract. The Commission does not believe this aspect of Amex's proposal presents any particular regulatory or surveillance concerns and finds the contract terms, including premium bids and offers, minimum price fluctuations, expiration cycles and option exercise procedures, are appropriate.

The Commission, however, does maintain a regulatory interest in certain other terms of the proposed European-style T-bill options market. The Amex has proposed position limits that are designed to prohibit market participants from acquiring a position in European-style T-bill options in excess of 1,500 contracts on the same side of the market. Amex's rules currently provide for a position limit of 1,000 contracts for its American-style T-bill options. In reviewing position limits the Commission has been careful to balance regulatory concerns with the need not to restrict depth and liquidity in the options markets. Moreover, in establishing position limits for T-bill options, the Commission has looked to the deliverable supply of underlying 13-week T-bills that are available upon exercise. At the time of approval of Amex's original T-bill options the deliverable supply of 13-week T-bills available upon exercise, including 26 week and 52 week T-bills with 13 weeks remaining to maturity, was approximately $10–12 billion. Since then the deliverable supply of 13 week T-bills, taking into account 26 and 52 week T-bills with 13 weeks remaining to maturity that will be available upon exercise, has increased to approximately $18–20 billion. Based on the approximate doubling in the deliverable suppy of T-bills available upon exercise, the Commission believes that the 500 contract increase (or 50% increase) proposed for Amex's European-style T-bill options are appropriate. The Commission believes that the proposed position limit will be sufficient to protect the options and related markets from disruptions caused either by congestion or manipulation.[16]

As noted above, the Amex has not proposed any exercise limits for its European-style T-bills because they only can be exercised on one day at expiration. The Commission believes that the elimination of exercise limits for European-style T-bill options does not present any distinct regulatory problems or congestion concerns. This is because an investor only can hold positions up to 1,500 contracts on either side of the market, which, in effect, will limit exercises to 1,500 contracts on the one day at expiration that such European-style options can be exercised. We note, however, that Amex can grant exemptions to existing position limits under certain circumstances. In granting exemptions for higher limits in European-style T-bill options, the Commission expects Amex to take into account the total effect of such increased limits, including their effect on the number of contracts that can be exercised on expiration day and any resulting congestion concerns.

As previously discussed, expiration dates will vary within the designated expiration months of March, June, September and December because they are tied to the maturity dates of one year T-bills being auctioned every four weeks. This system is different from the expiration schedule used for existing options traded on Amex which always

---

[11] As noted above, the expiration settlement dates for Amex's European-style T-bill options will coincide with the delivery dates specified for Treasury bill futures contracts traded on the CME. In the event Amex cannot use the futures prices on the CME, it has indicated it intends to poll government securities dealers to obtain forward prices on which to base the T-Bill Reference Price. *See* note 22, *infra*.

[12] *See* note 4, *supra*.

[13] The Commission also noted that as long as adequate disclosure is made of the terms and conditions of these contracts, it would expect that the premiums of each kind of contract generally should reflect these differences in benefits for purchasers and writers.

[14] *See* Securities Exchange Act Release No. 22418 (September 17, 1985), 50 FR 38732.

[15] *See* Securities Exchange Act Release No. 18371 (December 23, 1981), 46 FR 65423, approving Amex's proposed rules for the trading of American-style T-bill options, including its rules pertaining to contract design and delivery specifications.

[16] Although Amex has been phasing out its American-style T-bill options, any outstanding positions in such options will be aggregated with positions in European-style T-bills for position limit purposes. *See* letter from Nathan Most, Amex, to Sharon Lawson, Attorney, Division of Market Regulation, dated December 16, 1985 ("December 1985 Letter").

VOL 51 ISS 54 MR 20 1986 UMI

expire on the Saturday following the third Friday of an expiration month. In order to avoid confusion and alert market participants trading European-style T-bill options when expirations will occur, Amex regularly will publish the expiration dates of such T-bill options in its market bulletins prior to expiration.[17] This should provide market participants with adequate notice and alert them to the fact that expiration dates for European-style T-bills are non-standard. Based on these representations, the Commission believes that this aspect of the proposal should be approved.

Amex has proposed strike price intervals of .20 for European-style T-bill options, rather than the .50 intervals currently applicable to American-style T-bills. Amex states that this change is based on its experience with its existing options, not any specific differences between European- and American-style T-bill options.

The Commission recognizes that any narrowing of strike price intervals increases the flexibility accorded market participants and allows options positions to be more finely tailored to achieve intended investment objectives by providing additional investment opportunities.[18] At the same time, however, the narrower strike price intervals create the possibility of dispersing trading interest to the degree that there is an excessive dilution of liquidity in open options series. Accordingly, an evaluation of the appropriate strike price intervals requires a balancing of the need to accommodate market participants and the need to avoid causing excessive proliferation of options series.

With respect to the Amex's proposals, the Commission has concluded that the benefits to be derived from narrower intervals, in offering participants greater flexibility in achieving investment objectives, outweighs the possible adverse effects on market liquidity and dispersion of interest that may result from that action. While the Commission recognizes that, if the market in European-style T-bill options are excessively thin, the proliferation of illiquid series can result, the Commission expects the Amex to monitor closely the situation to determine if too many illiquid open option series exist in European-style T-bills as a result of the .20 strike price intervals and to act promptly to remedy this situation should it occur.[19]

A related portion of Amex's proposal would permit up to five different exercise prices to be introduced when series of options having a new expiration date are opened for trading, with additional exercise prices being added as the underlying price changes. Under the proposed rules, however, Amex may not introduce any new option series having less than 10 days left to expiration. Amex has stated that it generally intends to establish only three exercise prices for each new expiration introduced. Nevertheless, the Amex rules would provide it with the authority to introduce up to five exercise prices at one time because it takes, operationally, at least 24 hours to have a new series posted and in periods of high volatility the lack of such authority could result in the absence of at-the-money series for a period of time.

The Commission believes that this aspect of Amex's proposal strikes an appropriate balance by simultaniously accommodating market participants without causing excessive proliferation of options series. First, we note that Amex's proposal sets the maximum permissible number of strike prices.[20] Amex intends, as a routine matter, to introduce only three different exercise prices for newly introduced expiration dates.[21] Second, Amex rules provide for the delisting of option series with no open interest; thus should Amex list a new series in anticipation of a large market movement that does not materialize, Amex would be able to delist series that attract no trading interest. Finally, we also note that although under the rules Amex will have the authority to list up to 4 expirations at one time, it intends to keep only 2 expiration dates open at a time. This policy should help to avoid a large number of illiquid series from proliferating because new series having the same expiration dates would be added over time to reflect price changes in the underlying T-bills.

As discussed above, the Amex is proposing to use the Treasury Bill Reference Price to determine the in- or out-of-the-money value of a particular series of options. Under Amex's rules, the T-Bill Reference Price is established based on the prevailing market price of a forward or futures contract with similar delivery periods as Amex's European-style T-bill options. Although the Commission understands that, except under unusual circumstances or market conditions,[22] Amex will rely on the CME's futures market to determine its T-Bill Reference Prices,[23] the proposed rules provide Amex with discretion to decide which particular forward or futures markets it will rely on.

Finally, we note the proposed expiration settlement dates for European-style T-bills were selected because they are the delivery dates specified in the CME's rules with respect to its 13 week T-bill futures contract.[24] In the corresponding options, the proposed rules provide Amex with discretion to determine which particular forward or futures markets it will use as a reference market in establishing settlement dates. The Commission's order originally approving the trading of T-bill options noted the possibility of market congestion being caused by simultaneous delivery settlement dates for options and futures on T-bills.[25]

---

[17] *See* December 1985 Letter, note 16, *supra*.

[18] *See* Securities Exchange Act Release No. 17238 (October 22, 1980), 45 FR 71453. *See also* Securities Exchange Act Release No. 21644 (January 9, 1985), 50 FR 2380, approving reduced strike intervals for Amex's index options.

[19] Amex will take steps to either increase strike price intervals or skip intervals in the event volatility in the underlying T-bills results in the proliferation of illiquid options series.

[20] Under the proposal, Amex would be limited to maintaining two out-of-the-money, two in-the-money and one at-the-money T-bill options contracts at any one time. *See* letter from Heidi Litt Spitzer, Senior Attorney, Amex, to Sharon Lawson, SEC, dated February 4, 1986.

[21] Although Amex would have the authority to introduce and maintain up to five strike prices it is generally understood that three strikes, one out-of-the-money, one-in-the-money and one at-the-money, will be maintained during normal market conditions with two additional strikes added only at times of high volatility or other unusual market conditions. This should provide Amex with the flexibility to respond to market changes and develop its new product. The Commission expects Amex to submit a proposed rule change if it decides it wants to maintain five strikes at all times under any market conditions.

[22] For example, in its filing Amex notes that if a daily limit is reached on the CME early in the trading day, it might poll government securities dealers to obtain forward prices that would be the basis for determining the T-Bill Reference Price for that day.

[23] If the Amex did intend to rely on another market to generate its T-Bill Reference Price on a permanent basis it would have to submit a proposed rule change to the Commission.

[24] In its filing, Amex states that because the futures contract has the same delivery specifications as Amex's proposed options contract, the selection of option exercise settlement dates that coincide with CME's futures delivery dates should result in a relatively straightforward mathematical relationship between the options traded on the Amex and the futures contracts traded on the CME.

[25] Under Rule 1405(b), the OCC has the authority to extend or postpone any exercise settlement date for T-bill options whenever it is necessary in the public interest or in unusual conditions. This authority permits the OCC to select dates for the expiration of options contracts that do not coincide with the week that the CME's futures contracts are scheduled to terminate if congestion concerns are raised by the simultaneous settlements. Amex has indicated that, to date, the OCC has never had to exercise this authority even though delivery dates in the futures and options have coincided.

Accordingly, the Commission must assess whether there is a sufficient deliverable supply of T-bill options to avert the possibility of market congestion.

As indicated earlier, the deliverable supply of 13-week T-bills, including 26 and 52 week T-bills with 13 weeks remaining to maturity that can be supplied upon exercise, has nearly doubled since the original proposal to trade T-bill options was approved by the Commission. In addition, Amex has indicated that, in its experience, only a small percentage of actual exercises occur in T-bill options. Based on the above information, the Commission believes that congestion should not occur even though options and futures that expire at the same time. We also note that if congestion problems occur, the OCC will be able to take remedial action, and has the authority to impose restrictions on exercises and, if necessary, to prescribe cash settlement in lieu of the underlying security.[26]

In general, secondary trading in European-style T-bill options contracts will be governed by the same or comparable floor and upstairs rules and will be subject to the same regulatory controls as the T-bill options currently traded on Amex. For example, all existing customer protection rules would apply to European-style T-bill options. In addition, Amex will use the same surveillance techniques that it has used for American-style T-bill options to detect manipulation and other improper trading activities. The Commission has examined carefully the proposed rules governing trading activities in European-style T-bill options on the floor of the Amex and has concluded that the proposed rules provide sufficient regulatory safeguards and investor protections to accommodate the Amex's start-up of a European-style T-bill options market.

IV. Conclusion

Under section 19(b)(2) of the Act, the Commission must approve the foregoing rule change if it determines that it is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange. The Commission has reviewed carefully the rules proposed by the Amex to accommodate the listing and trading of European-style 13 week T-bill options and has concluded that the rules provide for adequate and proper regulation of the proposed market. Accordingly, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder and, in particular, the requirements of section 6.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change be and hereby is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 12, 1986.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

---

[26] The possibility that the deliverable supply to satisfy options exercises would be constricted by simultaneous Treasury bill futures delivery obligations has existed since Amex commenced trading Treasury bill options. This concern, however, has been brought into even sharper focus by the increased overlap in delivery terms effected by the changes to develop a European-style options contract. Hence, the Commission staff has requested that the Amex commence discussions with the CME on the possibility of developing coordinated surveillance information sharing arrangements, particularly in the event that either exchange anticipates possible substantial exercises or deliveries of Treasury bill options or futures contracts. *See* letter from Brandon Becker, Assistant Director, Division of Market Regulation, to Nathan Most, Vice President, Amex, dated March 4, 1986.

Self-Regulatory Organizations; Proposed Rule Change by the Cincinnati Stock Exchange Relating to the Application of ITS Trade-Through and Block Policy Rules

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 7, 1986, The Cincinnati Stock Exchange (the "Exchange") filed with the Securities and Exchange Commission the Proposed Rule Change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. The Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Proposed Rule Change amends CSE Rules 14.9 and 14.10 so as to extend the coverage of the Exchange's trade-through and block policies to additional trading situations involving CSE members. The terms "Exchange trade-through" and "block trade" are redefined, and conforming changes are made to the subparagraphs within Rules 14.9 and 14.10 related to remedies and exemptions.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

A. Self-Regulatory Organization's Statement of the Purpose of, and Stautory Basis for, the Proposed Rule Change

The purpose of the Proposed Rule Change is to apply the Intermarket Trading System ("ITS") trade-through and block policy rules: (1) To Designated Dealers when they effect transactions otherwise than on an exchange in ITS securities for which they are assigned as Designated Dealers; and (2) to Users when they effect transactions on the Exchange in ITS securities for which the Exchange does not have a Designated Dealer.

The Application of the ITS trade-through and block policy rules in the manner described above is consistent with Section 6(a)(5) of the Act in that it will promote just and equitable principles of trade and contribute to the perfection of the national market system, which, in turn, will protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that Rules 14.9 and 14.10, as amended by the Proposed Rule Change, will impose no burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has received comments on the Proposed Rule Change from the New York Stock Exchange, Inc.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longe period to be appropriate and publishes it reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such Proposed Rule Change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and

arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements such respect to the Proposed Rule Change that are filed with the Commission, and all written communications relating to the Proposed Rule Change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 5th Street, NW., Washington, DC. Copies of such filing will also be available for inspection copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by [April 10, 1986].

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 12, 1986.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 86-6147 Filed 3-19-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-23022; File No. SR-NASD-86-4]

Self-Regulatory Organizations; Request for Approval by National Association of Securities Dealers, Inc. of a Pilot Program With the Stock Exchange, London, England, for the Exchange and Distribution of International Securities Information

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 14, 1986, the National Association of Securities Dealers, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been perpared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The National Association of Securities Dealers, Inc. ("NASD") is requesting approval from the Securities and Exchange Commission ("SEC") of a Pilot Program to be jointly undertaken by the NASD and The Stock Exchange, London, England ("Exchange"). The terms of substance of the proposed Pilot Program are set forth below.

Scope of the Pilot Program

The Pilot Program has been undertaken to enable the NASD and Exchange to formally exchange and thereafter utilize proprietary quotation and last sale information for dissemination to participants in their respective marketplaces through the existing NASDAQ System, operated by the NASD, and the TOPIC System, operated by the Exchange. Initially, the information to be utilized by each party shall be limited to the quotation information described below. By virtue of the nature of the Pilot Program, it is anticipated that both the extent and use of the information and access to the facilities operated by the other party may be expanded during the course of the Pilot Program upon further written agreement of the NASD and Exchange. An important function of the Pilot Program will be to explore the possibility of appropriate trading linkages between the NASDAQ market and the Exchange market and the necessity for and development of regulatory programs and procedures to be applied to such linkages. An additional area for consideration under the Pilot Program may be the exploration of appropriate international clearance and settlement procedures for any proposed linkage.

Description of Information

Exchange Securities Information. The Exchange will furnish to the NASD, and the NASD shall be permitted to display on each of its NASDAQ Level ⅔ authorized terminals, current price quotations in each category of Exchange securities as described below:

1. Financial Times/Stock Exchange 100 ("FTSE")

The 100 most highly capitalized companies in the U.K. domestic market. Initially only jobbers middle prices shall be disseminated through the Exchange Price Information Computer ("EPIC"), with all individual market maker quotations becoming available on or about October 27, 1986.

2. Financial Times/Stock Exchange 100 Index

The Financial Times/Stock Exchange 100 Index is calculated in one minute intervals based upon a capitalization weighted measure of the value of the individual securities included in the Index.

3. Non U.K. Domiciled Securities

All individual market maker quotations in non U.K. domiciled securities diseminated through the TOPIC International Service.

For those Exchange securities comprising the FTSE–100 Index, "price quotation" shall be understood to initially mean middle prices with inside bid and offer quotation information and last sale information being added on or about October 27, 1986 ("Big Bang Day") and two-sided individual market maker's quotation thereafter added when generally available. For the Exchange securities of non-UK-domiciled companies, "price quotations" shall be understood to mean two-sided, individual market makers' quotations. The quotation information received from the Exchange and displayed by the NASD shall include all available quotations in each applicable Exchange security and be displayed in a non-discriminatory format mutually agreeable to the Exchange and NASD.

NASDAQ Securities Information. The NASD will furnish the Exchange, and the Exchange shall be permitted to display on each of its TOPIC authorized terminals and TOPICLINE, current bid and ask quotations of all market makers in each category of NASDAQ securities described below:

1. NASDAQ–100 List

All individual market maker quotations displayed in the NASDAQ system on securities included in the NASDAQ–100 Index™, which represents 100 of the largest non-financial companies, both domestic and foreign, in the NASDAQ/NMS.

2. NASDAQ–100 Index™

The NASDAQ–100 Index™ is a capitalization weighted measure of the value of the individual securities included in the Index.

3. NASDAQ Financial 100 List

All individual market maker quotations displayed in the NASDAQ system on securities included in the NASDAQ Financial Index™, which represents the 100 largest domestic financial companies in the NASDAQ/NMS.

4. Non U.K. American Depository Receipts (ADR's)

All individual market maker quotations in ADR's underlying non-U.K. domiciled securities.

The quotation information received from the NASD and displayed by the Exchange shall include all available quotations in each applicable NASDAQ

security and be displayed in a non-discriminatory format mutually agreeable to the NASD and Exchange.

During the course of the Pilot Program, the NASD and Exchange categories of securities described above may be modified to incorporate changes, additions, and deletions of the constituent securities, and/or expanded to include additional NASDAQ or Exchange quotation and/or last sale information upon written authorization of the other, to the extent such expansion would be consistent with the technical and operational capability of the NASD and Exchange systems.

The NASD is currently considering development of an International Subset of NASDAQ data, which would incorporate approximately 500 issues. At the same time, the Exchange's International Service is expanding as market makers increasingly participate. As a result of these developments, the NASD and the Exchange may agree to expand the set of securities for which information is exchanged, up to approximately 500 from each side.

Provision of Information. The Exchange will furnish Exchange Information to the NASD during the Exchange's normal hours of operation, currently 3:30 A.M. to 12:00 P.M. Washington Time (8:30 A.M. to 5:00 P.M. London Time). The Exchange Information furnished to the NASD shall be denominated in the currency of convention for the particular security.

The NASD will furnish NASD Information to the Exchange during the NASD's normal hours of operation which are currently 8:30 A.M. to 4:00 P.M. Washington Time (1:30 P.M. to 9:00 P.M. London Time). NASD Information furnished to the Exchange shall be denominated in United States dollars.

The quotation exchange system to be operated jointly by the NASD and the Exchange will enable the display, over the other's network, of "live" prices for the subset of international securities described above from the NASDAQ and Exchange databases. Current prices for Exchange securities will be sent via direct feed to NASDAQ, from which the particular securities in the exchange set will be filtered and saved in a database for formatting consistent with the NASDAQ level 2/3 display. Current NASDAQ prices will likewise be sent via the NQDS feed to the Exchange, which will be similarly filtered and saved for display in the TOPIC videotex system and TOPICLINE. A transatlantic satellite link currently operated by the Exchange for delivery of its TOPIC service to its subsidiary in North America will be used to transmit the price information both ways between the U.S. and the U.K. A private line from the NASDAQ computers to the Exchange subsidiary's vendor-agent in New York, in whose premises the transatlantic link terminates, will be used to carry the NQDS and Exchange feeds simultaneously via multiplexing.

The delivery of Exchange data over the NASDAQ network will be via database inquiry from Level 2/3 terminals which serve primarily broker/dealer and institutional subscribers. Exchange data will not be disseminated over any NASDAQ broadcast service. Inquiry facilities will be provided which will allow access to a list of the names and symbols of Exchange securities, the middle prices for the FTSE 100 Share Index components (until "Big Bang Day"), the competing market makers' quotations for the international issues, and a directory of Exchange market maker symbols and their telephone numbers. In the various displays that include prices, the amount displayed will be denominated in the currency in which the individual security trades: pounds or pence sterling for the U.K. issues, or the currency of convention for the international issues. The currency will be identified on the screen using an appropriate identifier, e.g. USD for United States dollars, £ for pounds sterling, NLG for Netherlands (Dutch) guilders. If a particular Exchange listed security also appears in the NASDAQ database (either in stock certificate or ADR form), the NASDAQ security symbol will be displayed, but not any price data. In no case will NASDAQ and Exchange data be consolidated on a single screen display. Individual market makers' quotes will be alphabetically arranged, and no inside price will be calculated.

NASD data will be displayed in the Exchange's system on the TOPIC network of videotex terminals and TOPICLINE. The display will include price and size plus any necessary indication of a special bid condition (penalty, stabilizing, presyndicate). Market makers' quotations will be alphabetically arranged. Although each screen can display up to 32 market makers with expansion planned to 48, provision is being made for overflow pages. In the case of overflow, the number of market makers displayed on each screen will be balanced. On the first screen pertaining to a security additional data, consisting of last sale information and the inside price with the ID's of the three market makers at each side of the inside market, will also be displayed. The inside market will be computed by the Exchange using the NASDAQ standard formula, i.e., oldest highest bid, oldest lowest offer.

Usage and Fees. The Exchange is authorized to disseminate NASD information through its TOPIC network of videotex terminals and TOPICLINE. NASD Information shall be provided to the Exchange for display over its network(s) under the same terms and conditions utilized by the Exchange to protect the integrity and proprietary nature of its own data.

The NASD will be authorized to disseminate Exchange information solely through its network of Level ⅔ interactive terminals. Exchange information shall be provided to NASD for display over its network of level ⅔ terminals under the same terms and conditions utilized by the NASD to protect the intergrity and proprietary nature of its own information.

The cost of transfer of information between the parties over the transatlantic satellite link will be shared equally. The exchange of comparable information between the parties and their right to disseminate this information to subscribers through comparable networks under this Pilot Program was believed to obviate the need for any separate fee arrangement between the parties or between a party and the subscribers of the other party. However, nothing shall preclude future modification to this fee arrangement, upon written agreement of the parties, in the event additional information, services or costs arising under the Pilot Program would make such modification appropriate.

The term of the Pilot Program is for a period of two years, but may be extended for additional periods with the mutual consent of the NASD and the Exchange.

Cooperative Regulatory Undertakings. The Pilot Program to be implemented provides for the exchange of certain quotation information which is currently made available by the NASD and Exchange to its NASDAQ Level ⅔ and TOPIC subscribers respectively. The exchange of information provided for under the Pilot Program is believed to represent a definitive step toward greater cooperation between the Exchange and NASD in the evolving international securities markets. The Exchange and NASD for several years have experienced significant cooperation and coordination in the areas of information disclosure, quotation and trading halts and/or suspensions and the resumption of trading, and the surveillance and investigation of trading in securities of mutual market concern. With the

VOL 51
ISS 54
MR 20
1986
UMI

initiation of the Pilot Program, the NASD and the Exchange contemplate the continued prioritization of coordination with, and communication of relevant information to the other with respect to quotation and trading halts and/or suspensions and the resumption of trading in each market. Similarly, it is contemplated that the parties will cooperate in sharing regulatory information as needed by either the Exchange or NASD for purposes of their surveillance and investigation responsibilities with respect to the securities included within the Pilot Program.

In furtherance of these cooperative regulatory efforts, the NASD and the Exchange comtemplate the exploration of joint regulatory initiatives which may include the development of uniform standards applicable to international transactions in NASD or Exchange securities and appropriate procedures to assure compliance with such standards by the respective members of the NASD and Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purposes of and basis for the proposal and disscussed any comments it received on the proposal. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B) and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the Pilot Program is twofold. The Pilot Program will provide market participants in both the United States and the United Kingdom and Republic of Ireland with real time access to an expanded universe of international securities information. The Pilot Program will also serve as the foundation for evaluation of the technical ramifications and regulatory implications of international securities transactions, information dissemination and clearance and settlement in the evolving international marketplace.

The statutory basis for undertaking the Pilot Program is found in section 11A(a)(1)(B) and (C), 15A(b)(6), and 17(A)(1)(B) and (C) of the Securities Exchange Act of 1934 ("Act"). Section 11A(a)(1)(B) and (C) sets forth the Congressional goal of achieving more efficient and effective market operations, the availability of information with respect to quotations for securities and the execution of investor orders in the best market through new data processing and communications techniques. Section 15A(b)(6) requires that the rules of the Association be designed "to foster cooperation and coordination with persons engaged in regulatory, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market. . ." Section 17A(a)(1) sets forth the Congressional goal of linking all clearance and settlement facilities and reducing costs involved in the clearance and settlement process through new data processing and communications techniques. The NASD believes that the Pilot Program will further these ends by providing the cooperative regulatory environment and operating experience to enhance the potential for achievement of these goals in the international marketplace.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed Pilot Program will provide for the sharing of market data between the NASD and Exchange on a nonexclusive basis, and the NASD believes that it imposes no burden on competition and may in fact significantly improve the competitive dynamics of the marketplace for these securities. To the extent that any burden on competition may be found to exist, the NASD believes that the benefit to be derived from the cooperative regulatory undertakings contemplated and operational experience to be gained will outweigh any potential burden upon competition and materially advance the purposes to be served under the foregoing sections of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Comments were neither solicited nor received in connection with the proposed Pilot Program.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period as the Commission may designate up to 120 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 10, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 14, 1986.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 86-6154 Filed 3-19-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-23014; File No. SR-OCC-86-04]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by Options Clearing Corp.

On February 21, 1986, the Options Clearing Corporation ("OCC") filed a proposed rule change with the Commission under Section 19(b)(1) of the Securities and Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1). The Commission is publishing this Notice to solicit comment on the rule change.

The proposed rule change amends the OCC By-law Article XV(k)'s definition of "country of origin" and adds related Interpretations and Policies to OCC Rule 1607. The By-Law's definition of

"country of origin" for ECU options exercise and assignment settlement purposes has been changed to refer to its meaning in OCC's Rules.[1] New Interpretation and Policy 1.a. to OCC Rule 1607 specifically defines that term for these purposes as Belgium, unless OCC directs otherwise. New Interpretation and Policy 1.b, however, states that OCC can deliver ECUs to a Clearing Member through the Member's ECU-denominated account at its correspondent bank, even if that bank is located outside Belgium.[2] Previously, exercises and assignments of ECU options could be settled only in Belgium.[3]

OCC states that the proposal should enable Clearing Members to establish banking relationships necessary to participate in the ECU options markets. OCC represents that Clearing Members have had difficulty finding banks to process ECU exercise and assignment activity because few Belgium banks offer ECU-denominated accounts. Conversely, many European banks outside Belgium offer those accounts and thus can process this activity.

The foregoing rule has become effective pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the proposal. Persons making written submissions should file six copies with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the filing, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of the filing will also be available for inspection and copying at the principal office of OCC. All submissions should refer to the file number in the caption above and should be submitted by March 31, 1986.

For the Commisison, by the Division of Market Regulation pursuant to delegated authority.

Dated: March 13, 1986.

Shirley E. Hollis,

Assistant Secretary.

Shipping Coordinating Committee; Subcommittee on Safety of Life at Sea, Working Group on Containers and Cargoes, Bulk Cargoes Panel; Meeting

The Bulk Cargoes Panel of the Working Group on Containers and Cargoes of the Subcommittee on Safety of Life at Sea (SOLAS) will conduct an open meeting on Mary 1, 1986 at 9:30 a.m. in Room 2415 at Coast Guard Headquarters, 2100 Second Street SW., Washington, DC.

The purpose of this meeting is to discuss:

1. United States positions on matters to be discussed at the 27th Session of the International Maritime Organization (IMO) Subcommittee on Containers and Cargoes to be held May 12-16, 1986.

2. Proposed revision of SOLAS, Chapter VI to include basic regulations for the safe carriage of cargoes except liquids and gases in bulk and to reference the following standards:

—Code of Safe Practice for Solid Bulk Cargoes;
—Code of Safe Practice for the Safe Stowage and Securing of Cargo, Cargo Units and Vehicles (under development);
—Code of Safe Practice for Ships Carrying Timber Deck Cargoes;
—IMO/ILO Guidelines for the Packing of Cargo in Freight Containers and Vehicles; and
—Code for the Safe Carriage of Grain in Bulk.

3. Proposed amendments to the Code of Safe Practice for Solid Bulk Cargoes, including:

—Development of new criteria in respect of liquefaction and sliding failures in solid bulk cargoes;
—Stability criteria for ships carrying cargoes which may liquefy; and
—Requirements for materials possessing chemical hazards.

4. Carriage of packaged timber deck cargoes.

5. IMO activities of a continuing nature.

In addition, the National Cargo Bureau will give a brief presentation on the shipment of problematic bulk cargoes.

Members of the public may attend up to the seating capacity of the room.

For further information contact Lieutenant Commander Larry H. Gibson, U.S. Coast Guard Headquarters (G-MTH-1), 2100 Second Street SW., Washington, DC 20593. Telephone: (202) 426-1577.

Dated: March 7, 1986.

Richard C. Scissors,

Chairman, Shipping Coordinating Committee.

Shipping Coordinating Committee; Subcommittee on Safety of Life at Sea, Working Group on Bulk Chemicals; Meeting

The Working Group on Bulk Chemicals of the Subcommittee on Safety of Life at Sea (SOLAS) will conduct an open meeting on April 10, 1986 at 9:30 a.m. in Room 2415 at Coast Guard Headquarters, 2100 Second Street SW., Washington, DC.

The purpose of this meeting will be a general review of all agenda items for the sixteenth session of the International Maritime Organization (IMO) Subcommittee on Bulk Chemicals scheduled for April 28-May 2, 1986.

The agenda for this meeting includes the following items:

—Implication of MARPOL 73/78, Annex II
—Mixtures of MARPOL 73/78, Annex I and Annex II substances
—Guidelines on the carriage of bulk chemicals on offshore support vessels
—Venting requirements for chemical tankers

Members of the public may attend up to the seating capacity of the room.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Reports, Forms, and Recordkeeping Requirements; Submittals to OMB February 20, 1986 to March 12, 1986

AGENCY: Department of Transportation (DOT), Office of the Secretary.

ACTION: Notice.

SUMMARY: This notice lists those forms, reports, and recordkeeping requirements imposed upon the public which were transmitted by the Department of Transportation, during the period February 20, 1986—March 12, 1986, to the Office of Management and Budget (OMB) for its approval in accordance with the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

FOR FURTHER INFORMATION CONTACT: John Chandler or Annette Wilson, Information Requirements Division, M-34, Office of the Secretary of Transportation, 400 Seventh Street, SW., Washington, DC 20590, telephone (202) 426-1887, or Gary Waxman or Sam Fairchild, Office of Management and Budget, New Executive Office Building, Room 3228, Washington, DC 20503, (202) 395-7340.

SUPPLEMENTARY INFORMATION:

Background

Section 3507 of Title 44 of the United States Code, as adopted by the Paperwork Reduction Act of 1980, requires that agencies prepare a notice for publication in the **Federal Register**, listing those information collection requests submitted to the Office of Management and Budget (OMB) for initial, approval, or for renewal under that Act. OMB reviews and approves agency submittals in accordance with criteria set forth in that Act. In carrying out its responsibilities, OMB also considers public comments on the proposed forms, reporting and recordkeeping requirements. OMB approval of an information collection requirement must be renewed at least once every three years.

Information Availability and Comments

Copies of the DOT information collection requests submitted to OMB may be obtained from the DOT officials listed in the "For Further Information Contact" paragraph set forth above. Comments on the requests should be forwarded, as quickly as possible, directly to the OMB officials listed in the "For Further Information Contact" paragraph set forth above. If you anticipate submitting substantive comments, but find that more than 10 days from the date of publication are needed to prepare them, please notify the OMB officials of your intent immediately.

Items Submitted for Review by OMB

The following information collection requests were submitted to OMB from February 20, 1986—March 12, 1986.

DOT No: 2701
OMB No: 2137-0510
By: Research and Special Programs Administration
Title: RAM Transportation Requirements
Form(s): None
Frequency: On occasion
Respondents: Shippers and carriers of radioactive materials
Need/Use: To maintain transportation safety in the shipping of radioactive materials so as to avoid the radioactive exposure hazards inherent in the transportation of these materials.

DOT No: 2708
OMB No: New
By: United States Coast Guard
Title: Liquified Natural Gas (LNG) Waterfront Facilities
Form(s): None
Frequency: On occasion
Respondents: Owners/operators of LNG facilities
Need/Use: This information collection requirement is needed and used to prevent or mitigate the results of an accidental release of liquified natural gas at such waterfront facility. This requirement would reduce the possibility that such an accident could occur, and will reduce the damage and injury to persons and property in the event of an accident.

DOT No: 2709
OMB No: 2125-0526
By: Federal Highway Administration
Title: Motor Carrier Accident Reports
Form(s): MCS-50T, MCS-50B
Frequency: On occasion
Respondents: Motor carriers
Need/Use: Accident reports provide vital information to the FHWA/BMCS in administering its regulatory program

DOT No: 2710
OMB No: 2125-0518
By: Federal Highway Administration
Title: Immediate Notification of Fatal Accidents
Form(s): None
Frequency: On occasion
Respondents: Motor Carriers
Need/Use: To meet the requirement that motor carriers notify FHWA by telephone, deaths of persons that occur within 24 hours of a reportable accident.

DOT No: 2712
OMB No: 2125-0518
By: Federal Highway Administration
Title: Minimum Levels of Financial Responsibility for Motor Carriers of Passengers
Form(s): MCS-90B, MCS-82B
Frequency: Annually
Respondents: Insurance Companies
Need/Use: The law requires for-hire motor carriers of passengers to maintain minimum levels of financial responsibility. The endorsement amends the carriers policy of insurance to assure compliance by the insured.

DOT No: 2713
OMB No: New
By: United States Coast Guard
Title: 33 CFR 140.15 Equivalents and Approved Equipment
Form(s): None
Frequency: On occasion
Respondents: Industries desiring to operate on U.S. Outer Continental Shelf (OSC)
Need/Use: This requirement is needed and used by the Coast Guard to ensure that an equivalent level of safety is maintained for certain unspecified equipment or procedures as provided in the regulations.

DOT No: 2714
OMB No: 2115-0007
By: United States Coast Guard
Title: Application for Inspection of U.S. Vessel
Form(s): CG-3752
Frequency: Annually, biennially, triennially
Respondents: Owners and operators of commercial vessels.
Need/Use: The Application for Inspection (CG-3752), must be completed prior to the Coast Guard inspecting a vessel for certification. The requirements are contained in 46 CFR 2.01-1. The application provides the Coast Guard with notification and basic information needed for planning and carrying out an inspection.

DOT No: 2115
OMB No: 2137-0009
By: Research and Special Programs Administration

Title: Applications to Add or Change Materials in the IM Table
Form(s): None
Frequency: On occasion
Respondents: Businesses wishing to have the IM Portable Tank Table Modified
Need/Use: The Office of hazardous Materials Transportation uses the information as a basis for modification of the Intermodal Tank Table of Hazardous materials and the regulated public as a means to request modification of the table.

DOT No: 2716
OMB No: New
By: Office of Commercial Space Transportation, OST
Title: Commercial Space Transportation: Licensing Regulations
Form(s): None
Frequency: When submitting a license application
Respondents: Organizations applying for licenses for launches
Need/Use: Launch licenses are required to protect the public health and safety, national security and foreign policy interests of the U.S.

DOT No: 2717
OMB No: 2138-0023
By: Research and Special Programs Administration
Title: Part 291 Domestic Cargo Transportation
Form(s): RSPA—291-A
Frequency: Annual
Respondents: 40
Need/Use: The data from 291-A is used to monitor the domestic all-cargo industry. This is the only recurring statistical and financial reporting requirement on this segment of the airline industry.

DOT No: 2718
OMB No: 2138-0014
By: Research and Special Programs Administration
Title: Accessibility and Transmittal of Service-Segment Data
Form(s): None
Frequency: Monthly
Respondents: Large Certificated Route Air Carriers
Need/Use: Provides the Department with traffic and capacity data needed for determining traffic flows and adequacy of service.

DOT No: 2720
OMB No: 2127-0040
By: National Highway Traffic Safety Administration
Title: 49 CFR Part 551.45 Designation of Agent
Form(s): None
Frequency: On occasion
Respondents: Foreign businesses
Need/Use: Every foreign manufacturer offering a motor vehicle/equipment for importation in the United States must designate an agent upon whom service of processes, notices, orders and requirements may be made.

DOT No: 2721
OMB No: 2125-0515
By: Federal Highway Administration
Title: Submission of Eligibility Statement for Utility Adjustments
Form(s): None
Frequency: On occasion
Respondents: State Highway Agencies
Need/Use: The eligibility statement is necessary in order for FHWA to determine whether the States statutes establish the legal authority or obligation to pay for utility adjustments on Federal-aid highway projects.

DOT No: 2722
OMB No: 2120-0518
By: Federal Aviation Administration
Title: Special Federal Aviation Regulation-Special Flight Authorizations for Noise Restricted Aircraft
Form(s): None
Frequency: On occasion
Respondents: Businesses and small businesses
Need/Use: Under Part 91, beginning January 1, 1985, operations of large turboject aircraft are prohibited at U.S. airports unless compliance with Part 36 noise levels is demonstrated. Therefore, operators (foreign, domestic, and corporate) will need a Special Flight Authorization for U.S. operators to dispose of aircraft or take them to be modified to comply.

DOT No: 2723
OMB No: 2127-0505
By: National Highway Traffic Safety Administration
Title: 49 CFR 571.217, Bus Window Retention and Release
Form(s): None
Frequency: On occasion
Respondents: Businesses
Need/Use: This standard requires emergency exit identification to be marked in all buses, along with concise operating instructions explaining how to unlatch and open the exit.

Issued in Washington, DC, on March 14, 1986.

John E. Turner,

Director of Information Systems and Telecommunications.

Research and Special Programs Administration

Grants and Denials of Applications for Exemptions

AGENCY: Research and Special Programs Administration, DOT.

ACTION: Notice of grants and denials of applications for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted in February 1986. The modes of transportation involved are identified by a number in the "Nature of Exemption Thereof" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

RENEWAL AND PARTY TO EXEMPTIONS

Application number	Exemption number	Applicant	Regulation(s) affected	Nature of exemption thereof
3302-X	DOT-E 3302	Airco Industrial Gases, Murray Hill, NJ.	49 CFR 173.302, 175.3	To authorize use of non-DOT specification sampling bottles (cylinders), for transportation of certain nonflammable gases (modes 1, 2, 3, 4).
3302-X	DOT-E 3302	Air Products and Chemicals, Inc., Allentown, PA.	49 CFR 173.302, 175.3	To authorize (modes use of non-DOT specification sampling bottles (cylinders), for transportation of certain nonflammable gases (modes 1, 2, 3, 4)
3998-X	DOT-E 3998	Stauffer Chemical Company, Westport, CT.	49 CFR 173.188	To authorize shipment of phosphoric anhydride in DOT Specification 6K metal drums (modes 1, 2).
4850-X	DOT-E 4850	GOEX, Inc., Cleburne, TX.	49 CFR 173.100(cc), 175.3.	To authorize shipment of flexible linear shaped charges, metal clad, in 100' lengths, containing not more than 50 grains per lineal foot of high explosive, as a Class C explosive (modes 1, 2, 4).
5843-X	DOT-E 5843	Union Carbide Corporation, Danbury, CT.	49 CFR 172.101, 173.315(a)(1).	To authorize shipment of 2 nonflammable gas in vacuum insulated non-DOT specification portable tanks (modes 1, 3).
6016-X	DOT-E 6016	Strate Welding Supply Co., Inc., Buffalo, NY.	49 CFR 173.315(a)	To authorize shipment of liquid oxygen, nitrogen, and argon in non-DOT specification portable tanks (mode 1).

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application number	Exemption number	Applicant	Regulation(s) affected	Nature of exemption thereof
6016-X	DOT-E 6016	Acety-Arc, Inc., Paducah, KY	49 CFR 173.315(a)	To authorize shipment of liquid oxygen, nitrogen, and argon in non-DOT specification portable tanks (mode 1).
6015-X	DOT-E 6016	Langdon Oxygen Co., Texarkana, TX.	49 CFR 173.315(a)	To authorize shipment of liquid oxygen, nitrogen, and argon in non-DOT specification portable tanks (mode 1).
6016-X	DOT-E 6016	O.E. Meyer & Sons, Inc., Sandusky, OH.	49 CFR 173.315(a)	To authorize shipment of liquid oxygen, nitrogen, and argon in non-DOT specification portable tanks (mode 1).
6016-X	DOT-E 6016	Southern Welding Supply Co., Inc., Bowling Green, KY.	49 CFR 173.315(a)	To authorize shipment of liquid oxygen, nitrogen, and argon in non-DOT specification portable tanks (mode 1).
6016-X	DOT-E 6016	Wilson Welding Supply, Inc., Warren, MI.	49 CFR 173.315(a)	To authorize shipment of liquid oxygen, nitrogen, and argon in non-DOT specification portable tanks (mode 1).
6045-P	DOT-E 6045	Viskase Corporation, Chicago, IL.	49 CFR 173.121	To become a party to Exemption 6045 (modes 1, 3).
6325-X	DOT-E 6325	Atlas Powder Company, Dallas, TX.	49 CFR 173.154(a)	To authorize transport of oxidizers in non-DOT specification cargo tanks or DOT Specification MC-306, MC-307 or MC-312 cargo tanks (mode 1).
6325-X	DOT-E 6325	Mining Services International Corp., Salt Lake City, UT.	49 CFR 173.154(a)	To authorize transport of oxidizers in non-DOT specification cargo tanks or DOT Specification MC-306, MC-307 or MC-312 cargo tanks (mode 1).
6530-X	DOT-E 6530	Acme Welding Supply Co., Inc., Bismarck, ND.	49 CFR 173.302(c)	To authorize shipment of hydrogen and mixtures of hydrogen with helium, argon or nitrogen in DOT Specification 3A, 3AA, 3AX steel cylinders (modes 1, 2).
6530-X	DOT-E 6530	Airco Industrial Gases, Murray Hill, NJ	49 CFR 173.302(c)	To authorize shipment of hydrogen and mixtures of hydrogen with helium, argon or nitrogen in DOT Specification 3A, 3AA, 3AX or 3AAX steel cylinders (modes 1, 2).
6530-X	DOT-E 6530	Brown Welding Supply, Inc., Salina, KS.	49 CFR 173.302(c)	To authorize shipment of hydrogen and mixtures of hydrogen with helium, argon or nitrogen in DOT Specification 3A, 3AA, 3AX or 3AAX steel cylinders (modes 1, 2).
6691-X	DOT-E 6691	Union Carbide Corporation, Danbury, CT.	49 CFR 173.34(e)(15)(i), Part 107, Appendix B.	To authorize use of DOT Specification 3A or 3AA cylinders over 35 years old which may be retested every 10 years, for transportation of certain flammable and nonflammable compressed gases (modes 1, 2, 3, 4, 5).
6735-X	DOT-E 6735	Great Lakes Chemical Corp., El Dorado, AR.	49 CFR 173.252	To authorize transport of bromine in a non-DOT specification cylinder constructed in accordance with all requirements of DOT Specification 4B, 4BA or 4BW except that the cylinder shall be marked "DOT-E 6735" in lieu of the DOT specification marking (modes 1, 2, 3).
6743-X	DOT-E 6743	Atlas Powder Company, Dallas, TX.	49 CFR 173.114a(h)(3), 173.182.	To authorize shipment of an oxidizing material and a blasting agent in DOT Specification 56 or 57 portable tanks (mode 1).
6765-X	DOT-E 6765	Airco Industrial Gases, Murray Hill, NJ.	49 CFR 173.315(a), 178.780(a)(4).	To authorize use of non-DOT specification containerized portable tanks, for transportation of a flammable and nonflammable gas (modes 1, 3).
6874-X	DOT-E 6874	Harrisons & Crosfield (Pacific), Inc., Emeryville, CA.	49 CFR 172.101, 173.370(a)(13).	To become a party to Exemption 6874 (modes 1, 2, 3).
6963-X	DOT-E 6963	Hedwin Corporation, Baltimore, MD.	49 CFR 173.119, 173.154, 173.221, 173.245(a)(26), 173.249(a)(1), 173.250a(a)(1), 173.256(a), 173.257(a)(1), 173.263(a)(26), 173.265(d)(6), 173.268(b)(6), 173.278(g), 173.272(i)(6), 173.277(a)(6), 173.287(c)(1), 173.288, 173.289(a)(1), 173.292(a)(1), 173.346(a), 178.19.	To authorize manufacture, marking and sale of non-DOT specification molded polyethylene containers, for shipment of oxidizers, poison B, corrosive liquids, organic peroxides and flammable liquids (modes 1, 2, 3).
6921-X	DOT-E 6921	Airco Industrial Gases, Murray Hill, NJ.	49 CFR 172.101, 173.315(a)(1).	To authorize use of a insulated containerized non-DOT specification portable tank, for transportation of liquefied helium (modes 1, 3).
7052-X	DOT-E 7052	Plainview Electronics Corporation, Plainview, NY.	49 CFR 172.101, 172.420, 175.3.	To authorize shipment of batteries containing lithium and other materials, classed as flammable solids (modes 1, 2, 3, 4).
7052-X	DOT-E 7052	Rockwell International Corporation, Anaheim, CA.	49 CFR 172.101, 172,420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3,4).
7052-X	DOT-E 7052	Ballard Technologies Corporation, North Vancouver, B.C.	49 CFR 172.101, 172,420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3,4).
7052-X	DOT-E 7052	U.S. Department of Energy, Washington, DC.	49 CFR 172.101, 172,420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3,4).
7052-X	DOT-E 7052	Datasonics, Inc., Cataumet, MA.	49 CFR 172.101, 172,420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3,4).
7052-P	DOT-E 7052	Wespol, Inc., Houston, TX	49 CFR 172.101, 172,420, 175.3.	To become a party to Exemption 7052 (modes 1, 2, 3,4).
7052-X	DOT-E 7052	U.S. Department of Defense, Falls Church, VA.	49 CFR 172.101, 172,420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3,4).
7052-X	DOT-E 7052	Hazeltine Corporation, Braintree, MA.	49 CFR 172.101, 172,420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3,4).
7052-X	DOT-E 7052	Eagle-Picher Industries, Inc., Joplin, MO.	49 CFR 172.101, 172,420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3,4).
7052-X	DOT-E 7052	DURACELL Inc., Bethel, CT	49 CFR 172.101, 172,420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3,4).
7052-P	DOT-E 7052	The Foxboro, Company, Foxboro, MA.	49 CFR 172.101, 172,420, 175.3.	To become a party to Exemption 7052 (modes 1, 2, 3,4).
7052-X	DOT-E 7052	Sonatech, Inc., Goleta, CA	49 CFR 172.101, 172,420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3,4).
7052-X	DOT-E 7052	Exploration Logging Inc., Sacramento, CA.	49 CFR 172.101, 172,420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3,4).
7052-X	DOT-E 7052	Moli Energy Limited, Burnaby, B.C., Canada.	49 CFR 172.101, 172,420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3,4).
7052-P	DOT-E 7052	Mather Corporation, Bryn Mawr, PA.	49 CFR 172.101, 172,420, 175.3.	To become a party to Exemption 7052 (modes 1, 2, 3,4).
7052-X	DOT-E 7052	Saft Corporation of America, Cockeysville, MD.	49 CFR 172.101, 172,420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3,4).
7052-X	DOT-E 7052	Geophysical Research Corporation, Tulsa, OK.	49 CFR 172.101, 172,420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3,4).

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application number	Exemption number	Applicant	Regulation(s) affected	Nature of exemption thereof
7052-X	DOT-E 7052	GTE Products Corp., Waltham, MA.	49 CFR 172.101, 172.420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3, 4).
7052-X	DOT-E 7052	McDonnell Douglas Corporation, St. Louis, MO.	49 CFR 172.101, 172.420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3, 4).
7052-P	DOT-E 7052	XCELATRON, Incorporated; Chimacum, WA.	49 CFR 172.101, 172.420, 175.3.	To become a party to Exemption 7052, (modes 1, 2, 3, 4).
7052-X	DOT-E 7052	Technical Oil Tool, Corporation Norman, OK.	49 CFR 172.101, 172.420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3, 4).
7052-X	DOT-E 7052	ENMET Corporation, Ann Arbor, MI.	49 CFR 172.101, 172.420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3, 4).
7052-X	DOT-E 7052	Northrop Corp., Hawthorne, CA.	49 CFR 172.101, 172.420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3, 4).
7052-X	DOT-E 7052	Sparton Corporation, Jackson, MI.	49 CFR 172.101, 172.420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3, 4).
7052-X	DOT-E 7052	Flopetrol Johnston, a Division of Schlumberger, Houston, TX.	49 CFR 172.101, 172.420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3, 4).
7052-P	DOT-E 7052	GEODATA Systems Limited, Wiltshire, England.	49 CFR 172.101, 172.420, 175.3.	To To become a party to Exemption 7052 (modes 1, 2, 3, 4).
7052-X	DOT-E 7052	Bren-Tronics, Inc., Commack, NY.	49 CFR 172.101, 172.420, 175.3.	To authorize shipment of batteries containing lithium and other materials classed as flammable solids (modes 1, 2, 3, 4).
7073-X	DOT-E 7073	Ethyl Corp., Baton Rouge, LA.	49 CFR 173.354(a) (6), 174.63(b).	To authorize use of non-DOT specification portable tanks for transportation of a Class B poisonous liquid, (modes 1, 2, 3).
7073-X	DOT-E 7073	Ethyl Corp., Baton Rouge, LA.	49 CFR 173.354,(a) (6), 174.63(b).	To authorize use of non-DOT specification portable tanks for transportation of a Class B poisonous liquid, (modes 1, 2, 3).
7495-X	DOT-E 7495	Brewer Chemical Corp., Honolulu, HI.	49 CFR 173.315,(a) (1), 173.353, 174.63(b).	To authorize methyl bromide, Class B poison, as an additional class of material (modes 1, 2, 3).
7541-X	DOT-E 7541	E. I. du Pont de Nemours & Co., Inc., Wilmington, DE.	49 CFR 173.315(a)	To authorize use of non-DOT specification portable tank for transportation of certain flammable and nonflammable compressed gases (modes 1, 3).
7598-X	DOT-E 7598	United Technologies Corp., Pratt & Whitney Mfg., East Hartford, CT.	49 CFR 173.182(b), 173.194(a), 173.234(a), 173.245(a), 173.249(a), 173.263, 173.264, 173.266, 173.268, 173.272, 173.283, 173.287, 173.352, 173.370, 173.54(a), 178.255-1(a).	To authorize shipment of certain corrosive materials, oxidizers and Class B poisons in a portable tank complying with DOT Specification 60, except the ends are bolted instead of welded (mode 1).
7654-X	DOT-E 7654	Texas Eastman Company, Longview, TX.	49 CFR 173.119(f)	To authorize use of a glass bottle not exceeding 500 milliliter capacity inside a metal container overpacked in a DOT Specification 12B fiberboard box, for transportation of a flammable liquid (modes 1, 2).
7753-X	DOT-E 7753	Stauffer Chemical Company, Westport, CT.	49 CFR 173.190(b)(2)	To authorize shipment of yellow phosphorous in a tight-head 55-gallon DOT Specification 17C drum (modes 1, 2, 3).
7835-P	DOT-E 7835	AmeriGas, Inc., Valley Forge, PA.	49 CFR 177.848, Part 107 Appen. B(1).	To become a party to Exemption 7835 (mode 1).
7835-P	DOT-E 7835	General Air Service & Supply, Denver, CO.	49 CFR 177.848, Part 107 Appen. B(1).	To become a party to Exemption 7835 (mode 1).
7891-X	DOT-E 7891	Sigma-Aldrich Corporation, Saint Louis, MO.	49 CFR 172.400, 172.402(a)(2), 172.402(a)(3), 172.504(a), 172.504, Table 1, 173.126, 173.138, 173.237, 173.246, 173.25(a), 175.3.	To authorize transport of packages bearing the DANGEROUS WHEN WET label, in motor vehicles which are not placarded FLAMMABLE SOLID W (modes 1, 2, 4).
7891-P	DOT-E 7891	Farchan Laboratories, Inc., Gainesville, FL.	49 CFR 172.400, 172.402(a)(2), 172.402(a)(3), 172.504(a), 172.504, Table 1, 173.126, 173.138, 173.237, 173.246, 173.25(a), 175.3.	To become a party to Exemption 7891 (modes 1, 2, 4).
7926-X	DOT-E 7926	Alaska Marine Highway System, State of Alaska, Juneau, AK.	49 CFR 172.101, 176.905(L).	To authorize stowage of certain hazardous materials on the vehicle deck of passenger vessels (mode 3).
7945-X	DOT-E 7945	HTL Industries, Inc., Duarte, CA.	49 CFR 173.304(a)(1), 175.3, 178.47.	To authorize use of a stainless steel other than that prescribed in the regulations, in the construction of a cylinder patterned after DOT Specification 4DS cylinders, for shipment of a nonflammable compressed gas (modes 1, 2, 4, 5).
7954-X	DOT-E 7954	Air Products and Chemicals, Inc., Allentown, PA.	49 CFR 172.504, 173.301(d)(2), 173.302(a)(3).	To authorize shipment of nonflammable gases in manifolded DOT Specification 3A2400, 3AA2400 or 3AAX2400 cylinders (modes 1, 3).
7981-P	DOT-E 7981	The Denver and Rio Grande Western Railroad Company, Denver, CO.	49 CFR 100-177	To become a party Exemption 7981 (mode 1).
8156-X	DOT-E 8156	Ashland Chemical, Columbus, OH.	49 CFR 173.121, 173.302(a)(4), 173.302(f), 173.304(a)(1).	To authorize transport of certain flammable or nonflammable compressed gases and carbon bisulfide in a DOT Specification 39 steel cylinder up to 225 cubic inches in volume (modes 1, 2).
8156-X	DOT-E 8156	Scott Environmental Technology, Incorporated, Plumsteadville, PA.	49 CFR 173.121, 173.302(a)(4), 173.302(f), 173.304(a)(1).	To authorize transport of certain flammable or nonflammable compressed gases and carbon bisulfide in a DOT Specification 39 steel cylinder up to 225 cubic inches in volume (modes 1, 2).
8156-X	DOT-E 8156	Air Products and Chemicals, Inc., Allentown, PA.	49 CFR 173.121, 173.302(a)(4), 173.302(f), 173.304(a)(1).	To authorize transport of certain flammable or nonflammable compressed gases and carbon bisulfide in a DOT Specification 39 steel cylinder up to 225 cubic inches in volume (modes 1, 2).
8156-X	DOT-E 8156	Union Carbide Corporation, Danbury, CT.	49 CFR 173.121, 173.302(a)(4), 173.302(f), 173.304(a)(1).	To authorize transport of certain flammable or nonflammable compressed gases and carbon bisulfide in a DOT Specification 39 steel cylinder up to 225 cubic inches in volume (modes 1, 2).

VOL 51 ISS 54 MR 20 1986 UMI

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application number	Exemption number	Applicant	Regulation(s) affected	Nature of exemption thereof
8162–X	DOT–E 8162	Structural Composites Industries, Inc., Pomona, CA.	49 CFR 173.302(a)(1), 173.304(a)(1), 175.3.	To authorize manufacture, marking and sale of non-DOT specification fiber reinforced plastic full composite cylinders, for transportation of nonflammable compressed gases (modes 1, 2, 3, 4, 5).
8354–X	DOT–E 8354	Compagnie des Containers Reservoirs (CCR), Paris, France.	49 CFR 173.123, 173.315.	To authorize use of a non-DOT specification portable tank, for transportation of certain liquefied petroleum gases and other gases classed as flammable liquids and flammable gases (modes 1, 2, 3).
8354–X	DOT–E 8354	VTG, Hamburg, Germany	49 CFR 173.123, 173.315.	To authorize use of a non-DOT specification portable tank, for transportation of certain liquefied petroleum gases and other gases classed as flammable liquids and flammable gases (modes 1, 2, 3).
8354–X	DOT–E 8354	ARBEL FAUVET RAIL, Paris, France.	49 CFR 173.123, 173.315.	To authorize use of a non-DOT specification portable tank, for transportation of certain liquefied petroleum gases and other gases classed as flammable liquids and flammable gases (modes 1, 2, 3).
8451–P	DOT–E 8451	Pyrotechnic Specialities, Inc., Byron, GA.	49 CFR 173.86, 173.88(e), 175.3.	To become a party to Exemption 8451 (modes 1, 2, 4).
8453–X	DOT–E 8453	Atlas Powder Company, Dallas, TX.	49 CFR 173.114a	To authorize use of non-DOT specification cargo tanks and DOT Specification MC–306, MC–307, or MC–312 stainless steel cargo tanks, to transport blasting agent (mode 1).
8468–X	DOT–E 8468	Hedwin Corporation, Baltimore, MD.	49 CFR 173.119, 173.125, 173.154, 173.272, 173.289, 173.348.	To authorize manufacture, marking and sale of DOT Specification 34 drums of 4, 5 and 6-gallon capacity, for shipmnet of certain flammable, poison B, corrosive liquids, oxidizers and organic peroxides (modes 1, 2, 3).
8650–X	DOT–E 8650	Ethyl Corp., Baton Rouge, LA.	49 CFR 173.354, 174.63(b).	To authorize use of a non-DOT specification steel portable tank for shipment of motor fuel antiknock compound (modes 1, 2, 3).
8650–X	DOT–E 8650	Ethyl Corp., Baton Rouge, LA.	49 CFR 173.354, 174.63(b).	To authorize non-DOT specification portable tanks in an ISO frame containing motor fuel antiknock compound to be shipped in container-on-flat-car-service (modes 1, 2, 3).
8718–X	DOT–E 8718	Structural Composites Industries, Inc., Pomona, CA.	49 CFR 173.302(a), 173.304(a), 175.3.	To authorize manufacture, marking and sale of non-DOT specification fiber reinforced plastic full composite cylinder for use as an equipment component aboard aircraft and marine craft, for transportation of certain nonflammable compressed gases (modes 1, 2, 3, 4, 5).
8770–X	DOT–E 8770	Eastman Kodak Co., Rochester, NY.	49 CFR 172.402, 173.206(c).	To authorize shipment of a corrosive liquid and minute quantity of a flammable, poisonous solid in DOT Specification 12A, 12B or 15A fiberboard or wooden boxes with inside glass bottles (modes 1, 2, 3).
8843–X	DOT–E 8843	GOEX, Inc., Cleburne, TX	49 CFR 173.246, 175.3	To authorize manufacture, marking and sale of non-DOT specification nonrefillable cylinders, for transportation of bromine trifluoride (modes 1, 2, 3, 4).
8937–P	DOT–E 8937	Industrial Mineral Product, Inc., Ravensdale, WA.	49 CFR 173.178	To become a party to Exemption 8937 (modes 1, 2, 3).
8967–X	DOT–E 8967	Hercules, Incorporated, Wilmington, DE.	49 CFR 173.93(a)(11)	To authorize shipment of a solid propellant explosive, in a non-DOT specification fiberboard tube, overpacked in a non-DOT specification palletized metal cage (mode 1).
9015–X	DOT–E 9015	Monsanto Company, St. Louis, MO.	49 CFR 173.217	To renew and to authorize potassium dichloro-s-triazinetrione and sodium dichloro-s-triazinetrione as additional oxidizers for shipment in bulk bags (modes 1, 2, 3).
9118–X	DOT–E 9118	ICI Americas Inc., Wilmington, DE.	49 CFR 173.245(a)(30)	To authorize shipment of 1,2-benzisothiazolin-3-one in aqueous solution or dispersion, either by itself or in combination with ethylenediamine or sodium hydroxide, in DOT Specification 57 steel portable tanks (modes 1, 2, 3).
9168–X	DOT–E 9168	All-Pak, Inc., Pittsburgh, PA	49 CFR 172.400, 172.504, 173.118, 173.244, 173.345, 173.346, 173.359, 173.370, 173.377, 175.3, 175.33.	To authorize manufacture, marking and sale of specially designed composite type packaging, for shipment of small quantities of various flammable, corrosive, and poison B liquids and solids shipped without POISON, CORROSIVE, or FLAMMABLE labels (modes 1, 2, 4).
9176–X	DOT–E 9176	Minnesota Valley Engineering, New Prague, MN.	49 CFR 173.304(a), 177.840(a)(1).	To authorize manufacture, marking and sale of DOT Specification 4L cylinders; for transportation of certain nonflammable gases (mode 1).
9181–X	DOT–E 9181	Honeywell, Inc., Horsham, PA.	49 CFR 173.206, 173.21, 173.247.	To authorize a DOT Specification 17C drum as overpack and to require the electical connector of the piston actuator to be covered with a Faraday shield cap (mode 1).
9184–X	DOT–E 9184	Midwest Carbide Corporation, Keokuk, IA.	49 CFR 173.178	To authorize shipment of calcium carbide in polyethylene lined woven polypropylene collapsible bags in truckload or carload lots only (modes 1, 2).
9184–X	DOT–E 9184	Cynamid Canada, Inc., East Willowdale, Canada.	49 CFR 173.178	To authorize shipment of calcium carbide in polyethylene lined woven polypropylene collapsible bags in truckload or carload lots only (modes 1, 2).
9195–X	DOT–E 9195	Owens-Illinois, Inc., Toledo, OH.	49 CFR 173.119(b)(4)	To authorize manufacture, marking and sale of DOT Specification 12B fiberboard boxes with inside bottles of plastic other than polyethylene, of one quart capacity, for shipment of certain insect control chemicals (modes 1, 2, 3).
9251–X	DOT–E 9251	Orchard Supply Company of Sacramento, Sacramento, CA.	49 CFR 173.245	To authorize shipment of a corrosive liquid, n.o.s. in DOT Specification 51 portable tanks (mode 1).
9275–P	DOT–E 9275	Boyle-Midway, New York, NY.	49 CFR Parts 100–199	To become a party to Exemption 9275 (modes 1, 2, 3, 4, 5).
9275–P	DOT–E 9275	Firmenich, Inc., Princeton, NJ.	49 CFR Parts 100–199	To become a party to Exemption 9275 (modes 1, 2, 3, 4, 5).
9275–P	DOT–E 9275	Hercules, Incorporated, Wilmington, DE.	49 CFR Parts 100–199	To become a party to Exemption 9275 (modes 1, 2, 3, 4, 5).
9275–P	DOT–E 9275	Carter-Wallace, Inc., New York.	49 CFR Parts 100–199	To become a party to Exemption 9275 (modes 1, 2, 3, 4, 5).
9275–P	DOT–E 9275	Mary Kay Cosmetics, Dallas, TX.	49 CFR Parts 100–199	To become a party to Exemption 9275 (modes 1, 2, 3, 4, 5).
9340–X	DOT–E 9340	Pioneer Plastics & Services Co., Ltd., Brampton, Ont., Canada.	49 CFR 178.19, 178.253 Part 173, Subpart F.	To authorize a 540 gallon capacity polyethylene portable tank for shipment of certain corrosive liquids (modes 1, 2).
9529–P	DOT–E 9529	Viskase Corporation, Chicago, IL.	49 CFR 173.21	To become a party to Exemption 9529 (modes 1, 3).
9545–X	DOT–E 9545	Medical Diagnostics, Inc., Columbia, MO.	49 CFR 173.118(a)	To authorize rail as an additional mode of transportation (modes 1, 2).

NEW EXEMPTIONS

Application number	Exemption number	Applicant	Regulation(s) affected	Nature of exemption thereof
9414–N	DOT–E 9414	Union Carbide Corporation, Danbury, CT.	49 CFR 173.302(a)(5)	To authorize transport of tetrafluoromethane in DOT Specification 3AL aluminum cylinders (modes 1, 3).
9513–N	DOT–E 9513	American Cyanamid Company, Wayne, NJ.	49 CFR 173.343, 173.377.	To authorize transport of an organic phosphate formulation in a bulk motor vehicle (mode 1).
9518–N	DOT–E 9518	Hawthorne Aviation Inc., Hawthorne, NV.	49 CFR 172.101, 172.204(c)(3), 173.27, 175.30(a)(1), 175.320(b), PART 107, APPENDIX B.	To authorize carriage of various Class A, B and C explosives not permitted for air shipment or in quantities greater than those prescribed for air shipment (mode 4).
9520–N	DOT–E 9520	Atlantic Richfield Company, Pasadena, CA.	49 CFR 173.315(h), 173.315(i), 173.32(n) 178.245–1, 178.245–4, 178.245–5.	To authorize a one time shipment of a nonflammable gas in thirty (30), non-DOT specification ASME Code "U" stamped portable tanks (modes 1, 3).

NEW EXEMPTIONS—Continued

EMERGENCY EXEMPTIONS

Application number	Exemption number	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 9574–N	DOT–E 9574	Chugach Electric Association, Inc., Anchorage, AK.	49 CFR 172.101 column 6, 173.315, 175.30.	To authorize use of non-DOT specification ASME Code "U" Stamped portable tank containing 4,000 pounds of carbon dioxide (mode 4).
EE 9575–N	DOT–E 9575	Schlumberger Well Services, Rosharon, TX.	49 CFR 172.101 column 6(b), 175.30, 175.320(b).	To authorize transport of shaped charges, commercial, and detonating cord, aboard cargo aircraft (mode 4).

WITHDRAWALS

Application number	Applicant	Regulation(s) Affected	Nature of exemption thereof
8522–P	Ashland Oil, Inc., Dublin, OH	49 CFR 177.839(a), 177.839(b), 178.150, Part 173 Subpart F	To become a party to Exemption 8522. (modes 1, 2, 3).

Denials

9444–N—Request by Champion Chemicals, Inc., Houston, TX to authorize reuse, without subjecting drums to the cleaning and rinsing steps of the reconditioning process of DOT Specification, Series 17 steel drums, for shipment of certain solvent-based intermediate materials, classed as flammable liquids denied February 5, 1986.

9482–N—Request by Dow Corning Corporation, Midland, MI to authorize transport of fammable liquids which are also corrosive materials in DOT specification 51 portable tanks denied February 18, 1986.

9556–N—Request by American Fireworks Company, Hudson, OH to authorize highway transport of limited quantities of certain special fireworks (Class B exposives) as fammable solid denied February 11, 1986.

Issued in Washington, DC, on March 13, 1986

BILLING CODE 4910-60-M

Urban Mass Transportation Administration

Grants and Cooperative Agreements; Elderly, Handicapped and Rural Programs in Insular Areas

AGENCY: Urban Mass Transportation Administration, DOT.

ACTION: Notice of policy.

SUMMARY: In response to a request from the Guam Mass Transit Authority (GMTA), the Urban Mass Transportation Administration (UMTA) announces its policy to provide for the consolidation of section 16(b)(2) and section 18 grants to the Insular Areas, as provided for in 48 U.S.C. 1469a. Public comment is invited. Consolidated of these grant programs is intended to minimize application and reporting requirements.

48 U.S.C. 1469a permits Federal agencies to streamline and consolidate certain grant-in-aid programs, such as the section 16(b)(2) elderly and handicapped program and the section 18 rural program, available to the Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands. These areas are referred to collectively as the U.S. Insular Areas. Specifically, 48 U.S.C. 1469a permits:

(a) Agencies to consolidate any or all grants to each of these Insular Areas and to waive requirements for matching funds, applications, and reports with respect to the consolidated grants, and

(b) Each Insular Area to use the consolidated grant funds for any purpose or program authorized for any of the consolidated grants.

In light of this provision UMTA will permit Guam and other interested Insular Areas to consolidate section 18 and section 16(b)(2) grants.

Consolidation of these UMTA grant programs and application requirements should improve the efficiency of grant-making procedures. This is especially important for the Insular Areas since they have small staff resources which have been strained to fulfill the existing application and reporting requirements of the affected programs, and since the amount of funding under the affected programs is not large.

In addition, 48 U.S.C. 1469a(d) allows an agency to waive any local matching share requirements of less than $200,000 for grants to Insular Areas.

Insular Areas interested in submitting applications for consolidated grants and/or local share waivers should notify the appropriate UMTA Regional Office for application procedures and

VOL
51

54
MR
20
1986
UMI

consolidation requirements. Among other things, the Area should identify the intended use of consolidated funds and should show that the transportation of the elderly and handicapped will not be adversely affected. Applications should be submitted in accordance with section 18 and section 16(b)(2 circulars as determined by UMTA.

DATE: This policy is effective immediately. However, UMTA is interested in receiving comments on this policy. Comments must be received within 60 days of this publication.

ADDRESS: Comments on this policy should be submitted to the UMTA Docket Number 85–A, Urban Mass Transportation Administration, Room 9228, 400 Seventh Street, SW., Washington, DC 20590. All written communications received on or before this comment period will be considered in determining whether adjustments to this policy may be warranted.

All comments and suggestions made will be available for examination at the above address between 8:30 a.m. and 5:00 p.m., Monday through Friday. Receipt of comments will be acknowledged by UMTA, if a self-addressed stamped postcard is included with each amount.

FOR FURTHER INFORMATION CONTACT: Daniel Duff, Assistant Chief Counsel for Legislation and Regulation, Office of the Chief Counsel, Room 9228, Telephone (202) 426–4011, UMTA, 400 Seventh Street, SW., Washington, DC 20590.

Issued on: March 17, 1986.

Ralph L. Stanley,

Administrator.

Sunshine Act Meetings

Federal Register
Vol. 51, No. 54
Thursday, March 20, 1986

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONTENTS

Item
Federal Deposit Insurance Corporation 1–4
Federal Home Loan Bank Board 5
Federal Reserve System 6
Postal Service 7

1

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 11:53 a.m. on Friday, March 14, 1986, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider a recommendation regarding the liquidation of an asset acquired by the Corporation from The Bowery Savings Bank, New York City (Manhattan), New York (Case No. 46,456).

In calling the meeting, the Board determined, on motion of Director Irvine H. Sprague (Appointive), seconded by Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required its consideration of the matter on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matter in a meeting open to public observation; and that the matter could be considered in a closed meeting pursuant to subsections (c)(4), (c)(6), (c)(9)(B), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(9)(B), and (c)(10)).

Dated: March 17, 1986.

Federal Deposit Insurance Corporation.

Margaret M. Olsen,

Deputy Executive Secretary.

2

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 4:40 p.m. on Friday, March 14, 1986, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to adopt: (1) A resolution (a) making funds available for the payment of insured deposits in Farmers and Merchants State Bank of Lamberton, Lamberton, Minnesota, which had been closed by the Deputy Commissioner of Commerce for the State of Minnesota on Friday, March 14, 1986, (b) accepting the bid of American Bank Mankato, Mankato, Minnesota, an insured State nonmember bank, for the transfer of the insured and fully secured or preferred deposits of the closed bank, and (c) designating American Bank Mankato, Mankato, Minnesota, as the agent for the Corporation for the payment of insured and fully secured or preferred deposits of the closed bank; and (2) an Order approving the application of American Bank Mankato, Mankato, Minnesota, for consent to purchase certain assets of and to assume the liability to pay certain deposits made in Farmers and Merchants State Bank of Lamberton, Lamberton, Minnesota, and for consent to establish the sole office of Farmers and Merchants State Bank of Lamberton as a branch of American Bank Mankato.

In calling the meeting, the Board determined, on motion of Chairman L. William Seidman, seconded by Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: March 17, 1986.

3

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Monday, March 24, 1986, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Application for consent to merge and establish one branch:

The German American Bank, Jasper, Indiana, an insured State nonmember bank, for consent to merge, under its charter and title, with Bank of Ireland, Ireland, Indiana, and for consent to establish the sole office of Bank of Ireland as a branch of the resultant bank.

Application for consent to purchase assets and assume liabilities:

First National Bank of Versailles, Versailles, Kentucky, for consent to purchase certain assets of and assume the liability to pay deposits made in the Versailles Branch of Future Federal Savings Bank, Louisville, Kentucky, a non-FDIC-insured institution.

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 46,452–L (Amendment)
  First National Bank, Snyder, Texas
Case No. 46,453–SR (Amendment)
  State Bank of Alexandria, Alexandria, Nebraska
Case No. 46,459
  The New Boston Bank and Trust Company, Boston Massachusetts
Case No. 46,460
  Mutual Savings Banks, New York Region Consolidation

Memorandum and resolution re: Delegations of authority to the Director, Division of Bank Supervision, to grant written approval for repayment of net worth certificates.

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation

UMI

pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications, requests, or actions involving administrative enforcement proceedings approved by the Director or an Associate Director of the Division of Bank Supervision and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Discussion Agenda:

Memorandum and resolution re: Final amendments to Parts 303 and 309 of the Corporation's rules and regulations, entitled "Applications, Requests, Submittals, Delegations of Authority, and Notices of Acquisition of Control," and "Disclosure of Information," respectively, which (1) require persons who have filed notices with the Corporation under the Change in Bank Control Act of 1978 ("CBCA") (12 U.S.C. 1817(j)), to publish an announcement of the notice's acceptance in a newspaper; and (2) make certain information regarding CBCA notices accepted by the Corporation available to the public upon request.

Memorandum and resolution re: Final amendments to Part 329 of the Corporation's rules and regulations, entitled "Interest on Deposits," which amendments define the category of demand deposit and prohibit payment of interest on demand deposits.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898-3813.

Dated: March 17, 1986.

Federal Deposit Insurance Corporation.

4

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Monday, March 24, 1986, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b(c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meetings.

Discussion Agenda:

Recommendations regarding the Corporation's assistance agreement with an insured bank pursuant to section 13 of the Federal Deposit Insurance Act.

Report of the Director, Division of Accounting and Corporate Services:

Memorandum re: Investment Management Report, December 31, 1985

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898-3813.

Dated: March 17, 1986.

Federal Deposit Insurance Corporation.

Margaret M. Olsen,

Deputy Executive Secretary.

BILLING CODE 6720-01-M

6

FEDERAL RESERVE SYSTEM

TIME AND DATE: 10:00 a.m., Wednesday, March 26, 1986.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Consideration of office space needs of the Federal Reserve Board. (This item was originally announced for a closed meeting on March 17, 1986.)
2. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
3. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: March 18, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

7

POSTAL SERVICE

By telephone vote on March 14 and 17, 1986, a majority of the members contacted and voting, the Board voted to add to the agenda for the closed session on Monday, April 7, 1986, the following item:

Consideration of proposed temporary third-class domestic mail classification schedule changes—sacking requirements.

The Board determined that pursuant to section 552b(c)(3) of title 5, United States Code, and §7.3(c) of title 39, Code of Federal Regulations, discussion of the matter is exempt from the open meeting

requirement of the Government in the Sunshine Act [5 U.S.C. 552b(b)] because it is likely to disclose information in connection with proceedings under chapter 36 of title 39 (having to do with postal ratemaking, classification, and changes in postal services), which is specifically exempted from disclosure by section 410(c)(4) of title 39, United States Code. The Board also determined that pursuant to section 552b(c)(10) of title 39, United States Code, and §7.3(j) of title 39 Code of Federal Regulations, the discussion is exempt because it is likely to specifically concern the Postal Service in a civil action or proceeding or the litigation of a particular case involving a determination on the record after opportunity for a hearing.

In accordance with section 552b(f)(1) of title 5, United States Code, and §7.6(a) of title 39, Code of Federal Regulations, the General Counsel of the United States Postal Service has certified that in his opinion the meeting may properly be closed to public observation pursuant to section 552b(c)(3) and (10) of title 5, United States Code, and §7.3 (c) and (j) of title 39, Code of Federal Regulations.

Requests for information about the meeting should be addressed to the Secretary of the Board, David F. Harris, at (202) 268-4800.

David F. Harris,

Secretary.

DEPARTMENT OF TRANSPORTATION

Revised Fiscal Year 1986 UMTA Formula Grant Apportionments

AGENCY: Urban Mass Transportation Administration (UMTA), DOT.

ACTION: Notice.

SUMMARY: The Surface Transportation Assistance Act of 1982 (Pub. L. 97–424) established a formula grant program for Fiscal Years 1984, 1985, and 1986 under section 9 and section 18 of the Urban Mass Transportation Act of 1964, as amended (the UMT Act). A notice published in the **Federal Register** on January 24, 1986 (51 FR 3310), provided the Fiscal Year 1986 apportionment of funds to each urbanized area over 200,000 in population, and to State Governors for both urbanized areas under 200,000 in population and nonurbanized areas. However, in light of the then pending reductions required by Gramm-Rudman-Hollings legislation, that Notice stated that only 50% of the apportionment would be available until further notice. Since the required reductions have now been determined, this Notice provides the revised apportionments. In addition, this Notice also includes revised apportionments for the section 16(b)(2) elderly and handicapped program.

FOR FURTHER INFORMATION CONTACT: Edward R. Fleischman, Chief, Resource Management Division, (202) 426–2053, 400 Seventh Street, SW., Washington, DC, 20590.

SUPPLEMENTARY INFORMATION: A program of Federal assistance to urban mass transportation systems by means of formula grants for capital and operating assistance was enacted January 6, 1983, under the Surface Transportation Assistance Act of 1982 (Pub. L. 97–424). The legislation is authorized for Fiscal Years 1984, 1985, and 1986. Funds for Fiscal Year 1986 were appropriated by the Department of Transportation and Related Agencies Appropriations Act, 1986, Pub. L. 99–190 (the Fiscal Year 1986 Appropriations Act).

Section 9 and 18 Programs

A Notice published in the **Federal Register** on January 24, 1986 (51 FR 3310), provided the Fiscal Year 1986 apportionment of section 9 and section 18 funds for urbanized and nonurbanized areas, based on census information and operating and financial data submitted for the 1984 section 15 Annual Report. However, the Balanced Budget and Emergency Deficit Control Act of 1985 (Gramm-Rudman-Hollings), Pub. L. 99–177, required reductions to be made in Fiscal Year 1986 funding availability to meet deficit reduction targets. These reductions for UMTA total 4.3 percent of Fiscal Year 1986 appropriated funds (in the case of the Formula program, a $92,450,000 reduction from $2,150,000,000).

Therefore, this Notice provides revised apportionment tables which reflect these required reductions. Since the section 9 apportionment tables include adjustments to correct previous data errors and, in addition, contain the apportionment of prior year unobligated section 5 funds, the actual figures shown do not only represent the 4.3 percent reduction.

Section 16(b) (2) Program

Governors were notified in a February 7, 1986, letter from the UMTA Administrator of the Fiscal Year 1986 apportionment under the section 16(b)(2) elderly and handicapped program. This Notice includes revised apportionments of those amounts based upon the Gramm-Rudman-Hollings reductions of 4.3 percent of Fiscal Year 1986 appropriated funds ($1,312,000 reduction from $30,500,000).

The revised section 16(b)(2) apportionments also do not reflect only the 4.3 percent reduction since the apportionment includes an amount of prior year redistributed funds, and since the section 16(b)(2) administrative formula provides a basic floor level of funding for each State. Also, some States received additional funding in Fiscal Year 1984 and 1985 in order to hold them harmless to Fiscal Year 1983 funding levels during the transition to the new section 16(b)(2) formula based on the 1980 census data. That transition is completed and States are no longer being held harmless to Fiscal Year 1983 levels.

Application Procedures

Applications for Section 9 funds should be submitted to the appropriate UMTA Regional Office in conference with UMTA Circular 9030.1, published June 27, 1983. Applications for section 18 funds should be submitted to the appropriate UMTA Regional Office in conformance with UMTA Circular 9040.1, published May 23, 1985. Applications for section 16(b)(2) funds should be submitted to the appropriate UMTA Regional Office in conformance with UMTA Circular 9070.1A, published May 14, 1985.

Issued on: March 14, 1986.

Ralph L. Stanley,

Administrator.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1435

Protection of Sugar Producers

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule sets forth provisions which are designed to protect sugar producers as mandated by section 401(e)(2) of the Agricultural Act of 1949, as amended by the Food Security Act of 1985. Under the rule, the Commodity Credit Corporation (CCC) will pay sugar producers the maximum benefits from the sugar price support program, less benefits previously received by the producers, in the event of the insolvency of the processor with whom they have entered into a contract for the processing of sugar beets or sugarcane. Interested persons are invited to submit written comments on the proposed rule.

DATES: Comments must be received on or before April 10, 1986 in order to be assured of consideration.

ADDRESS: Send comments to Director, Cotton, Grain, and Rice Price Support Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, P.O. Box 2415, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: Ross ballard, Program Specialist, Cotton, grain, and Rice Price Support Division, Agricultural Stabilization and Conservation service, U.S. Department of Agriculture, P.O. Box 2415, Washington, DC 20013. Phone: (202) 447-4704.

SUPPLEMENTARY INFORMATION: The Information collection requirements proposed by this rule will not become effective until they have been approved by the Office of Management and Budget (OMB) in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507). Such approval has been requested and is under consideration. Comments concerning the information collection requirements contained in this rule may be addressed to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer, ASCS/USDA, Washington, DC 20503, Telephone (202) 395-7340.

This proposed rule has been reviewed under USDA procedures established in accordance with the provisions of Departmental Regulations 1512-1 and Executive Order 12291 and has been classified "not major." The provisions of this rule will not result in: (1) An annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In has been determined that the Regulatory Flexibility Act is not applicable to this rule since CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this proposed rule.

The title and number of the Federal Assistance Program to which this proposed rule applies are: Title—Commodity Loans and Purchases; Number—10.051, as found in the Catalog of Federal Domestic Assistance.

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment. Therefore, neither an environmental assessment nor an Environmental Impact Statement is needed.

This activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

Statutory Authority

This activity is required pursuant to section 401(e) of the Agricultural Act of 1949, as amended by the Food Security Act of 1985.

Section 401(e)(2) of the 1949 Act provides that if bankruptcy or other insolvency of a sugar processor caused producers of sugar beets and sugarcane not to receive maximum benefits from the sugar price support program within 30 days after the final settlement date provided for in the contract between such producers and processor, the Secretary of Agriculture, through CCC, on demand of the producers and on such assurances as to nonpayment as the Secretary may require, shall pay such producers the maximum benefits from the price support program, minus any benefits previously received by the producers. Section 401(e)(2) of the 1949 Act creates an obligation under which the Secretary is required to pay producers amounts which, previously, the producers could legally only recover from the bankrupt or insolvent sugar company through bankruptcy or insolvency proceedings.

The payments which are made available to producers in accordance with the terms and conditions of this regulations are subject to reduction to the extent required by the Balanced Budget and Emergency Deficit Control Act of 1985, Title II of Pub. L 99-177 (popularly known as the "Gramm-Rudman-Hollings Act").

Need for Immediate Action

Some producers of 1984 crop sugar beets that were delivered to a processor participating in the 1984 sugar program will not receive the maximum benefit of the price support program as a result of the bankruptcy or other insolvency of the processor. These producers are eligible to apply for payment because the final settelement date provided for in their contract with the sugar processor was after January 1, 1985. Therefore, the comment period with respect to this proposed rule is limited to 21 days. Comments are requested and should be submitted on or before April 10, 1986 in order to be assured of consideration.

Major Program Provisions

Producer Eligibility

Only those producers whose contracts with their processors had a final settlement date after January 1, 1985 and who have not received the maximum price support benefits due to the bankruptcy or other insolvency of a processor who was a participant in the sugar price support program would be eligible for payment. Producers of sugar beets and sugarcane that contracted with processors not participating in the sugar price support program would not be eligible for payment under this subpart.

Subrogation

In order to be eligible to receive a payment from CCC under this subpart a producer must subrogate to CCC all claims against the processor and other persons responsible for nonpayment. CCC would then have the authority to pursue such claims against the processor and other persons responsible for nonpayment to recover any benefits not paid to the producers in accordance with the terms and conditions of the sugar price support program.

Administration

A producer who has not received at least the price support level applicable to that producer's crop of sugar beets or sugarcane from a processor participating in the price support program may apply at the producer's local county Agricultural Stabilization and

Conservation Service (ASCS) office for payments made available under this subpart. The application must be submitted no earlier than 30 days after, and no later than 60 days after, the final settlement date provided for in the contract between the producer and the processor. A request for payment must be made by producers or their designated agent on a form prepared by CCC. Commodity Credit Corporation expects that this form will include (1) a certification as to the quality and quantity of the sugar beets or sugarcane that the producer delivered to the processor, (2) a certification concerning liens or other encumbrances with respect to such sugar beets or sugarcane, and (3) an agreement by the producer regarding subrogation. CCC also expects that county offices will verify some of the information obtained from producers and identify possible claims due to CCC, and this material will be forwarded to a central location which will (1) perform necessary compliance checks and (2) disburse payments. In the case of eligible producers of 1984 crop sugar beets, the final date for producers to apply for payment will be 30 days following the effective date of the final rule. Producers must provide information required by CCC to assure eligibility.

List of Subjects in 7 CFR Part 1435

Agriculture, Loan programs, Payments, Price support programs, Sugar.

Proposed Rule

PART 1435—[AMENDED]

Accordingly, it is proposed that a new subpart be added to 7 CFR Part 1435 as follows:

A new subpart consisting of §§ 1435.200 through 1435.206 is added to read as follows:

Subpart—Regulations Governing the Protection of Sugar Producers

Sec.	
1435.200	General statement.
1435.201	Definitions.
1435.202	Producer eligibility.
1435.203	Benefit payment to producers.
1435.204	Liens.
1435.205	Subrogation of claims.
1435.206	OMB control number assigned pursuant to Paperwork Reduction Act.

Subpart—Regulations Governing the Production of Sugar Producers

Authority: Sec. 401(e)(2), Agricultural Act of 1949 (7 U.S.C. 1421(e)(2)); 5 U.S.C. 301.

§ 1435.200 General statement.

If the bankruptcy or other insolvency of a processor has caused producers of sugar beets or sugarcane not to receive maximum benefits from the price support program for sugar beets or sugarcane within 30 days after the final settlement date provided for in the contract between such producers and processor, CCC, on demand of the producers and on such assurances as to nonpayment as CCC may require, shall pay such producers benefit payments.

§ 1435.201 Definitions.

The following definitions apply to terms used in this subpart:

"ASCS" means the Agricultural Stabilization and Conservation Service, United States Department of Agriculture.

"Benefit payment(s)" means an amount to be paid to eligible producers equal to the difference between the specified price support level for the applicable crop of sugar beets or sugarcane, after all applicable adjustments, and any benefits previously received by the producers with respect to such crop of sugar beets and sugarcane.

"CCC" means the Commodity Credit Corporation, United States Department of Agriculture.

§ 1435.202 Producer eligibility.

(a) A producer of sugar beets or sugarcane shall be considered to be eligible for benefit payments only: (1) For that quantity of domestically-produced sugar beets or sugarcane sold under contract to a processor who was a participant in the price support program for sugarcane or sugar beets for the applicable corp; (2) if the contract with the processor provided for a final settlement date after January 1, 1985; (3) if the processor failed to make payment on the final settlement date due to bankruptcy or other insolvency; and (4) if the producer was an eligible producer for purposes of the price support program for the applicable crop of sugar beets or sugarcane.

(c) CCC may require as a condition of payment such documentation or other proof of the producer's eligibility, the processor's nonpayment, or other element of the benefit payment as CCC determines appropriate.

§ 1435.203 Benefit payment to producers.

(a) *Where to request benefit payments.* A producer must request a benefit payment from CCC at the producer's local county ASCS office, in a manner and on a form prescribed by CCC.

(b) *Availability dates.* A producer must request a benefit payment no earlier than 30 days, and no later than 60 days, after the final settlement date provided for in the contract between the producer and the processor, unless otherwise approved by CCC. In the case of eligible producers of 1984 crop sugar beets, the final date for producers to demand a benefit payment shall be 30 days following the effective date of this regulation, unless otherwise approved by CCC.

(c) *Method of payment.* Benefit payments will be made by checks drawn on CCC, by credit to the producer's account, or by such other means as CCC determines appropriate.

§ 1435.204 Liens.

(a) In order to receive a benefit payment, a producer must certify to CCC whether there were any liens or encumbrances on the sugar beets or sugarcane that that producer sold to the applicable processor under the applicable contract as of the time of delivery of the sugar beets or sugarcane to the processor, or as of the time title to the sugar beets or sugarcane transferred from the producer if title transferred at a time other than at the time of delivery to the processor. If there were any such liens or encumbrances, the producer must provide CCC with a certified list of all such liens or encumbrances together with the names and addresses of the holders of such liens or encumbrances and the amount held by each such holder.

(b) Commodity Credit Corporation will make all benefit payments jointly to the producer and the holders of such liens or encumbrances unless the producer provides CCC with a waiver of all such liens or encumbrances by each such holder or a certified statement by such holder that the liens or encumbrances have been extinguished. Commodity Credit Corporation may prescribe the form for such waivers or statements.

§ 1435.205 Subrogation of claims.

(a) A producer must execute an agreement with CCC, acceptable to CCC, subrogating to CCC all claims of that producer against the processor and other persons responsible for nonpayment. Any recoveries by that producer from any source whatsoever for the processor's nonpayment must be immediately forwarded to CCC. The producer shall cooperate with CCC in CCC's efforts to collect on the claims subrogated to CCC.

(b) A producer shall maintain the books and records pertaining to the benefit payments and the applicable contracts with the processor for a period of at least 3 years following the producer's demand for payment under

VOL
51
ISS
54
MR
20
1986
UMI

this subpart. Authorized officials of the United States Department of Agriculture shall have access to, and right to examine, any pertinent books, documents, papers and records of the producer.

§ 1435.206 OMB control number assigned pursuant to Paperwork Reduction Act.

The information collection requirements contained in these regulations (7 CFR 1435.200 through 1435.206) have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Control Number 0560–0095.

Signed at Washington DC, on March 17, 1986.

Milton J. Hertz,

Acting Executive Vice President, CCC.

Order Now!

The United States Government Manual 1985/86

As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to see about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and subject/agency indexes.

Of significant historical interest is Appendix A, which describes the agencies and functions of the Federal Government abolished, transferred, or changed in name subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

DENVER, CO

WHEN: March 24; at 9 am.

WHERE: Room 239,
Federal Building,
1961 Stout Street, Denver, CO.

RESERVATIONS: Elizabeth Stout,
Denver Federal Information Center,
303-236-7181,

Rules and Regulations

Federal Register
Vol. 51, No. 55
Friday, March 21, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 981

Handling of Almonds Grown in California; Administrative Rules and Regulations Governing Reporting Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action makes a correction in the administrative rules and regulations issued under the Federal marketing order for California almonds. A final rule published in the Federal Register on April 13, 1977 (42 FR 19321) established a paragraph concerning reserve reporting as § 981.474(c). However, that paragraph was never published in the Code of Federal Regulations. On November 20, 1985, a paragraph concerning custom processing reporting was published as § 981.474(c) by a final rule published in the Federal Register (50 FR 47707). This action corrects this error of designating two separate paragraphs as § 981.474(c) by redesignating the paragraph concerning reserve reporting as § 981.474(d) and allowing the paragraph concerning custom processing reporting to remain § 981.474(c).

FOR FURTHER INFORMATION CONTACT: James B. Wendland, Acting Chief, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, Washington, DC 20250 (202) 447-5053.

SUPPLEMENTARY INFORMATION: This action corrects § 981.474 of Subpart—Administrative Rules and Regulations (7 CFR 981.401–981.474; 50 FR 16451, 24174, 30263, and 47707) by redesignating a paragraph which was inadvertently omitted from the Code of Federal Regulations. This subpart is issued under the marketing agreement and Order No. 981 (7 CFR 981), both as amended, regulating the handling of almonds grown in California. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The redesignated paragraph concerns reporting requirements for handlers diverting reserve almonds to noncompetitive outlets. The paragraph was originally published in the Federal Register on April 13, 1977 (42 FR 19321) as § 981.474(c). However, the paragraph was inadvertently omitted from the Code of Federal Regulations. This omission has had no adverse effect on handler compliance with the provision's reporting requirements as all affected persons were aware of the regulation.

A regulation involving custom processing reporting was inadvertently published as § 981.474(c) by a final rule published in the Federal Register on November 20, 1985 (50 FR 47707). This action corrects this error of designating two separate paragraphs as § 981.474(c) by redesignating the paragraph concerning reserve reporting as § 981.474(d) and allowing the paragraph concerning custom processing to remain § 981.474(c).

List of Subjects in 7 CFR Part 981

Marketing agreements and order, Almonds, California.

PART 981—ALMONDS GROWN IN CALIFORNIA

1. The authority citation for 7 CFR Part 981 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as Amended; 7 U.S.C. 601–674.

Subpart—Administrative Rules and Regulations

2. Section 981.474 is amended by adding a new paragraph (d) as follows:

§ 981.474 Other reports.

* * * * *

(d) *Reserve reports.* In any crop year when reserve almonds are diverted to noncompetitive outlets, such handler shall report such handler's intentions to divert on ABC Form 13 and the completion of diversion on ABC Form 14. Upon notice to all handlers, the Board may waive the requirements to file ABC Form 13 for diversion of almonds to noncompetitive outlets which are acceptable to the Board.

Dated: March 14, 1986.

Thomas R. Clark,

Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-M

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 40, 51, 74 and 150

Material Balance Reports of Source Material and Special Nuclear Material

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission is amending its regulations concerning the submission of material balance inventory reports of source material and special nuclear material. The rule will reduce the reporting requirements imposed on affected licensees without adversely affecting the domestic safeguards program or NRC's ability to satisfy existing international and domestic safeguards commitments. This action eliminates the requirement to submit a statement of material balance for U.S. origin source material for all licensees except those reporting under the U.S./IAEA Safeguards Agreement. It also eliminates the requirement to report the composition of ending inventory on Form 742C for all except nuclear reactor licensees and licensees reporting under the Agreement.

EFFECTIVE DATE: April 21, 1986.

FOR FURTHER INFORMATION CONTACT: June Robertson, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone: (301) 427-4233.

SUPPLEMENTARY INFORMATION:

Background

Currently, NRC licensees authorized to possess more than 350 grams of special nuclear material are required to submit an inventory report for each material type on Forms 742 and 742C as of March 31 and September 30 each

VOL 51
ISS 55
MR 21
1986
UMI

year. Also, NRC and Agreement State licensees authorized to possess more than 1,000 kilograms of source material are required to submit a yearly statement of their source material holdings as of September 30 each year. This information is necessary to the domestic inspection program and is needed to provide to the Australian and Canadian Governments a periodic report showing the inventory of all the materials in each U.S. facility that is subject to their respective bilateral agreements. As a part of a reevaluation of the safeguards data collection and processing requirements, the NRC examined the possibility of eliminating the requirements for licensees to report inventories on Forms 742 (Material Balance Report) and 742C (Physical Inventory Listing) for most licensees. It concluded that, with the exception of those licensees reporting under the U.S./IAEA Safeguards Agreement, the requirements for reporting inventories on Material Balance Reports could be deleted. It also concluded, however, that it needed a composition of ending inventory to be submitted on Form 742C by licensees of nuclear reactors for meeting its domestic responsibilities. Therefore, it decided to retain the requirements for submitting Form 742C for nuclear reactor licensees and licensees reporting under the U.S./IAEA Safeguards Agreement.

Proposed Rule

For licensees other than those reporting under the U.S./IAEA Safeguards Agreement, the proposed rule (50 FR 19695, May 10, 1985) would have eliminated the requirement to submit Form 742. For all licensees other than those with nuclear reactors and those reporting under the U.S./IAEA Safeguards Agreement, the proposed rule woud have eliminated the requirement to submit Form 742C. Instead, the NRC would have computer-generated for each licensee, an inventory report based on material transaction reports submitted to it on Form 741 for special nuclear material and foreign origin source material. (In a separate rulemaking action effective July 16, 1984 (49 FR 24705, June 15, 1984), the requirement to report domestic transfers of U.S. origin source material was deleted. Only imports, exports, and domestic transfers of foreign origin source material are currently reported to the transaction data base.) This NRC-generated report would have been submitted to the licensee for review and verification with the licensee's book inventory data or with the results of a physical inventory by the licensee, as the case may be. The licensee would then have submitted any supplemental data necessary to reconcile any difference between the NRC's data and its data.

The proposed amendment would have affected approximately 350 NRC and Agreement State licensees of which approximately 150 are small independent industrial manufacturers each with an estimated annual gross income of less than $1 million and a staff of fewer than 500 people. The NRC concluded that, as a result of this change, the reporting requirements for each affected special nuclear material licensee would have been reduced by two reports per year and the reporting requirements for each affected source material licensee would have been reduced by one statement per year. The process of the licensee verification of the computer-generated report would have affected partially the reduction in licensee reporting, but the net requirements on licensees was thought to be less than those of generating and submitting the currently required reports.

When 10 CFR Part 74 was published on February 25, 1985 (50 FR 7575), it contained the MC&A regulatory requirements for low enrichment uranium (LEU) licensees. Certain safeguards-related recordkeeping and reporting requirements, formerly found in Part 70, were also moved to new Part 74 in order to separate them from safety reporting requirements. The reporting requirement for SNM physical inventory results is therefore included in Part 74.

On March 12, 1984 (49 FR 9362), the NRC published a final rule which implemented section 102(2) of the National Environmental Policy Act of 1969 as amended (NEPA). Section 51.22 identifies the type of regulatory and licensing actions which may be eligible for categorical exclusion. The categorical exclusion in 10 CFR 51.22(c)(3) which applies to amendments to the Commission's regulations which relate to recordkeeping and reporting requirements includes Part 70 but does not include Part 74. When Part 74 was promulgated in February 1985, portions of the existing recordkeeping requirements in Part 70 and all of the reporting requirements in Part 70, both of which were specifically covered by the environmental impact categorical exclusion in § 51.22(c)(3), were transferred to Part 74. At that time, however, the requisite conforming amendment to add Part 74 to the list of parts identified in § 51.22(c)(3) was not made. To remedy this inadvertent oversight, a conforming amendment is now being made to 10 CFR 51.22(c)(3) to add Part 74 to the list of parts referenced in that categorical exclusion.

Summary of Public Comments

The sixty-day comment period for the proposed rule expired on July 9, 1985. The NRC received comments from twelve respondents. The comments were mixed as to whether or not an actual reduction in reporting requirements would be achieved.

Proposed § 40.64

There were no public comments received which specifically addressed this proposed section. However, the NRC determined to revise this section (which deals with reports on material balances of source material) so that it is compatible with its revisions to proposed § 74.13 (discussed below) on material balance statements of special nuclear material. The NRC has revised existing § 40.64 by explicitly eliminating the requirement for reporting material balances of source material by licensees who possess only domestic origin source material. This fulfills the intent, implicit in the proposed procedure for an NRC-generated report to not require this information.

Proposed § 70.53

As a consequence of the promulgation of 10 CFR Part 74 on March 27, 1985 (50 FR 7575), reporting requirements of Part 70 are now contained in Part 74. All changes proposed to § 70.53 are therefore contained in § 74.13 as described below.

Revised § 74.13

Four commenters, all power reactor licensees, opposed the proposed revision. They pointed out that a requirement to verify and update the proposed report generated by NRC was likely to increase rather than decrease a power reactor licensee's reporting effort. It was also pointed out that there was a workload associated with changing the existing licensees' programs and procedures and that the result might be a degradation of the accounting systems. One of the commenters opposing adoption of the proposed amendment to this section also suggested that NRC revise DOE Form RW–859 to allow reporting of current isotopes by assembly. This would allow elimination of Forms 742 and 742C for reactor licensees which report composition of special nuclear material on an assembly basis. Seven commenters, four power reactor licensees, too university reactor licensees and one fuel facility licensee, supported the proposed amendments. Some of these commenters suggested

modifications to the amendments as proposed. (One of these supporting the amendment pointed out that promulgation of new Part 74 now makes it necessary to reflect changes to reporting requirements in Part 74 as well as in Part 70. This suggestion has been adopted.)

After reviewing the comments, NRC has concluded that replacing licensee-generated reports of material balances for both source material and special nuclear material with an NRC-generated report is likely to increase rather than decrease licensees' reporting efforts. Licensees would be obliged to retain most of their current accounting and reporting programs and procedures in addition to verifying and updating data produced outside of that system. For that reason, NRC is abandoning the proposal to generate material balance reports and to require source material and special nuclear material licensees to verify and update them. It will continue to require special nuclear material licensees to submit reports of material balances on Form 742.

By retaining the requirements for licensees to submit Form 742 and by not adopting the proposed amendments, the suggestions by two power reactor licensees and by a fuel facility licensee to extend the period for verifying the NRC-generated report become moot. Similarly, the suggestion by a power reactor licensee to tie the date for submission of Form 742C to that of Form 742 is also moot.

The proposal is being adopted to eliminate the requirement for licensees other than those reporting under the US/IAEA Safeguards Agreement and those with nuclear reactors (power, test, research and others) to report composition of inventory semi-annually on Form 742C.

A number of suggestions unrelated to the proposal to generate an NRC report were not adopted. (1) A suggestion that Form 741 (Material Transaction Report) be revised to simplify its completion by licensees was not adopted because this was outside the scope of the original proposal. (2) Another commenter suggested eliminating the requirement for nuclear reactor licenses to submit material balance information entirely. This suggestion was not adopted because it was determined that use of the Form 742 by nuclear reactor licensees was necessary to ensure the accounting of material by these licensees on a periodic basis. (3) A suggestion to revise DOE Form RW–850 to provide current isotopes on an assembly basis was not adopted. That form is currently undergoing revision by DOE. After completion of that revision, modification to provide NRC reporting requirements may be explored. (4) Another suggestion that licensees of "small" reactors be excused from submitting this report was also not adopted. Low power reactors do not produce substantial changes in the isotopic composition of their fuel over considerable periods of time. Nonetheless, there is no readily distinguishing feature for identifying reactors to be excused from the requirement. This suggestion, however, may become part of another effort to reduce the reporting requirements imposed upon nonpower reactor licensees.

Proposed § 150.17

No comments were received specifically addressing this proposed amendment. This section is being revised to be consistent with § 40.64(b), the other portion of regulations treating source material.

Environmental Impact: Categorical Exclusion

The NRC has determined that the amendments to Parts 40, 51 and 74 in this final regulation are the type of action described in categorical exclusion of 10 CFR 51.22(c)(3) and that the amendment to Part 150 in this final regulation is the type of action described in 10 CFR 51.22(c)(1). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this regulation.

Paperwork Reduction Act Statement

This final rule amends information collection requirements that are subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). This rule had been approved by the Office of Management and Budget. OMB approval Nos. 3150–004, 3150–0020, 3150–0032, 3150–0058, 3150–0123.

Regulatory Analysis

The Commission has prepared a regulatory analysis on this final regulation. The analysis examines the costs and benefits of the alternatives considered by the Commission. The analysis is available for inspection in the NRC Public Document Room, 1717 H Street, NW., Washington, DC. Single copies of the draft analysis may be obtained from June Robertson, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone: (301) 427–4233.

Regulatory Flexibility Certification

In accordance with the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission hereby certifies that this rule will not have a significant economic impact upon a substantial number of small entities due to the fact that all affected licensees will experience a decrease in their reporting requirements.

The final rule reduces the number of specific licensees required to report inventories of nuclear materials under 10 CFR 40.64 and 150.17 from 350 to 250. Currently, approximately 200 of these licensees submit two reports each year to report inventories of special nuclear materials. The remaining 150 licensees submit one report each year to report holdings of source material. The economic impact on all licensees will be reduced because approximately 100 small licensees which currently complete a report(s) will not report inventories at all. Currently, the time needed to complete the report is two hours.

The approximately 100 licensees which need not complete and submit an inventory report are small independent industrial licensees which currently submit one report each year. This is a reduction of (2 hrs×100) 200 hours each year.

The average small independent industrial licensee has an annual gross income of less than $1 million and employs fewer than 500 people. The cost for complying with the reduced requirement does not pose an economic impact. There will be no additional cost for any licensee as a result of these amendments.

Backfit Analysis

On May 10, 1985 (50 FR 19695), the Commission published in the **Federal Register** proposed amendments to the NRC's safeguards data collection and reporting requirements. The proposed amendments would have eliminated the requirement for licensees possessing special nuclear material (SNM) with more than 350 grams of contained uranium-235 to complete and submit semiannual Material Balance Reports, DOE/NRC Form 742. In its stead, NRC proposed to prepare a report of material balance for each licensee based upon information submitted by these licenses on Nuclear Material Transaction Reports, DOE/NRC Form 741. The NRC report was then to be reviewed, corrected, and updated by licensees as necessary. Power reactor licensees would have been subject to these revised procedures. The Commission intended by this change to reduce the reporting burden.

Four power reactor licensees commented that these proposed

VOL 51
ISS 55
MR 21
1986
UMI

amendments were more likely to increase their reporting effort than decrease it. In view of this comment, these proposed rules that would have required changes in the recordkeeping and reporting requirements for power reactor licensees have been deleted from the final rule. Power reactor licensee reporting requirements will remain unchanged. Because there is nothing in the final amendments that requires a change in any component system, or procedure at a nuclear power reactor, the Commission's backfit rule (10 CFR 50.109) is not applicable to this rulemaking proceeding.

List of Subjects

10 CFR Part 40

Governmental contracts, Hazardous materials—transportation, Nuclear materials, Penalty, Reporting and recordkeeping requirements, Source material, Uranium.

10 CFR Part 51

Administrative practice and procedure, Environmental impact statement, Nuclear materials, Nuclear power plants and reactors, Reporting and recordkeeping requirements.

10 CFR Part 74

Accounting, Hazardous materials—transportation, Material control and accounting, Nuclear materials, Packaging and containers, Penalty, Radiation protection, Reporting and recordkeeping requirements, Scientific equipment, Special nuclear material.

10 CFR Part 150

Hazardous materials—transportation, Intergovernmental relations, Nuclear materials, Penalty, Reporting and recordkeeping requirements, Security measures, Source material, Special nuclear material.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 522 and 553, the NRC is adopting the following amendments to 10 CFR Parts 40, 51, 74 and 150.

PART 40—DOMESTIC LICENSING OF SOURCE MATERIAL

1. The authority citation for Part 40 is revised to read as follows:

Authority: Secs. 62, 63, 64, 65, 81, 161, 182, 183, 186, 68 Stat. 932, 933, 935, 948, 953, 954, 955, as amended, secs. 11e(2), 83, 84, Pub. L. 95–604, 92 Stat. 3033, as amended, 3039, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2014(e)(2), 2092, 2093, 2094, 2095, 2111, 2113, 2114, 2201, 2232, 2233, 2236, 2282); sec. 274, Pub. L. 86–373, 73 Stat. 688 (42 U.S.C. 2021); secs. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846); sec. 275, 92 Stat. 3021, as amended by Pub. L. 97–415, 96 Stat. 2067 (42 U.S.C. 2022).

Section 40.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 40.31(g) also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Section 40.46 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 40.71 also issued under sec. 187, 68 Stat. 955 (42 U.S.C. 2237).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 40.3, 40.25(d)(1)–(3), 40.35(a)–(d), 40.41 (b) and (c), 40.46, 40.51 (a) and (c), and 40.63 are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); and §§ 40.25 (c), (d) (3), and (4), 40.26(c)(2), 40.35(e), 40.42, 40.61, 40.62, 40.64 and 40.65 are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

2. In § 40.64, paragraph (b) is revised to read as follows:

§ 40.64 Reports.

* * * * *

(b) Except as specified in paragraphs (d) and (e) of this section, each licensee authorized to possess at any one time and location more than 1,000 kilograms of uranium or thorium, or any combination of uranium or thorium, shall submit to the Commission within 30 days after September 30 of each year a statement of its foreign origin source material inventory. This statement must be submitted to the address specified in the reporting instructions (NUREG/BR–0007), and include the Reporting Identification Symbol (RIS) assigned by the Commission to the licensee. Copies of the reporting instructions may be obtained by writing to the U.S. Nuclear Regulatory Commission, Division of Safeguards, Washington, DC 20555.

* * * * *

PART 51—ENVIRONMENTAL PROTECTION REGULATIONS FOR DOMESTIC LICENSING AND RELATED REGULATORY FUNCTIONS

1. The authority citation for Part 51 continues to read as follows:

Authority: Sec. 161, 68 Stat. 948, as amended (42 U.S.C. 2201); secs. 201, as amended, 202, 88 Stat. 1242, as amended, 1244 (42 U.S.C. 5841, 5842).

Subpart A also issued under National Environmental Policy Act of 1969, secs. 102, 104, 105, 83 Stat. 853–854, as amended (42 U.S.C. 4332, 4334, 4335); and Pub. L. 95–604, Title II, 92 Stat. 3033–3041. Section 51.22 also issued under sec. 274, 73 Stat. 688, as amended by 92 Stat. 3036–3038 (42 U.S.C. 2021).

2. In § 51.22, paragraph (c)(3) is revised to read as follows. Paragraph (c) introductory text is shown for the convenience of the reader.

§ 51.22 Criterion for and identification of licensing and regulatory actions eligible for categorical exclusion.

* * * * *

(c) The following categories of actions are categorical exclusions:

* * * * *

(3) Amendments to Parts 20, 30, 31, 32, 33, 34, 35, 40, 50, 51, 60, 61, 70, 71, 72, 73, 74, 81 and 100 of this chapter which relate to (i) procedures for filing and reviewing applications for licenses or construction permits or other forms of permission or for amendments to or renewals of licenses or construction permits or other forms of permission; (ii) recordkeeping requirements; or (iii) reporting requirements; and (iv) actions on petitions for rulemaking relating to these amendments.

* * * * *

PART 74—MATERIAL CONTROL AND ACCOUNTING OF SPECIAL NUCLEAR MATERIAL

3. The authority citation for Part 74 continues to read as follows:

Authority: Secs. 53, 57, 161, 182, 183, 68 Stat. 930, 932, 948, 953, 954, as amended sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2073, 2077, 2201, 2232, 2233, 2282); secs. 202, 206, 88 Stat. 1244, 1246 (42 U.S.C. 5842, 5846).

For the purposes of sec. 223, 63 Stat. 958, as amended (42 U.S.C. 2273); §§ 74.31, 74.81, and 74.82 are issued under secs. 161b and 161i, 68 Stat. 948, 949, as amended (42 U.S.C. 2201(b), 2201(i)); and §§74.11, 74.13, and 74.15 are issued under sec. #161o 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

4. In § 74.13, paragraph (a)(1) is revised to read as follows:

§ 74.13 Material status reports.

(a)(1) Each licensee authorized to possess at any one time and location special nuclear material in a quantity totaling more than 350 grams of contained uranium-235, uranium-233, or plutonium, or any combination thereof, shall complete and submit to the Commission (on DOE/NRC Form 742, Material Balance Report) material balance reports concerning special nuclear material received, produced, possessed, transferred, consumed, disposed of, or lost by it. Each nuclear reactor licensee, as defined in §§ 50.21 and 50.22 of this chapter, also shall prepare (on DOE/NRC Form 742C, Physical Inventory Listing) a statement of the composition of the ending inventory, and submit it to the Commission as an attachment to each material balance report. Each licensee shall compile a report as of March 31 and September 30 of each year and file it within 30 days after the end of the period covered by the report. The

Commission may permit a licensee to submit such reports at other times when good cause is shown. In preparing and submitting the reports described in this paragraph, each licensee shall comply with the printed instructions for completing the particular form.

* * * * *

PART 150—EXEMPTIONS AND CONTINUED REGULATORY AUTHORITY IN AGREEMENT STATES AND IN OFFSHORE WATERS UNDER SECTION 274

6. The authority citation for Part 150 continues to read as follows:

Authority: Section 161, 68 Stat. 948, as amended, sec. 274, 73 Stat. 688 (42 U.S.C. 2201, 2021); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841).

Sections 150.3, 150.15, 150.15a, 150.31, 150.32 also issued under secs. 11e(2), 81, 68 Stat. 923, 935, as amended, secs. 83, 84, 92 Stat. 3033, 3039 (42 U.S.C. 2014e(2), 2111, 2113, 2114). Section 150.14 also issued sec. 53, 68 Stat. 930, as amended (42 U.S.C. 2073). Section 150.17a also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Section 150.30 also issued under sec. 234, 83 Stat. 444 (42 U.S.C. 2282).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 150.20(b)(2)–(4) and 150.21 are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); § 150.14 is issued under sec. 161i, 68 Stat. 949, as amended (42 U.S.C. 2201(i)); and §§ 150.16–150.19 and 150.20(b)(1) are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

7. In § 150.17, paragraph (b) is revised to read as follows:

§ 150.17 Submission to the Commission of source material reports.

* * * * *

(b) Except as specified in paragraph (d) of this section and § 150.17a, each person authorized to possess at any one time and location, under an Agreement State license, more than 1,000 kilograms of uranium or thorium, or any combination of uranium or thorium, shall submit to the Commission within 30 days after September 30 of each year, a statement of the licensee's foreign origin source material inventory. This statement must be submitted to the address specified in the printed instructions (NUREG/BR–0007) and must include the Reporting Identification Symbol (RIS) assigned by the Commission to the licensee. Copies of the reporting instructions may be obtained by writing to U.S. Nuclear Regulatory Commission, Division of Safeguards, Washington, DC 20555.

BILLING CODE 7590-01-M

DEPOSITORY INSTITUTIONS DEREGULATION COMMITTEE

12 CFR Ch. XII

Termination of Functions; Revocation of Regulations

AGENCY: Depository Institutions Deregulation Committee.

ACTION: Final rule, Notice of Termination of Depository Institutions Deregulation Committee, Revocation of Regulations, Delegation of Authority over Records and Residual Matters.

SUMMARY: The Depository Institutions Deregulation Act of 1980 (Title II of Pub. L. 96–221; 12 U.S.C. 3501 et seq.) ("DIDA") mandates that on March 31, 1986, the Depository Institutions Deregulation Committee ("DIDC") be terminated. Pub. L. 96–211, Title II, section 210; 12 U.S.C. 3509. In accordance with that requirement, this document revokes the regulations of the DIDC and removes the regulations of the DIDC from the Code of Federal Regulations since they no longer have any legal existence. All future correspondence concerning the DIDA should be directed to the Assistant Secretary of Treasury (Domestic Finance).

EFFECTIVE DATE: 12:01 A.M., April 1, 1986.

FOR FURTHER INFORMATION CONTACT: John Bowman, Office of the General Counsel, Department of Treasury, Room 2026, Main Treasury Building, Washington, DC 20220 (202) 566–6737.

SUPPLEMENTARY INFORMATION: The DIDC has resolved to delegate to the Assistant Secretary of the Treasury (Domestic Finance) the authority to deal with any residual matters relating to the disposition of records and Freedom of Information Act requests and the permanent responsibility and authority to take all necessary and appropriate actions incidental to the termination of the DIDC's operations. Because the DIDC's regulations have no further legal existence, the DIDC voted to take such actions as are necessary to revoke those regulations and remove them from the Code of Federal Regulations: 12 CFR Parts 1201, 1202, 1203, 1204. These CFR sections deal with rules of organization and procedure for the DIDC, rules regarding availability of DIDC information, rules regarding public observation of the DIDC meetings, and rules regarding interest on deposits. Readers are referred to 31 CFR, Subtitle A, for regulations concerning the Office of the Assistant Secretary of the Treasury (Domestic Finance).

The DIDC has determined that notice and public procedure on this rule are unnecessary, pursuant to 5 U.S.C. 553(b), since there is no authority for the DIDC to exist or exercise any authority after March 31, 1986. The DIDA has terminated the DIDC effective March 31, 1986. Pub. L. 96–221, Title II, section 210; 12 U.S.C. 3509. For these same reasons, the DIDC has determined that a delayed effective date for this rule is unnecessary and contrary to the public interest pursuant to 5 U.S.C. 553(d)(3).

Accordingly, for the reasons set out in the preamble, 12 CFR is amended by removing Parts 1201, 1202, 1203, 1204 and vacating Chapter XII.

List of Subjects in 12 CFR Chapter XII

Banks, Banking, Savings and loan associations.

Authority: Title II of Pub. L. 96–221; 12 U.S.C. 3501 et seq.

Dated: March 18, 1986.

Mark G. Bender,

Executive Secretary of the Depository Institutions Deregulation Committee.

BILLING CODE 4810-25-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 93

Special Air Traffic Rules; High Density Traffic Airports Slot Allocation

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting to withdraw high density traffic airport slots.

SUMMARY: On March 7, 1986, the Department issued a Special Federal Aviation Regulation which announced the date and location of lotteries to reallocate certain air carrier slots at LaGuardia, O'Hare International, and Washington National Airports (51 FR 8632, March 12, 1986). A lottery to allocate five percent of slots at the three airports will be held on March 27, 1986. A lottery will be held on March 26, 1986, to withdraw slots from incumbent air carriers at each airport as necessary to make a total of five percent of slots

VOL
51
ISS
55
MR
21
1986
UMI

available. At the request of affected incumbent carriers, the drawing to determine the order in which carriers will select the slots to be withdrawn has been rescheduled for 1:00 p.m. on March 25. This will provide carriers subject to withdrawal of slots additional time to plan for the actual withdrawal on March 26.

This notice announces a meeting to conduct a drawing to determine the order in which incumbent air carriers at LaGuardia, O'Hare, and Washington National Airports will select slots to be withdrawn. The meeting will be held at FAA Headquarters on March 25, 1986.

DATE: The meeting will be held on Tuesday, March 25, 1986, at 1:00 p.m.

ADDRESS: The meeting will be held at FAA Headquarters, Third Floor Auditorium, 800 Independence Avenue SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: David L. Bennett, Manager, Airspace and Air Traffic Law Branch, AGC–230, Telephone: (202) 426–3691, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591.

SUPPLEMENTARY INFORMATION:

Availability of Document

Any person may obtain a copy of Special Federal Aviation Regulation No. 48, "Special Slot Withdrawal and Reallocation Procedures," by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue SW., Washington, DC 20591; or by calling (202) 426–8058. Communications must identify the amendment number of the document.

Public Process

This notice announces a meeting to conduct a drawing to determine the order in which incumbent air carriers will select slots for withdrawal at LaGuardia, O'Hare, and Washington National Airports. The meeting is open to the public and all interested persons are invited to attend. The meeting will begin at 1:00 p.m. on Tuesday, March 25, 1986, at FAA Headquarters, in the Third Floor Auditorium.

Issued in Washington, DC, on March 17, 1986.

E. Tazewell Ellett,

Chief Counsel.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket 760]

United States Steel Corp., et al.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Modifying order.

SUMMARY: The Federal Trade Commission has modified a 1924 order (8 F.T.C. 1) issued against respondent by deleting a requirement that the company included specific price and transportation information on its contracts and invoices.

DATES: Order issued July 21, 1924. Modifying Order issued March 10, 1986.

FOR FURTHER INFORMATION CONTACT: FTC/L–301, Daniel P. Ducore, Washington, DC 20580. (202) 634–4642.

SUPPLEMENTARY INFORMATION: In the Matter of United States Steel Corporation, et al.

List of Subjects in 16 CFR Part 13

Steel, Trade practices.

(Sec. 6, 38 Stat., 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

Federal Trade Commission

Order Reopening and Modifying Order Issued on July 21, 1924

Commissioners: Terry Calvani, Acting Chairman, Patricia P. Bailey, Mary L. Azcuenaga.

[Docket No. 760]

In the Matter of United States Steel Corporation, *et al.*

On November 7, 1985, respondent United States Steel Corporation ("USS") filed its "Request to Reopen and Set Aside in Part and Modify in Part the Order" ("Request"), pursuant to section 5(b) of the Federal Trade Commission Act, 15 U.S.C. 45(b), and § 2.51 of the Commission's Rules of Practice. The Request asked the Commission to reopen the proceeding in Docket No. 760 and to modify the order issued by the Commission in this case on July 21, 1924, by deleting paragraph 3, which requires USS to state clearly on its contracts and invoices how much is charged for the steel f.o.b. the producing or shipping point and how much, if any, is charged for the actual transportation. USS also asks that the order be modified to specify that, "Quotations and sales may be made on a net delivered price basis so long as there is no concerted refusal to quote or sell rolled steel products f.o.b. the plant where the products are manufactured or from which they are shipped." USS' request was placed on the public record for thirty days; no comments were received.

After reviewing USS' request and other available information, the Commission has concluded that the public interest warrants reopening and modification of the order to eliminate paragraph 3. The requirement that price and transportation information be included on USS' contracts and invoices for rolled steel products was adopted principally as a fencing-in restraint ancillary to the order's prohibitions against the use of the "Pittsburgh Plus" or other basing point pricing system and against price discrimination. USS has shown that since the deregulation of railroad freight rates by the Staggers Rail Act of 1980, 49 U.S.C. 10701 *et seq.*, enacted by Congress to promote competition by allowing carriers to negotiate confidential contract rates with their customers, many carriers have insisted that USS not disclose their negotiated rates. This change in the legal framework within which carriers and USS now operate, and the carriers' insistence upon confidentiality within that new framework, represents a changed condition of fact warranting elimination of the order's requirement that the actual freight charge appear on contracts and invoices between USS and its customers. Disclosure of USS' rates in its invoices allows USS' competitors to discover any favorable terms which it has negotiated with carriers and would reduce the incentive of a rail carrier to offer USS a favorable rate. Elimination of Paragraph 3 is therefore in the public interest because it will enable USS to compete effectively for contract rates.

The disclosure requirements of paragraph 3 appear to have served their remedial purpose. There is no indication that USS has used the "Pittsburgh Plus" or other basing point system of pricing or engaged in price discrimination of the type contemplated by the order since July 21, 1924. Nothing in the record suggests that the requirements of paragraph 3 are now needed to ensure that basing point pricing or price discrimination are not reinstituted by USS.

With respect to the remainder of the Request, which asks that the order be modified to specify that, "Quotations and sales may be made on a net delivered price basis so long as there is no concerted refusal to quote or sell rolled steel products f.o.b. the plant where the products are manufactured or from which they are shipped," such modification is not necessary. Once paragraph 3 is deleted, the remaining provisions of the order do not restrict USS' ability to quote or sell on a net delivered price basis. Rather, these provisions only ban quoting or selling of rolled steel products at "Pittsburgh Plus" prices, which the order defines as adding to the price of products shipped from points outside Pittsburgh amounts equal to the freight if the products had been shipped from Pittsburgh, or upon any other basing point. Net delivered pricing would not, therefore, be precluded so long as there was no charge for fictitious freight.

Accordingly, it is ordered that this matter be, and it hereby is, reopened and that paragraph 3 of the order be, and it hereby is, deleted.

Issued: March 10, 1986.

By the Commission.

Emily H. Rock,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 200

[Release Nos. 33–6653; 34–23026; 35–24051; 39–1089; IC–14992; IA–1017]

Approved Information Collections; Current OMB Expiration Dates

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Commission is amending Subpart N of Part 200 relating to collection requirements under the Paperwork Reduction Act to reflect current OMB expiration dates for approved information collections.

EFFECTIVE DATE: March 21, 1986.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Fogash, Deputy Executive Director, SEC, 450 Fifth Street, NW., Washington, DC 20549 (202) 272–2142.

SUPPLEMENTARY INFORMATION: The Commission will amend Subpart N periodically to reflect current information.

The Commission finds that this amendment, concerning the display of the control numbers and expiration dates assigned to information collection requirements of the Commission by the Office of Management and Budget pursuant to the Paperwork Reduction Act, pertains only to procedural matters; it is therefore not subject to the provisions of the Administrative Procedure Act, 5 U.S.C. 551 et seq., requiring advance notice and opportunity for comment. Accordingly, it is effective upon publication in the **Federal Register.**

17 CFR Part 270

[Release No. IC-14983; File No. S7-30-85]

Acquisition and Valuation of Certain Portfolio Instruments by Registered Investment Companies

AGENCY: Securities and Exchange Commission.

ACTION: Adoption of final rule and rule amendments.

SUMMARY: The Commission is adopting amendments to an existing rule that permits money market funds to use the amortized cost method of valuing their portfolio securities or the penny-rounding method of computing their price per share. The amendments will allow funds replying on the rule to acquire put options and to treat variable rate or floating rate debt securities with periodic demand features, a type of put option, as short-term debt securities under certain conditions. The amendments also clarify the responsibilities that the existing rule assigns to money market fund directors and allow money market funds to rely on a high quality rating assigned by a nationally recognized statistical rating organization that does not control and is not controlled by or under common control with the issuer of or any insurer, guarantor or provider of credit support for the rated securities.

The Commission is also adopting an amendment to an existing rule that exempts certain investment company acquisitions of securities issued by persons engaged in securities related activities in order to clarify the circumstances under which investment companies may acquire demand features and another type of put option known as standby commitments. Finally, the Commission is adopting a new rule that allows registered investment companies to assign a fair value of zero to standby commitments.

EFFECTIVE DATE: April 21, 1986.

FOR FURTHER INFORMATION CONTACT: Jack W. Murphy, Attorney, (202) 272–2048 or Elizabeth K. Norsworthy, Chief, (202) 272–2048, Office of Regulatory Policy, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

After the effective date, questions should be directed to the Office of the Chief Counsel, (202) 272–2030, Division of Investment Management, 450 Fifth Street, NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission today is adopting amendments to rules 2a–7 [17 CFR 270.2a–7] and 12d3–1 [17 CFR 270.12d3–1] and adopting rule 2a41–1 [17 CFR 270.2a41–1] under the Investment Company Act of 1940 [15 U.S.C. 80a–1, *et seq.*] ("Act").

1986
UMI

Last July, the Commission proposed amendments to rules 2a–7 and 12d3–1 and adoption of new rule 2a41–1 [1] to give money market funds more flexibility to acquire certain types of put options known as demand features and standby commitments. The fifteen commentators on the proposal generally supported the initiative taken by the Commission, but believed that certain aspects of the proposal should be modified or eliminated. Those comments are reflected in the final version of the rule and rule amendments as discussed below.

Subject to specified conditions, rule 2a–7 allows certain open-end investment companies known as money market funds to use either the amortized cost method of valuing their portfolio securities[2] or the penny-rounding method of pricing their securities.[3] The rule requires money market funds using the above methods to limit their investments to instruments that are of high quality and that have a remaining maturity of one year or less. Funds relying on the rule must also maintain an average dollar-weighted portfolio maturity of no more than 120 days.[4]

The amendments to rule 2a–7 permit money market funds relying on the rule to acquire put options, including demand features and standby commitments, under certain conditions. The final version of the rule uses the term "put" to describe the type of options that may be acquired, instead of the term "liquidity put" that was used in the proposal. As proposed, the final rule imposes a five percent limitation on the puts that a fund may acquire from the same institution. However, unlike the proposal, the final rule tracks section 5(b)(1) of the Act [15 U.S.C. 80a–5(b)(1)] and rule 5b–2 thereunder [17 CFR 270.5b–2] by imposing that limitation with respect to only 75 percent of a fund's portfolio and allowing a fund to invest up to ten percent of its assets in unconditional puts or other securities issued by the same institution.[5]

The final rule also clarifies the circumstances under which a demand feature or standby commitment may be considered to be of high quality. Both the long-term and the short-term aspects of demand instruments must be of high quality before they can be acquired by a fund relying on the rule unless the demand feature is unconditional. In that event, the fund may focus only on the short-term quality of the instrument. This provision modifies the proposal which would have required that a fund examine both the short-term and long-term aspects of any demand instrument before treating the instrument as a short-term debt security. The final version of the rule also makes it clear that a fund may not acquire a standby commitment unless a determination has been made that the issuer of the commitment presents a minimal risk of default.

As in the proposal, the amendments permit funds relying on rule 2a–7 to use certain demand features to shorten the maturity of variable and floating rate instruments.[6] In the final version of the rule, such demand features must entitle the fund to receive the principal amount of the underlying security or securities and must be exercisable either (i) at any time on no more than thirty days' notice; or (ii) at specified intervals not exceeding one year and upon no more than thirty days' notice. Since the proposal would have prescribed a seven day minimum notice period, a note has been added to the final rule to remind money market fund directors of their responsibility to ensure that the fund has sufficient liquidity.

As in the proposal, amended rule 2a–7 simply states the conditions that must be satisfied before a demand feature can be used to shorten the maturity of the security or securities underlying the feature. While the directors, of course, remain ultimately responsible for that decision, the amended rule no longer requires them to make an explicit finding with respect to each instrument.[7]

Finally, rule 2a–7 is amended to allow money market funds to rely on a high quality rating if the rating is assigned by a nationally recognized statistical rating organization ("NRSRO") that does not control and is not controlled by or under common control with the issuer of, or any insurer, guarantor or provider of credit support for the securities. The final rule refers only to that aspect of the Act's definition of "affiliated person" that includes any person directly or indirectly controlling, controlled by or under common control with another person and not, as proposed, to all aspects of that definition.[8]

Rule 12d3–1 provides exemptive relief from section 12(d)(3) of the Act [15 U.S.C. 80a–12(d)(3)] to allow investment companies to purchase or otherwise acquire securities issued by persons engaged in securities related activities. The amendment to rule 12d3–1 permits any type of investment company—not just money market funds relying on rule 2a–7—to acquire puts issued by persons engaged in securities related activities so long as the company complies with the same diversification requirements that are found in amended rule 2a–7. Finally, the Commission is adopting rule 2a41–1 under section 2(a)(41) of the Act [15 U.S.C. 80a–2(a)(41)] essentially as proposed to allow investment companies to assign a fair value of zero

---

[1] *See* Investment Company Act Release No. 14607 (July 1, 1985) [50 FR 27982] ("proposing release").

[2] A money market fund using the amortized cost method of valuation values the debt securities in its portfolio and other assets at acquisition cost. The interest earned on each portfolio debt security (plus any discount received or less any premium paid upon purchase) is then accrued ratably over the remaining maturity of the security. By declaring these accruals to its shareholders as a daily dividend, the money market fund is able to set a fixed price per share, which is usually $1.00.

The final version of the rule retains the description of the amortized cost method that appears in the existing rule. Although the proposal would have clarified that language, the Commission has decided to retain the original language because the commentators expressed so much concern that the proposed change might have some hidden meaning.

[3] A money market fund using the penny-rounding pricing method values portfolio securities for which market quotations are readily available at current market value, and other securities and assets at fair value as determined in good faith by the board of directors. The current net asset value per share is then rounded to the nearest one percent, allowing the fund to maintain a fixed price per share (usually $1.00). Penny-rounding funds may also use the amortized cost valuation method to value portfolio securities having a remaining maturity of sixty days or less. *See* Investment Company Act Release No. 13380 (July 11, 1983) [48 FR 32555] adopting the existing rule ("adopting release") at footnote 44, *citing* Investment Company Act Release No. 9786 (May 31, 1977), 42 FR 28999.

The final version of the rule retains the description of penny-rounding that appears in the existing rule. As in the case of the description of the amortized cost method that appears in the existing rule, the Commission had proposed to describe the penny-rounding method more precisely. The original rule language is retained to assuage commentator concern as to any hidden meaning behind the proposed language change.

[4] Generally, the maturity of an instrument is considered to be the period remaining until the date noted on the face of the instrument as the date on which the principal amount must be paid.

[5] An unconditional put is defined in the rule as a put that is readily exercisable in the event of a default in the payment of principal or interest on the underlying security or securities. Conversely, a conditional put would not be readily exercisable in the event of default.

[6] As proposed, the definitions of variable and floating rate in struments have been clarified.

[7] *See* the proposing release, *supra* note 1, at notes 40–43 and accompanying text. *See also* adopting release, *supra* note 3, at notes 19–25 and accompanying text.

Also, as proposed, parenthetical references to "trustees" that appear in the existing rule are deleted because the definition of "director" in section 2(a)(12) of the Act [15 U.S.C. 80a–2(a)(12)] specifically includes a member of a board of trustees.

[8] *See* section 2(a)(3) [15 U.S.C. 80a–2(a)(3)]. Control is defined in section 2(a)(9) of the Act [15 U.S.C. 80a–2(a)(9)] to include direct or indirect ownership of more than 25 percent of the voting securities of a company.

to standby commitments under certain conditions.

Since the proposing release described in detail the market changes and exemptive applications that prompted the proposed rule and rule amendments, this release focuses on the changes that have been made in the proposal to reflect the comments received.

Discussion

A. Amendments to Rule 2a–7

1. *Puts that may be acquired by funds relying on the rule and puts that may be used to shorten maturity.* The final amendments to rule 2a–7 use the general term "put" to describe the options that money market funds relying on the rule may acquire. A put is defined as a right to sell a specified underlying security or securities within a specified period of time and at a specified exercise price, that may be sold, transferred or assigned only with the underlying security or securities.[9]

The proposed amendments used the term "liquidity puts" to refer to the put options that funds relying on the rule could acquire. Several commentators, however, felt that the use of this term, together with certain statements contained in the proposing release, might unnecessarily restrict money market funds to purchasing put options solely for liquidity purposes. In this regard, they pointed out that while funds relying on the rule may acquire puts for such purposes, they may also acquire the puts to shorten the maturity of the underlying securities or to permit reinvestment of fund assets at a more favorable rate of return. Since the Commission did not intend to prevent funds from acquiring puts for these other purposes, the term "put" is used in the final version of the rule.

The final version of the rule separately defines demand features and standby commitments instead of describing those options within the definition of put. The definition of standby commitment is adopted as proposed. The definition of demand feature, however, has been modified so that the final rule makes clear that the exercise price need not include accrued interest. This change has been made because the proposal could have been read to require that accrued interest must always be paid at the time of exercise, a result that was not intended.

As in the proposal, a fund relying on the rule may use demand features to shorten the maturity of only variable or floating rate instruments.[10] One commentator suggested that the final rule permit funds to use demand features to shorten the maturity of fixed rate instruments. However, the Commission still believes that an instrument should have an adjustable interest rate, as well as a demand feature, to be treated as a short-term debt security. For example, if a fund using amortized cost decides that exercise of a demand feature is not in the best interests of the fund or if the demand feature cannot be exercised, then the Commission believes that a mechanism must exist that can be reasonably expected to return the value of the instrument to par, *i.e.*, a variable interest rate, or that can reasonably be expected to keep the value of the instrument at par, *i.e.*, a floating interest rate. Otherwise, the market-based value of the instrument could deviate significantly from its amortized cost value after the exercise date.

A few commentators urged the Commission to permit funds to use standby commitments as well as demand features to shorten maturity. However, applicants for exemptive relief have routinely represented that they are unlikely to exercise their standy commitments; they only exercise this type of put as a last resort to facilitate portfolio liquidity.[11] In view of these representations, the Commission does not believe that it would be appropriate to allow funds to use the commitments to shorten maturity.

2. *Limitation on puts from a single institution.* The diversification requirements contained in the final amendments to rule 2a–7 track those in section 5(b)(1) of the Act and provide that immediately after the acquisition of any put, a money market fund which uses the amortized cost valuation method may not, with respect to 75 percent of the total amortized cost value of its assets, have more than five percent of its assets invested in securities subject to puts from the same institution. Similarly, in the case of a money market fund which uses the penny-rounding pricing method, the fund may not, with respect to 75 percent of the total market-based value of its assets, have more than five percent of its assets invested in securities subject to puts from the same institution. In each case, however, the amended rule also tracks rule 5b–2 under the Act and provides that a fund may invest up to ten percent of its assets in unconditional puts and other securities issued by the same institution. An unconditional put is considered to be a put that is exercisable even in the event of a default in the payment of principal or interest on the underlying securities. A put is considered to be from the institution to whom the fund will look for payment of the exercise price.[12]

Since, as noted above, these requirements track the diversification requirements of section 5(b)(1) of the Act [15 U.S.C. 80a–5(b)(1)] and rule 5b–2 thereunder [17 CFR 270.5b–2],[13] a diversified fund complying with rule 2a–7 will not have to take any further steps to ensure compliance with section 5 with respect to the puts in its portfolio. However, the fund will still have to comply with section 5 with respect to the securities underlying those puts.

The proposed amendments would have limited funds relying on the rule to investing no more than five percent of their total assets in securities subject to any type of put from the same institution. A number of commentators felt that these proposed limitations were unnecessarily restrictive. Several questioned the need for any separate limitation in rule 2a–7, given the existing diversification requirements imposed by section 5 [14] and by subchapter M of the Internal Revenue Code of 1954 ("IRC").[15] Another commentator maintained that the acquisition of puts should not be subject to any diversification requirements, given the relatively small number of financial institutions engaged in issuing puts.

On the other hand, several commentators did not oppose the

---

[9] Several commentators believed that although a fund relying on the rule may not "sever" a put from the underlying security or securities, the put itself may be "severable." The Commission continues to believe, however, that the cost of a separately traded put could differ significantly from its market value and therefore could cause the fixed price of a fund's shares to deviate significantly from the market-based value of its portfolio.

[10] The maturity of a variable rate instrument must be the longer of the period remaining until the principal amount can be recovered through demand or the period remaining until the interest rate is to be readjusted. Although a few commentators suggested that the maturity should be the shorter of the specified periods, the Commission continues to believe that the more prudent measurement is the longer of the periods.

[11] *See* the proposing release, *supra* note 1, at notes 18–24 and accompanying text.

[12] In the case of a standby commitment, the put would be from the broker, dealer or bank that has agreed to repurchase the underlying securities. In the case of a demand feature, the put would be from the party that has provided a letter of credit or other credit facility to ensure payment of the exercise price.

[13] The diversification requirements of rule 2a–7 and section 5 are not identical because the puts that a money market fund may acquire are typically not assigned a separate value. Accordingly, the amended rule's percentage limitations are applied to the securities subject to puts from the same institution, not to the puts themselves.

[14] *See* section 5(b)(1) and rule 5b–2 thereunder.

[15] *See* 26 U.S.C. 851 *et seq.*

VOL 51 ISS 55 MR 21 1986 UMI

inclusion of a separate limitation in rule 2a–7. One commentator expressly supported the proposed five percent limitation on the grounds that it would prevent money market funds from being subjected to "unnecessary and unintended market risks." Other commentators argued that the proposed five percent limitation should be modified so that it would track the Act's diversification requirements, *i.e.*, the limitation should apply only to 75 percent of the fund's portfolio and the fund should be able to invest up to ten percent of its portfolio in unconditional puts from the same institution. Still other commentators expressed the opinion that funds should be able to invest up to ten percent of their assets in any kind of puts issued by the same institution.

Two commentators noted that if the final version of the rule contained a diversification requirement, the provision should more clearly identify the party that would be considered the issuer of the put. One of these commentators stated that the limitation should not be applicable to the remarketing agent for a demand instrument, but should apply to the provider of credit support, such as a letter of credit, since the holder of the instrument relies primarily upon that party in assessing the quality of the put. On the other hand, another commentator felt that it could be inappropriate to apply a limitation to the issuer of a letter of credit supporting a demand feature in light of the tax implications of *Philadelphia Gear Corp. v. FDIC.*[16] Several commentators also noted that if the final version of the rule contained a diversification requirement, the Commission should clarify the interrelationship between that requirement and diversification requirements under section 5.

The Commission has decided to include a separate diversification requirement in the final version of the rule in order to ensure that a fund's liquidity will not be impaired by relying too heavily upon the same institution or upon only a handful of institutions to support whatever puts are in the fund's portfolio. However, as described above, the proposed five percent limitation has been clarified and modified to track the Act's diversification requirements.

3. *Quality of portfolio securities.* The final version of the amendments specifically provides that funds relying on the rule may only acquire securities that are of high quality, as determined by at least one NRSRO that is not an affiliated person, as defined in section 2(a)(3)(C) of the Act, of the issuer of or any insurer, guarantor or provider of credit support for, the rated securities or that are found to be of comparable quality by the board of directors. This allows a fund to rely on a NRSRO rating only if the NRSRO does not control, and is not controlled by or under common control with the issuer or any insurer, guarantor or provider of credit support.[17]

As proposed, a fund could not rely on a NRSRO rating if the NRSRO were an affiliated person of the issuer, insurer, guarantor or provider of credit support, *i.e.*, meeting all parts of the definition of affiliated person found in section 2(a)(3). One commentator urged the Commission to eliminate the unaffiliated requirement altogether, arguing that the requirement would place an undue burden of compliance on funds relying on the rule. However, as discussed in the proposing release, although the concept of independence is implicit in the term NRSRO, the Commission believes that for the purposes of rule 2a–7, independence should be defined within the context of the Act. The proposal has been modified, however, to focus only on the control aspect of the definition of affiliated person because the Commission believes that funds should have little or no difficulty in ascertaining whether a control relationship exists between a NRSRO and the issuer, insurer, guarantor or provider of credit support of the rated securities.

The final amendments provide that both the short-term and long-term aspects of a demand instrument must be rated high quality or found by the board to be of high quality [18] unless the demand feature is unconditional. In that event, the fund may focus only on the short-term quality of the instrument. A demand feature is considered to be unconditional if exercisable even in the event of a default in the payment of principal or interest on the underlying securities.

The proposed amendments would have provided that a fund may use a demand feature to shorten the maturity of a demand instrument only if the demand instrument has a short-term and a long-term high quality rating or is found to be of comparable quality. Several commentators urged the Commission to focus only on the quality of the demand feature, not on the quality of the securities underlying the demand feature. Two commentators believed, however, that this should be the case only if the demand feature is unconditional. In addition, several commentators noted that the qualtity of the securities underlying a demand feature should still be taken into account when a fund makes its investment decision.[19] Finally, some commentators maintained that a separate quality requirement for demand instruments is unnecessary, given the high quality requirements presently contained in rule 2a–7.

In view of the nature of demand instruments, the Commission continues to believe that rule 2a–7 should separately address the quality requirements that should be applicable to those instruments. Since a demand instrument must be of high quality for a fund relying on the rule to acquire it, as well as to shorten its maturity, this separate requirement has been added to the rule's existing quality requirements, not to the rule's maturity requirements as originally proposed. While the final version of the rule still generally requires a fund to focus on both the long-term and short-term aspects of a demand instrument, an exception is made in the case of demand instruments with unconditional demand features. Where credit support will be provided even in the event of default on the underlying securities, the Commission agrees that a fund should be able to focus only on the quality of the short-term aspect of the demand instrument—the demand feature. If the quality of any demand instrument falls below the high quality level required by the rule, a fund must dispose of the instrument within a reasonable period of time by exercising the demand feature or by selling the demand instrument on the secondary market, whichever is in the best interests of the fund and its shareholders.

---

[16] 751 F.2d 1131 (10th Cir. 1984), *cert. granted* 106 S.Ct 245 (1985) (No. 84–1672). That case held that a standby letter of credit is a "deposit" for purposes of Federal Deposit Insurance Corporation ("FDIC") insurance. Since federal tax law denies tax-exempt status to municipal debt securities that are guaranteed in whole or in part by the United States Government, the holding in *Philadelphia Gear* could mean the loss of the tax-exempt status of any municipal bond that is supported by a letter of credit issued by an FDIC-insured bank. Such a holding could significantly limit the number of institutions that could continue to provide credit support for tax-exempt issues.

[17] *See supra* note 8.

[18] *See* proposing release, *supra* note 1, at note 30 for a discussion of the credit factors that the board should examine in making a comparable quality determination. A demand instrument may be considered an unrated security in the event that a rating agency has not taken into account the existence of an external agreement to provide credit support, such as insurance or a letter of credit. Also, where only the long-term or short-term quality has been rated, the board may make a comparable quality determination with regard to the unrated credit aspect.

[19] One commentator maintained that a fund should focus only on the quality of the underlying security or securities. That commentator believed that a demand instrument is analogous to a short-term repurchase agreement ("repo") collateralized by long-term securities and that a fund's board of directors should be allowed to make a high quality determination if the securities underlying the demand feature are of high quality, just as the Commission has permitted when the securities underlying a repo are of high quality. *See* adopting release, *supra* note 3, at note 31.

Finally, the quality requirements of the amended rule provide that a standby commitment will be considered to be of high quality if the directors have determined that the issuer of the commitment presents a minimal risk of default. This representation has been routinely made by applicants who have received exemptive relief to acquire standby commitments [20] and is added to the rule at the request of one commentator who pointed out that without clarification, it would be difficult for the directors to know how to ascertain whether a standby commitment is of high quality.

4. *Notice limitations on demand instruments.* As noted above, the final rule expands from seven to 30 days the notice requirement for the demand features that funds relying on the rule may use to shorten the maturity of variable and floating rate debt instruments. Because the notice period has been lengthened, a note has been added to the rule reminding directors of their responsibility to ensure that their fund has sufficient liquidity.

Open-end investment companies are required to limit their acquisition of illiquid securities to ensure that all redemption requests will be satisfied within the seven day period prescribed by section 22(e) of the Act [15 U.S.C. 80a–22(e)]. In 1969, the Commission took the position that in no event should the percentage of illiquid securities held by an open-end investment company exceed 10% of the market-based value of the company's net assets.[21] The term "illiquid security" generally includes any security which cannot be disposed of promptly and in the ordinary course of business without taking a reduced price. A security is considered illiquid if a fund cannot receive the amount at which it values the instrument within seven days.

In the release adopting rule 2a–7, the Commission elaborated upon the responsibilities of money market fund board of directors with regard to the acquisition and valuation of illiquid securities, noting that because of the nature of money market funds, the difficulties that could arise in conjunction with the purchase of illiquid securities might be even greater than for other types of open-end management investment companies. In particular, the Commission pointed out that money market funds often have a greater and perhaps less predictable volume of redemptions than other open-end investment companies. Further, the portfolio management of a money market fund might be impaired if a fund were forced to meet redemption requests by selling marketable securities that it would otherwise wish to retain in order to avoid attempting to dispose of illiquid portfolio instruments. Finally, the valuation of illiquid securities may potentially overstate or understate the fund's net asset value to the detriment of shareholders. In light of these potential problems, the board of directors of a money market fund relying on the rule must take steps to limit the acquisition of illiquid portfolio instruments to a lever lower than the ten percent limit set for other types of open-end investment companies.[22]

A number of the commentators felt that a seven day notice period was unreasonably short for periodic demand instruments that entitle the holder to receive the principal amount of the underlying securities at specified intervals not exceeding one year. Several commentators asked the Commission to lengthen the prescribed notice period to 30 days because present market conditions have resulted in a standard notice period of 15 to 30 days for such instruments. In addition, one commentator indicated that limiting the notice period to seven days could impair the ability of a remarketing agent to successfully remarket the instrument. Other commentators believed that the rule should not contain any notice requirement for periodic demand instruments. These commentators observed that, after notice has been given, a periodic demand instrument trades in the market as a security having a maturity equal to the period remaining until the date on which the exercise price is to be paid.

In addition to addressing the proposed notice requirement for periodic demand instruments, several commentators questioned whether the amended rule should continue to have a seven day notice requirement for demand features that are exercisable at any time.[23] Those commentators felt that this requirement should be removed or expanded in light of the market conditions discussed above. Moreover, one commentator noted that while the widespread use of seven day demand instruments demonstrates that a successful remarketing effort is possible within seven days, all involved parties would prefer a longer notice period so that a longer and possibly more effective remarketing effort could take place.

In the final version of the rule, the Commission has decided to expand to 30 days the notice requirements for all types of demand features, whether exercisable at specified intervals or at any time. The Commission still believes that some limit must be placed on the extent to which funds relying on the rule will have to anticipate their cash and investment needs more than seven days in advance. However, the Commission believes that funds should be able to invest in the demand instruments that are being marketed with notice periods of up to 30 days, as long as the directors are cognizant of their responsibility to maintain an adequate level of liquidity. To emphasize that responsibility, a note has been added to the rule summarizing and referring to the Commission's position outlined above. It the context of determining the liquidity of demand instruments, the Commission expects that the directors would establish procedures to evaluate the existence and depth of the secondary market for such instruments, as well as the period remaining until the principal amount can be recovered.

B. Amendment to Rule 12d3–1

As amended, rule 12d3–1 provides exemptive relief to allow registered investment companies to acquire puts, as defined in amended rule 2a–7, from persons engaged in securities related activities. This is in contrast to the proposal that provided exemptive relief only to money market funds that have complied with all of the provisions of rule 2a–7. At the request of two commentators, the proposal has been redrafted so that the final amendment applies to all types of investment companies and conditions exemptive relief upon a company's compliance with the same diversification requirements that are found in amended rule 2a–7. Since these diversification

---

[20] *See* Notices of applications and orders cited in the proposing release, *supra* note 1, at note 10.

[21] *See* Investment Company Act Release No. 5847 (October 21, 1969)[35 FR 19989].

[22] *See* adopting release, *supra* note 3, at notes 37–39 and accompanying text. In view of these liquidity concerns, the proposed amendments to rule 2a–7 would have permitted funds relying on the rule to shorten the maturity of long-term debt securities subject to demand features only if the demand features could be exercised upon no more than seven days' notice.

[23] The seven day notice period for demand features exercisable at any time was carried over from the text of the existing rule.

VOL 51 ISS 55 MR 21 1986 UMI

requirements track those of section 5(b)(1) of the Act and rule 5b–2 thereunder, a diversified fund would not have to take any additional steps to diversify the puts that it has acquired from persons engaged in securities related activities. However, the fund would still have to comply with section 5 with respect to the securities underlying those puts.

C. Rule 2a41–1

The Commission is also adopting new rule 2a41–1 essentially as proposed to allow a registered investment company to assign a fair value of zero to a standby commitment, provided that the standby commitment is not used to affect the fund's valuation of the underlying security or securities and any consideration paid for the commitment is accounted for as unrealized depreciation until the commitment is exercised or expires.

Text of Rule and Rule Amendments

Part 270 of Chapter II of Title 17 of the Code of Federal Regulations is amended as shown.

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

1. The authority citation for Part 270 is amended by adding the following citations:

Authority: Secs. 38, 40, 54 Stat. 841, 842, 15 U.S.C. 80a–37, 80a–39 * * * §§ 270.2a–7, 270.2a41–1 and 270.12d3–1 also issued under secs. 6(c) [15 U.S.C. 80a–6(c)], 22(c) [15 U.S.C. 80a–22(c)] and 38(a) [15 U.S.C. 80a–37(a)].

2. Section 270.2a–7 is amended by removing the parenthetical phrase "trustees in the case of a trust" in paragraph (a)(1); removing the parenthetical term "trustees" throughout paragraphs (a)(2)(i), (a)(2)(ii), (a)(2)(v) and (a)(3)(i); redesignating (a)(2)(v) as (a)(2)(vi), and (a)(2)(vi) as (vii); revising paragraphs (a)(2)(iv), (a)(3)(iii), and (b); and adding a note to the end of the section and new paragraphs (a)(2)(v), (a)(3)(iv), and (c) to read as follows. The authority citation at the end of the section is removed.

§ 270.2a–7 Use of the amortized cost valuation and penny-rounding pricing methods by certain money market funds.

(a) * * *

(2) * * *

(iv) The money market fund will limit its portfolio investments, including puts and repurchase agreements, to those United States dollar-denominated instruments which the board of directors determines present minimal credit risks and which are (A) of "high quality" as determined by any nationally recognized statistical rating organization that is not an affiliated person, as defined in section 2(a)(3)(C) of the Act [15 U.S.C. 80a–2(a)(3)(C)], of the issuer of, or any insurer, guarantor or provider of credit support for the instrument which the money market fund is considering acquiring, or (B) in the case of any instrument that is not rated, of comparable quality as determined by the board of directors. In this regard, a demand instrument must have received both a short-term and a long-term high quality rating or have been determined to be of comparable quality by the board of directors, *except* that a demand instrument that has an unconditional demand feature may be acquired solely in reliance upon a short-term high quality rating or upon a finding of comparable short-term quality by the board of directors. The directors may base a determination that a standby commitment is of comparable quality upon a finding that the issuer of the commitment presents a minimal risk of default.

(v) Immediately after the acquisition of any put, the money market fund will not, with respect to 75 percent of the total amortized cost value of its assets, have invested more than 5% of the total amortized cost value of its assets in securities underlying puts from the same institution. An unconditional put shall not be considered to be a put from that institution, *provided, that,* the amortized cost value of all securities held by the money market fund and issued or guaranteed by the same institution does not exceed 10 percent of the total amortized cost value of the fund's assets. For the purposes of this paragraph, a put will be considered to be from the party to whom the fund will look for payment of the exercise price and an unconditional put will be considered to be a guarantee of the underlying security or securities.

* * * * *

(3) * * *

(iii) The money market fund will limit its portfolio investments, including puts and repurchase agreements, to those United States dollar-denominated instruments which the board of directors determines present minimal credit risks and which are (A) of "high quality" as determined by any nationally recognized statistical rating organization that is not an affiliated person, as defined in section 2(a)(3)(C) of the Act [15 U.S.C. 80a–2(a)(3)(C)], of the issuer of or any insurer, guarantor or provider of credit support for the instrument which the money market fund is considering acquiring, or (B) or, in the case of an instrument that is not rated, of comparable quality as determined by the board of directors. In this regard, a demand instrument must have received both a short-term and a long-term high quality rating or have been determined to be of comparable quality by the board of directors, *except* that a demand instrument that has an unconditional demand feature may be acquired solely in reliance upon a short-term high quality rating or upon a finding of comparable short-term quality by the board of directors. The directors may base a determination that a standby commitment is of comparable quality upon a finding that the issuer of the commitment presents a minimal risk of default.

(iv) Immediately after the acquisition of any put, the money market fund will not, with respect to 75 percent of the total market-based value of its assets, have invested more than 5% of the total market-based value of its assets in securities underlying puts from the same institution. An unconditional put shall not be considered to be a put from that institution, *provided, that,* the market based value of all securities issued or guaranteed by the same institution and held by the money market fund does not exceed ten percent of the total market-based value of the fund's assets. For the purposes of this paragraph, a put will be considered to be from the party to whom the fund will look for payment of the exercise price and an unconditional put will be considered to be a guarantee of the undelrying security or securities.

(b) For the purposes of this rule, the maturity of a portfolio instrument shall be deemed to be the period remaining until the date noted on the face of the instrument as the date on which the principal amount must be paid, or in the case of an instrument called for redemption, the date on which the redemption payment must be made, except that:

(1) An instrument that is issued or guaranteed by the United States government or any agency thereof which has a variable rate of interest readjusted no less frequently than annually may be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.

(2) A variable rate instrument, the principal amount of which is scheduled on the face of the instrument to be paid in one year or less, may be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.

(3) A variable rate instrument that is subject to a demand feature may be deemed to have a maturity equal to the longer of the period remaining until the next readjustment of the interest rate or the period remaining until the principal amount can be recovered through demand.

(4) A floating rate instrument that is subject to a demand feature may be deemed to have a maturity equal to the period remaining until the principal amount can be recovered through demand.

(5) A repurchase agreement may be deemed to have a maturity equal to the period remaining until the date on which the repurchase of the underlying securities is scheduled to occur, or where no date is specified, but the agreement is subject to demand, the notice period applicable to a demand for the repurchase of the securities.

(6) A portfolio lending agreement may be treated as having a maturity equal to the period remaining until the date on which the loaned securities are scheduled to be returned, or where no date is specified, but the agreement is subject to demand, the notice period applicable to a demand for the return of the loaned securities.

(c) *Definitions.* (1) The "amortized cost method of valuation" is the method of calculating an investment company's net asset value whereby portfolio securities are valued by reference to the fund's acquisition cost as adjusted for amortization of premium or accumulation of discount rather than by reference to their value based on current market factors.

(2) The "penny-rounding method of pricing" is the method of computing an investment company's price per share for purposes of distribution, redemption and repurchase whereby the current net asset value per share is rounded to the nearest one percent.

(3) A "put" is a right to sell a specified underlying security or securities within a specified period of time and at a specified exercise price, that may be sold, transferred or assigned only with the underlying security or securities.

(4) A "standby commitment" is a put that entitles the holder to achieve same day settlement and to receive an exercise price equal to the amortized cost of the underlying security or securities plus accrued interest, if any, at the time of exercise.

(5) A "demand feature" is a put that entitles the holder to receive the principal amount of the underlying security or securities and which may be exercised either (A) at any time on no more than 30 days' notice; or (B) at specified intervals not exceeding one year and upon no more than 30 days' notice.

(6) An "unconditional put" or an "unconditional demand feature" is a put or a demand feature that by its terms, would be readily exercisable in the event of a default in payment of principal or interest on the underlying security or securities.

(7) A "variable rate instrument" is one whose terms provide for the adjustment of its interest rate on set dates and which, upon such adjustment, can reasonably be expected to have a market value that approximates its par value.

(8) A "floating rate instrument" is one whose terms provide for the adjustment of its interest rate whenever a specified interest rate changes and which, at any time, can reasonably be expected to have a market value that approximates its par value.

(9) The term "nationally recognized statistical rating organization" shall mean any nationally recognized statistical rating organization, as that term is used in rule 15c3–1(c)(2)(vi)(F) under the Securities Exchange Act of 1934 [17 CFR 240.15c3–1(c)(2)(vi)(F)].

(10) "One year" shall mean 365 days except, in the case of an instrument that was originally issued as a one year instrument, but had up to 375 days until maturity, one year shall mean 375 days.

Note:—The board of directors of a money market fund relying on this rule is reminded that the Commission has said that "because of the nature of money market funds, the difficulties that could arise in conjunction with the purchase of illiquid instruments by such funds might be even greater than for other types of openend management investment companies. . . . By purchasing or otherwise acquiring illiquid instruments, a money market fund exposes itself to a risk that it will be unable to satisfy redemption requests promptly. . . . In addition, . . . management of the investment company's portfolio could also be affected by the purchase of illiquid instruments. . . . Finally, the purchase of illiquid instruments can seriously complicate the valuation of a money market fund's shares and can result in the dilution of shareholders' interests." *See* Investment Company Act Release No. 13380 (July 11, 1983) [48 FR 32555 at 32561–32562 July 18, 1983]. *See also* Investment Company Act Release No. 5847 (October 21, 1969) [35 FR 19989].

3. By adding § 270.2a41–1 to read as follows:

§ 270.2a41–1 Valuation of standby commitments by registered investment companies.

(a) A standby commitment as defined in rule 2a–7(c)(4) under the Act [17 CFR 270.2a–7(c)(4)] may be assigned a fair value of zero, *Provided,* That:

(1) The standby commitment is not used to affect the company's valuation of the security or securities underlying the standby commitment; and

(2) Any consideration paid by the company for the standby commitment, whether paid in cash or by paying a premium for the underlying security or securities, is accounted for by the company as unrealized depreciation until the standby commitment is exercised or expires.

4. By revising paragraphs (d)(8)(iii) and (d)(8)(iv) and adding new paragraph (d)(8)(v) of § 270.12d3–1 to read as follows. The authority citation at the end of the section is removed.

§ 270.12d3–1 Exemption of acquisitions of securities issued by persons engaged in securities related businesses.

* * * * *

(d) * * *

(8) * * *

(iii) Exercise of options, warrants, or rights acquired in compliance with this rule;

(iv) Conversion of convertible securities acquired in compliance with this rule; and

(v) Acquisition of puts, as defined in rule 2a–7(c)(3) under the Act [17 CFR 270.2a–7(c)(3)], provided that, immediately after the acquisition of any put, the company will not, with respect to 75 percent of the total value of its assets, have invested more than five percent of the total value of its assets in securities underlying puts from the same institution. An unconditional put shall not be considered a put from that institution, *provided, that,* the value of all securities issued or guaranteed by the same institution and held by the investment company does not exceed ten percent of the total value of the company's assets. For the purposes of this section, a put will be considered to be from the party to whom the company will look for payment of the exercise price and an unconditional put, as defined in rule 2a–7(c)(6) under the Act [17 CFR 270.2a–7(c)(6)], will be considered to be a guarantee of the underlying security or securities.

* * * * *

Dated: March 12, 1986.

By the Commission.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 101

[T.D. 86-66]

Change in the Customs Field Organization; Pascagoula, MS

AGENCY: U.S. Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations by extending the geographical limits of the port of entry of Pascagoula, Mississippi. The change extends the existing port limits to include all of Jackson County, Mississippi. These extended port limits coincide with the jurisdiction of the Jackson County Port Authority, and encompass areas undergoing industrial development and growth, thereby allowing them access to Customs services. Moreover, they will enable Customs to provide better service to carriers, importers and the public.

EFFECTIVE DATE: April 21, 1986.

FOR FURTHER INFORMATION CONTACT: Bernie Harris, Office of Inspection and Control, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229 (202-566-8157).

SUPPLEMENTARY INFORMATION:

Background

As part of a continuing program to obtain more efficient use of its personnel, facilities, and resources, and to provide better service to carriers, importers, and the public, Customs is amending § 101.3, Customs Regulations (19 CFR 101.3), by extending the geographical limits of the port of entry of Pascagoula, Mississippi.

Prior to this amendment, T.D. 56333, published in the **Federal Register** on January 12, 1965 (30 FR 344), extended the geographical limits of Pascagoula, Mississippi, to include the corporate limits of Pascagoula, and that area lying eastward of the city limits to 88° 28 minutes west longitude, and south of 30° 23 minutes north latitude to the existing shoreline.

The amendment extends the existing port limits to include all of Jackson County, Mississippi. These extended port limits coincide with the jurisdiction of the Jackson County Port Authority, and encompass areas undergoing industrial development and growth, thereby allowing them access to Customs services. The list of Customs regions, districts, and ports of entry in § 101.3(b), Customs Regulations, is being amended accordingly.

The change set forth in this document was set forth in a notice published in the **Federal Register** on October 8, 1985 (50 FR 40982), and although public comments were invited, none were received. Accordingly, after further review of the matter, Customs has determined to make the change as proposed.

Change in the Customs Service Field Organization

Under the authority vested in the President by section 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by Executive Order No. 10289, September 17, 1951 (3 CFR 1949–1953 Comp. Ch. II), and pursuant to authority provided by Treasury Department Order No. 101–5 (47 FR 2449), the existing geographical limits of the port of Pascagoula, Mississippi, are extended to include all of Jackson County, Mississippi. Accordingly, the limits of the port of Pascagoula, Mississippi, include all of Jackson County, Mississippi.

List of Subjects in 19 CFR Part 101

Customs duties and inspection, Imports, Organization.

Amendment to the Regulations

PART 101—GENERAL PROVISIONS

1. The authority citation for Part 101 continues to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 1, 66, 1202 (Gen. Hdnote 11), 1624, Reorganization Plan 1 of 1965; 3 CFR Part 1965 Supp.

§ 101.3 [Amended]

2. To reflect the change, the list of Customs regions, districts, and ports of entry in § 101.3, Customs Regulations (19 CFR 101.3), is amended by removing "T.D. 56333" under the column headed "Ports of entry" after the phrase "Pascagoula, Miss., including territory described in" and inserting, in its place, "T.D. 86–66," in the Mobile, Alabama, Customs district in the South Central Region.

Executive Order 12291

Because the amendment relates to the organization of the Customs Service, pursuant to section 1(a)(3) of E.O. 12291, it is not subject to the Executive Order.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this amendment. Customs routinely establishes, expands, and consolidates Customs ports of entry throughout the U.S. to accommodate the volume of Customs-related activity in various parts of the country. Although this change may have a limited effect upon some small entities in the Pascagoula, Mississippi, area, it is not expected to be significant because the extension of the limits of Customs ports of entry in other locations has not had a significant economic impact upon a substantial number of small entities to the extent contemplated by the Regulatory Flexibility Act. Accordingly, it is certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that the amendment will not have a significant economic impact on a substantial number of small entities.

Drafting Information

The principal author of this document was Larry L. Burton, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service Headquarters. However, personnel from other Customs offices participated in its development.

William von Raab,
Commissioner of Customs.

Approved: March 5, 1986.

Francis A. Keating II,
Assistant Secretary of the Treasury.

BILLING CODE 4820-02-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 74 and 82

[Docket Nos. 83C-0012 and 84C-0426]

D&C Green No. 6; Listing as a Color Additive for Coloring Absorbable Sutures

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the color additive regulations to provide for an increase in the level at which D&C Green No. 6 can be used to color certain polyglycolic acid surgical sutures and to provide for its use for coloring poly(glycolic acid-*co*-trimethylene carbonate) absorbable sutures for general surgical use. These actions respond to two petitions filed by American Cyanamid Co. FDA is also incorporating the listing of this color additive for use in sutures into the subpart of its regulations that the agency has established for color additives used in medical devices. Elsewhere in this issue of the Federal Register, FDA is proposing to remove the restriction that bars migration of D&C Green No. 6 from a suture to surrounding tissues and to establish a uniform set of specifications for D&C Green No. 6 for all of its regulated uses.

DATES: Effective April 22, 1986, except as to any provisions that may be stayed by the filing of proper objections; objections by April 21, 1986.

ADDRESS: Written objections to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Rudolph Harris, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of March 29, 1983 (48 FR 13098), FDA announced that a color additive petition (CAP 3C0170) had been filed by American Cyanamid Co., Pearl River, NY 10965, proposing that § 74.1206(c)(1)(ii) (21 CFR 74.1206(c)(1)(ii)) (incorrectly cited in the March 29, 1983, notice as § 74.1206(c)(1)(i)) of the agency's color additive regulations be amended to provide for an increase to 0.5 percent by weight of D&C Green No. 6 in polyglycolic acid absorbable sutures. The petition was filed under section 706 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 376).

In a second notice published in the **Federal Register** of February 14, 1985 (50 FR 6252), FDA announced that a color additive petition (CAP 4C0186) had been filed by Davis and Geck, American Cyanamid Co., Danbury, CT 06810, proposing that 21 CFR 74.3206 be amended to allow the use of D&C Green No. 6 for coloring an absorbable monofilament suture, 1,4-dioxan-2,5-dione polymer with 1,3-dioxan-2-one, for general surgery. The polymer is made from glycolic acid and trimethylene carbonate and is also described by the chemical name poly(glycolic acid-*co*-trimethylene carbonate). The agency has considered the alternate names for this polymer and has decided to use poly(glycolic acid-*co*-trimethylene carbonate) as the preferred name in this document and in the regulation because it is more commonly used. The notice of filing was issued under section 706 of the act.

I. Regulatory History

In the **Federal Register** of December 28, 1962 (27 FR 12828), in response to a color additive petition (CAP 2C0004), FDA issued a final rule listing D&C Green No. 6 for coloring polyethylene terephthalate surgical sutures, including sutures for ophthalmic use. In the **Federal Register** of April 25, 1975 (40 FR 18167), FDA amended § 74.1206 to provide for the use of D&C Green No. 6 in coloring polyglycolic acid surgical sutures, including sutures for ophthalmic use, as a result of a second petition (CAP 2C0104).

In the **Federal Register** of April 2, 1982 (47 FR 14138), FDA issued a final rule listing D&C Green No. 6 for use in externally applied drugs (21 CFR 74.1206) and cosmetics (21 CFR 74.2206) in response to color additive petitions 8C0085. The preamble to the April 2, 1982 final rule provides a detailed account of the regulatory history of D&C Green No. 6 and a detailed explanation of why the agency found its use in externally applied drugs and cosmetics to be safe.

In the **Federal Register** of March 29, 1983 (48 FR 13020), FDA issued a final rule listing D&C Green No. 6 for use in contact lenses (21 CFR 74.3206). FDA issued this regulation in response to color additive petitions 3C0164, 3C0171, and 3C0172.

II. The Color Additive

D&C Green No. 6 is principally 1,4-bis[(4-methylphenyl)amino]-9,10-anthracenedione (CAS Reg. No. 128–80–3). This material is formed by chemically reacting 1 molecule of quinizarin with 2 molecules of *p*-toluidine. Because no chemical reaction consumes all the starting materials and yields only the desired product, both the resulting reaction mixture and commercial product will contain some unreacted quinizarin and *p*-toluidine. This fact is significant because Weisburger et al. have demonstrated that *p*-toluidine is a carcinogen in mice (Ref. 1).

Residual amounts of reactants, such as *p*-toluidine and other manufacturing aids, are commonly found among the impurities of many color additives. The presence of such impurities is not unique to color additives, however. Numerous impurities are present in all chemical products, even in highly purified reagent grade chemicals.

III. The Use of D&C Green No. 6 in Sutures

Surgical sutures of different diameters are used in different types of surgery. The suture size (or diameter) is usually designated by a numerical coding system published in the U.S. Pharmacopeia (U.S.P.). For the range of sizes considered in this document, the diameter of the suture decreases as the first digit in the size description increases. Thus, size 2–0 is larger than size 8–0.

Color additives are added to the sutures to increase their visibility for the physician. Smaller size sutures, being more difficult to see, require a more intense color and, hence, a higher percentage of color additive. Although the percentage of color additive in a small suture may be higher than that in a large suture, the smaller suture may still contain less total color additive because of its smaller size.

In CAP 3C0170, the petitioner requested a change in the color additive regulations to allow for a fivefold increase in the percentage of D&C Green No. 6 in polyglycolic acid sutures of U.S.P. size 8–0 and smaller. The petitioner asserted that even with this higher concentration of color, the smaller size sutures contain no more color additive per unit length than those sutures used in the safety tests supporting the original regulation for polyglycolic acid sutures (CAP 2C0104).

In the second petition (CAP 4C0186), the petitioner requested that the regulations be amended to provide for the use of D&C Green No. 6 at a level not to exceed 0.21 percent by weight of suture material for coloring poly(glycolic acid-*co*-trimethylene carbonate) absorbable sutures other than those sutures used in ophthalmic surgery. This petition relies on studies in which sutures containing 0.21 percent color additive were implanted in animals.

IV. Safety of D&C Green No. 6

A. Legal Standard

Under section 706(b)(4) of the act, the so-called "general safety clause" for color additives, a color additive cannot be listed for a particular use unless the data presented to FDA establish that the color additive is safe for that use. Although what is meant by "safe" is not explained in the general safety clause, the legislative history of the Color Additive Amendments of 1960 (Pub. L. 86–618) makes clear that this word is to have the same meaning for color additives as for food additives.

"Safe" is defined in the legislative history of the Food Additives Amendment of 1958 as a "reasonable certainty that no harm will result from the proposed use of an additive. It does not—and cannot—require proof beyond any possible doubt that no harm will result under any conceivable

VOL 51
ISS 55
MR 21
1986
UMI

circumstance." S. Rept. 2422, 85th Cong., 2d Sess. (1958). This concept of "safe" is incorporated in FDA's color additive regulations (21 CFR 70.3(i)). In addition, the anticancer or Delaney Clause of the color additive provisions (section 706(b)(5)(B) of the act) provides that a noningested color additive shall be deemed to be unsafe and shall not be listed if, after tests that are appropriate for evaluating the safety of the additive for such use, it is found to cause cancer in man or animal.

B. Toxicology

The petitioner did not submit additional toxicological studies with CAP 3C0170. The petitioner relied instead on the agency's previous conclusion of safety for the use of D&C Green No. 6 at 0.1 percent in polyglycolic acid sutures and argued that use at 0.5 percent in microsurgical sutures would result in substantially lower exposure to the color additive than from its currently authorized use for general surgical suture applications. The petitioner states that the largest microsurgical suture (U.S.P. size 8–0) colored at the 0.5 percent level requires about one-tenth as much color additive per centimeter as a typical suture used for general surgery (U.S.P. size 2–0) colored at the 0.1 percent level.

In making its safety evaluation, the agency has considered the following toxicology studies submitted by the petitioner as part of its previous petition (CAP 2C0104) to list the use of D&C Green No. 6 at a level of 0.1 percent by weight in polyglycolic acid sutures: (1) a subcutaneous suture implantation study in rabbits for up to 90 days with sutures ranging in diameter from U.S.P. size 8–0 to U.S.P. size 2–0, (2) an ophthalmic surgery study in cats for up to 120 days with U.S.P. size 6–0 sutures, and (3) corneal implantation study in cats for up to 120 days with U.S.P. size 6–0 sutures.

Because polyglycolic acid sutures are absorbable, all the color additive was released into the neighboring tissue during these studies. Thus, the animals were exposed to at least as much color additive during these studies as they would have been if sutures of size 8–0 and smaller, containing 0.5 percent color additive, had been used. For example, U.S.P. size 6–0 sutures with 0.1 percent color additive and U.S.P. size 8–0 sutures with 0.5 percent color additive will both contain approximately 0.07 microgram of color additive per centimeter of suture. (The actual amount will vary because the size describes a range of allowed diameters.) On the other hand, a U.S.P. size 2–0 suture, commonly used in general surgery, with 0.1 percent color additive will contain approximately 10 times that amount.

In CAP 4C0186, the petitioner submitted the reports of several toxicity studies to establish that there is a reasonable certainty of no harm from use of D&C Green No. 6 in poly(glycolic acid-*co*-trimethylene carbonate) sutures. These studies include acute toxicity studies with suture extracts in mice, acute toxicity studies with suture implants in rats, 6 month suture implantation toxicity studies in rats and dogs, an antigenicity study with suture implants in guinea pigs, a fertility and general reproductive performance study with suture implants in rats, a teratology study with suture implants in rabbits, an evaluation of the suture for possible hemolytic activity on human blood, a pyrogenicity study with suture extract in rabbits, an in vitro cytotoxicity study on the suture, and genotoxicity studies on D&C Green No. 6, the suture, and extracts from the colored suture. The sutures used in the studies contained 0.21 percent D&C Green No. 6. Exaggerated amount of suture material were used in the implant studies. As part of its safety evaluation, the agency also considered the safety data previously submitted to support the listing of D&C Green No. 6 for use in polyglycolic acid sutures, externally applied drugs and cosmetics, and contact lenses.

The agency finds that the data referenced or submitted in 3C0170 and 4C0186 provide adequate bases on which to assess the safety of the respective petitioned uses of D&C Green No. 6. In its evaluation of the various studies, FDA found no adverse toxic effects that were attributable to D&C Green No. 6.

C. Carcinogenic Impurity and Risk Assessment

Although D&C Green No. 6 itself has not been shown to cause cancer, it does contain a carcinogenic impurity, *p*-toluidine. FDA has concluded that it is possible to list the use of such a color additive. (See 47 FR 14140–14145.) In deciding whether the use of such an additive is safe, FDA considers, among other things, its calculation of the upper limit of risk from lifetime exposure to the carcinogenic impurity. Evaluation of the risk from exposure to *p*-toluidine from the use of D&C Green No. 6 in sutures has two parts: (1) An assessment of probable exposure to *p*-toluidine and (2) an extrapolation of the risk from *p*-toluidine from the levels of exposure to it in the animal bioassay to the much lower levels of exposure for humans. For a complete discussion of risk from D&C Green No. 6 in sutures, see the agency's proposal to establish uniform specifications elsewhere in this issue of the **Federal Register.**

1. Exposure

In estimating a high user's lifetime-averaged probable exposure to *p*-toluidine from the petitioned uses of D&C Green No. 6 in polglycolic acid and poly(glycolic acid-*co*-trimethylene carbonate) sutures, the agency has considered the amount of *p*-toluidine in D&C Green No. 6 and the amount of suture that might be implanted in a person as a result of multiple surgeries over a lifetime.

Data on the amount of *p*-toluidine in D&C Green No. 6 indicate that the color additive will contain approximately 500 parts per million of *p*-toluidine. (See discussion of *p*-toluidine analyses at 47 FR 14140.)

The amount of suture used during surgery will vary with the type of surgery. The agency estimates that the maximum length of suture used in any one surgery is not likely to exceed 5 meters. Most types of surgery would use far less. The agency also believes that, over a lifetime, a person is not likely to receive more than 10 meters of any suture material (Ref. 2).

Finally, for purposes of estimating exposure, the agency is using U.S.P. size 2–0 suture as a model because it is a very common size suture for general surgery.

In assessing the safety of the petitioned uses of D&C Green No. 6, FDA is evaluating the suture use that would result in the greatest exposure to *p*-toluidine and is assuming that all exposure arises from this use. The uses of D&C Green No. 6 that are the subject of 3C0170 and 4C0186 would only replace the highest exposure with a lower one.

The highest level at which D&C Green No. 6 added to sutures is 0.75 percent, the level at which this color additive is used in polyethylene terephthalate suture material. The agency recognizes that the polyethylene terephthalate suture is a nonabsorbable suture, and that the suture will be removed long before all of the color additive migrates. Nonetheless, the agency will assume that all the *p*-toluidine in a polyethylene terephthalate suture containing 0.75 percent D&C Green No. 6 migrates because this assumption provides the basis for a worst-case estimate for all suture use.

Using this assumption, the agency estimates that lifetime-averaged exposure to *p*-toluidine from D&C Green No. 6 in sutures is not likely to exceed 0.15 nanogram per day (150 picograms per day) (Ref. 3). This estimate of exposure far exceeds the estimated level of exposure from 0.5 percent D&C Green No. 6 in U.S.P. size 8–0 and smaller polyglycolic acid sutures (no more than .003 nanogram per day) or from poly(glycolic acid-*co*-trimethylene carbonate) absorbable sutures containing 0.21 percent D&C Green No. 6 (0.065 nanogram per day).

2. Risk Extrapolation

In the agency's 1982 document permanently listing D&C Green No. 6 for use in externally applied drugs and cosmetics (47 FR 14138), FDA described its use of quantitative risk assessment procedures to extrapolate from the *p*-toluidine dietary dose in the animal experiment to the very low levels of human exposure. The risk analysis employed in the present document relies on the same risk assessment procedures.

The simplest method for estimating risk to compare the human lifetime-averaged systemic exposure to *p*-toluidine from sutures colored with D&C Green No. 6 to the lifetime-averaged systemic exposure of mice fed *p*-toluidine in the Weisburger et al. bioassay (Ref. 1), in which *p*-toluidine was shown to be a carcinogen. On this basis, using a linear extrapolation, the agency estimates the upper limit individual lifetime carcinogenic risk from exposure to sutures containing 0.75 percent D&C Green No. 6 is 1 in 10 billion or 1 in 100 billion, depending on the specific assumptions in the linear extrapolation procedure (Ref. 3).

The agency recognizes that exposure to *p*-toluidine from sutures is different from that encountered in the Weisburger bioassay, which the agency is using for its risk extrapolation. Exposure to *p*-toluidine from sutures is parenteral and localized, while exposure in the Weisburger bioassay was through lifetime dietary administration. The agency does not wish to imply that linear time-averaging of dose from a dietary study is necessarily the best way to estimate risk from sutures. However, in the absence of explicit scientific information indicating how these exposure differences affect risk, the agency believes that the extremely small risk estimated by simple linear time-averaging of the dose provides a sufficiently large margin of safety for the agency to conclude that the petitioned use of this color additive in sutures is safe.

D. Specifications

In the 1982 document, the agency established new specifications for D&C Green No. 6 limiting the maximum concentration at which *p*-toluidine may be present. FDA has incorporated these new specifications in all of the final rules listing uses of D&C Green No. 6 that it has issued since 1982. The agency is also requiring that the D&C Green No. 6 used in polyglycolic acid and ploy(glycolic acid-*co*-trimethylene carbonate) sutures in accordance with this final rule comply with the new specifications. Elsewhere in this issue of the **Federal Register**, the agency is proposing to amend the regulations to apply this set of specifications to all permitted uses of D&C Green No. 6.

V. Conclusion on Safety

Based on the available toxicity data, the small amount of the color additive in sutures, the agency's exposure calculation, and the vanishingly small risk from the exposure to *p*-toluidine that results from this use of the color additive, FDA finds that the color additive D&C Green No. 6 is safe for use at 0.5 percent by weight in polyglycolic acid general surgical and ophthalmic surgical sutures not exceeding U.S.P. size 8–0. The agency also finds that this level of color additive is suitable for this use because it will impart an intense green color to the sutures which will enhance their visibility. Based on the information in CAP 4C0186, FDA also finds that the color additive D&C Green No. 6 is safe and suitable for use at 0.21 percent by weight in poly(glycolic acid-*co*-trimethylene carbonate) absorbable general surgical sutures.

VI. Changes in Codified Language

Sutures were regulated as drugs before the passage of the Medical Device Amendments of 1976 but are now regulated as medical devices. In a final rule published in the **Federal Register** of March 19, 1983 (48 FR 13020), FDA amended the color additive regulations by establishing new Subpart D under 21 CFR Part 74 to provide for listing certified color additives for use in or on medical devices and by listing in § 74.3206 (21 CFR 74.3206) D&C Green No. 6 for use in contact lenses. In the preamble to the March 29, 1983, final rule, FDA announced that, in the near future, it would move to Subpart D those color additives used in or on medical devices that are currently listed in Part 74 under Subpart B (drugs).

FDA is now moving to Subpart D the provisions of § 74.1206(b)(1), which set forth the specifications for D&C Green No. 6 for use in sutures, and of § 74.1206(c)(1), which list D&C Green No. 6 for that use. The agency is redesignating § 74.3206(b) as § 74.3206(b)(1) and § 74.1206(b)(1) as § 74.3206(b)(2). The agency is also redesignating § 74.1206(b)(2) as § 74.1206(b). Finally, FDA is revising §§ 74.2206 and 82.1206, which reference the specifications in § 74.1206(b)(2), to reflect the redesignation of § 74.1206(b)(2) as § 74.1206(b). These actions will avoid redundancy and simplify the regulations pertaining to D&C Green No. 6.

The agency is making two other editorial changes. First, because sutures are now regulated as medical devices instead of as drugs, the agency is deleting § 74.1206(c)(4), which states that if a suture is a new drug, it must have an approved new drug application in effect. Second, the agency is revising § 74.3206(c)(2), which currently provides that a contact lens in which D&C Green No. 6 is used is subject to the requirements of sections 510(k) and 515 of the act (21 U.S.C. 360(k) and 360e). To that section, the agency is adding a reference to section 520(g) of the act (21 U.S.C. 360j(g)), which was inadvertently omitted from the March 29, 1983, final rule, and is removing the specific reference to "contact lenses" and replacing it with a reference to "medical devices," to make clear that these requirements also apply to sutures. Because these changes are merely editorial, and do not impose nor delete any requirements but simply refer to existing statutory requirements, FDA finds that notice and comment rulemaking is unnecessary.

Finally, elsewhere in this issue of the **Federal Register**, FDA is proposing to revise § 74.3206(b) by substituting the term "medical devices" for the term "contact lenses" in § 74.3206(b)(1), so that all listings of D&C Green No. 6 in medical devices reference the same specifications, and by deleting the obsolete specifications for D&C Green No. 6 in § 74.3206(b)(2). In that document FDA is also proposing to remove § 74.3206(c)(3) (21 CFR 74.3206(c)(3), formerly 21 CFR 74.1206(c)(3)), which prohibits migration of the color additive to the surrounding tissue. A final rule based on this proposal will establish a uniform set of specifications for the use of D&C Green No. 6 in drugs, cosmetics, and medical devices.

In accordance with § 71.15 (21 CFR 71.15), the petitions and the documents that FDA considered and relied upon in reaching its decisions to approve these petitions are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in § 71.15, the agency will delete from the documents any materials that are not available for public

VOL 51
ISS 55
MR 21
1986
UMI

disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of these actions and has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's findings of no significant impact and the evidence supporting these findings may be seen in the Docket Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday. FDA's regulations implementing the National Environmental Policy Act (21 CFR Part 25) have been replaced by a rule published in the **Federal Register** of April 26, 1985 (50 FR 16636, effective July 25, 1985). Under the new rule, actions of this type would require an environmental assessment under 21 CFR 25.31a(a).

VII. Reference

The following information has been placed on file at the Dockets Management Branch (address above) and is available for review in that office between 9 a.m. and 4 p.m., Monday through Friday.

1. Weisburger, F.K., *et al.*, "Testing of Twenty-one Environmental Aromatic Amines or Derivatives for Long-Term Toxicity or Carcinogenicity," *Journal of Environmental Pathology and Toxicology*, 2:325–356, 1978.
2. Memorandum to the record dated October 10, 1985, from the Food Additive Chemistry Evaluation Branch, Re: "Exposure Estimates for Color Additives in Sutures."
3. Memorandum dated November 1, 1985, from the Quantitative Risk Assessment Committee to Director, Office of Toxicological Sciences, Re: "Risk from *p*-Toluidine in Sutures."

Any person who will be adversely affected by these regulations may at any time on or before April 21, 1986, file with the Dockets Management Branch (address above), written objections thereto. Objections shall show how the person filing will be adversely affected by the regulation, specify with particularity the provisions of the regulation deemed objectionable, and state the grounds for the objections. Objections shall be filed in accordance with the requirements of 21 CFR 71.30. If a hearing is requested, the objections shall state the issue for the hearing, shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday. Notice of the filing of objections or the lack thereof will be announced by publication in the **Federal Register.**

List of Subjects

21 CFR Part 74

Color additives, Cosmetics, Drugs, Medical devices.

21 CFR Part 82

Color additives, Cosmetics, Drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Parts 74 and 82 are amended as follows:

PART 74—LISTING OF COLOR ADDITIVES SUBJECT TO CERTIFICATION

1. The authority citation for 21 CFR Part 74 continues to read as follows:

Authority: Secs. 701, 706, 52 Stat. 1055–1056 as amended, 74 Stat. 399–407 as amended (21 U.S.C. 371, 376); 21 CFR 5.10.

2. In § 74.1206 by revising paragraphs (b) and (c), to read as follows:

§ 74.1206 D&C Green No. 6.

* * * * *

(b) *Specifications.* The color additive D&C Green No. 6 for use in coloring externally applied drugs shall conform to the following specifications and shall be free from impurities other than those named to the extent that such other impurities may be avoided by current good manufacturing practice:

Volatile matter (at 135 °C), not more than 2.0 percent.
Water-soluble matter, not more than 0.3 percent.
Matter insoluble in carbon tetrachloride, not more than 1.5 percent.
p-Toluidine, not more than 0.1 percent.
1,4-Dihydroxyanthraquinone, not more than 0.2 percent.
1-Hydroxy-4-[(4-methylphenyl)amino]-9, 10-anthracenedione, not more than 5.0 percent.
Lead (as Pb), not more than 20 parts per million.
Arsenic (as As), not more than 3 parts per million.
Mercury (as Hg), not more than 1 part per million.
Total color, not less than 96.0 percent.

(c) *Uses and restrictions.* The color additive D&C Green No. 6 may be safely used for coloring externally applied drugs in amounts consistent with current good manufacturing practice.

* * * * *

3. In § 74.2206 by revising paragraph (a), to read as follows:

§ 74.2206 D&C Green No. 6.

(a) *Identity and specifications.* The color additive D&C Green No. 6 shall conform in identity and specifications to the requirements of § 74.1206 (a) and (b).

* * * * *

4. In § 74.3206 by revising paragraphs (a), (b), and (c), to read as follows:

§ 74.3206 D&C Green No. 6.

(a) *Identity.* The color additive D&C Green No. 6 shall conform in identity to the requirements of § 74.1206(a).

(b) *Specifications.* (1) The color additive D&C Green No. 6 for use in coloring contact lenses shall conform to the specifications of § 74.1206(b).

(2) The color additive D&C Green No. 6 for use in coloring surgical sutures shall conform to the following specifications and shall be free from impurities other than those named to the extent that such other impurities may be avoided by current good manufacturing practice, except that D&C Green No. 6 for use in coloring surgical sutures listed in paragraph (c)(1) (iv) and (v) of this section shall conform to the specifications in § 74.1206(b):

Volatile matter (at 135 °C), not more than 2.0 percent.
Water-soluble matter, not more than 0.3 percent.
Matter insoluble in carbon tetrachloride, not more than 1.5 percent.
Intermediates, not more than 0.5 percent.
Lead (as Pb), not more than 10 parts per million.
Arsenic (as As), not more than 1 part per million.
Pure color, not less than 96.0 percent.

(c) *Uses and restrictions.* (1) The color additive D&C Green No. 6 may be safely used at a level (i) not to exceed 0.03 percent by weight of the lens material for coloring contact lenses; (ii) not to exceed 0.75 percent by weight of the suture material for coloring polyethylene terephthalate surgical sutures, including sutures for ophthalmic use; (iii) not to exceed 0.1 percent by weight of the suture material for coloring polyglycolic acid surgical sutures with diameter greater than U.S.P. size 8–0, including sutures for ophthalmic use; (iv) not to exceed 0.5 percent by weight of the suture material for coloring polyglycolic acid surgical sutures with diameter not greater than U.S.P. size 8–0, including sutures for ophthalmic use; and (v) not to exceed 0.21 percent by weight of the suture material for coloring poly(glycolic acid-*co*-trimethylene carbonate) sutures (also referred to as 1,4-dioxan-2,5-dione polymer with 1,3-dioxan-2-one) for general surgical use.

(2) Authorization for these uses shall not be construed as waiving any of the requirements of sections 510(k), 515, and 520(g) of the Federal Food, Drug, and Cosmetic Act with respect to the medical device in which D&C Green No. 6 is used.

(3) When the sutures listed in paragraph (c)(1) (ii) through (iv) of this section are used for the purposes specified in their labeling, the color additive does not migrate to the surrounding tissue.

* * * * *

PART 82—LISTING OF CERTIFIED PROVISIONALLY LISTED COLORS AND SPECIFICATIONS

5. The authority citation for 21 CFR Part 82 continues to read as follows:

Authority: Secs. 701, 706, 52 Stat. 1055–1056 as amended, 74 Stat. 399–407 as amended (21 U.S.C. 317, 376); 21 CFR 5.10.

6. In § 82.1206 by revising the first sentence, to read as follows:

§ 82.1206 D&C Green No. 6.

The color additive D&C Green No. 6 shall conform in identity and specifications to the requirements of § 74.1206 (a) and (b) of this chapter. * * *

Dated: March 18, 1986.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing-Federal Housing Commissioner

24 CFR Part 201

[Docket No. N-86-1600; FR-2200]

Mortgage and Loan Insurance Programs; Title I Property Improvement and Manufactured Home Loans; Eligible Use of Loan Proceeds and Income Requirements for Borrowers

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice on the eligible use of loan proceeds and income requirements for borrowers.

SUMMARY: This notice announces certain HUD findings required under the rule for property improvement and manufactured home loans under Title I, section 2 of the National Housing Act (12 U.S.C. 1703). This rule (24 CFR Part 201) was published in the **Federal Register** of October 25, 1985 (50 FR 43516) and requires that these findings be published by Notice in the **Federal Register.** Under §§ 201.20(b)(2) and 201.21(b)(5), the Secretary finds that certain products, improvements, items, and activities may not be financed with the proceeds of Title I loans. Under § 201.22(b), in order for a borrower's income to be considered adequate for a manufactured home loan, the Secretary has determined that certain maximum percentages of net effective income will be required.

EFFECTIVE DATE: January 15, 1986.

FOR FURTHER INFORMATION CONTACT: William C. Sorrentino, Director, Office of Manufactured Housing and Regulatory Functions, Room 9158, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410, telephone (202) 755–5210. (This is not a toll-free number).

SUPPLEMENTARY INFORMATION: The Department published in the **Federal Register** of October 25, 1985 (50 FR 43516) a final rule on property improvement and manufactured home loans under Title I, section 2 of the National Housing Act (12 U.S.C. 1703). Included among the requirements in that rule (24 CFR Part 201) is HUD's obligation to publish certain determinations by Notice in the **Federal Register** concerning the eligible use of loan proceeds and income requirements for borrowers. This Notice implements the **Federal Register** publication requirements in §§ 201.20(b)(2), 201.21(b)(5), and 201.22(b) of that rule.

Concerning § 201.20(b)(2), the rule states that proceeds from property improvement loans must be used only to finance renovations that substantially protect or improve the basic livability or utility of the property. In addition, the Secretary is required to publish by Notice in the **Federal Register** a list of items and activities that may not be financed with the proceeds of any property improvement loan. This list may also be amended by Notice. If a lender questions the eligibility of any item or activity, it shall request a specific ruling by the Secretary before making a loan.

Under § 201.20(b)(2), the Secretary finds that the following categories of products and improvements may not be financed with a Title I property improvement loan: (1) Products or improvements that do not become a permanent part of the real property and (2) products or improvements that are considered luxury items, as follows:

Barbecue pits.
Bathhouses.
Dumbwaiters.
Exterior hot tubs, saunas, spas or whirlpool baths.
Flower boxes.
Hangars for airplanes.
Kennels.
Kitchen appliances which are not designed or manufactured to be built into or permanently affixed to the structure.
Outdoor fireplaces or hearths.
Photo murals.
Sprinkler systems and fire extinguishers (except that these items shall be eligible in the case of fire safety equipment loans).
Swimming pools.
Television antennae and satellite discs.
Tennis courts.
Tree surgery.
Waterproofing of a structure by pumping or injecting any substance in the earth adjacent to or beneath the foundation or basement floor.

Section 201.21(b)(5) of the rule states requirements for HUD's publication by Notice of a list of items and activities that similarly may not be financed with proceeds of any manufactured home loan. Under § 201.21(b)(5), the Secretary finds that the following items may not be financed with a Title I manufactured home loan: (1) Small appliances (e.g., radios, stereos, toasters, and televisions) that are not a permanent part of the property; (2) HUD inspection fees, permits, and seals (although they may be included in the wholesale (base) price of the home); (3) decorator kits, bed linen and spreads; and (4) decorations or appurtenances that are

VOL
51
ISS
55
MR
21
1986
UMI

not a permanent part of or attached to the property securing repayment of the loan. In addition, the following items may not be included in a manufactured home purchase loan, except at their actual cost to the borrower as stated in the retail purchase contract under § 201.16(b)(4) and as approved by the Secretary: garage, patio, carport, or other comparable appurtenance.

Section 201.22(b) of the rule states that the Secretary will publish by Notice in the Federal Register the maximum percentages of net effective income for borrowers for Title I manufactured home loan applications. An applicant's income may not exceed certain maximum percentages of net effective income published by the Secretary, which will be based upon generally prevailing interest rates and upon HUD's experience of claims/loan ratios, for prospective use by lenders in approving such loan applications.

Under the criteria in § 201.22(b), the Secretary has determined that a borrower's income will be considered adequate: (1) Where the total prospective housing expenses do not exceed 38 percent of the borrower's net effective income and (2) where the total of such prospective housing expenses and other recurring expenses do not exceed 53 percent of the borrower's net effective income. The terms "total prospective housing expenses" and "net effective income" are defined in § 201.22(b).

Dated: January 16, 1986.

Susan K. Zagame,

Acting General Deputy Assistant Secretary for Housing, Deputy Federal Housing Commissioner.

BILLING CODE 4210-27-M

Office of the Secretary

24 CFR Parts 800, 813, 900, and 913

[Docket No. R-86-1279; FR-2181]

Transfer of Section 23 Programs to the Assistant Secretary for Public and Indian Housing

AGENCY: Office of the Secretary, HUD.

ACTION: Final rule.

SUMMARY: This document makes changes in Parts 800, 813 and 913 to reflect a change made in the delegation of authority for administration of the housing programs authorized by sections 10(c) and 23 of the United States Housing Act of 1937, 42 U.S.C. 1410 and 1421(b). The amendment to the delegation of authority, published on May 21, 1985 (50 FR 20943), transferred authority for the section 23 programs from the Assistant Secretary for Housing—Federal Housing Commissioner to the Assistant Secretary for Public and Indian Housing.

EFFECTIVE DATE: May 5, 1986.

FOR FURTHER INFORMATION CONTACT: Thomas Sherman, Director, Office of Public Housing, 451 Seventh Street SW., Washington, DC 20410-5000, telephone (202) 755-5380. [This is not a toll free-telephone number.]

SUPPLEMENTARY INFORMATION: Part 800 governs the section 23 Housing Assistance Payments (Section 23 HAP) program for newly constructed or substantially rehabilitated housing. The regulations for this program were first published on April 22, 1974 (39 FR 14303) to implement section 23 of the United States Housing Act of 1937 (1937 Act), before amendment of that Act by the Housing and Community Development Act of 1974 (1974 Act). Although section 8 of the 1974 Act authorized a housing assistance payments (Section 8 HAP) program that has essentially replaced the section 23 HAP program and many section 23 projects have been converted to section 8 assistance, there are still some section 23 projects that are covered by Part 800.

Part 800 is located in Chapter VIII, a chapter for the housing assistance payments program regulations of the Assistant Secretary of Housing. Since authority for this program has been transferred to the Assistant Secretary for Public and Indian Housing, whose rules appear in Chapter IX, it is necessary to redesignate Part 800 as a new Part 900, placing it in Chapter IX.

Two other parts are affected by this document. Part 813 prescribes the definition of income and rent calculations for the section 8 HAP programs. It also has covered the section 23 programs and programs administered under section 10(c) of the 1937 Act before its amendment by the 1974 Act. The counterpart of Part 813 for programs administered by the Assistant Secretary for Public and Indian Housing is Part 913. Therefore, this document amends § 813.101 to remove these programs from the list of those covered by Part 813, and it amends § 913.101 to add these programs to the list of covered programs This change has no substantive effect.

Findings and Certifications

The Department has determined that this reorganization of regulations need not be published as a proposed rule, as generally required by the Administrative Procedure Act (APA), since this rulemaking merely reflects agency organization and practice. It is thus exempt under section 553(b)(A) of the APA from the requirement of prior notice and comment.

A Finding of No Significant Impact with respect to the environment under the National Environmental Policy Act (42 U.S.C. 4321-4347) is unnecessary, since this reorganization of regulations is categorically exempt from the requirement of an environmental assessment under § 50.20 (k) of HUD regulations implementing that Act.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the rule indicates that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in cost or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Under the Regulatory Flexibility Act (5 U.S.C. 605(b)), the undersigned hereby certifies that this rule does not have a significant economic impact on small entities, because it merely changes the organization of the Department's regulations.

This rule was not listed in the Department's Semiannual Regulatory Agenda published on October 29, 1985 (50 FR 44166), under Executive Order 12291 and the Regulatory Flexibility Act.

The Catalog of Federal Domestic Assistance Program Number is 14.146, Low Income Housing Assistance Program.

List of Subjects

24 CFR Part 800

Grant programs: Housing and community development, Rent subsidies.

24 CFR Part 813

Lower income housing, Loan programs—Housing and community development, Utilities.

24 CFR Part 900

Grant programs: Housing and community development, Rent subsidies.

24 CFR Part 913

Grant programs: Housing and community development, Low and moderate income housing, Public housing.

PART 800—[REDESIGNATED AS 900]

Accordingly, the Department hereby amends Chapters VIII and IX as follows:

1. Part 800—Section 23 Housing Assistance Payments Program—New Construction and Substantial Rehabilitation is redesignated as a new Part 900—Section 23 Housing Assistance Payments Program—New Construction and Substantial Rehabilitation, and §§ 800.101–800.203 are redesignated as Section 900.101–900.203, respectively.

2. In the list below, for each section listed in the left column, remove the reference indicated in the middle column from wherever it appears and add in its place the reference indicated in the right column:

Section	Remove	Add
900.102	Part 813	Part 913.
900.103	§ 800.102(b)	§ 900.102(b).
900.103	Parts 812 and 813	Parts 912 and 913.
900.202	§ 800.202(e)	§ 900.202(e).

PART 813—DEFINITION OF INCOME, INCOME LIMITS, RENT AND REEXAMINATION OF FAMILY INCOME FOR THE SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAMS AND RELATED PROGRAMS

3. The title of Part 813 is revised to read as set forth above.

4. The authority citation for Part 813 continues to read as follows:

Authority: Sections 3, 8 and 16, United States Housing Act of 1937 (42 U.S.C. 1437a, 1437f and 1437n); section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 813.101 [Amended]

5. Section 813.101 is amended by removing the phrase "; and applicants and tenants assisted under Sections 10(c) and 23 of the 1937 Act as in effect before amendment by the Housing and Community Development Act of 1974 (42 U.S.C. 1410 and 1421b (1970 ed.))." and by adding a period.

PART 913—DEFINITION OF INCOME, INCOME LIMITS, RENT AND REEXAMINATION OF FAMILY INCOME FOR THE PUBLIC HOUSING AND INDIAN HOUSING PROGRAMS

6. The authority citation for Part 913 continues to read as follows:

Authority: Secs. 3, 6, and 16, United States Housing Act of 1937 (42 U.S.C. 1437a, 1437d, 1437n); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 913.101 [Amended]

7. Section 913.101 is amended by adding after "Opportunities Programs" the phrase "; and applicants and tenants assisted under sections 10(c) and 23 of the 1937 Act as in effect before amendment by the Housing and Community Development Act of 1974 (42 U.S.C. 1410 and 1421b (1970 ed.))."

Dated: March 12, 1986.

Samuel R. Pierce, Jr.,

Secretary.

BILLING CODE 4210-32-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 602

[T.D. 8071]

Income Tax; Reserve for Certain Guaranteed Debt Obligations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to final rule.

SUMMARY: This document contains a correction to the Federal Register publication on Friday, January 17, 1986, beginning at 51 FR 2478 of the final regulations which were the subject of Treasury Decision 8071. T.D. 8071 relates to the treatment of reserves for certain guaranteed debt obligations.

EFFECTIVE DATE: The final regulations that are the subject of this correction are effective for taxable years ending after October 21, 1965.

FOR FURTHER INFORMATION CONTACT: Carroll Yue of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224. (Attention: CC:LR:T). Telephone 202-566-3935 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

On January 17, 1986, final regulations relating to the treatment of reserves for certain guaranteed debt obligations were published in the Federal Register (51 FR 2478). These regulations are effective for taxable years ending after October 21, 1965. These amendments were made to conform the regulations to changes made by the Act of November 2, 1966 (Pub. L. 89-722, 80 Stat. 1151), which added section 166(g) to the Internal Revenue Code of 1954. Section 166(g) was redesignated as section 166(f) by section 605 of the Tax Reform Act of 1976 (90 Stat. 1575).

Need for Correction

As published, Treasury Decision 8071 includes the following language in incorrect sequence:

"*Example.* For 1977, A, a dealer in automobiles who uses the calendar year as the taxable year, adopts in accordance with this section the reserve method of treating section 166(f)(1)(A) guaranteed debt obligations. A's first year in business as an automobile dealer is 1973. For 1972, 1973, 1974, 1975, and 1976, A's records disclose the following information with respect to these obligations:

Year	Obligations outstanding at close of year	Gross losses from these obligations	Recoveries from these obligations	Net losses from these obligations
1972	$0	$0	$0	$0
1973	780,000	9,700	1,000	8,700
1974	795,000	8,900	1,050	7,850
1975	850,000	8,850	850	8,000
1976	820,000	9,300	1,400	7,900
Total	3,245,000	36,750	4,300	32,450

The opening balance for 1977 of A's reserve for these obligations is $8,200, determined as follows:

$$\$8,200 = \$820,000 \times \frac{\$32,450}{\$3,245,000}$$

(3) *More appropriate balance.* A taxpayer may select a balance other than the one produced under paragraph (e)(1) of this section if it is more appropriate, based upon the taxpayer's actual experience, and in the event the taxpayer's return is examined, if the balance is approved by the district director.

This language appears on page 2480, third column, immediately following paragraph (d)(8), and preceding paragraph (e)(1).

Correction of Publication

Accordingly, the publication of Treasury Decision 8071, which was the subject of FR Doc. 86-1132, is corrected by removing the above-mentioned language which appears on page 2480, third column, immediately following paragraph (d)(8) and preceding paragraph (e)(1), and inserting the same

VOL 51
ISS 55
MR 21
1986
UMI

language on page 2481, first column, immediately following paragraph (e)(2) and preceding paragraph (e)(4).

Paul A. Francis,

Acting Director, Legislation and Regulations Division.

BILLING CODE 4830-01-M

Office of the Secretary

31 CFR Part 128

Reporting of International Capital and Foreign Currency Transactions and Holdings, Transfers of Credit, and Export of Coin and Currency

AGENCY: Department of the Treasury, Office of the Secretary.

ACTION: Final rule.

SUMMARY: Subpart B of Part 128, Title 31, Code of Federal Regulations, describes those forms prescribed under Part 128 for reporting of data on international capital transactions. This final rule adds to Subpart B a new § 128.11c, which describes and thereby authorizes the issuance of Treasury International Capital (TIC) Form BL–3. TIC Form BL–3 (a copy of which is attached) is designed for use by a bank or other financial intermediary in the United States to notify a nonbanking customer that a new foreign borrowing denominated in U.S. dollars is effective and that the customer may have an obligation to report the outstanding loan balance on TIC Form CQ–1. The obligation to report on TIC Form CQ–1 applies when such outstanding borrowings from foreigners will not be reported by the bank or other financial intermediary on TIC Form BL–2.

DATE: March 21, 1986.

FOR FURTHER INFORMATION CONTACT: Gary A. Lee, Manager, Treasury International Capital Reporting System, Room 5453, Department of the Treasury, 15th and Pennsylvania Avenue NW., Washington, DC 20220 (202–566–3114).

SUPPLEMENTARY INFORMATION:

Background

Part 128 of Title 31, Code of Federal Regulations, sets forth the requirements and describes the forms used for reporting international capital and foreign currency transactions and holdings. Large amounts of offshore loans to U.S. nonbank residents are not being properly reported on the TIC C-series forms prescribed in Subpart B of Part 128. Much of this under reporting results from confusion among nonbank borrowers over whether the source of their loans is domestic or foreign. This confusion is exacerbated by the failure of U.S. intermediaries to comply with existing obligations, specified in the Form BL–2 instructions, either to report certain foreign transactions on behalf of their U.S. customers or to inform those customers of foreign ownership of claims held against them so the customers can themselves report the transactions on their own TIC forms.

New TIC Forms BL–3 formalizes the present arrangement whereby the intermediary is given the option to either include "reportable foreign borrowings" or Form BL–2, "Custody Liabilities of Reporting Banks, Brokers and Dealers to Foreigners,' Payable in Dollars," (OMB No. 1505–0018), on an unidentified basis or to notify the customer of certain foreign borrowings on Form BL–3. On the latter form, a bank or other financial intermediary advises the U.S. nonbanking entity that (1) the intermediary is acting as the U.S. address of the foreign lender in servicing drawn and outstanding loan balances; and (2) that the loan balances will not be reported as custody liabilities to foreign lenders on the intermediary's TIC Form BL–2. On receipt of the notification, the nonbanking firm will be formally advised of his subsequent reporting responsibility to include the liability on TIC Form CO–1, "Financial Liabilities to, and Claims on, Unaffiliated Foreigners," (OMB No 1505–0024). Banks and other financial intermediaries will also be required to file copies of every Form BL–3 with the Federal Reserve Bank of New York for data monitoring purposes.

Section 128.2(a)(2) of Title 31 mandates that persons subject to the jurisdiction of the United States and engaged in any transfer of credit between any person within the United States and any person outside of the United States shall furnish information concerning such transfers as required by report forms and instructions prescribed in Subpart B of Part 128. The addition to Subpart B of § 128.11c, describing new TIC Form BL–3, will provide the necessary authorization for use of this form.

Notice and Comment

In response to a notice of proposed rule making dated May 10, 1985 which invited comments through July 15, 1985 and during an earlier April 1 to June 1, 1985 informal comment period, the Department of the Treasury received twenty-one comments on proposed TIC Form BL–3. These comments came from fourteen individual banks, four domestic banking associations and three associations of foreign banks. In addition, two letters of comment were received several weeks after the comment period had ended, including a foreign bank association and a representative office. The Treasury has considered all of the comments received in formulating the final rule. The following summarizes the comments and sets forth Treasury's responses.

Burden and Cost of Reporting

Comment: Commenters cited three reasons why Form BL–3 would greatly increase the current reporting burden and associated costs. First, that the proposed scope of the BL–3 would encompass foreign loan transactions in addition to those in which the U.S. intermediary actually acts as the U.S. address of the foreign lender. Second, the Form BL–3 instructions were interpreted by some commenters to require U.S. banking offices to gather information and file a notification form on all loans granted to U.S. nonbank residents by related foreign offices whether or not a U.S. banking office is directly involved in the transaction. Based on this interpretation, some commenters argued that Form BL–3 requirements constituted an extraterritorial attempt by Treasury to collect information and, with respect to U.S. offices of foreign banks, a penalty for conducting business in the U.S. Third, that a separate Form BL–3 notification would be required each time a reportable borrowing arrangement was renegotiated or rolled-over.

Response: Treasury has taken steps to provide that any notification pursuant to Form BL–3 requirements will not be unreasonably burdensome either to U.S.-chartered banks or to U.S. offices of foreign banks. First, Treasury has amended the Form BL–3 instructions to require a U.S. intermediary to make notification only of loans and transactions *drawn down* and *outstanding* and for which the intermediary knowingly acts as the U.S. address of a foreign lender. Second, Treasury has amended Form BL–3 notification requirements so that they clearly require information from U.S. banking offices only with regard to loan arrangements in which they are directly involved and not with regard to all loans granted to U.S. nonbank residents by related foreign offices. In all cases, the intermediary will have the option to report such transactions on Form BL–2 or to file the Form BL–3 Notification. Third, a rollover of a foreign loan need not be subject to Form BL–3 notification provided either that a notification is issued at the time of the first take-down of the loan or that the intermediary

includes the outstanding balances on such loans on its own Form BL–2.

Inclusion of Representative Offices

Comment: There was strong objection to the specific inclusion of representative offices among potential Form BL–3 respondents on the grounds that representative offices do not report on Form BL–2, may not legally undertake banking business, maintain no records and often are one-person operations. Further, it was argued that in most cases the loans that were generated by representative offices for the foreign parent were in fact serviced by a U.S. branch or agency of the parent. In such cases, the branch or agency would be able to shoulder any TIC reporting responsibility.

Response: Treasury has exempted representative offices from any Form BL–3 notification responsibility.

Foreign Confidentiality Laws

Comment: Many commenters stated that the requirement for filing a copy of Form BL–3 with the Federal Reserve Bank of New York could in many cases put the U.S. intermediary in violation of foreign bank secrecy laws because it would reveal proprietary information; e.g., customer names and amounts in accounts of foreign banking offices. Many in the industry asserted that this could result in jurisdictional conflicts and litigation, thereby involving substantial additional costs.

Response: Treasury has amended the Form BL–3 instructions to clarify that the intermediary has the option of including "reportable foreign borrowings" on Form BL–2 on an unidentified basis if it chooses not to notify both the customer and the Federal Reserve Bank of New York of such foreign borrowings on Form BL–3.

Definitional Problems—Need for Clarification

Comment: A number of commenters stated that the instructions to proposed Form BL–3 did not clearly define the types of transactions that were to be encompassed by the term "reportable foreign borrowing," and that the instructions should contain examples of loans and credit arrangements either covered or excluded from the scope of the reporting requirement. In particular, commenters asked that Treasury clearly state whether the following arrangements are within the scope of the Form BL–3 reporting requirement: loans to foreign affiliates of U.S. nonbank entities, loan participations and "contingent" liabilities such as standby letters of credit, performance bonds and guarantees.

Response: Treasury has refined the reporting instructions for Form BL–3 to define clearly the types of loans and credit arrangements that are to be considered "reportable foreign borrowings."

Reporting Threshold and Exemptions

Comment: Several commenters argued that the notification threshold on proposed Form BL–3 ($1 million per borrowing arrangement) should be tied to the Form BL–2 reporting threshold (currently $15 million of aggregate reportable liabilities). Further, several commenters objected to the proposed Form BL–3 notification requirement for new foreign loans (overnights and others) scheduled to mature before the end of the current calendar quarter since loans outstanding at the quarter end only are reportable by nonbank borrowers on TIC Form CQ–1.

Response: Treasury has amended the requirements to provide that banks and other intermediaries who opt for Form BL–3 notification of "reportable foreign borrowings" will not be required to submit Form BL–3 until "reportable foreign borrowings" and other "custody" items covered by Form BL–2 aggregate to $15 million or more as of the month end in which the borrowing is initially drawn and outstanding. Further, in the interest of reduced reporting burden, Treasury has exempted from optional Form BL–3 notification any "reportable foreign borrowings" which are scheduled to mature before the end of the current calendar quarter. Form BL–3 notification will be applicable to borrowings maturing during the next or subsequent quarters only. However, outstanding balances of overnights and other loans booked abroad which constitute "reportable foreign borrowings" and which mature before the end of the next calendar quarter may be reportable on Form BL–2 if outstanding as of the last business day of a month.

In addition, Treasury has changed the filing date of Form BL–3 from 10 days to 15 days following the month-end so as to correspond with the filing deadline for Form BL–2.

Foreign Currency Denominated Borrowings

Comment: Several commenters complained that proposed Form BL–3 exceeded the scope of Form BL–2 in that it would require notification of borrowings payable in foreign currencies as well as borrowings payable in dollars.

Response: Treasury has limited the notification requirements of Form BL–3 to encompass borrowings payable in U.S. dollars only.

Alternative Sources of Information

Comment: There were some suggestions that Treasury should explore other avenues of information as a means of measuring the completeness of U.S. data on foreign lending to U.S. nonbanks. It was pointed out such data are currently collected by a number of foreign governments and central banks that perhaps could be used by the Treasury. A specific source of alternative aggregate information was cited: Table 7YR–D, "Cross-Border Bank Credits to Nonbanks by Residence of Borrower," published in the IMF's *International Financial Statistics*. It was suggested that Treasury seek any necessary additional detail on these borrowings from the foreign collection authorities themselves.

Response: The Treasury fully recognizes the data collection activities of other countries and in fact directly shares non-confidential TIC aggregates on an ongoing basis with several countries and international agencies, including the IMF. The data readily available from these other sources are not detailed enough for Treasury's needs. Even if other countries were to share finer detail, which is most unlikely given their confidential character, the data would not be sufficiently precise to complement respondent data reported in the TIC System and to facilitate TIC data editing procedures. Further, data collection systems differ among counties. Form BL'–3's purpose is to improve compliance with existing TIC reporting requirements. We believe that implementation of the form, as revised, will help close current reporting gaps in the TIC statistical series.

Special Analyses

This rule provides technical clarification of existing reporting requirements. For this reason, the Department of the Treasury has determined that this document does not constitute a "major" rule as defined in Executive Order 12291 and that a regulatory impact analysis is not required; has certified, pursuant to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), that this rule will not have a significant economic impact on a substantial number of small entities; and has determined that a delayed effective date is unnecessary pursuant to 5 U.S.C. 553(d)(3).

Amendment

Part 128, Subpart B, Chapter I of Title 31, Code of Federal Regulations is amended as set forth below:

PART 128—[AMENDED]

1. The authority citation for Part 128 continues to read as follows:

Authority: Sec. 8, Pub. L. 79–171, 59 Stat. 515, 22 U.S.C. 286f; Sec. 4, Pub. L. 94–472, 90 Stat. 2059, 22 U.S.C. 3103; E.O. 10033, 14 FR 561, 3 CFR, 1949–1953, Comp: E.O. 11961, January 9, 1977, 42 FR 4321, as amended.

2. In Part 128, § 128.11c is added to read as follows:

§ 128.11c International Capital Form BL–3: Intermediary's notification of foreign borrowing denominated in U.S. dollars.

On this form any intermediary in the United States which knows that it is being used as the U.S. address of "foreigners" in connection with the servicing of their U.S. dollar loans to nonbank borrowers in the United States is required to notify its nonbanking customer in the United States and the Federal Reserve Bank of New York of that nonbanking customer's obligation to report borrowings from foreigners on Treasury International Capital (TIC) Form CQ–1 if the intermediary does not exercise its option to report the outstanding borrowings on TIC Form BL–2.

Dated: March 6, 1986.

David C. Mulford,

Assistant Secretary, International Affairs.

Note.—The attached form is printed for the convenience of the reader. It will not appear in the CFR.

The data furnished on this report will be held in confidence.

International Capital Form BL–3

DEPARTMENT OF THE TREASURY

Office of the Assistant Secretary for International Affairs

Form Approved OMB No. 1505–0088

REPORT TO THE FEDERAL RESERVE BANK OF NEW YORK

Intermediary's Notification of Foreign Borrowing Denominated In U.S. Dollars

Note.—This notification should be sent not later than the fifteenth day following the month-end in which a "reportable foreign borrowing" is initially drawn and outstanding.

This report is required by law (22 U.S.C. 286f; 22 U.S.C. 3103; E.O. 10033; 31 CFR 128). Failure to report can result in a civil penalty not exceeding $10,000. Willful failure to report can result in criminal prosecution and upon conviction a fine of not more than $10,000, or, if an individual, imprisonment for not more than one year, or both. Any officer, director, employee or agent of any corporation who knowingly participates in such violation may be punished by a like fine, imprisonment, or both (22 U.S.C. 3105; 31 CFR 128.4(a)).

BEFORE PREPARING THIS REPORT PLEASE READ CAREFULLY THE GENERAL INSTRUCTIONS AND DEFINITIONS FOR THE TIC BANKING FORMS AND THE INSTRUCTIONS FOR THIS FORM.

INSTRUCTIONS FOR THE PREPARATION OF FORM BL–3

Intermediary's Notification of Foreign Borrowing Denominated in U.S. Dollars

Noted.—This notification should be sent no later than the fifteenth day following the month-end in which a "reportable foreign borrowing" is initially drawn and outstanding.

A. INTRODUCTION

The purpose of this report is to gather timely and reliable information on the international financial position of the United States and on movements of capital between the United States and foreign countries.

This form is specifically designed for use by an intermediary (as defined in these instructions) to notify a nonbanking customer in the United States of its obligation to report on Treasury International Capital (TIC) Form CQ–1 borrowings from foreigners which will not be reported by the intermediary on TIC Form BL–2. These borrowings, as defined in these instructions, are those payable in U.S. dollars to "foreigners" which represent claims, acquired either here or abroad, on persons in the United States.

The General Instructions and Definitions for the Preparation of Reports on the Treasury International Capital Banking Forms apply to the preparation of reports on this form, as well as the instructions below.

This notification is required by law (22 U.S.C. 2861; 22 U.S.C. 3103; E.O. 10033; 31 C.F.R. 128). Failure to report can result in a civil penalty not exceeding $10,000. Willfull failure to report can result in criminal prosecution and upon conviction a fine of not more than $10,000, or, if an individual, imprisonment for not more than one year, or both. Any officer, director, employee or agent of any corporation who knowingly participates in such violation may be punished by a like fine, imprisonment, or both (22 U.S.C. 3105; 31 C.F.R. 128.4(a)).

Data reported on this form will be held in confidence by the Department of the Treasury and the Federal Reserve Bank of New York acting as fiscal agent of the Treasury. The data reported by individual respondents will not be published or otherwise publicly disclosed. Data reported by individual respondents may be made available to the Board of Governors of the Federal Reserve System and to other Federal agencies insofar as authorized by the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and the international investment Survey Act of 1976 (22 U.S.C. 3101 *et seq.*).

B. WHO MUST REPORT

Any intermediary, i.e., any bank, banking institution (including the U.S. agencies, branches and subsidiaries of foreign banks), thrift institution, broker or dealer in the United States, which knows that it is being used as the U.S. address of "foreigners" in connection with the servicing of their loans to nonbank borrowers in the United States (i.e., "reportable foreign borrowings" as defined in these instructions), may be required to report on this form. For instance, a bank in the United States may be an "intermediary" for "reportable foreign borrowings" that are carried on the books of a "shell" branch or other related foreign office.

Note.—Your attention is drawn to General Instruction B., "Who Must Report," of TIC Form BL–2, which states: Reporting institutions are required to report all financial claims on persons in the United States, other than "long-term" securities, which they hold for "foreigners" either in direct custody or in their own name with a custodian bank of

other institution. If the reporting institution is used by "foreigners" as their U.S. address in connection with their financial transactions with persons in the United States, the reporting institution must report claims on persons in the United States which result from such transactions as if such claims were in the report's custody, or must inform the U.S. persons against whom the claims are held that they are owned by "foreigners," identifying the countries and the amounts relevant to each.

In the case of a "reportable foreign borrowing" that you do not elect to include on your Form BL–2 as a "custody" liability to "foreigners," you must notify the U.S. borrower and the Federal Reserve Bank of New York using Form BL–3.

C. EXEMPTIONS

A bank, banking or thrift institution, broker or dealer need not file Form BL–3 for any "reportable foreign borrowing" if *either* of the following conditions is met:

1. Total "custody" liabilities to "foreigners" (including "reportable foreign borrowings") for purposes of reporting on Form BL–2 aggregate less than $15 million as of the month-end in which the foreign dollar borrowing is *drawn* and *outstanding;* or

2. You elect to include on your own monthly Form BL–2 the amount of the "reportable foreign borrowing" *drawn* and *outstanding* at month-end.

Note.—Form BL–3 need not be filed for any borrowing *drawn* and *outstanding* that is less than $1,000,000 or that is scheduled to mature before the end of the current calendar quarter.

D. FILING OF REPORTS

A notification on this form should be sent to the borrower, with a copy to the Federal Reserve Bank of New York, not later than 15 days following the month-end in which the "reportable foreign borrowing" is initially *drawn* and *outstanding,* at the following address: Corporate Unit, International Reports Division, Federal Reserve Bank of New York, 33 Liberty Street, New York, New York 10045.

Form BL–3 need only be filed once per borrowing, showing the date of the first draw-down.

E. NONBANK BORROWER

A "nonbank borrower" means any person located in the United States other than a bank, bank holding company, thrift institution, security broker or dealer, including their domestic, majority-owned nonbanking subsidiaries, and the U.S. Government and its agencies, corporations and other instrumentalities.

F. REPORTABLE FOREIGN BORROWING

A "reportable foreign borrowing" is a foreign credit, denominated in U.S. dollars, extended to a nonbank borrower in the United States for which you are *knowingly* being used as the U.S. address of the "foreign" lender in connection with its loan servicing transactions with the U.S. borrower. The term "reportable foreign borrowing" includes:

1. Loans and syndicated borrowings when the notes evidencing such borrowings *are not held* by you for account of the foreign lenders. (Note: When such notes *are directly held* by you for the account of foreign lenders, they *are reportable* as custody liabilities on Form BL–2. See General Instruction B., "Who Must Report," Form BL–2.)

2. Overnight and call borrowings.

3. Borrowings that were switched without the knowledge of the U.S. borrower from the books of the U.S. intermediary to the books of the foreign lender.

4. Participations to foreign lenders of loans granted by you to U.S. nonbank borrowers if the terms (e.g., interest rate and maturity) of the participation are identical to those of the underlying loan and such participation certificates *are not held* by you for account of the foreign lenders. (See Note in F. 1. above.)

G. EXCLUSIONS

The following should be excluded from amounts reported on Form BL–3:

1. Borrowings denominated in foreign currencies.

2. Extensions of credit in connection with letters of credit, acceptances and due bills.

3. Performance bonds, standby letters of credit, guarantees or other similar contingent liabilities.

4. Overdrafts of U.S. firms with banks abroad.

5. Commercial paper and other short-term (*original* maturity of one year or less) negotiable and readily marketable obligations issued by U.S. firms that are being *held* by you for account of "foreigners." (Note: When such instruments are directly *held* by you for the account of "foreigners," they *are reportable* as custody liabilities on TIC Form BL–2. See General Instruction B., "Who Must Report," Form BL–2.)

6. Loans granted by "foreign" lenders to foreign affiliates of U.S.-based firms.

7. "Long-term" marketable securities of public and private issuers in the United States. Such securities include bonds, notes, and debentures with an *original* maturity of more than one year.

8. Nonnegotiable and nonmarketable notes and loan participation certificates of U.S. firms *held* by you for the account of foreigners. (Note: These items *are reportable* as custody liabilities on Form BL–2. See item G. 5 above.)

9. Loans granted by foreign lenders to banks, bank holding companies, thrift institutions and brokers or dealers located in the United States, including their domestic nonbanking subsidiaries.

10. Borrowings which are scheduled to mature before the end of the current calendar quarter.

11. Borrowings for which the intermediary does not know it is serving as the U.S. address of a "foreign" lender (including commitments or lines of credit arranged by the intermediary but for which the intermediary does not know when or whether the U.S. nonbank borrower draws upon the commitment or line or credit).

BILLING CODE 4810-25-M

POSTAL SERVICE

39 CFR Part 3

Increase of Delegated Authority for Capital Investment Projects

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This final rule amends the bylaws of the Board of Governors to increase the Postmaster General's delegated authority for capital investment projects from $5 to $10 million. The previous authority was established in 1977. Since that time construction costs have increased almost 80%, so that the purchasing power of $5 million has been reduced to the equivalent of less than $2.8 million in 1986 dollars. This inflation has resulted in the Board being required to review and approve many small, uncomplicated investment projects that, under the original delegation, it did not intend to review. By increasing the authority to $10 million the Board will restore the delegation to its original force.

EFFECTIVE DATE: March 4, 1986.

FOR FURTHER INFORMATION CONTACT: John Ward (202) 268–3392.

Accordingly, Part 3 of 39 CFR is amended as follows:

List of Subjects in 3 CFR Part 3

Organization and functions (Government agencies), Postal Service.

PART 3—BOARD OF GOVERNORS [ARTICLE III]

1. The authority citation for Part 3 continues to read as follows:

Authority: 39 U.S.C. 202, 203, 205, 401 (2), (10), 1003, 3013; 5 U.S.C. 552b (g), (j).

§ 3.4 [Amended]

2. In § 3.4, paragraph (g) is amended by striking out "$5 million" and inserting "$10 million" in lieu thereof.

W. Allen Sanders,

Associate General Counsel, Office of General Law and Administration.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 400

[OMB-9-F]

Medicare and Medicaid Programs; OMB Control Numbers for Collection of Information Requirements Contained in HCFA Regulations

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: This final rule amends a general HCFA regulation to display control numbers assigned by the Office of Management and Budget (OMB) for approved "collection of information" requirements that are contained in regulations governing the Medicare and Medicaid programs.

This rule is issued in accordance with OMB regulations for controlling paperwork burdens on the public (5 CFR Part 1320) and serves as notice that the collection of information is approved.

EFFECTIVE DATE: March 24, 1986.

FOR FURTHER INFORMATION CONTACT: Michael Odachowski, (301) 594-3075.

SUPPLEMENTARY INFORMATION:

General Information

Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), Federal agencies are required to obtain OMB approval of "collection of information" requirements that are contained in any regulations published by the agencies. To implement provisions of this Act, the OMB has established regulations under Part 1320 of title 5 of the Code of Federal Regulations. The OMB regulations require Federal agencies to notify the public that a collection of information requirement has been approved by OMB by issuing a notice in the Federal Register, and to display the control number assigned by OMB after approval of the requirement as part of the agency's regulatory text.

To comply with the OMB requirement that HCFA include in its regulations the OMB control numbers assigned, we have established a general regulation under 42 CFR 400.310 to display valid OMB control numbers and applicable regulation sections as a means of notifying the public. We update this regulation routinely to add the most recent OMB control numbers or to delete entries that are no longer in effect. This document contains our latest update of control numbers.

Waiver of Proposed Rulemaking and Waiver of Delayed Effective Date

This regulation merely updates our display of OMB control numbers for approved collection of information requirements contained in HCFA regulations. It is technical in nature. To publish the regulation in proposed form is unnecessary and would serve no useful purpose. Therefore, we find good cause to waive notice of proposed rulemaking.

In addition, we find justification to waive the 30 day delay in effective date required by the Administrative Procedure Act for the following reasons. Under EOMB regulations at 5 CFR 1320.13(j), a collection of information requirement is not effective until EOMB has assigned a control number and the number is displayed. We display the OMB control number by publishing it in the Federal Register. We believe that it is unreasonable to use a 30 day delayed effective date for the OMB control number displayed in this rule because we are displaying the control number before the effective date of the regulations containing the controlled collection of information requirements. To use a 30 day delayed effective date would merely delay implementation of those sections of the regulations subject to OMB approval, and is unnecessary. Therefore, we find good cause to waive the 30 day delay in effective date.

Impact Analysis

As noted above, this regulation is technical in nature and merely updates the display of OMB control numbers of approved collection of information requirements contained in HCFA regulations. Therefore, the Secretary has determined that this document does not meet the criteria for a major rule as defined in section 1(b) of Executive Order 12291. In addition, the Secretary certifies, consistent with the Regulatory Flexibility Act, that this document would not have a significant economic impact on a substantial number of small entities.

List of Subjects in 42 CFR Part 400

Grant programs-health, Health facilities, Health maintenance organizations (HMO), Medicaid, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 400 is amended as follows:

PART 400—INTRODUCTION: DEFINITIONS

1. The authority citation for Part 400 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh) and 44 U.S.C. Chapter 35.

2. Section 400.310 is amended by adding, in numerical order by CFR section, the following entries of sections that contain collections of information and assigned OMB control numbers.

§ 400.310 Display of currently valid OMB control numbers:

Office of the Secretary

42 CFR Part 455

[LRR-2-CN]

Medicare and Medicaid Programs; Fraud and Abuse Technical Amendments

AGENCY: Office of the Secretary, HHS, Office of Inspector General (OIG).

ACTION: Correction of final rule.

SUMMARY: This document corrects technical errors that appeared in the final rule, published September 13, 1985 (50 FR 37370), that implemented sections 2348 and 2370 of the Deficit Reduction Act of 1984, and set forth a series of technical changes transferring the responsibility of making fraud and abuse determinations from the Health Care Financing Administration to the Department's OIG.

FOR FURTHER INFORMATION CONTACT: Ronald Ritchie (301) 594-1832.

SUPPLEMENTARY INFORMATION: Following the publication of the OIG Fraud and Abuse Technical Amendments final rule (50 FR 37370, September 13, 1985), one commenter pointed out that revisions to 42 CFR 455.208 and 455.213 failed to include specific reference to "intermediate care facility services" in the regulations. As a result of this comment and upon reexamination of past and existing policies and regulatory actions in this area, we believe now that a further revision is necessary to clarify these regulations and to insure that intermediate care facility services are specifically delineated in these provisions.

To correct these omissions in 42 CFR 455.208 and 455.213, we are making the following corrections:

§ 455.208 [Corrected]

A. Page 37375: In column 2, § 455.208(c)(1), in the third line, the phrase "posthospital extended care services" is corrected to read as "skilled nursing facility and intermediate care facility services."

§ 455.213 [Corrected]

A. Page 37375: In column 3, § 455.213(b)(1), in the third line, the phrase "posthospital extended care services" is corrected to read as "skilled nursing facility and intermediate care facility services."

(Catalog of Federal Domestic Assistance Programs, No. 13.714, Medical Assistance Program; No. 13.773, Medicare-Hospital Insurance Program; and No. 13.744, Medicare-Supplementary Medical Insurance Program)

Dated: March 17, 1986.

BILLING CODE 4150-04-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6614

[I-8856]

Idaho; Public Land Order No. 6605, Correction

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order will correct an error in the land description of Public Land Order No. 6605 of May 24, 1985.

FOR FURTHER INFORMATION CONTACT: Larry Lievsay, Idaho State Office, 208-334-1735.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

The land description in Public Land Order No. 6605 of May 17, 1985, in FR Doc. 85-12618, published at page 21443 in May 24, 1985, is corrected as follows:

On Page 21443, under T. 5 S., R. 3 W., the line reading "Sec. 6, Lots 11, 12, 29-59, 63-86, 91-96, 100, 106-110" should read "Sec. 6, Lots 11, 12, 29-59, 63-86, 89, 91-96, 99, 100, 106-110."

J. Steven Griles,

Assistant Secretary of the Interior.

March 11, 1986.

BILLING CODE 4310-84-M

OFFICE OF PERSONNEL MANAGEMENT

45 CFR Part 801

Voting Rights Program Appendix A: New York

AGENCY: Office of Personnel Management.

ACTION: Final rule with request for comments.

SUMMARY: The Office of Personnel Management (OPM) is establishing a new office for filing applications or complaints under the Voting Rights Act of 1965, as amended. The Attorney General has determined that this designation is necessary to enforce the guarantees of the Fourteenth and Fifteenth amendments to the Constitution.

DATES: This rule is effective immediately upon publication. In view of the need for its publication without an opportunity for prior comment, comments will still be considered. To be timely, comments must be received on or before April 21, 1986.

ADDRESS: Send or deliver comments to Ronald E. Brooks, Coordinator, Voting Rights Program, Office of Personnel Management, Room 5532, 1900 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Ronald E. Brooks, (202) 632-5544.

SUPPLEMENTARY INFORMATION: The Attorney General has designated Bronx, Kings, and New York Counties, as additional examination points under the provisions of the Voting Rights Act of 1965, as amended. He determined on November 1, 1985, that these designations are necessary to enforce the guarantees of the Fourteenth and Fifteenth amendments to the Constitution. Accordingly, pursuant to section 6 of the Voting Rights Act of 1965, as amended, 42 U.S.C. 1973d, OPM will appoint Federal examiners to review the qualifications of applicants to be registered to vote and Federal observers to observe local elections.

Under section 553(b)(3)(B) of title 5 of the United States Code, the Director finds that good cause exists for waiving the general notice of proposed

VOL 51
ISS 55
MR 21
1986
UMI

rulemaking. The notice is being waived because of OPM's legal responsibilities under 42 U.S.C. 1973e(a) and other parts of the Voting Rights Act of 1965, as amended, which require OPM to publish counties certified by the U.S. Attorney General and locations within these counties where citizens can be federally listed and become eligible to vote, and where Federal observers can be sent to observe local elections.

Under section 553(d)(3) of title 5 of the United States Code, the Director finds that good cause exists to make this amendment effective in less than 30 days. The regulation is being made effective immediately to allow Federal examiners to register voters immediately in view of the pending elections to be held in the subject counties where Federal observers will observe elections under the authority of the Voting Rights Act of 1965, as amended.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have significant economic impact on a substantial number of small entities because it adds a new location to the list of counties in the regulations concerning OPM's responsibilities under the Voting Rights Act.

List of Subjects in 45 CFR Part 801

Administrative practice and procedures, Voting rights.

U.S. Office of Personnel Management.

Constance Horner,

Director.

Accordingly, OPM is amending 45 CFR Part 801 as follows:

PART 801—VOTING RIGHTS PROGRAM

1. The authority citation for Part 801 continues to read as follows:

Authority: 5 U.S.C. 1103; secs 7, 9, 79 Stat. 440, 411 (42 U.S.C. 1973c, 1973).

2. Section 801.202 is amended by alphabetically adding New York (which include Bronx, Kings, and New York Counties) to Appendix A to read as follows:

§ 801.202 Times and places for filing and forms of application.

* * * * *

Appendix A

* * * * *

New York

County; Place for filing; Beginning date.

* * * * *

Bronx, Kings, and New York Counties, New York—26 Federal Plaza, Room 29108, New York, New York.

BILLING CODE 6325-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. 1

[MM Docket No. 85-218; FCC 86-67]

Tender Offers and Proxy Contests

AGENCY: Federal Communications Commission.

ACTION: Policy Statement.

SUMMARY: The Commission determined that the mandatory use of the traditional long form procedures in connection with tender offers and proxy contests involving Commission licensees disserves the public interest. In the extraordinary circumstances surrounding a tender offer, the Commission found that the grant of special temporary authority pursuant to section 309(f) of the Communications Act to an independent trustee with restricted authority would provide an appropriate mechanism to permit shareholder consideration of tender offers. In situations in which the use of proxies may result in a transfer of corporate control, the Commission decided to employ an expedited procedure which entails the submission of a short form 316 supplemented by specific data on citizenship, other media interests and law violations. In situations in which the use of proxies does not effectuate a transfer of control, the Commission determined to retain the current practice of obtaining notification of changes in the Board at the time that the annual ownership report is filed.

ADDRESS: Federal Communications Commission, Washington DC 20554.

EFFECTIVE DATE: March 21, 1986.

FOR FURTHER INFORMATION CONTACT: Laurel Bergold, Policy and Rules Division, Mass Media Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION: Effective immediately, the complete text of the decision adopted by the Commission will be summarized for Federal Register publication rather than published in full.

In the Matter of Tender Offers and Proxy Contests [MM Docket No. 85-218].

This is a summary of the Commission's policy statement, MM Docket No. 85-218, adopted January 30, 1986 and released March 17, 1986.

The full texts of Commission decisions are available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, Northwest, Washington, DC. The complete text of this decision may also be purchased from the Commission's Copy Contractor, International Transcription Service, (202) 857-3800, 2100 M Street, Northwest, Suite 140, Washington DC 20037.

Summary of Policy Statement

1. On January 30, 1986, the Federal Communications Commission ("Commission") adopted a *Policy Statement* on the appropriate procedures governing tender offers and proxy contests involving Commission licensees and corporations that control Commission licensees. In that *Policy Statement*, the Commission concluded that the mandatory and exclusive use of the long form procedures, in the context of tender offers and proxy contests, is not required and, in fact, would contravene the public interest. Consequently, it found that the formulation of specific alternative approaches to this traditional procedure was necessary. The Commission emphasized that these determinations were based upon the record that it compiled in that proceeding, its experience in regulating the broadcasting industry and careful consideration of four fundamental objectives: The need to comply fully with the strictures and policies of the Communications Act, the promotion of strict neutrality of its regulatory procedures, the elimination of unnecessary regulatory delay and the accommodation of the policies underlying federal and state statutes concerning the governance of corporations.

2. In light of the varying factual settings in which proxy contests can arise, the Commission stated that it would be inappropriate for it to fashion generic procedures applicable in all situations involving proxy contests. It noted that section 310(d) of the Communications Act of 1934, *as amended*, requires the Commission to grant prior approval only with respect to those changes in the composition of a Board of Directors of a licensee corporation which constitute a transfer

of control. The Commission determined, however, that many proxy contests involving the election of a Board do not result in a transfer of control cognizable under section 310(d). In such situations, the Commission found the application of prior approval procedures to be both unnecessary and unwarranted. The Commission also stated that it would be inappropriate to adopt potentially burdensome and costly filing requirements in such cases, either on a pre-election or on an accelerated post-election basis. Rather, when no change of control over a licensee is involved, the Commission found that its regulatory objectives would be best served by continuation of its current practice of obtaining notification of changes in the Board in the ordinary course pursuant to the annual ownership report.

3. The Commission recognized, however, that there are certain types of proxy contests, such as the contested Board election in *Full Value of Storer Communications Inc.*, 101 FCC 2d 434, *aff'd sub nom. Storer Communications, Inc. v. FCC*, 763 F.2d 436 (D.C. Cir. 1985), that involve a transfer of control requiring its prior approval. It noted, however, that such transfers do not involve any change in ownership or on-going voting interests. Consequently, the Commission determined that this type of transfer annually will not be considered substantial under the Communications Act requiring that use of long form procedures. Moreover, in this context, the Commission found that the use of long form procedures would conflict with the purposes of the securities laws, would thwart the objective of assuring governmental neutrality and would result in unnecessary and potentially costly regulatory delay. For such transfers, therefore, the Commission stated that it would utilize a modified short form procedure, supplemented by data on citizenship, other attributable media interests, and adverse findings regarding law violations.

4. With respect to tender offers, in its *Policy Statement*, the Commission indicated that a tender offer involving its licensee may be simultaneously subject to the potentially conflicting procedures prescribed by the Communications Act and its implementing rules, the Williams Act, other federal laws and regulations and state law. The Commission decided that the accommodation of these diverse regulatory structures would warrant the use of special procedures. It also found that the exclusive use of the long form procedures would result in protracted delays, effectively insulate incumbent management from takeover challenges, and conflict with the objective of governmental neutrality set forth in the Williams Act. Indeed, it determined that the regulatory delays arising from this procedure in effect would deprive shareholders of communications corporations of the ability to consider tender offers. For these reasons, the Commission concluded that extraordinary circumstances exist which fully justify the application of the exceptional procedures prescribed by section 309(f) of the Communications Act.

5. Accordingly, in the context of a tender offer, the Commission determined to supplement the long form procedure with use of a temporary voting trust. Pursuant to section 309(f) of the Communications Act, the Commission concluded that it would grant an STA to a qualified, independent trustee with power to consummate the tender offer and, subject to certain prescribed limitations, to exercise control over the corporation during the pendency of the long form review of the offeror. The Commission stated that this supplementary, expedited regulatory approach would eliminate the deleterious effect of regulatory delay which would otherwise effectively deny shareholders the ability to consider tender offers without depriving interested parties of the right to fully participate in the long form review of the offeror.

6. The Commission also decided to impose specific restrictions on the offeror designed to prevent him or her from exercising control over the corporation or from influencing the trustee pending the completion of the long form review. Specifically, from the time that the tender offer is consummated the Commission stated that it would strictly prohibit the offeror from either becoming involved in, or seeking to influence, directly or indirectly, the operation or management of the corporation. For example, under this restriction the offeror could not nominate a director as his or her representative or attempt to influence the trustee's selection of Board members. In addition, the Commission determined that the offeror would be required to place all his or her existing stock holdings in trust at or before the consummation of the tender offer.

7. The Commission noted that the imposition of regulatory restrictions which do not further statutory objectives would both unnecessarily burden the offeror and would constitute unwarranted governmental interference in the marketplace. Accordingly, before consummation of the tender offer, the Commission determined that the offeror would not be restricted from exercising voting rights in existing stock interests or from taking any other actions he or she deems appropriate to promote a successful takeover bid, providing such actions do not amount to an exercise of *de facto* control of the licensee. Additionally, the Commission concluded that the offeror would not be obligated to place his or her existing stock holdings in trust prior to the time the tender offer is consummated.

8. In addition to direct limitations on the offeror, the Commission stated that additional prescriptions concerning the relationship between the offeror and the trustee are essential to ensure that the trustee will be able to act independently in exercising the powers granted pursuant to the STA. As a consequence, the Commission required strict separation between the trustee and the offeror. In establishing such separation, the Commission stated that it would not grant an STA to a trustee if that trustee either has any direct or indirect familial ties or business relationships, apart from the trust agreement, with the offeror, related entities or its principals, officers, or directors. In addition, it applied the same type of insulation criteria to any director who may be elected by the trustee. Because an offeror could influence the licensee by communicating with the trustee on matters relating to the management and operations of the corporation, the Commission decided to ban such communications.

9. The Commission emphasized, however, that it would not completely prohibit all communications between the offeror and the trustee. In this regard, the Commission stated that it would permit the trustee to send written information to the offeror regarding the management or operations of the company. It noted that the mere receipt of written reports would not provide the offeror with the means by which to influence corporate affairs. The Commission also determined that there was no reason to prohibit communications between the trustee and the offeror relating to the purchase of tendered stock. It did require, however, that all permissible communications between the trustee and the offeror, during the time in which the STA is in effect, be in writing.

10. The Commission recognized that the trustee must have sufficient authority to direct the operations of the business, should the need arise. It concluded, therefore, that the trustee requires a certain degree of flexibility in the manner in which he or she exercises control over the corporation. For

VOL
51
ISS
55
MR
21
1986
UMI

example, the Commission stated that the trustee would be permitted to participate in the election of the Board of Directors.

11. The Commission asserted, however, that the need for flexibility should be balanced against the limited purpose and temporary duration of the trust. It enunciated three broad principles to guide the trustee's participation in the management and operations of the company as well as the manner in which he or she exercises the power granted by the STA. First, the Commission stated that the trustee has a general obligation to safeguard the assets of the corporation. Second, the Commission determined that the trustee should exercise his or her power in a manner which assures the continuity of broadcast operations. Third, the Commission stated that the trustee must act in a manner which facilitates the underlying long form transaction. In addition, the Commission stated that it would expect the trustee to act, whenever possible, and except where necessary to promote the three objectives set forth above, in a manner which preserves the *status quo* and maintains the general character of the corporation. It concluded, therefore, that the trustee would be presumptively disallowed from undertaking, initiating or supporting any significant departures from existing corporate operations or practices.

Ordering Clauses

12. Accordingly, it is ordered, that this proceeding is terminated.

13. It is further ordered, that the "Motion for Acceptance of Late Filed Comments" filed by Gurman, Kurtis & Blask, Chartered is granted.

Federal Communications Commission.
William J. Tricarico,
Secretary.

47 CFR Part 74

[MM Docket No. 83-523; FCC 86-66]

In Regard to the Instructional Television Fixed Service

AGENCY: Federal Communications Commission.

ACTION: Summary of reconsideration of final rule.

SUMMARY: This action considers petitions for reconsideration and clarification of the *Second Report and Order* in MM Docket No, 83-523, regarding the Instructional Television Fixed Service. Some petitioners question the legality and necessity of the "local priority period" adopted and also request clarification or modification of the Commission's definition of "local." Others challenge aspects of the "point system" comparative selection process and its random-chance tie-breaker. Others have sought modification or clarification of some of the characteristics for which points are awarded to competing applicants under that system. For the most part, petitioners arguments were already considered in the originating Order. New arguments advanced are not persuasive, and the petitions are denied, except to the extent some minor modifications are made for purposes of clarity or to better effect the Commission's original intentions.

EFFECTIVE DATE: April 21, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

List of Subjects in 47 CFR Part 74

Television broadcasting.

In the matter of Amendment of Part 74 of the Commission's Rules and Regulations In Regard to the Instructional Television Fixed Services, [MM Docket No. 83-523].

This is a summary of the Commission's memorandum opinion and order in MM Docket No. 83-523, adopted January 30, 1986, and released March 14, 1986.

The full text of Commission decisions are available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, Northwest, Washington, DC. The complete text of this decision may also be purchased from the Commission's Copy Contractor, International Transcription Service (202) 857-3800, 2100 M Street, Northwest, Suite 140, Washington, DC 20037.

Summary of the Memorandum Opinion and Order

1. The subject decision disposes of the various petitions for reconsideration filed in response to the Commission's *Second Report and Order* in MM Docket No. 83-523, 101 FCC 2d 49, 50 FR 28736 (June 29, 1985). In the *Second Report and Order, supra,* the Commission modified eligibility and operating rules for the Instructional Television Fixed Service ("ITFS"), instituted comparative proceeding procedures for selecting among mutually exclusive ITFS applications, instituted cut-off procedures, finalized requirements for non-ITFS use of ITFS facilities, and modified certain of the technical standards for ITFS.

Eligibility

2. In the *Second Report and Order, supra,* the Commission instituted a "local priority period" of one year, during which time only local entities are eligible to apply for and receive ITFS authorizations, and pending applications by nonlocal entities are disregarded. (The last day of that period will be July 27, 1986.) The local priority period was challenged on a variety of grounds, all of which are rejected. Contrary to petitioners' assertions, the notice provisions of the Administrative Procedure Act (5 U.S.C. 553) were satisfied. While the particular provision ultimately adopted was not specifically proposed earlier in the proceeding, all parties were on explicit notice that the eligibility requirements were under review generally, and specifically that the Commission was troubled by the nonlocal nature of many of the applicants. Furthermore, other specific severe restrictions on nonlocal applicants' fundamental eligibility were proposed earlier by the Commission and by commenting parties. Thus, interested parties were fairly apprised of the subjects and issues involved and the fact that their interests were at stake.

3. The Commission also rejects petitioners' assertions that the perceived need for the local priority period was based on mistakes of fact or perception regarding the availability of facilities, local parties' desire for facilities, and the number of applications. The Commission finds that petitioners misunderstand its interpretation of these facts and the reasons for its actions. It also finds that while ultimate achievement of the desired goal, increased availability of MDS support for local ITFS entities and a consequent increase in local ITFS applications, cannot be proven in advance, it is a reasonable deduction, based on the facts available.

4. Petitioner's argument that the local priority period violates their rights to a comparative hearing on all pending "cut-off" applications is also rejected. The Commission notes that the cases cited by petitioners presume an applicant's basic eligibility in establishing that applicant's right to a comparative hearing. An ineligible applicant is not entitled to a hearing, and the nonlocal applicants are currently ineligible. The Commission refers to a series of cases asserting its authority to establish eligibility standards by general rule, even where qualification changes disqualify pending applicants, and even where the standard is only temporary. One petitioner's similar argument that the local priority period constitutes retroactive application of a new rule, in violation of section 553 of the Administrative Procedure Act, is similarly dismissed. In this regard the Commission also observes that petitioners cannot be said to have relied to their detriment on the original rules in the sense of choosing one available course of action over another. The Commission found this result consistent also with the other considerations specified in *Retail Wholesale and Department Store Union, AFL-CIO v. N.L.R.B.,* 466 F.2d 380 (D.C. Cir. 1972).

5. The Commission rejects petitioners' contention that the requirement for a local program committee for all nonlocal entities (47 CFR 74.932(a)(5)) puts nonlocal entities on a par with local entities in ability to serve local needs. Rather, it is intended only to guarantee some measure of local involvement, less than control, in educational decisions.

6. In response to one nonlocal entity's proposal, the Commission will permit nonlocal entities to participate in local corporations (or other organizations) which may qualify as local entities, both for eligibility and for comparative purposes. They may also be entitled to an accreditation preference for comparative purposes. It sets out specific guidelines regarding the structure of the entity necessary to ensure unequivocal local control. It also provides that nonlocal entities with cut-off applications may amend their applications to substitute local parties, under specific procedures and within specific timeframes set out in the decision. A cut-off nonlocal application mutually exclusive with a cut-off local application must be amended to comply with the provisions in the *Second Report and Order, supra* at paras. 12-15, within 90 days of the publication of this Summary in the **Federal Register**. Local applicants which are mutually exclusive with any such nonlocal applicants will also be permitted to amend their applications are provided in the decision. A cut-off nonlocal application that is not mutually exclusive with any cut-off local application must be amended during the local priority period. Competing new applications for those facilities may also be filed by other local entities during the local priority period. The Commission will also permit local stations which are members of the Public Broadcasting Service to be substituted in PBS's pending applications; it does not find PBS local.

7. The Commission declines several proposed modifications to its definition of "local," finding some inappropriate and others simply unnecessary. It specifically affirms the eligibility of state educational television commissions under the present rules. It also provides that any such entity need not submit the letters from proposed receive sites, required of other nonlocal applicants, if it can demonstrate that the public schools it proposes to serve are required to use its proposed formal educational programming.

Mutually Exclusive Selection Procedure

8. In the *Second Report and Order, supra,* the Commission adopted a point accumulation procedure, based on specific predetermined attributes, for choosing among mutually exclusive applicants for ITFS facilities. In those cases where the highest point accumulation is shared by two or more parties, a random chance tie-breaker is employed to select the licensee. Petitioners contest the inclusion of various criteria adopted, as well as the exclusion of others not adopted. The Commission observes that most of the arguments regarding criteria were offered and discussed in its prior decision. It acknowledges particularly the weight of the preference for local entities, pointing to the many concerns regarding nonlocal entities which developed during the prior stages of the proceeding, but shows that the local preference, taken alone, can be overcome by combinations of other factors.

9. The Commission declines to erode the significance of the accreditation preference, refusing to award it to applicants which are not accredited but have an arrangement or relationship to an accredited institution. The point of this preference, it states, is to prefer situations where there is no middleman, so that control over operations flows directly and uninterrupted from the accredited institution. An umbrella organization which is composed of entities which would be individually entitled to this preference will be itself entitled to the preference points. Also, when a governmental agency qualifies for this preference, any directly controlled arm of that agency may receive the preference if its specific duties include that educational function. The Commission does not extend the accreditation preference to hospitals and medical consortia. Where they are affiliated with an accrediated institution, the medical school or other educational institution would be the appropriate body to receive the accreditation preference points. While this formal distinction may impose some procedural burden on such parties, it protects the integrity of the preference without necessarily disadvantaging the hospital or health-related organization.

10. The Commission defends the weight accorded its "diversity" preference, pointing out that the two-point award for applicants which do not exceed the four-channel limitation is surpassed by only two other preferences. It also addresses, for the first time, comparative decisions between mutually exclusive applications involving the modification of existing facilities. It states that it will insist on coordination efforts by the parties, and that a comparative procedure will be implemented only after the parties submit documentation of their attempts to resolve the conflicts and those specific points which preclude a resolution. Then, any comparative procedure implemented will include a two-point preference to favor the institution of a new service over modification of an existing service.

11. The Commission affirms its decision to give somewhat greater preference to proposed formal educational service than to proposed "other" ITFS service, as such service is the primary objective of the ITFS spectrum dedication. The mechanics for determining this point award is modified to effect more accurately the Commission's stated intention.

12. None of the other proposed preferences, including service to specified grade levels, "fair and efficient use of the spectrum," and prior telecommunications experience, are adopted. The absence of a minority preference is defended by reference to the diversity goal underlying the traditional minority preference in broadcasting, which does not apply equally when choosing among applicants for an educational service.

13. The Commission concludes that the random chance tie-breaker need not follow the provisions of the lottery statute (47 U.S.C. 309(i)), as the statute and its legislative history indicate that it was not intended to apply to a tie-breaker situation, but rather where the lottery is used as a primary selection method. The Commission rejects one petitioner's contention that there was sufficient notice of the Commission's intention to adopt a lottery without the lottery statute preferences, citing a specific solicitation during the rulemaking proceeding. (*Further Notice of Proposed Rulemaking,* 98 FCC 2d 1249, 1263 (1984)).

14. An alternative to the tie-breaker, mandated equal division of the

VOL
51
ISS
55
MR
21
1986
UMI

contested facilities, was rejected. The Commission does state its intention to advise and permit tied parties time to reach a cooperative settlement before instituting a tie-breaker lottery.

Petitions To Deny

15. Denying one petitioner's request, the Commission will not provide a specific period of time for petitions to deny to be filed against amendments filed in response to the *Second Report and Order, supra.* A period for petitions to deny those applications has already passed, and amendments are not expected to be substantive. In any case where an applicant proposes material changes or otherwise exceeds the scope of clarifying amendments, interested parties can file objections or comments without reopening a petition period generally for all cut-off applications. However, where a new local entity files an amendment to supplant a current nonlocal applicant, and where a local applicant files an amendment or new application, pursuant to the new provisions in the instant decision, referred to above, petitions to deny can be filed within thirty days of public notice of the filing of such amendment or application. Such petitions to deny addressing an amendment may only treat new matters raised by the amendment.

Licensee Control

16. A proposal to require any ITFS excess capacity lessee to submit a copy of any sublease to its lessor/licensee is rejected by the Commission. It finds its current rules sufficient to ensure that licensees maintain control over their facilities. Whether licensees exercise that control to their greatest economic benefit (the purpose of the proposal) is not germane to the issue. The provision that lease terms cannot exceed license terms is retained to meet the Commission's responsibility to ensure the proper use of the scarce spectrum resource it has allocated to a particular, valuable service.

Service Classification of ITFS

17. One petitioner contends that ITFS service should be classified as "broadcasting," with its attendant responsibilities observed, because its excess capacity use is an omnidirectional transmission to the general public. However, the excess capacity use to which the petitioner refers is typically provided on a subscription basis. In a separate proceeding, the Commission has proposed to classify all subscription services as "nonbroadcast," based on their specialized point-to-point or point-to-multipoint nature, and will not change its initial classification of ITFS as a nonbroadcast service. Petitioner's comments will be associated with the proceeding considering regulatory classification of subscription services. *Notice of Proposed Rulemaking* in General Docket No. 85–305, 51 FR 1817 (January 15, 1986).

Four-Channel Limitation

18. In maintaining its four-channel limitation as currently written, the Commission rejects a petitioner's suggestion that it be expanded to preclude any entity from having direct or indirect interests in more than eight channels within a 50-mile geographic area, via funding, jurisdictional controls, or consortia-membership restrictions. The Commission notes that such a provision could restrict state funding of education and that consortia can actually contribute to the efficient use of the facilities by combining resources and uses of facilities. The Commission maintains the capacity to review the merit of individual cases if monopolization appears to threaten.

Permissible Use

19. *Essential Use.* The essential use requirement provides that "every channel authorized must be used to transmit formal educational programming offered for credit to enrolled students of accredited schools." 47 CFR 74.931(a). The Commission again rejects arguments to expand the definition to include less formal kinds of instructional programming, including various forms of continuing education and in-service training, stressing the primary purpose of ITFS service. In response to concerns raised by a hospital association, the definition is rewarded to include nationally accredited as well as a state accredited instruction, and instruction directed at students as well as "staff."

20. *Substantial Use.* Commission rules required that at least forty hours must be preserved for ITFS use on a channel before it can be used for non-ITFS purposes, with at least twenty of those hours in active use. 47 CFR § 74.931(e). The Commission denies one petitioner's request that the requirement be delayed for one year from the date of this decision. It also affirms its determination that while any reserved hours used to fulfill the requirement may be utilized for non-ITFS purposes on an interim basis, they must be recapturable by the lessor/licensee without charge and without procedural impediment.

Technical Standards

21. *15-Mile Protected Service Area.* The Commission again rejects the proposal for a 15-mile radius or mathematically defined service area for ITFS stations, and will continue to protect individual receive sites. It repeats its reasoning that due to the nature of ITFS service, many carefully engineered receive sites fall outside of the protected area and would not receive protection, in effect penalizing good engineering practices. Additionally, in certain situations, the mathematically specified boundary would protect areas not receiving ITFS service, unnecessarily reducing the availability of facilities. It repeats its requirement that applications be filed in order to afford protection to new receive sites and reasserts its conclusion that this burden is not significant, given the simplicity of the procedure. (Applications to add receive sites are minor changes and are not subject to cut-off procedures.)

22. *Major/Minor Changes.* The Commission will maintain its current definition of "major" change. One petitioner contends that is should be expanded, as some types of changes that do not fall into the category involve potential significant interference or preclusion considerations. However, the Commission's staff has the discretion to classify any individual change as a major change, if appropriate, and the public interest is best served by expeditiously processing those modification applications which are not likely to have an adverse impact, and by affording a greater opportunity for review and challenge only in those isolated cases where warranted. The Commission maintains that there is ample time for staff review of each application before such a determination must be made.

23. *Receive Antenna Appropriateness.* One petitioner maintains that the rule revisions dealing with appropriate receive site antenna selections would have the effect of discouraging efficient spectrum utilization, and further contends that individual licensees should be required to install the "best practical" receive antenna. The Commission agrees with other parties that such antenna upgrades would represent a costly burden to existing licensees, and affirms its decision. An additional provision, developed by the parties, is adopted to permit grant of applications which would otherwise involve interference with existing licensees provided that the applicant bears all costs of upgrading the existing licensees reception equipment to prevent such interference. Applicants wishing to take advantage of this policy are required to submit appropriate documentation.

---

24. *Interference Ratios.* One petitioner contends that unless received video signal-to-noise ratios are considered in interference calculations, some individual receive sites will be overprotected, reducing the availability of additional ITFS service to the public. The Commission's experience is that the majority of ITFS stations are designed to avoid such situations, and that there is not sufficient evidence to justify this additional processing burden on applicants and the Commission's staff.

25. The protection standard for adjacent channel interference depends on the date of the installation of equipment being protected, with the standard relaxed with respect to newer equipment. The rule will be modified, however, to depend on the date of the installation of reception equipment, rather than of the transmitting equipment, as the quality of the receive equipment determines the capability to discriminate between adjacent channel signals. Determining such dates will be the resonsibility of the applicant wishing to utilize the relaxed standard; absent information presented to the contrary, it will be assumed that reception equipment installation occurred simultaneously with original station construction.

26. The Commission denies one petitioner's request that cochannel and adjacent channel interference ratios be increased from 45 dB to 55 dB and 10 dB, to 15 dB, respectively. The established ratios are based on extensive Television Allocation Study Organization (TASO) test results. While alternative viewing tests, for which the Commission has also provided, would be expensive, factual data is necessary for making such decisions. No such information has been advanced to persuade the Commission to change the adopted interference ratios.

27. *Identification of Receive Site Equipment.* The Commission rejects petitioner's request that the Commission require submission of pertinent data on receive sites retroactively from ITFS licensees. Such a requirement would impose an unnecessary burden on existing licensees and the characteristics of the two-foot reference antenna provide a reasonable alternative. Alternate showings may be made by an applicant when accompained by appropriate data.

28. *Out-of-Band Emission Limits.* One petitioner contends that our present limitation on out-of-band emissions are inadequate, especially in situations where adjacent channel facilities are colocated. New limitations are suggested. The Commission concludes that inadequate documentation has been presented on both the technical need and the economic impact of stricter out-of-band emission limitations and maintains that the present limitations are adequate. The Commission also considers a request for relaxation of aural power and modulation rules and concludes that such matters could be resolved as case-by-case waiver requests.

29. *Interoperability Standards.* Several petitioners assert that the Commission's current regulations are inadequate to provide mutual protection of spectrally adjacent facilities in different services. As a guideline, the Commission maintains that an applicant in ITFS, OFS or MDS should provide previously granted adjacent channel stations in any of the other services the level of protection specified in the rules applicable to the previously granted service. This will provide adequate protection to all services while avoiding unnecessary delays in authorizing new facilities.

30. *International Considerations.* The Commission determines that, based upon recent bilateral discussions, 50 miles is a more appropriate figure for cross-border coordination than the present 35 mile standard.

Ordering Clauses

31. Accordingly, it is ordered, That the petitions for reconsideration filed by the parties listed in Appendix A are denied, except to the extent indicated above.

32. It is further ordered, That any nonlocal entity that wishes to amend its ITFS application pursuant to the provisions of paragraphs 12–14 [in the original text], shall file such amendment within the time periods set out in paragraph 15 and 16 [in the original text].

33. It is further ordered, That any local entity, whose ITFS application is mutually exclusive with that of a nonlocal entity, that wishes to amend its application pursuant to the provisions of paragraph 15 [in the original text], shall file such amendment within ninety days of the publication of the Summary of this order in the **Federal Register**.

34. It is further ordered, That Part 74 of the Commission's Rules and Regulations is amended, effective thirty days after publication in the **Federal Register**, as set forth in Appendix B, under authority contained in 47 U.S.C. 2, 4(i) and 303.

35. It is further ordered, That the revisions of FCC Form 330–P (now designated as FCC Form 330) are adopted and the revised formats effective upon final approval by the Office of Management and Budget and the release of a Public Notice announcing the availability of the revised form.

36. It is further ordered, That the Secretary shall cause a Summary of this *Memorandum Opinion and Order* to be printed in the **Federal Register**.

Federal Communications Commission.
William J. Tricarico,
Secretary.

Appendix B

Part 74 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

PART 74—EXPERIMENTAL, AUXILIARY AND SPECIAL BROADCAST, AND OTHER PROGRAM DISTRIBUTIONAL SERVICES

1. The authority citation for Part 74 continues to read:

Authority: Secs. 4 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303, unless otherwise noted. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended; 47 U.S.C. 301, 303, 307, unless otherwise noted.

2. Section 74.903 is amended by revising paragraph (a)(2) and the introductory text of (b), and paragraph (b)(3), and by adding paragraph (a)(4) to read as follows:

§ 74.903 Interference.

(a) * * *

(2) Adjacent channel interference is defined as the ratio of the desired signal to undesired signal present in an adjacent channel, at the antenna input terminals of the affected receiver, when the ratio is less than 0 dB, except in cases where the stations were constructed before May 26, 1983. In such cases, the desired to undesired signal ratio shall not be less than 10 dB unless the individual receive site under consideration has been subsequently upgraded with up-to-date reception equipment. Absent information presented to the contrary, the Commission will assume that reception equipment installation occurred simultaneously with original station construction.

(3) * * *

(4) If an application can demonstrate that the installation of a receiving antenna at an existing licensee's site with characteristics superior to those of the standard antenna (or, alternatively, the appropriate existing antenna in use at the site) will permit the applicant to

VOL
51
ISS
55
MR
21
1986
UMI

provide service without interference to the existing licensees, the application will be considered grantable with the condition that the applicant bears all costs of upgrading the existing licensee's reception equipment at that site(s). Such a showing should include interference calculations for both the existing or reference antenna and the proposed antenna. The manufacturer, model number(s), co-polar and cross-polar gain patterns of the replacement antenna should be supplied as well as an accurate assessment of the expected reimbursement costs.

(b) All applicants for instructional television fixed stations are expected to take full advantage of such directive antenna techniques to prevent interference to the reception of any existing operational fixed, multichannel multipoint distribution, international control or instructional television fixed station at authorized receiving locations. Therefore, all applications for new or major changes must include an analysis of potential interference to all existing and previously proposed stations in accordance with § 74.903(a). An applicant for a new instructional television fixed station or for changes in an existing ITFS facility for a construction permit must include the following technical information with the application:

* * * * *

(3) An analysis concerning possible adverse impact upon Mexican and Canadian communications if the station's transmitting antenna is to be located within 50 miles of the border.

* * * * *

3. Section 74.913 is amended by revising paragraphs (b) (2), (3), (4) and (c); and adding new Note 1 and redesignating present Note 1 as Note 2, as follows:

§ 74.913 Selection procedure for mutually exclusive ITFS applications.

* * * * *

(b) Each applicant will be awarded a predetermined number of points under the criteria listed:

* * * * *

(2) Three points for accredited schools, or their governing bodies applying within their jurisdiction;

(3)(i) Two points for applicants whose request, if granted, would result in the acquisition of four or fewer ITFS channels by that applicant within the particular area;

(ii) Two points for new applicants, *i.e.*, applicants that are not already authorized to operate an ITFS station within the particular area;

(4) One point for a proposed weekly schedule of twenty-one or more average hours per channel per week of formal educational programming (§ 74.931(a)), or of forty-one or more average hours per channel per week of other ITFS programming; two points for forty-one or more average hours per channel per week of formal education programming, or for sixty-one or more hours per channel per week of ITFS programming where at least twenty-one of those hours are formal educational programming;

(5) * * *

(c) If the best qualified (highest scoring) two or more applicants have the same point accumulation, they will be given thirty days from the date of release of such decision to notify the Commission of any agreement to divide the use of the channels. If no agreement is reached and advanced to the Commission within that time, the tentative selectee will then be determined through a tie-breaker mechanism.

* * * * *

Note 1: Entities entitled to the accreditation points will include umbrella organizations whose membership is composed of entities which are individually eligible for the points. Also, a state's department of education (or equivalent agency) would qualify, as well as any directly controlled arm of that department if its specific duties include that department's educational function.

Note 2: * * *

4. Section 74.932 is amended by revising paragraph (a)(4), as follows:

§ 74.932 Eligibility and licensing requirements.

(a) * * *

(4) These applicant organizations whose eligibility is established by service to accredited institutional or governmental organizations must submit documentation from proposed receive sites demonstrating they will receive and use the applicant's formal educational programming. In place of this documentation, a state educational television (ETV) commission may demonstrate that the public schools it proposes to serve are required to use its proposed formal educational programming.

5. Section 74.931 is amended by revising note 1, which follows paragraph (e), as follows:

§ 74.931 Purpose and permissible service.

* * * * *

(e) * * *

Note 1: Any medical service courses offered by hospitals to their staffs or to medical students as training for state or national licenses or certifications will qualify as formal educational programming to satisfy the requirement of paragraph (e) of this section.

[FR Doc. 86-5890 Filed 3-20-86; 8:45 am]

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Parts 571 and 585

[Docket No. 74-14; Notice 43]

Federal Motor Vehicle Safety Standards

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Final rule.

SUMMARY: On April 12, 1985, NHTSA issued a notice proposing a number of amendments to Standard No. 208, *Occupant Crash Protection*. Based on its analysis of the comments received in response to that notice, the agency has decided to take the following actions: Retain the oblique crash test for automatic restraint equipped cars, adopt some New Car Assessment Program test procedures for use in the standard's crash tests, provide in the standard for a due care defense with respect to the automatic restraint requirement, and require the dynamic testing of manual lap/shoulder belts in passenger cars. This notice also creates a new Part 585 that sets reporting requirements regarding compliance with the automatic restraint phase-in requirements of the standard.

DATES: The amendments made by this notice will take effect on May 5, 1986, except the requirement for dynamic testing of manual safety belts in passenger cars § 571.208, S4.6.1) will go into effect on September 1, 1989, if the automatic restraint requirement is rescinded. Petitions for reconsideration must be filed by April 21, 1986.

ADDRESS: Petitions for reconsideration should refer to the docket and notice number of this notice and be submitted to: Administrator, Room 5220, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Dr. Richard Strombotne, Office of Vehicle Safety Standards, Room 5320, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590. Telephone (202) 426-2264.

SUPPLEMENTARY INFORMATION:

Background

On July 11, 1984 (49 FR 28962), the Secretary of Transportation issued a final rule requiring automatic occupant protection in all passenger cars. The rule is based on a phase-in schedule beginning on September 1, 1986, with full implementation being required by September 1, 1989. However, if before April 1, 1989, two-thirds of the population of the United States are covered by effective state mandatory safety belt use laws (MULs) meeting specified criteria, the automatic restraint requirement will be rescinded.

More specifically, the rule requires:

- Front outboard seating positions in passenger cars manufactured on or after September 1, 1986, for sale in the United States, will have to be equipped with automatic restraints based on the following schedule:
- Ten percent of all cars manufactured on or after September 1, 1986.
- Twenty-five percent of all cars manufactured on or after September 1, 1987.
- Forty percent of all cars manufactured on or after September 1, 1988.
- One hundred percent of all cars manufactured on or after September 1, 1989.
- During the phase-in period, each car that is manufactured with a system that provides automatic protection to the driver without the use of safety belts and automatic protection of any sort to the passenger will be given an extra credit equal to one-half car toward meeting the percentage requirement. In addition, each car which provides non-belt automatic protection solely to the driver will be given a one vehicle credit.
- The requirement for automatic restraints will be rescinded if MULs meeting specified conditions are passed by a sufficient number of states before April 1, 1989, to cover two-thirds of the population of the United States. The MULs must go into effect no later than September 1, 1989.

In the July 1984 notice, the Secretary identified various issues requiring additional rulemaking. On April 12, 1985, the agency issued two notices setting forth proposals on all of those issues. One notice (50 FR 14589), which is the basis for the final rule being issued today, proposed: reporting requirements for the phase-in, deletion of the oblique test, alternative calculations of the head injury criterion (HIC), allowing the installation of manual belts in convertibles, use of the New Car Assessment Program (NCAP) test procedures, and adoption of a due care defense. The notice also proposed the dynamic testing of manual lap/shoulder belts for passenger cars, light trucks and light vans. The second notice (50 FR 14602) set forth the agency's proposals on the use of the Hybrid III test dummy and additional injury criteria. NHTSA has not yet completed its analysis of the comments and issues raised by the Hybrid III proposal or the proposal regarding convertibles and dynamic testing of safety belts in light trucks and light vans. The agency will publish a separate **Federal Register** notice announcing its decision with regard to these issues when it has completed its analysis.

Oblique Crash Tests

Standard No. 208 currently requires cars with automatic restraints to pass the injury protection criteria in 30 mph head-on and oblique impacts into a barrier. The April 1985 notice contained an extensive discussion of the value of the oblique test and requested commenters to provide additional data regarding the safety and other effects of deleting the requirement.

The responses to the April notice reflected the same difference of opinion found in the prior responses on this issue. Those favoring elimination of the test argue that the test is unnecessary since oblique crash tests generally show lower injury levels. They also said the additional test adds to the cost of complying with the standard—although manufacturers differed as to the extent of costs. Four manufacturers suggested that any cost reduction resulting from elimination of the test would be minimal, in part because they will continue to use the oblique tests in their restraint system development programs, regardless of what action the agency takes. Another manufacturer, however, said that while it would continue to use oblique testing during its vehicle development programs, the elimination of the oblique test in Standard No. 208 would result in cost and manpower savings. These savings would result because the parts used in vehicles for certification testing must be more representative of actual production parts than the parts used in vehicles crashing during development tests.

Those favoring retention of the test again emphasized that the test is more representative of real-world crashes. In addition, they said that occupants in systems without upper torso belts, such as some air bag or passive interior systems, could experience contact with the A-pillar and other vehicle structures in the oblique test that they would not experience in a head-on test. Although, again, there were confliciting opinions on this issue—one manufacturer said that oblique tests would not affect air bag design, while other manufacturers argued that the oblique test is necessary to ensure the proper design of air bag systems. The same manufacturer that said air bag design would not be effected by the oblique test, emphasized that vehicles with 2-point automatic belts or passive interiors, "may show performance characteristcs in oblique tests that do not show up on perpendicular tests." Similarly, one manufacturer said that oblique tests will not result in test dummy contact with the A-pillar or front door—while another manufacturer argued that in the oblique test contact could occur with the A-pillar in vehicles using non-belt technologies.

After examining the issues raised by the commenters, the agency has decided to retain the oblique tests. There are a number of factors underlying the agency's decision. First, although oblique tests generally produce lower injury levels, they do not consistently produce those results. For example, the agency has conducted both oblique and frontal crash tests on 14 different cars as part of its research activities and NCAP testing. The driver and passenger HIC's and chest acceleration results for those tests show that the results in the oblique tests are lower in 31 of the 38 cases for which data were available. However, looking at the results in terms of vehicles, 6 of the 14 cars had higher results, exclusive of femur results, in either passenger or driver HIC's or chest accelerations in the oblique tests. The femur results in approximately one-third of the measurements were also higher in the oblique tests. Accident data also indicate that oblique impacts pose a problem. The 1982 FARS and NASS accident records show that 14 percent of the fatalities and 22 percent of the AIS 2-5 injuries occur in 30 degree impacts.

The agency is also concerned that elimination of the oblique test could lead to potential design problems in some automatic restraint systems. For example, air bags that meet only a perpendicular impact test could be made much smaller. In such a case, in an oblique car crash, the occupant would roll off the smaller bag and strike the A-pillar or instrument panel. Similarly, the upper torso belt of an automatic belt system could slip off an occupant's shoulder in an oblique crash. In belt systems with a tension-relieving device, the system will be tested with the maximum amount of slack recommended by the vehicle manufacturer, potentially increasing the possibility of the upper

VOL 51
ISS 55
MR 21
1986
UMI

torso belt slipping off the occupant's shoulder. In the case of passive interiors, an occupant may be able to contact hard vehicle structures, such as the A-pillar, in oblique crashes that would not be contacted in a perpendicular test. If the A-pillar and other hard structures are not designed to provide protection in oblique crashes then there would be no assurance, as there presently is, that occupants would be adequately protected. Thus, the oblique test is needed to protect unrestrained occupants in passive interiors, and to ensure that air bags and automatic or manual safety belts are designed to accommodate some degree of oblique impact.

The agency recognizes that retention of the oblique test will result in additional testing costs for manufacturers. The agency believes, however, that there are a number of factors which should minimize those costs. First, even manufacturers opposing retention of the oblique test indicated that they will continue to perform oblique crash tests to meet their own internal requirements as well as to meet the oblique test requirements of the Standard No. 301, *Fuel System Integrity*. Since the oblique tests of Standard No. 208 and Standard No. 301 can be run simultaneously, the costs resulting from retention of the oblique crash test requirements of Standard No. 208 should not be significant.

Dynamic Testing of Manual Belts

The April notice proposed that manual lap/shoulder belts installed at the outboard seating positions of the front seat of four different vehicle types comply with the dynamic testing requirements of Standard No. 208. Those requirements provide for using test dummies in vehicle crashes for measuring the level of protection offered by the restraint system. The four vehicle types subject to this proposal are passenger cars, light trucks, small van-like buses, and light multipurpose passenger vehicles (MPV's). (The agency considers light trucks, small van-like buses, and light MPV's to be vehicles with a Gross Vehicle Weight Rating (GVWR) of 10,000 pounds or less and an unloaded vehicle weight of 5,500 pounds or less. The 5,500 pound unloaded vehicle weight limit is also used in Standard No. 212, *Windshield Retention*, and Standard No. 219, *Windshield Zone Intrusion*. The limit was adopted in those standards on April 3, 1980 (45 FR 22044) to reduce compliance problems for final-stage manufacturers. Readers are referred to the April 1980 notice for a complete discussion of the 5,500 pound limit.)

Currently, manual belts are not subject to dynamic test requirements. Instead they must be tested in accordance with Standard No. 209, *Seat Belt Assemblies*, for strength and other qualities in laboratory bench tests. Once a safety belt is certified as complying with the requirements of Standard No. 209, it currently may be installed in a vehicle without any further testing or certification as to its performance in that vehicle. The safety belt anchorages in the vehicle are tested for strength in accordance with Standard No. 210, *Seat Belt Assembly Anchorages*.

The April 1985 notice also addressed the issue of tension-relieving devices on manual belts. Tension-relieving devices are used to introduce slack in the shoulder portion of a lap-shoulder belt to reduce the pressure of the belt on an occupant or to effect a more comfortable "fit" of the belt to an occupant. The notice proposed that manufacturers be required to specify in their vehicle owner's manuals the maximum amount of slack they recommend introducing into the belt under normal use condition. Further, the owner's manual would be required to warn that introducing slack beyond the maximum amount specified by the manufacturer could significantly reduce the effectiveness of the belt in a crash. During the agency's dynamic tesing of manual belts, the tension-relieving devices would be adjusted so as to introduce the maximum amount of slack specified in the owner's manual.

The agency proposed that the dynamic test requirement for passenger cars take effect on September 1, 1989, and only if the Secretary determines that two-thirds of the population is covered by effective safety belt use laws, thereby rescinding the automatic restraint requirement. Should such a determination be made, it is important that users of manual belts be assured that their vehicles offer the same level of occupant protection as if automatic restraints were in their vehicles. Absent a rescission of the automatic restraint requirement, application of the dynamic testing requirements to manual safety belts in passenger cars would be unnecessary since those belts would not be required in the outboard seating positions of the front seat. In the case of light trucks, light MPV's and small van-like buses, the agency proposed that the dynamic test requirement take effect on September 1, 1989. The proposed effective date for light trucks, light MPV's and van-like buses was not conditional, because those vehicles are not covered by the automatic restraint requirement and will likely continue to have manual safety belts.

Adoption of the Requirement

As discussed in detail below, the agency has decided to adopt a dynamic test requirement for safety belts used in passenger cars. The agency is still analyzing the issues raised in the comments about dynamic testing for safety belt systems in other vehicles and will announce its decision about safety belt systems in light trucks, MPV's and buses at a later date.

Most of the commenters favored adopting a dynamic test requirement for manual belts at least with respect to passenger cars, although many of those commenters raised questions about the leadtime needed to comply with the requirement. Those opposing the requirement argued that the field experience has shown that current manual belts provide substantial protection and thus a dynamic test requirement is not necessary. In addition, they argued that dynamic testing would substantially increase a manufacturer's testing costs, and its testing workload. One commenter said that because of the unique nature of the testing, it could not necessarily be combined with other compliance testing done by a manufacturer. The same commenter argued that vehicle downsizing, cited by the agency as one reason for dynamically testing belts, does not create safety problems since the interior space of passenger cars has remained essentially the same as it was prior to downsizing. The commenter also argued there is no field evidence that the use of tension-relieving devices in safety belts, the other reason cited by the agency in support of the need to test dynamically manual safety belts, is compromising the performance of safety belts.

The agency strongly believes that current manual belts provide very substantial protection in a crash. The Secretary's 1984 automatic protection decision concluded that current manual safety belts are at least as effective, and in some cases, more effective than current automatic belt designs. That conclusion was based on current manual safety belts, which are not certified to dynamic tests. However, as discussed in the April 1985 notice, the agency is concerned that as an increasing number of vehicles are reduced in size for fuel economy purposes and as more tension-relieving devices are used on manual belts, the potential for occupant injury increases. The agency agrees that downsizing efforts by manufacturers have attempted to preserve the interior space of passenger cars, while reducing their

exterior dimensions. Preserving the interior dimensions of the passenger compartment means that occupants will not be placed closer to instrument panels and other vehicle structures which they could strike in a crash. However, the reduction in exterior dimensions can result in a lessening of the protective crush distance available in a car. Thus the agency believes it is important to ensure that safety belts in downsized vehicles will perform adequately. In the case of tension-relieving devices, agency tests of lap/shoulder belt restrained test dummies have shown that as more slack is introduced into a shoulder belt, the injuries measured on the test dummies increased. Thus, as discussed in detail later in this notice, the agency believes it is important to ensure that safety belts with tension-relievers provide adequate protection when they are used in the manner recommended by vehicle manufacturers. This is of particular concern to the agency since the vast majority of new cars (nearly all domestically-produced cars) now are equipped with such devices. For those reasons, the agency is adopting the dynamic test requirement.

The adoption of this requirement will ensure that each and every passenger car, as compared to the vehicle population in general, offers a consistent, minimum level of protection to front seat occupants. By requiring dynamic testing, the standard will assure that the vehicle's structure, safety belts, steering column, etc., perform as a unit to protect occupants, as it is only in such a test that the synergistic and combination effects of these vehicle components can be measured. As discussed in detail in the Final Regulatory Evaluation (FRE), vehicle safety improvements will result from dynamic testing; and, as discussed later in this notice, such improvements can often be made quickly and at low cost.

The agency recognizes that manufacturers may have to conduct more testing than they currently do. However, the dynamic testing of manual belts in passenger cars, as with testing of automatic restraints, can be combined with other compliance tests to reduce the overall number of tests. The agency notes that in its NCAP tests, it has been able to combine the dynamic testing of belts with measuring the vehicle's compliance with other standards. The agency has followed the same practice in its compliance tests. For example, the agency has done compliance testing for Standard Nos. 208, 212, 219, and 301 in one test. The agency would, of course, recognize a manufacturer's use of combined tests as a valid testing procedure to certify compliance with these standards.

Effective Date

Two commenters argued that the requirement should become effective as soon as practical. As discussed in the April 1985 notice, the agency proposed an effective date of September 1, 1989, because it did not want to divert industry resources away from designing automatic restraints for passenger cars. The agency continues to believe it would be inappropriate to divert those resources for the purposes of requiring improvements on manual belt systems that might not be permitted in passenger cars.

Other commenters asked for a delay in the effective date—one asked for a delay until September 1, 1991, while another asked that the effective date be set 2–3 years after the determination of whether a sufficient number of States have passed effective mandatory safety belt use laws. NHTSA does not agree there is a need to delay the effective date beyond September 1, 1989 for passenger cars. Commenters argued that the time span between any decision on rescission of the automatic restraint requirements (as late as April 1, 1989) and the effective date of the dynamic testing of manual belts (September 1, 1985) is too short to certify manual belts.

The agency believes there is sufficient leadtime for passenger cars. Most of the vehicle components in passenger cars necessary for injury reduction management are the same for automatic restraint vehicles and dynamically tested manual belt vehicles. Additionally, as indicated and discussed in the April notice, approximately 40 percent of the passenger cars tested in the agency's 35 mph (NCAP) program meet the injury criteria specified in Standard No. 208, even though a 35 mph crash involves 36 percent more energy than the 30 mph crash test required by Standard No. 208. In addition, the FRE shows that with relatively minor vehicle and/or restraint system changes some safety belt systems can be dramatically improved. This is further evidence that development of dynamically tested manual belts for passenger cars in 30 mph tests should not be a major engineering program. Thus, a delay in the effective date for passenger cars is not needed.

Webbing Tension-Relieving Devices

With one exception, those manufacturers who commented on the proposal concerning tension-relieving devices supported testing safety belts adjusted so that they have the amount of slack recommended by the manufacturer in the vehicle owner's manual. However, one manufacturer and two other commenters objected to the provision related to dynamic testing with the tension-relieving device adjusted to the manufacturer's maximum recommended slack position. The manufacturer objected to a dynamic test that would require any slack at all to be introduced into the belt system, on the grounds that uncontrolled variability would be introduced into the dynamic test procedure, which would then lack objectivity. The manufacturer asserted that it might have to eliminate all tension-relieving devices for its safety belts.

The agency's proposed test procedure was intended to accommodate tension-relieving devices since they can increase the comfort of belts. At the same time, the proposal would limit the potential reduction in effectiveness for safety belt systems with excessive slack. The agency does not agree that this test procedure need result in the elimination of tension-relieving devices from the marketplace. As mentioned earlier, other manufacturers supported the proposal and did not indicate they would have to remove tension-relieving devices from their belt systems. The commenter opposing the requirement did not show that injury levels cannot be controlled within the specified injury criteria by testing with the recommended amount of slack, as determined by the manufacturer. The recommended slack could be very small or at any level selected by the manufacturer as appropriate to relieve belt pressure and still ensure that the injury reduction criteria of Standard No. 208 would be met. As a practical matter, most tension-relievers automatically introduce some slack into the belt for all occupants. Testing without such slack would be unrealistic.

The two other commenters objected to the proposal that manual belt systems using tension-relieving devices meet the injury criteria with only the specified amount of slack recommended in the owner's manual. They stated that most owners would not read the instructions in the owner's manual regarding the proper use of the tension-relieving device. They said an occupant could have a false sense of adequate restraint when wearing a belt system adjusted beyond the recommended limit.

The agency's views on allowing the use of tension relievers in safety belts were detailed in the April 1985 notice. The agency specifically noted the effectiveness of a safety belt system

VOL 51
ISS 55
MR 21
1986
UMI

could be compromised if excessive slack were introduced into the belt. However, the agency recognizes that a belt system must be used to be effective at all. Allowing manufacturers to install tension-relieving devices makes it possible for an occupant to introduce a small amount of slack to relieve shoulder belt pressure or to divert the belt away from the neck. As a result, safety belt use is promoted. This factor should outweigh any loss in effectiveness due to the introduction of a recommended amount of slack in normal use. This is particularly likely in light of the requirement that the belt system, so adjusted, must meet the injury criteria of Standard No. 208 under 30 mph test conditions. Further, the inadvertent introduction of slack into a belt system, which is beyond that for normal use, is unlikely in most current systems. In addition, even if too much slack is introduced, the occupant should notice that excessive slack is present and a correction is needed, regardless of whether he or she has read the vehicle's owner's manual.

Exemption From Standard Nos. 203 and 204

One commenter suggested that vehicles equipped with dynamically tested manual belts be exempt from Standard Nos. 203, *Impact Protection for the Driver from the Steering Control Systems,* and 204, *Steering Column Rearward Displacement.* The agency does not believe such an exemption would be appropriate because both those standards have been shown to provide substantial protection to belted drivers.

Latching Procedure in Standard No. 208

One commenter asked that Standard No. 208 be modified to include a test procedure for latching and adjusting a manual safety belt prior to the belt being dynamically tested. NHTSA agrees that Standard 208 should include such a procedure. The final rule incorporates the instructions contained in the NCAP test procedures for adjusting manual belts, as modified to reflect the introduction of the amount of slack recommended by the vehicle manufacturer.

Revisions to Standard No. 209

The notice proposed to exempt dynamically tested belts from the static laboratory strength tests for safety belt assemblies set forth in S4.4 of Standard No. 209. One commenter asked that such belts be exempted from the remaining requirements of Standard No. 209 as well.

NHTSA agrees that an additional exemption from some performance requirements of Standard No. 209 is appropriate. Currently, the webbing of automatic belts is exempt from the elongation and other belt webbing and attachment hardware requirements of Standard No. 209, since those belts have to meet the injury protection criteria of Standard No. 208 during a crash. For dynamically-tested manual belts, NHTSA believes that an exemption from the webbing width, strength and elongation requirements (sections 4.2(a)–(c)) is also appropriate, since these belts will also have to meet the injury protection requirements of Standard No. 208. The agency has made the necessary changes in the rule to adopt that exemption.

The agency does not believe that manual belts should be exempt from the other requirements in Standard No. 209. For example, the requirements on buckle release force should continue to apply, since manual safety belts, unlike automatic belts, must be buckled every time they are used. As with retractors in automatic belts, retractors in dynamically tested manual belts will still have to meet Standard No. 209's performance requirements.

Revisions to Standard No. 210

The notice proposed that dynamically tested manual belts would not have to meet the location requirements set forth in Standard No. 210, *Seat Belt Assembly Anchorages.* One commenter suggested that dynamically tested belts be completely exempt from Standard No. 210; it also recommended that Standard No. 210 be harmonized with Economic Commission for Europe (ECE) Regulation No. 14. Two other commenters suggested using the "out-of-vehicle" dynamic test procedure for manual belts contained in ECE Regulation No. 16, instead of the proposed barrier crash test in Standard No. 208.

The agency does not believe that the "out of vehicle" laboratory bench test of ECE Regulation No. 16 should be allowed as a substitute for a dynamic vehicle crash test. The protection provided by safety belts depends on the performance of the safety belts themselves, in conjunction with the structural characteristics and interior design of the vehicle. The best way to measure the performance of the safety belt/vehicle combination is through a vehicle crash test.

The agency has already announced its intention to propose revisions to Standard No. 210 to harmonize it with ECE Regulation No. 14; therefore the commenters' suggestions concerning harmonization and exclusion of dynamically tested safety belts from the other requirements of Standard No. 210 will be considered during that rulemaking. At the present time, the agency is adopting only the proposed exclusion of anchorages for dynamically tested safety belts from the location requirements, which was not opposed by any commenter.

Belt Labelling

One commenter objected to the proposal that dynamically tested belts have a label indicating that they may be installed only at the front outboard seating positions of certain vehicles. The commenter said that it is unlikely that anyone would attempt to install a Type 2 lap shoulder belt in any vehicle other than the model for which it was designed. The agency does not agree. NHTSA believes that care must be taken to distinguish dynamically tested belt systems from other systems, since misapplication of a belt in a vehicle designed for use with a specific dynamically tested belt could pose a risk of injury. If there is a label on the belt itself, a person making the installation will be aware that the belt should be installed only in certain vehicles.

Use of the Head Injury Criterion

The April 1985 notice set forth two proposed alternative methods of using the head injury criterion (HIC) in situations when there is no contact between the test dummy's head and the vehicle's interior during a crash. The first proposed alternative was to retain the current HIC calculation for contact situations. However, in non-contact situations, the agency proposed that a HIC would not be calculated, but instead new neck injury criteria would be calculated. The agency explained that a crucial element necessary for deciding whether to use the HIC calculation or the neck criteria was an objective technique for determining the occurrence and duration of head contact in the crash test. As discussed in detail in the April 1985 notice, there are several methods available for establishing the duration of head contact, but there are questions about their levels of consistency and accuracy.

The second alternative proposed by the agency would have calculated a HIC in both contact and non-contact situations, but it would limit the calculation to a time interval of 36 milliseconds. Along with the requirement that a HIC not exceed 1000, this would limit average head acceleration of 60 g's or less.

Almost all of the commenters opposed the use of the first proposed alternative. The commenters uniformly noted that there is no current technique that can accurately identify whether head contact has or has not occurred during a crash test in all situations. However, one commenter urged the agency to adopt the proposed neck criteria, regardless of whether the HIC calculation is modified. There was a sharp division among the commenters on the second proposed alternative. Manufacturers commenting on the issue uniformly supported the use of the second alternative; although many manufacturers argued that the HIC calculation should be limited to a time interval of approximately 15 to 17 milliseconds (ms), which would limit average head accelerations to 80–85 g's. Another manufacturer, who supported the second alternative, urged the agency to measure HIC only during the time interval that the acceleration level in the head exceeds 60 g's. It said that this method would more effectively differentiate results received in contacts with hard surfaces and results obtained from systems, such as airbags, which provide good distribution of the loads experienced during a crash. Other commenters argued that the current HIC calculation should be retained; they said that the proposed alternatives would lower HIC calculations without ensuring that motorists were still receiving adequate head protection.

NHTSA is in the process of reexamining the potential effects of the two alternatives proposed by the agency and of the two additional alternatives suggested by the commenters. Once that review has been completed, the agency will issue a separate notice announcing its decision.

NCAP Test Procedures

The April 1985 notice proposed adopting the test procedures on test dummy positioning and vehicle loading used in the agency's NCAP testing. The commenters generally supported the adoption of the test procedures, although several commenters suggested changes in some of the proposals. In addition, several commenters argued that the new procedures may improve test consistency, but the changes do not affect what they claim is variability in crash test results. As discussed in the April 1985 notice, the agency believes that the test used in Standard No. 208 does produce repeatable results. The proposed changes in the test procedures were meant to correct isolated problems that occurred in some NCAP tests. The following discussion addresses the issues raised by the commenters about the specific test procedure changes.

Vehicle Test Attitude

The NPRM proposed that when a vehicle is tested, its attitude should be between its "as delivered" condition and its "loaded" condition. (The "as delivered" condition is based on the vehicle attitude measured when it is received at the test site, with 100 percent of all its fluid capacities and with all its tires inflated to the manufacturer's specifications. For passenger cars, the "loaded" condition is based on the vehicle's attitude with a test dummy in each front outboard designated seating position, plus carrying the cargo load specified by the manufacturer.)

One commenter said that the weight distribution, and therefore the attitude, of the vehicle is governed more by the Gross Axle Weight Rating (defined in 49 CFR Part 571.3) than the loading conditions identified by the agency. The commenter recommended that the proposal not be adopted. Another commenter said that the agency should adopt more specific procedures for the positioning of the dummy and the cargo weight. For example, that commenter recommended that the "cargo weight shall be placed in such manner that its center of gravity will be coincident with the longitudinal center of the trunk, measured on the vehicle's longitudinal centerline." The commenter said that unless a more specific procedure is adopted, a vehicle's attitude in the fully loaded condition would not be constant.

The agency believes that a vehicle attitude specification should be adopted. The purpose of the requirement is to ensure that a vehicle's attitude during a crash test is not significantly different than the fully loaded attitude of the vehicle as designed by the manufacturer. Random placement of any necessary ballast could have an effect on the test attitude of the vehicle. If these variables are not controlled, then the vehicle's test attitude could be affected and potential test variability increased.

NHTSA does not agree that the use of the Gross Axle Weight Rating (GAWR) is sufficient to determine the attitude of a vehicle. The use of GAWR only defines the maximum load-carrying capacity of each axle rather than in effect specifying a minimum and maximum loading as proposed by the agency. In addition, use of the GAWR may, under certain conditions, make it necessary to place additional cargo in the passenger compartment in order to achieve the GAWR loading. This condition is not desirable for crash testing, since the passenger compartment should be used for dummy placement and instrumentation and not ballast cargo. Thus the commenter's recommendation is not accepted.

The other commenter's recommendations regarding more specific test dummy placement procedures for the outboard seating positions were already accommodated in the NPRM by the proposed new S10.1.1, Driver position placement, and S10.1.2, Passenger position placement. Since those proposals adequately describe dummy placement in these positions, they are adopted.

NHTSA has evaluated the commenter's other suggestion for placing cargo weight with its center of gravity coincident with the longitudinal center of the trunk. The agency does not believe that it is necessary to determine the center of gravity of the cargo mass, which would add unnecessary complexity to the test procedure, but does agree that the cargo load should be placed so that it is over the longitudinal center of the trunk. The test procedures have been amended accordingly.

Open Window

One commenter raised a question about the requirement in S8.1.5 of Standard No. 208 that the vehicle's windows are to be closed during the crash test. It said adjustment of the dummy arm and the automatic safety belt can be performed only after an automatic belt is fully in place, which occurs only after the door is closed. Therefore, the window needs to be open to allow proper arm and belt placement after the door is closed.

NHTSA agrees that the need to adjust the slack in automatic and dynamically-tested manual belts prior to the crash test may require that the window remain open. The agency has modified the test procedure to allow manufacturers the option of having the window open during the crash test.

Seat Back Position

One commenter recommended that proposed S8.1.3, *Adjustable seat back placement,* be modified. The notice proposed that adjustable seat backs should be set in their design riding position as measured by such things as specific latch or seat track detent positions. The commenter suggested two options. The first option would be to allow vehicle manufacturers to specify any means they want to determine the seat back angle and the resulting dummy torso angle. As its second option, the commenter recommended that if the agency decides to adopt the proposal, it should determine the "torso

VOL
51
ISS
55
MR
21
1986
UMI

angle with an H-point machine according to SAE J826." The commenter said that depending on how the torso angle is established, different dummy torso angle could result in substantial adjustment deviations that can affect seat back placement.

The purpose of the requirement is to position the seat at the design riding position used by the manufacturer. The agency agrees with the commenter that manufacturers should have the flexibility to use any method they want to specify the seat back angle. Thus, the agency has made the necessary changes to the test procedure.

Dummy Placement

One commenter made several general comments about dummy placement. It agreed that positioning is very important and can have an influence on the outcome of crash tests. It argued that both the old and the proposed procedures are complicated and impractical to use. The commenter claims this situation will become more complicated if the Hybrid III is permitted, since the positioning must be carried out within a narrow temperature range (3 °F) for the test dummy to remain in calibration.

The commenter also believes that the positioning of the dummy should relate to vehicle type. It said that the posture and seating position of a vehicle occupant will not be the same in a van as in a sports car. For example, it said it has tried the proposed positioning procedures and found that they can result in an "unnatural" position for the dummy in a sports vehicle. The commenter argued that this "unnatural" position would then lead to a knee bolster design which would perform well in a crash test, but would likely not provide the same protection to a real occupant because of difference in positioning. The commenter recommended that the old positioning procedure be retained and the new procedure be provided as an option for those manufacturers whose vehicles cannot be adequately tested otherwise.

Because consistency in positioning the dummy is required prior to test, NHTSA believes that a single set of procedures should apply. As discussed in the April 1985 notice, the agency proposed the new procedures because of positioning problems identified in the NCAP testing. Allowing the use of the old positioning procedures could lead to sources of variability, thus negating a major objective of the procedures. The commenter's suggestion is therefore not adopted. The agency also notes that during its NCAP testing, which has involved tests of a wide variety of cars (including sports cars), trucks and MPV's, NHTSA has not experienced the "unnatural" seating position problem cited by the commenter.

Knee Pivot Bolt Head Clearance

Two commenters said that the proposal did not specify the correct distance between the dummy's knees, as measured by the clearance between the knee pivot bolt heads. The commenters are correct that the distance should be 11¾ inches rather than the proposed value of 14⅛ inches. The agency has corrected the number in the final rule.

Foot Rest

One commenter believes that a driver of cars equipped with foot rests typically will place his or her left foot on the foot rest during most driving and therefore this position should be used to simulate normal usage. The commenter said that using the foot rest will minimize variations in the positioning of the left leg, thus improving the repeatability of the test. In a discussion with the commenter, the agency has learned that the type of foot rest the commenter is referring to is a pedal-like structure where the driver can place his or her foot.

For vehicles without foot rests, the commenter recommended the agency use the same provisions for positioning the left leg of the driver as are used for the right leg of the passenger. It noted that positioning the driver's left leg, as with the passenger's right leg, can be hampered by wheelwell housing that projects into the passenger compartment and thus similar procedures for each of those legs should be used.

NHTSA agrees that in vehicles with foot rests, the test dummy's left foot should be positioned on the foot rest as long as placing the foot there will not elevate the test dummy's left leg. As discussed below, the agency is concerned that foot rests, such as pads on the wheelwell, that elevate the test dummy's leg can contribute to test variability. The agency also agrees that the positioning procedures for the driver's left leg and the passenger's right leg should be similar in situations where the wheelwell housing projects into the passenger compartment and has made the necessary changes to the test procedure.

Wheelwell

One commenter believes that the wheelwell should be used to rest the dummy's foot. It said that positioning the test dummy's foot there is particularly appropriate if the wheelwell has a design feature, such as a rubber pad, installed by the manufacturer for this purpose.

NHTSA disagrees that the dummy's foot should be rested on the wheelwell housing. The agency is concerned that elevating the test dummy's leg could lead to test variability by, among other things, making the test dummy unstable during a crash test. Although the wheelwell problem is similar to the foot rest problem, placement of the test dummy's foot on a separate, pedal-like foot rest can be accomplished while retaining the heel of the test dummy in a stable position on the floor. That is not the case with pads located on the wheelwell.

Another commenter also said that the proposed procedure for positioning the test dummy's legs in vehicles where the wheelwell projected into the passenger compartment was unclear as to how the centerlines of the upper and lower legs should be adjusted so that both remain in a vertical longitudinal plane. In particular, it was concerned that in a vehicle with a large wheelhousing, it may not be possible to keep the left foot of the driver test dummy in the vertical longitudinal plane after the right foot has been positioned. It believes that the procedure should specify which foot position should be given priority; it recommended that the position of the right leg be required to remain in the plane, while bringing the left leg as close to the vertical longitudinal plane as possible. The agency agrees that maintaining the inboard leg of the test dummy in the vertical plane is more easily accomplished since it will not be blocked by the wheelwell. The agency has modified the test procedure to specify that when it is not possible to maintain both legs in the vertical longitudinal plane, that the inboard leg must be kept as close as possible to in the vertical longitudinal plane and the outboard leg should be placed as close as possible to the vertical plane.

Lower Leg Angle

One commenter argued that proposed sections on lower leg positioning (S10.1.2.1(b) and S10.1.2.2(b)) will not result in a constant positioning of the test dummy's heels on the floor pan, thus causing differences in the lower leg angles. It stated that the lower leg angles will affect the femur load generated at the moment the foot hits the toe board during a collision. The commenter therefore proposed that the test procedure be revised to include placing a 20 pound load on the test dummy's knee during the foot positioning procedure. The commenter

did not, however, explain the basis for choosing a force of 20 pounds.

NHTSA believes that use of the additional weight loading and settling procedure proposed by the commenter will add an unnecessary level of complexity to the test procedure without adding any corresponding benefit. The positioning of the test dummy's heel has not been a problem in the agency's NCAP tests. Accordingly, the agency is not adopting the commenter's recommendation.

Shoulder Adjustment

One commenter asked the agency to specify that the shoulders of the test dummy be placed at their lowest adjustment position. While the shoulders are slightly adjustable, the agency believes that specifying an adjustment position is unnecessary. The agency's test experience has shown that the up and down movement of the shoulders is physically limited by the test dummy's rubber "skin" around the openings where the arms are connected to the test dummy's upper torso.

Dummy Lifting Procedure

One commenter was concerned about the dummy lifting proposed in (Section S10.4.1, Dummy Vertical Upward Displacement). It said that if the dummy lifting method is not standardized, test results could be affected by allowing variability in the position of the dummy's H point (the H point essentially represents the hip joint) through use of different lifting methods. It recommended use of a different chest lifting method to avoid variability in the subsequent positioning of the test dummy H-point.

The agency is not aware of any test data indicating that the use of different lifting methods is a significant source of variability. As long as a manufacturer follows the procedures set forth in S10.4.1 in positioning the test dummy, it can use any lifting procedure it wants.

Dummy Settling Load

One commenter was concerned about the proposed requirements for dummy settling (S10.4.2, Lower torso force application, and S10.4.5, Upper torso force application). The commenter believes that the proposals are inadequate because they do not prescribe the area over which to apply the load used to settle the test dummy in the seat. The commenter said that if the proposed 50 pound settling force is applied to an extremely small contact area, then the dummy may be deformed. It recommended that the load be applied to a specified area of 9 square inches on the dummy. In addition, it recommended that the agency specify the duration of the 50 lb. force application during the adjustment of the upper torso; it suggested a period of load application ranging from 5 to 10 seconds.

NHTSA and others have successfully used the proposed settling test procedures in their own tests without having any variability problems. Unless abnormally small contact areas are employed, or extremely short durations are used, standard laboratory practices should not result in any such problems. The agency believes that further specifying the area and timing of the force application is not necessary.

Dummy Head Adjustment

One commenter pointed out that it is impossible to adjust the head according to S10.6, Head Adjustment, because the Part 572 test dummy does not have a head adjustment mechanism. The agency agrees and has deleted the provision.

Additional Dummy Settling and Shoulder Belt Positioning Procedures

One commenter suggested a substantial revised dummy settling procedure and new procedures for positioning of the shoulder belt. NHTSA believes that its proposed procedures sufficiently address the settling and belt position issues. In addition, the commenter did not provide any data to show that variability would be further reduced by its suggested procedures. A substantial amount of testing would be needed to verify if the commenter's suggested test procedures do, in fact, provide any further decrease in variability than that obtained by the agency's test procedures. For those reasons, the agency is not adopting the commenter's suggestions for new procedures.

Due Care

In the April 1985 notice, the agency proposed amending the standard to state that the due care provision of section 108(b)(2) of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1397(b)(2)) applies to compliance with the standard. Thus, a vehicle would not be deemed in noncompliance if its manufacturer establishes that it did not have reason to know in the exercise of due care that such vehicle is not in conformity with the standard.

Commenters raised a number of questions about the proposal, with some saying that the agency needed to clarify what constitutes "due care," others recommending that the agency reconsider the use of "design to conform" language instead of due care and another opposing the use of any due care provision.

A number of commenters, while supporting the use of a due care provision, said that the proposal provides no assurance that a manufacturer's good faith effort will be considered due care. They said that the agency should identify the level of testing and analysis necessary to constitute due care. Another commenter emphasized that in defining due care, the agency must ensure that a manufacturer uses recognized statistical procedures in determining that its products comply with the requirements of the standard.

Another group of commenters requested the agency to reconsider its decision not to use "design to conform" language in the standard; they said that the agency's concerns about the subjectivity of a "design to conform" language are not greater and could well be less than that resulting from use of due care language.

One commenter opposed the use of any due care language in the standard. It argued that the National Traffic and Motor Vehicle Safety Act requires the agency to set objective performance requirements in its standards. When a manufacturer determines that it has not met those performance requirements, then the manufacturer is under an obligation to notify owners and remedy the noncomplying vehicles. It argued that the proposed due care provision, in effect, provides manufacturers with an exemption from the Vehicle Safety Act recall provisions.

As discussed in the July 1984 final rule and the April 1985 notice, the agency believes that the test procedure of Standard No. 208 produces repeatable results in vehicle crash tests. The agency does, however, recognize that the Standard No. 208 test is more complicated than NHTSA's other crash test standards since a number of different injury measurements must be made on the the two test dummies used in the testing. Because of this complexity, the agency believes that manufacturers need assurance from the agency that, if they have made a good faith effort in designing their vehicles and have instituted adequate quality control measures, they will not face the recall of their vehicles because of an isolated apparent failure to meet one of the injury criteria. The adoption of a due care provision provides that assurance. For the reasons discussed in the July 1984 final rule, the agency still believes use of a due care provision is a better approach to this issue than use of a design to conform provision.

As the agency has emphasized in its prior interpretation letters, a

VOL
51
ISS
55
MR
21
1986
UMI

determination of what constitutes due care only be made on a case-by-case basis. Whether a manufacturer's action will constitute due care will depend, in part, upon the availability of test equipment, the limitations of available technology, and above all, the diligence evidenced by the manufacturer.

Adoption of a due care defense is in line with the agency's longstanding and well-known enforcement policy on test differences. Under this long standing practice if the agency's testing shows noncompliance and a manufacturer's tests, valid on their face, show complying results, the agency will conduct an inquiry into the reason for the differing results. If the agency concludes that the difference in results can be explained to the agency's satisfaction, that the agency's results do not indicate an unreasonable risk to safety, and that the manufacturer's tests were reasonably conducted and were in conformity with standard, then the agency does not use its own tests as a basis for a finding of noncompliance. Although this interpretation has long been a matter of public record, Congress, in subsequent amendments of the Vehicle Safety Act, has not acted to alter that interpretation. The Supreme Court has said that under those circumstances, it can be presumed that the agency's interpretation has correctly followed the intent of the statute. (*See United States* v. *Rutherford*, 442 U.S. 544, 554n. 10 (1979))

Phase-In

Attribution Rules

With respect to cars manufactured by two or more companies, and cars manufactured by one company and imported by another, the April 1985 notice proposed to clarify who would be considered the manufacturer for purposes of calculating the average annual production of passenger cars for each manufacturer and the amount of passenger cars manufactured by each manufacturer that must comply with the automatic restraint phase-in requirements. In order to provide maximum flexiblity to manufacturers, while assuring that the percentage phase-in goals are met, the notice proposed to permit manufacturers to determine, by contract, which of them will count, as its own, passenger cars manufactured by two or more companies or cars manufactured by one company and imported by another.

The notice also proposed two rules of attribution in the absence of such a contract. First, a passenger car which is imported for purposes of resale would be attributed to the importer. The agency intended that this proposed attribution rule would apply to both direct importers as well as importers authorized by the vehicle's original manufacturer. (In this context, direct importation refers to the importation of cars which are originally manufactured for sale outside the U.S. and which are then imported without the manufacturer's authorization into the U.S. by an importer for purposes of resale. The Vehicle Safety Act requires that such vehicles be brought into conformity with Federal motor vehicle safety standards.) Under the second proposed attribution rule, a passenger car manufactured in the United States by more than one manufacturer, one of which also markets the vehicle, would be attributed to the manufacturer which markets the vehicle.

These two proposed rules would generally attribute a vehicle to the manufacturer which is most responsible for the existence of the vehicle in the United States, i.e., by importing the vehicle or by manufacturing the vehicle for its own account as part of a joint venture, and marketing the vehicle. (Importers generally market the vehicles they import.) All commenters on these proposals supported giving manufacturers the flexibility to determine contractually which manufacturer would count the passenger car as its own. The commenters also supported the proposed attribution rules. Therefore, the agency is adopting the provisions as proposed.

Credit for Early Phase-In

The April 1985 notice proposed that manufacturers that exceeded the minimum percentage phase-in requirements in the first or second years could count those extra vehicles toward meeting the requirements in the second or third years. In addition, manufacturers could also count any automatic restraint vehicles produced during the one year preceding the first year of the phase-in. Since all the commenters addressing these proposals supported them, the agency is adopting them as proposed. The agency believes that providing credit for early introduction will encourage introduction of larger numbers of automatic restaints and provide increased flexibility for manufacturers. In addition, it will assure an orderly build-up of production capability for automatic restraint equippped cars as contemplated by the July 1984 final rule.

One commenter asked the agency to establish a new credit for vehicles equipped with non-belt automatic restraints at the driver's position and a dynamically-tested manual belt at the passenger position. The commenter requested that such a vehicle receive a 1.0 credit. The commenter also asked the agency to allow vehicles equipped with driver-only automatic restraint systems to be manufactured after September 1, 1989, the effective date for automatic restraints for the driver and front right passenger seating positions in all passenger cars. In its August 30, 1985 notice (50 FR 35233) responding to petitions for reconsideration of the July 1984 final rule on Standard No. 208, the agency has already adopted a part of the commenter's suggestion by establishing a 1.0 vehicle credit for vehicles equipped with a non-belt automatic restraint at the driver's position and a manual lap/shoulder belt at the passenger's position. For reasons detailed in the July 1984 final rule, the agency believes that the automatic restraint requirement should apply to both front outboard seating positions beginning on September 1, 1989, and is therefore not adopting the commenter's second suggestion.

Phase-In Reporting Requirements

The April 1985 notice proposed to establish a new Part 585, *Automatic Restraint Phase-in Reporting Requirements*. The agency proposed requiring manufacturers to submit three reports to NHTSA, one for each of the three automatic restraint phase-in periods. Each report, covering production during a 12-month period beginning September 1 and ending August 31, would be required to be submitted within 60 days after the end of such period. Information required by each report would include a statement regarding the extent to which the manufacturer had complied with the applicable percentage phase-in requirement of Standard No. 208 for the period covered by the report; the number of passenger cars manufactured for sale in the United States for each of the three previous 12-month production periods; the actual number of passenger cars manufactured during the reporting production (or during a previous production period and counted toward compliance in the reporting production period) period with automatic safety belts, air bags and other specified forms of automatic restraint technology, respectively; and brief information about any express written contracts which concern passenger cars produced by more than one manufacturer and affect the report.

One commenter questioned the need for a reporting requirement, saying that the requirement was unnecessary since manufacturers must self-certify that

their vehicles meet Standard No. 208. The agency believes that a reporting requirement is needed for the limited period of the phase-in of automatic restraints so that the agency can carry out its statutory duty to monitor compliance with the Federal motor vehicle safety standards. During the phase-in, only a certain percentage of vehicles are required to have automatic restraints. It would be virtually impossible for the agency to determine if the applicable percentage of passenger cars has been equipped with automatic restraints unless manufacturers provide certain production information to the agency. NHTSA is therefore adopting the reporting requirement.

The same commenter said that requiring the report to be due 60 days after the end of the production year can be a problem for importers. The commenter said that production records may accompany the vehicle, which may not actually reach the United States until 30 or 45 days after the production year ends. The commenter asked the agency to provide an appeal process to seek an extension of the period to file the report. The agency believes that the example presented by the commenter represents a worst case situation and complying with the 60 day requirement should not be a problem for manufacturers, including importers. However, to eliminate any problems in worst case situations, the agency is amending the regulation to provide that manufacturers seeking an extension of the deadline to file a report must file a request for an extension at least 15 days before the report is due.

Calculation of Average Annual Production

The agency also proposed an alternative to the requirement that the number of cars that must be equipped with automatic restraints must be based on a percentage of each manufacturer's average annual production for the past three model years. The proposed alternative would permit manufacturers to equip the required percentage of its actual production of passenger cars with automatic restraints during each affected year. Since all commenters addressing this proposal supported it, the agency is adopting it as an alternative means of compliance, at the manufacturer's option. In the case of a new manufacturer, the manufacturer would have to calculate the amount of passenger cars required to have automatic restraints based on its production of passenger cars during each of the affected years. Since the agency has decided to adopt the alternative basis for determining the production quota, it has made the necessary conforming changes in the reporting requirements adopted in this notice.

One commenter also requested the agency to clarify whether a manufacturer does have to include its production volume of convertibles when it is calculating the percentage of vehicles that must meet the phase-in requirement. The automatic restraint requirement applies to all passenger cars. Thus, a manufacturer's production figures for passenger car convertibles must be counted when the manufacturer is calculating its phase-in requirements.

Retention of VINs

In order to keep administrative burdens to a minimum, the agency proposed that the required report need not use the VIN to identify the particular type of automatic restraint installed in each passenger car produced during the phase-in period. Since that information could be necessary for purposes of enforcement, however, the agency proposed to require that manufacturers maintain records until December 31, 1991, of the VIN and type of automatic restraint for each passenger car which is produced during the phase-in period and is reported as having automatic restraints. Although direct import cars are not required to have a US-format VIN number, those cars would still have a European-format VIN number and thus direct importers would be required to retain that VIN information. (The agency is considering a petition from Volkswagen requesting that direct import cars be required to have US-format VINs.)

The reason for retaining the information until 1991 is to ensure that such information would then be available until the completion of any agency enforcement action begun after the final phase-in report is filed in 1990. The agency believes this requirement meets the needs of the agency, with minimal impacts on manufacturers, and therefore is adopting it as proposed. One commenter asked whether a manufacturer is required to keep the VIN information as a separate file or whether keeping the information as a part of its general business records is sufficient. As long as the VIN information is retrievable, it may be stored in any manner that is convenient for a manufacturer.

Impact Analyses

The agency has considered the economic and other effects of the requirement adopted in this final rule and determined that they are not major within the meaning of Executive Order 12291 nor significant within the meaning of DOT's regulatory policies and procedures. A Final Regulatory Evaluation (FRE) has been prepared and placed in the public docket.

Two of the actions adopted in this notice potentially have measurable economic consequences or effects on consumers, which are fully detailed in the FRE and briefly discussed below. The two actions are requiring the use of dynamic testing for manual belt systems in passenger cars and retaining the oblique test. The remaining changes adopted in this notice concern technical changes that should not have more than minimal economic effects on either consumers or manufacturers and thus require no regulatory evaluation.

The proposed dynamic testing of lap-shoulder belt systems could result in increased testing costs to vehicle manufacturers. At present, manufacturers already conduct crash testing for Standard Nos. 204, *Steering Column Rearward Displacement*, 212, *Windshield Mounting*, 219, *Windshield Zone Intrusion*, and 301, *Fuel System Integrity*. In many cases, manufacturers can combine the dynamic testing of safety belts with the testing done to meet these other standards and thus avoid the cost of testing an additional vehicle for the proposed safety belt requirements. The agency estimates that the incremental costs associated with the instrumentation of the test dummy and measurements needed for the dynamic testing of safety belts in passenger cars would be approximately $8,500 per test, excluding the cost of the vehicle. In the case of the oblique test, the agency notes that, as discussed earlier in this notice, even most manufacturers opposing retention of the oblique test said that they would continue to use it in their own testing.

NHTSA has also considered the impacts of this final rule under the Regulatory Flexibility Act. I hereby certify that this final rule will not have a significant economic impact on a substantial number of small entities. Accordingly, the agency has not prepared a regulatory flexibility analysis.

Few, if any, passenger car manufacturers would qualify as small entities. The suppliers of webbing and other manual or automatic restraint components would not likely be significantly affected. Small organizations or governmental units should not be significantly affected since the price increases associated with this final rule should not affect the purchasing of new cars by these entities.

VOL 51
ISS 55
MR 21
1986
UMI

The reporting and recordkeeping requirements in this rule have been submitted and approved by the Office of Management and Budget, pursuant to the requirements of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). These requirements have been approved under several OMB approval numbers (approval number 2127–0535 (expires June 30, 1986), 2127–0541 (expires December 31, 1986), 2127–0512 (expires Feb. 29, 1988).

Finally, the agency has analyzed this final rule for purposes of the National Environmental Policy Act. The agency has determined that this action would not have any significant impact on the quality of the human environment.

List of Subjects

49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

49 CFR Part 585

Reporting and recordkeeping requirements.

PART 571—[AMENDED]

In consideration of the foregoing, 49 CFR Part 571 is amended as follows:

The authority citation for Part 571 would continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

§ 571.208 Standard No. 208; Occupant crash protection.

1. Section S4.1.3.1.2 is revised to read as follows:

S4.1.3.1.2 Subject to S4.1.3.4 and S4.1.5, the amount of passenger cars, specified in S4.1.3.1.1 complying with the requirements of S4.1.2.1 shall be not less than 10 percent of:

(a) The average annual production of passenger cars manufactured on or after September 1, 1983, and before September 1, 1986, by each manufacturer, or

(b) The manufacturer's annual production of passenger cars during the period specified in S4.1.3.1.1.

2. Section 4.1.3.2.2 is revised to read as follows:

S4.1.3.2.2 Subject to S4.1.3.4 and S4.1.3.4 and S4.1.5, the amount of passenger cars specified in S4.1.3.2.1 complying with the requirements of S4.1.2.1. shall be not less than 25 percent of:

(a) The average annual production of passenger cars manufactured on or after September 1, 1984, and before September 1, 1987, by each manufacturer, or

(b) The manufacturer's annual production of passenger car during the period specified in S4.1.3.2.1.

3. Section 4.1.3.3.2 is revised to read as follows:

S4.1.3.3.2 Subject to S4.1.3.4 and S4.1.5, the amount of passenger cars specified in S4.1.3.3.1 complying with the requirements of S4.1.2.1 shall be not less than 40 percent of:

(a) The average annual production of passenger cars manufactured on or after September 1, 1985, and before September 1, 1988, by each manufacturer or

(b) The manufacturer's annual production of passenger cars during the period specified in S4.1.3.3.1.

4. Section S4.1.3.4 is revised to read as follows:

S4.1.3.4 *Calculation of complying passenger cars.*

(a) For the purposes of calculating the numbers of cars manufactured under S4.1.3.1.2, S4.1.3.2.2, or S4.1.3.3.2 to comply with S4.1.2.1:

(1) Each car whose driver's seating position complies with the requirements of S4.1.2.1(a) by means not including any type of seat belt and whose front right seating position will comply with the requirements of S4.1.2.1(a) by any means is counted is counted as 1.5 vehicles, and

(2) Each car whose driver's seating position complies with the requirements of S4.1.2.1(a) by means not including any type of seat belt and whose right front seat seating position is equipped with a manual Type 2 seat belt is counted as one vehicle.

(b) For the purposes of complying with S4.1.3.1.2, a passenger car may be counted if it:

(1) Is manufactured on or after September 1, 1985, but before September 1, 1986, and

(2) Complies with S4.1.2.1.

(c) For the purposes of complying with S4.1.3.2.2, a passenger car may be counted if it:

(1) Is manufactured on or after September 1, 1985, but before September 1, 1987,

(2) Complies with S4.1.2.1, and

(3) Is not counted toward compliance with S4.1.3.1.2

(d) For the purposes of complying with S4.1.3.3.2, a passenger car may be counted if it:

(1) Is manufactured on or after September 1, 1985, but before September 1, 1988,

(2) Complies with S4.1.2.1, and

(3) Is not counted toward compliance with S4.1.3.1.2 or S4.1.3.2.2.

5. A new section S4.1.3.5 is added to read as follows:

S4.1.3.5. Passenger cars produced by more than one manufacturer.

S4.1.3.5.1 For the purposes of calculating average annual production of passenger cars for each manufacturer and the amount of passenger cars manufactured by each manufacturer under S4.1.3.1.2, S4.1.3.2.2 or S4.1.3.3.2, a passenger car produced by more than one manufacturer shall be attributed to a single manufacturer as follows, subject to S4.1.3.5.2:

(a) A passenger car which is imported shall be attributed to the importer.

(b) A passenger car manufactured in the United States by more than one manufacturer, one of which also markets the vehicle, shall be attributed to the manufacturer which markets the vehicle.

S4.1.3.5.2 A passenger car produced by more than one manufacturer shall be attributed to any one of the vehicle's manufacturers specified by an express written contract, reported to the National Highway Traffic Safety Administration under 49 CFR Part 585, between the manufacturer so specified and the manufacturer to which the vehicle would otherwise be attributed under S4.1.3.5.1.

6. A new section S4.6 is added to read as follows:

S4.6 *Dynamic testing of manual belt systems.*

S4.6.1 If the automatic restraint requirement of S4.1.4 is rescinded pursuant to S4.1.5, then each passenger car that is manufactured after September 1, 1989, and is equipped with a Type 2 manual seat belt assembly at each front outboard designated seating position pursuant to S4.1.2.3 shall meet the frontal crash protection requirements of S5.1 at those designated seating positions with a test dummy restrained by a Type 2 seat belt assembly that has been adjusted in accordance with S7.4.2.

S4.6.2 A Type 2 seat belt assembly subject to the requirements of S4.6.1 of this standard does not have to meet the requirements of S4.2 (a)–(c) and S4.4 of Standard No. 209 (49 CFR 571.209) of this Part.

7. S7.4.2 is revised to read as follows:

S7.4.2 *Webbing tension relieving device.* Each vehicle with an automatic seat belt assembly or with a Type 2 manual seat belt assembly that must meet S4.6 installed in a front outboard designated seating position that has either manual or automatic devices permitting the introduction of slack in the webbing of the shoulder belt (e.g., "comfort clips" or "window-shade" devices) shall:

(a) Comply with the requirements of S5.1 with the shoulder belt webbing adjusted to introduce the maximum amount of slack recommended by the manufacturer pursuant to S7.4.2(b);

(b) Have a section in the vehicle owner's manual that explains how the tension-relieving device works and specifies the maximum amount of slack (in inches) recommended by the vehicle manufacturer to be introduced into the shoulder belt under normal use conditions. The explanation shall also warn that introducing slack beyond the amount specified by the manufacturer can significantly reduce the effectiveness of the shoulder belt in a crash; and

(c) Have an automatic means to cancel an shoulder belt slack introduced into the belt system by a tension-relieving device each time the safety belt is unbuckled or the adjacent vehicle door is opened, except that open-body vehicles with no doors can have a manual means to cancel any shoulder belt slack introduced into the belt system by a tension-relieving device.

8. Section 8.1.1(c) is revised to read as follows:

S8.1.1 * * *

(c) *Fuel system capacity.* With the test vehicle on a level surface, pump the fuel from the vehicle's fuel tank and then operate the engine until it stops. Then, add Stoddard solvent to the test vehicle's fuel tank in an amount which is equal to not less than 92 and not more than 94 percent of the fuel tank's usable capacity stated by the vehicle's manufacturer. In addition, add the amount of Stoddard solvent needed to fill the entire fuel system from the fuel tank through the engine's induction system.

* * * * *

9. A new 8.1.1(d) is added to read as follows:

S8.1.1 * * *

(d) *Vehicle test attitude.* Determine the distance between a level surface and a standard reference point on the test vehicle's body, directly above each wheel opening, when the vehicle is in its "as delivered" condition. The "as delivered" condition is the vehicle as received at the test site, with 100 percent of all fluid capacities and all tires inflated to the manufacturer's specifications as listed on the vehicle's tire placard. Determine the distance between the same level surface and the same standard reference points in the vehicle's "fully loaded condition." The "fully loaded condition" is the test vehicle loaded in accordance with S8.1.1 (a) or (b), as applicable. The load placed in the cargo area shall be center over the longitudinal centerline of the vehicle. The pretest vehicle attitude shall be equal to either the as delivered or fully loaded attitude or between the as delivered attitude and the fully loaded attitude.

10. S7.4.3 is amended by removing the reference to "S10.6" and replacing it with a reference to "S10.7."

11. S7.4.4 is amended by removing the reference to "S10.5" and replacing it with a reference to "S10.6."

12. S7.4.5 is amended by removing the reference to "S8.1.11" and replacing it with a reference to "S10."

13. Section 8.1.3 is revised to read as follows:

S8.1.3 *Adjustable seat back placement.* Place adjustable seat backs in the manufacturer's nominal design riding position in the manner specified by the manufacturer. Place each adjustable head restraint in its highest adjustment position.

14. Sections 8.1.11 through 8.1.11.2.3 are removed.

15. Sections 8.1.12 and 8.1.13 are redesignated 8.1.11 and 8.1.12, respectively.

16. Section 10 is revised to read as follows:

S10 *Test dummy positioning procedures.* Position a test dummy, conforming to Subpart B of Part 572 (49 CFR Part 572), in each front outboard seating position of a vehicle as specified in S10.1 through S10.9. Each test dummy is:

(a) Not restrained during an impact by any means that require occupant action if the vehicle is equipped with automatic restraints.

(b) Restrained by manual Type 2 safety belts, adjusted in accordance with S10.9, if the vehicle is equipped with manual safety belts in the front outboard seating positions.

S10.1 *Vehicle equipped with front bucket seats.* Place the test dummy's torso against the seat back and its upper legs against the seat cushion to the extent permitted by placement of the test dummy's feet in accordance with the appropriate paragraph of S10. Center the test dummy on the seat cushion of the bucket seat and set its midsagittal plane so that it is vertical and parallel to the centerline of the vehicle.

S10.1.1 *Driver position placement.*

(a) Initially set the knees of the test dummy 11–3/4 inches apart, measured between the outer surfaces of the knee pivot bolt heads, with the left outer surface 5.9 inches from the midsagittal plane of the test dummy.

(b) Rest the right foot of the test dummy on the undepressed accelerator pedal with the rearmost point of the heel on the floor pan in the plane of the pedal. If the foot cannot be placed on the accelerator pedal, set it perpendicular to the lower leg and place it as far forward as possible in the direction of the geometric center of the pedal with the rearmost point of the heel resting on the floor pan. Except as prevented by contact with a vehicle surface, place the right leg so that the upper and lower leg centerlines fall, as close as possible, in a vertical longitudinal plane without inducing torso movement.

(c) Place the left foot on the toeboard with the rearmost point of the heel resting on the floor pan as close as possible to the point of intersection of the planes described by the toeboard and the floor pan. If the foot cannot be positioned on the toeboard, set it perpendicular to the lower leg and place it as far forward as possible with the heel resting on the floor pan. Except as prevented by contact with a vehicle surface, place the left leg so that the upper and lower leg centerlines fall, as close as possible, in a vertical plane. For vehicles with a foot rest that does not elevate the left foot above the level of the right foot; place the left foot on the foot rest so that the upper and lower leg centerlines fall in a vertical plane.

S10.1.2 *Passenger position placement.*

S10.1.2.1 *Vehicles with a flat floor pan/toeboard.*

(a) Initially set the knees 11¾ inches apart, measured between the outer surface of the knee pivot bolt heads.

(b) Place the right and left feet on the vehicle's toeboard with the heels resting on the floor pan as close as possible to the intersection point with the toeboard. If the feet cannot be placed flat on the toeboard, set them perpendicular to the lower centerlines and place them as far forward as possible with the heel resting on the floor pan.

(c) Place the right and left legs so that the upper and lower leg centerlines fall in vertical longitudinal planes.

S10.1.2.2 *Vehicles with wheelhouse projections in passenger compartment.*

(a) Initially set the knees 11¾ inches apart, measured between outer surfaces of the knee pivot bolt heads.

(b) Place the right and left feet in the well of the floor pan/toeboard and not on the wheelhouse projection. If the feet cannot be placed flat on the toeboard, set them perpendicular to the lower leg centerlines and as far forward as possible with the heels resting on the floor pan.

(c) If it is not possible to maintain vertical and longitudinal planes through the upper and lower leg centerlines for each leg, then place the left leg so that its upper and lower centerlines fall, as closely as possible, in a vertical

VOL 51 ISS 55 MR 21 1986 UMI

longitudinal plane and place the right leg so that its upper and lower leg centerlines fall, as closely as possible, in a vertical plane.

S10.2 *Vehicle equipped with bench seating.* Place a test dummy with its torso against the seat back and its upper legs against the seat cushion, to the extent permitted by placement of the test dummy's feet in accordance with the appropriate paragraph of S10.1.

S10.2.1 *Driver position placement.* Place the test dummy at the left front outboard designated seating position so that its midsagittal plane is vertical and parallel to the centerline of the vehicle and so that the midsagittal plane of the test dummy passes through the center of the steering wheel rim. Place the legs, knees, and feet of the test dummy as specified in S10.1.1.

S10.2.2 *Passenger position placement.* Place the test dummy at the right front outboard designated seating position as specified in S10.1.2, except that the midsagittal plane of the test dummy shall be vertical and longitudinal, and the same distance from the vehicle's longitudinal centerline as the midsagittal plane of the test dummy at the driver's position.

S10.3 *Initial test dummy placement.* With the test dummy at its designated seating position as specified by the appropriate requirements of S10.1 or S10.2, place the upper arms against the seat back and tangent to the side of the upper torso. Place the lower arms and palms against the outside of the upper legs.

S10.4 *Test dummy settling.*

S10.4.1 *Test dummy vertical upward displacement.* Slowly lift the test dummy parallel to the seat back plane until the test dummy's buttocks no longer contact the seat cushion or until there is test dummy head contact with the vehicle's headlining.

S10.4.2 *Lower torso force application.* Using a test dummy positioning fixture, apply a rearward force of 50 pounds through the center of the rigid surface against the test dummy's lower torso in a horizontal direction. The line of force application shall by 6½ inches above the bottom surface of the test dummy's buttocks. The 50 pound force shall be maintained with the rigid fixture applying reaction forces to either the floor pan/toeboard, the 'A' post, or the vehicle's seat frame.

S10.4.3 *Test dummy vertical downward displacement.* While maintaining the contact of the horizontal rearward force positioning fixture with the test dummy's lower torso, remove as much of the 50 pound force as recessary to allow the test dummy to return downward to the seat cushion by its own weight.

S10.4.4 *Test dummy upper torso rocking.* Without totally removing the horizontal rearward force being applied to the test dummy's lower torso, apply a horizontal forward force to the test dummy's shoulders sufficient to flex the upper torso forward until its back no longer contacts the seat back. Rock the test dummy from side to side 3 or 4 times so that the test dummy's spine is at any angle from the vertical in the 14 to 16 degree range at the extremes of each rocking movement.

S10.4.5 *Upper torso force application.* With the test dummy's midsagittal plane vertical, push the upper torso back against the seat back with a force of 50 pounds applied in a horizonal rearward direction along a line that is coincident with the test dummy's midsagittal plane and 18 inches above the bottom surface of the test dummy's buttocks.

S10.5 *Placement of test dummy arms and hands.* With the test dummy positioned as specified by S10.3 and without including torso movement, place the arms, elbows and hands of the test dummy, as appropriate for each designated seating position in accordance with S10.3.1 or S10.3.2. Following placement of the arms, elbows and hands, remove the force applied against the lower half of the torso.

S10.5.1 *Driver's position.* Move the upper and the lower arms of the test dummy at the driver's position to their fully outstretched position in the lowest possible orientation. Push each arm rearward permitting bending at the elbow, until the palm of each hand contacts the outer part of the rim of the steering wheel at its horizontal centerline. Place the test dummy's thumbs over the steering wheel rim and position the upper and lower arm centerlines as close as possible in a vertical plane without inducing torso movement.

S10.5.2 *Passenger position.* Move the upper and the lower arms of the test dummy at the passenger position to fully outstretched position in the lowest possible orientation. Push each arm rearward, permitting bending at the elbow, until the upper arm contacts the seat back and is tangent to the upper part of the side of the torso, the palm contacts the outside of the thigh, and the little finger is barely in contact with the seat cushion.

S10.6 *Test dummy positioning for latchplate access.* The reach envelopes specified in S7.4.4 are obtained by positioning a test dummy in the driver's seat or passenger's seat in its forwardmost adjustment position. Attach the lines for the inboard and outboard arms to the test dummy as described in Figure 3 of this standard. Extend each line backward and outboard to generate the compliance arcs of the outboard reach envelope of the test dummy's arms.

S10.7 *Test dummy positioning for belt contact force.* To determine compliance with S7.4.3 of this standard, position the test dummy in the vehicle in accordance with the appropriate requirements specified in S10.1 or S10.2 and under the conditions of S8.1.2 and S8.1.3. Pull the belt webbing three inches from the test dummy's chest and release until the webbing is within 1 inch of the test dummy's chest and measure the belt contact force.

S10.9 *Manual belt adjustment for dynamic testing.* With the test dummy at its designated seating position as specified by the appropriate requirements of S8.1.2, S8.1.3 and S10.1 through S10.5, place the Type 2 manual belt around the test dummy and fasten the latch. Remove all slack from the lap belt. Pull the upper torso webbing out of the retractor and allow it to retract; repeat this operation four times. Apply a 2 to 4 pound tension load to the lap belt. If the belt system is equipped with a tension-relieving device introduce the maximum amount of slack into the upper torso belt that is recommended by the manufacturer for normal use in the owner's manual for the vehicle. If the belt system is not equipped with a tension relieving device, allow the excess webbing in the shoulder belt to be retracted by the retractive force of the retractor.

17. S11 is removed.

18. S4.1.3.1.1, S4.1.3.2.1, S4.1.3.3.1, S4.1.4 and S4.6.1 are amended by adding a new second sentence to S4.1.3.1.1, S4.1.3.2.1, S4.1.3.3.1 and S4.1.4 and a new second sentence to S4.6.1 to read as follows:

A vehicle shall not be deemed to be in noncompliance with this standard if its manufacturer establishes that it did not have reason to know in the exercise of due care that such vehicle is not in conformity with the requirement of this standard.

19. S8.1.5 is revised to read as follows:

S8.1.5 Movable vehicle windows and vents are, at the manufacturer's option, placed in the fully closed position.

20. S7.4 is revised to read as follows:

7.4 *Seat belt comfort and convenience.*

(a) *Automatic seat belts.* Automatic seat belts installed in any vehicle, other then walk-in van-type vehicles, which has a gross vehicle weight rating of 10,000 pounds or less, and which is manufactured on or after September 1, 1986, shall meet the requirements of S7.4.1, S7.4.2, and S7.4.3.

(b) *Manual seat belts.*

(1) *Vehicles manufactured after September 1, 1986.* Manual seat belts installed in any vehicle, other than manual Type 2 belt systems installed in the front outboard seating positions in passenger cars or manual belts in walk-in van-type vehicles, which have a gross vehicle weight rating of 10,000 pounds or less, shall meet the requirements of S7.4.3, S7.4., S7.4.5, and S7.4.6.

(2) *Vehicles manufactured after September 1, 1989.*

(i) If the automatic restraint requirement of S4.1.4 is rescinded pursuant to S4.1.5, then manual seat belts installed in a passenger car shall meet the requirements of S7.1.1.3(a), 7.4.2, 7.4.3, S7.4.4, S7.4.5, and S7.4.6.

(ii) Manual seat belts installed in a bus, multipurpose passenger vehicle and truck with a gross vehicle weight rating of 10,000 pounds or less, except for walk-in van-type vehicles, shall meet the requirements of 7.4.3, S7.4.4, S7.4.5, and S7.4.6.

§ 571.209 Standard No. 209, Seat belt assemblies.

1. A new S4.6 is added, to read as follows:

S4.6 *Manual belts subject to crash protection requirements of Standard No. 208.*

(a) A seat belt assembly subject to the requirements of S4.6.1 of Standard No. 208 (49 CFR Part 571.208) does not have to meet the requirements of S4.2(a)–(c) and S4.4 of this standard.

(b) A seat belt assembly that does not comply with the requirements of S4.4 of this standard shall be permanently and legibly marked or labeled with the following language:

This seat belt assembly may only be installed at a front outboard designated seating position of a vehicle with a gross vehicle weight rating of 10,000 pounds or less.

§ 571.210 Standard No. 210, Seat belt assembly anchorages.

1. The second sentence of S4.3 is revised to read as follows:

S4.3 Location.

Anchorages for automatic and for dynamically tested seat belt assemblies that meet the frontal crash protection requirement of S5.1 of Standard No. 208 (49 CFR Part 571.208) are exempt from the location requirements of this section.

* * * * *

1. Chapter V, Title 49, Transportation, the Code of Federal Regulations, is amended to add the following Part:

PART 585—AUTOMATIC RESTRAINT PHASE-IN REPORTING REQUIREMENTS

Sec.
585.1 Scope.
585.2 Purpose.
585.3 Applicability.
585.4 Definitions.
585.5 Reporting requirements.
585.6 Records.
585.7 Petition to extend period to file report.

Authority: 15 U.S.C. 1392, 1407; delegation of authority at 49 CFR 1.50.

§ 585.1 Scope.

This section establishes requirements for passenger car manufacturers to submit a report, and maintain records related to the report, concerning the number of passenger cars equipped with automatic restraints in compliance with the requirements of S4.1.3 of Standard No. 208, *Occupant Crash Protection* (49 CFR Part 571.208).

§ 585.2 Purpose.

The purpose of the reporting requirements is to aid the National Highway Traffic Safety Administration in determining whether a passenger car manufacturer has complied with the requirements of Standard No. 208 of this Chapter (49 CFR 571.208) for the installation of automatic restraints in a percentage of each manufacturer's annual passenger car production.

§ 585.3 Applicability.

This part applies to manufacturers of passenger cars.

§ 585.4 Definitions.

All terms defined in section 102 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1391) are used in their statutory meaning.

"Passenger car" is used as defined in 49 CFR Part 571.3.

"Production year" means the 12-month period between September 1 of one year and August 31 of the following year, inclusive.

§ 585.5 Reporting requirements.

(a) *General reporting requirements.* Within 60-days after the end of each of the production years ending August 31, 1987, August 31, 1988, and August 31, 1989, each manufacturer shall submit a report to the National Highway Traffic Safety Administration concerning its compliance with the requirements of Standard No. 208 for installation of automatic restraints in its passenger cars produced in that year. Each report shall—

(1) Identify the manufacturer;

(2) State the full name, title and address of the official responsible for preparing the report;

(3) Identify the production year being reported on;

(4) Contain a statement regarding the extent to which the manufacturer has complied with the requirements of S4.1.3 of Standard No. 208;

(5) Provide the information specified in § 585.5(b);

(6) Be written in the English language; and

(7) Be submitted to: Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590.

(b) *Report content.*—(1) *Basis for phase-in production goals.* Each manufacturer shall provide the number of passenger cars manufactured for sale in the United States for each of the three previous production years, or, at the manufacturer's option, for the current production year. A new manufacturer that is, for the first time, manufacturing passenger cars for sale in the United States must report the number of passenger cars manufactured during the current production year.

(2) *Production.*

Each manufacturer shall report for the production year being reported on, and each preceding production year, to the extent that cars produced during the preceding years are treated under Standard No. 208 as having been produced during the production year being reported on, the following information:

(i) The number of passenger cars equipped with automatic seat belts and the seating positions at which they are installed,

(ii) The number of passenger cars equipped with air bags and the seating positions at which they are installed, and

(iii) The number of passenger cars equipped with other forms of automatic restraint technology, which shall be described, and the seating positions at which they are installed.

(3) *Passenger cars produced by more than one manufacturer.*

Each manufacturer whose reporting of information is affected by one or more of the express written contracts permitted by section S4.1.3.5.2. of Standard No. 208 shall:

(i) Report the existence of each contract, including the names of all parties to the contract, and explain how

VOL
51
ISS
55
MR
21
1986
UMI

the contract afffects the report being submitted.

(ii) Report the actual number of passenger cars covered by each contract.

§ 585.6 Records.

Each manufacturer shall maintain records of the Vehicle Identification Number and type of automatic restraint for each passenger car for which information is reported under § 585.5(b)(2), until December 31, 1991.

§ 585.7 Petition to extend period to file report.

A petition for extension of the time to submit a report must be received not later than 15 days before expiration of the time stated in § 585.5(a). The petition must be submitted to: Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, SW, Washington, DC 20590. The filing of a petition does not automatically extend the time for filing a report. A petition will be granted only if the petitioner shows good cause for the extension and if the extension is consistent with the public interest.

Issued on March 18, 1986.

Diane K. Steed,

Administrator.

BILLING CODE 4910-59-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1312

[Ex Parte No. MC-176]

Short Notice Effectiveness for Independently Filed Motor Passenger Carrier Rates

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.

SUMMARY: The Commission, pursuant to applications filed by several passenger carriers, and under 49 U.S.C. 10762(d)(1), adopts final rules that amend 49 CFR Part 1312, to reduce the notice period required for independent rate filings by motor carriers of passengers, including regular route passenger, express and special and charter operations. Independently established rate reductions, rate increases, and new rates for motor passenger carrier fares may now become effective on 1-day's notice, rather than the 30-days' notice previously required by 49 CFR 1312.4(e)(1)(ii)(A). The reduced notice period will enable passenger-carriers to compete more effectively and to respond more quickly to various types of competition, particularly since fuel prices and insurance costs continue to fluctuate. The final rules are set forth in the appendix to this notice.

EFFECTIVE DATE: March 21, 1986.

FOR FURTHER INFORMATION CONTACT:

Robin Williams Denick (202) 275-7711
or
Howell I. Sporn (202) 275-7691

SUPPLEMENTARY INFORMATION: Proposed rules in this proceeding were published at 50 FR 53168, December 30, 1985.

Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission, Washington, DC 20423, or call 289-4357 (DC Metropolitan area) or toll fee (800) 424-5403.

Energy and Environmental Considerations

The final rules as adopted here will not affect significantly the quality of the human environment or conservation of energy resources.

Regulatory Flexibility Analysis

The Commission certifies that adoption of these rules will not have a significant economic impact on a substantial number of small entities because they affect only the notice period required for motor passenger carrier rate filings. Reduction of the notice period is consistent with the National Transportation Policy, 49 U.S.C. 10101, which encourages the Commission to reduce burdens and promote an economic and efficient transportation system.

List of Subjects in 49 CFR Part 1312

Buses, Tariffs.

Decided: March 14, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley.

James H. Bayne,

Secretary.

Appendix

Title 49 CFR Part 1312, is amended as follows:

PART 1312—[AMENDED]

1. The authority citation for 49 CFR Part 1312 continues to read as follows:

Authority: 49 U.S.C. 10762; 5 U.S.C. 553.

2. Section 1312.4(e)(1)(ii) is amended by revising paragraph (A) and by adding a new paragraph (C) to precede the flush paragraph at the end of paragraph (e)(1)(ii) to read as follows:

§ 1312.4 Filing tariffs

* * * * *

(e) * * *
(ii) * * *
(A) 30 days' notice is required.

* * * * *

(C) For independently set rates of motor carriers of passengers, including regular route passenger, package express and special and charter operations, the rule generally is 1-day's notice for reductions and increases of passenger rates. See § 1312.39(i) for details.

* * * * *

3. Section 1312.39 is amended by revising paragraph (f); and adding a new paragraph (i) to read as follows:

§ 1312.39 Miscellaneous provisions that may be filed on less than statutory notice.

* * * * *

(f) *Roundtrip excursion fares.* Fares for a roundtrip excursion limited to a designated period may be established upon posting and filing the tariff on 1-day's notice.

* * * * *

(i) *Tariffs of Motor Carriers of Passengers—Changes—New, Reduced and Increased Rates.* Except as otherwise provided in paragraph (h)(5) of this section, each independently established new or changed rate, charge, rule, or other provision must be filed with the Commission in Washington, DC, at least 1 day before the date upon which it is to become effective. Similarly, each independently established change in a rule or other provision that effects a reduction in the value of service or increase in a rate or charge must be filed with the Commission in Washington, DC, at least 1 day before the date upon which it is to become effective.

[FR Doc. 86-6327 Filed 3-20-86; 8:45 am]

BILLING CODE 7035-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Determination of Endangered Status for Argyroxiphium Sandwicense ssp. Sandwicense ('Ahinahina or Mauna Kea Silversword)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines *Argyroxiphium sandwicense* ssp. *sandwicense* ('Ahinahina or Mauna Kea silversword) to be an endangered species, under the authority contained in the Endangered Species Act of 1973, as amended. The only known natural population of this plant is located on the east slope of Mauna Kea on the island of Hawaii, State of Hawaii. In addition, a small number of individuals have been planted at other places on the mountain. This species in vulnerable to any substantial habitat alteration, and faces the present threat of elimination through grazing and trampling by feral animals, and the potential threat of damage by insect larvae. This determination that *Argyroxiphium sandwicense* ssp. *sandwicense* is an endangered species implements the protection provided by the Endangered Species Act of 1983, as amended.

DATE: The effective date of this rule is April 21, 1986.

ADDRESS: The complete file for this rule is available for inspection, by appointment, during normal business hours at the U.S. Fish and Wildlife Service, Lloyd 500 Building, 500 NE. Multnomah Street, Suite 1692, Portland, Oregon 97232.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne S. White, Chief, Division of Endangered Species, at the above address (503/231-6131 or FTS 429-6131).

SUPPLEMENTARY INFORMATION:

Background

This taxon was first collected in 1825 by James Macrae,and was described in 1836 by De Candolle. When Macrae visited Mauna Kea, several populations of this silversword were extant on the upper slopes of the volcano, and the species presumably numbered thousands of individuals. The only known collections of the Mauna Kea silversword after 1916 are from the Wailuku River population. In 1916, the taxon was abundant at the Wailuku site. However, today only about 110 individuals remain, 95 of which are nursery-raised plants transplanted into the area. Several undocumented sightings of individuals or small numbers of plants have been recorded as recently as 1955 from other places on the mountain.

There has been some disagreement concerning the proper taxonomic disposition of the taxon. *Argyroxiphium sandwicense* has sometimes been interpreted broadly to include plants of both the islands of Maui and Hawaii, without any recognition of infraspecific taxa. Alternatively, the Maui plants have been segregated at the specific level as *A. macrocephalum.* Recent research supports the acceptance of an inclusive concept of the species, with one subspecies (ssp. *sandwicense*) confined to the island of Hawaii and one (ssp. *macrocephalum*) native to Maui. Both taxa are known as 'ahinahina in Hawaiian.

The Hawaii taxon historically occupied the alpine slopes of the Mauna Kea volcanic dome, mostly above the tree line and including barren alpine desert areas above other vegetation. The only known extant natural population is found in the upper limits of *Sophora* woodland and the alpine scrub above the tree line along the Wailuku River drainage. The Wailuku River population is found on State lands in the Mauna Kea Forest Reserve and on Hawaiian Home Lands.

There are also historic reports of silverswords from Hualalai and Mauna Loa on the island of Hawaii. The plants of Hualalai may have been *A. sandwicense* ssp. *sandwicense.* No specimens are know from this population, which is no longer believed to be extant. It may have represented an undescribed and now-extinct taxon. Reports from Mauna Loa are believed to have been based on the related *A. kauense,* which is endemic to Mauna Loa.

Argyroxiphium sandwicense ssp. *sandwicense* produces a globose basal rosette of dagger-shaped leaves that are up to 1 foot long and usually less than ½ inch wide at their midpoint; the leaves are cloaked with silvery hairs. These rosettes grow for an average of 5 to 15 years, reaching diameters of 2 feet or more before producing a rather narrow flowering stalk with numerous branches, each bearing a flowering head about 1 inch in diameter with pinkish ray flowers. After flowering, plants with a single rosette die. Individual rosettes of multiple-rosette plants also die after flowering.

On June 16, 1976, the Service published a proposed rule in the **Federal Register** (41 FR 24523) to determine approximately 1,700 vascular plant taxa to be endangered species. General comments on the 1976 proposal were summarized in an April 26, 1978, **Federal Register** publication (43 FR 17909). *Argyroxiphium macrocephalum* was included in the June 16, 1976, proposal. It is apparent that this was mistaken, and that the intent was to indicate *A. sandwicense* in an inclusive sense, comprising both the Maui and Hawaii taxa.

The Endangered Species Act Amendments of 1978 required that all proposals over two years old be withdrawn. A 1-year grace period was given to those proposals already more than 2 years old. Subsequently, on December 10, 1979, the Service published a notice of the withdrawal of the portion of the June 16, 1976, proposal that had not been made final, along with other proposals that had expired (44 FR 70796); this notice of withdrawal included *Argyroxiphium macrocephalum.*

Argyroxiphium sandwicense was included in the December 15, 1980 (45 FR 82479) updated review notice. *Argyroxiphium macrocephalum* was included in that notice as a taxon no longer under review because it was not considered to be a separate entity. A reproposal for the Mauna Kea silversword subspecies was published March 6, 1985 (50 FR 9092), based on information available at the time of the 1976 proposal and information gathered after that time and summarized in a detailed status report prepared under contract by a University of Hawaii botanist (Carr 1982). The Service now determines the Mauna Kea silversword to be an endangered species with the publication of this final rule.

Summary of Comments and Recommendations

In the March 6, 1985, proposed rule (50 FR 9092) and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. A newspaper notice that invited general public comment was published in the *Honolulu Star Bulletin* on April 1, 1985. Nine comments were received and are discussed below. A public hearing was requested and held in Hilo, Hawaii, June 24, 1985, five people testified, and their testimony is also included in the following summary.

Comments were received from the Governor of Hawaii, the Hawaii Audubon Society, the Director of the Waimea Arboretum and Botanical Garden, the Environmental Defense Fund, and five private individuals. Testimony at the public hearing was presented on behalf of the Chairperson of the State Department of Land and Natural Resources, and four private individuals. All comments received in the period from March 6, 1985, to May 6, 1985, and all testimony given at the public hearing, have been considered in formulating this final rule. The comment period was reopened for 15 working days following the public hearing, closing again July 15, 1985. One additional letter of comment, from Dr.

1986
UMI

Otto Degener, was received during this period. The Governor deferred his support of the listing of the taxon. He stated in his letter of May 1, 1985, that it would be ". . . premature to make any firm decision," and recommended that representatives of the Service and Department of Land and Natural Resources staff meet to discuss the activities which the State had undertaken, such as the construction of exclosures and propagation of silverswords in these exclosures. All other responding organizations and individuals supported the listing as an endangered species.

The activities listed in the Governor's letter include the construction of a 2-acre exclosure in 1973, a 50-acre exclosure near Wailuku in 1975, and two 5-acre exclosures above Pu'u La'au in 1978; these are all of Mauna Kea within the historic range of the Mauna Kea silversword. Approximately 50 seedlings were planted in the two 5-acre exclosures. In June 1985, the Service inspected the two exclosures; there were 10 silverswords growing in one, and 21 in the other. At least three of the silverswords had flowered during past flowering seasons and one was just coming into flower, but no seedlings or young plants were evident. A total of 385 silversword seedlings were planted in the 50-acre and adjoining 2-acre exclosures between 1974 and 1982. Some of these plants have flowered, and at least 17 seedlings were produced. A census of these exclosures, made by four botanists in August 1984, produced a total count of 110 plants, 15 of which they believed to be remnants of the natural population. The other 95 had been nursery-raised and planted out by the Hawaii State Division of Forestry and Wildlife. The proposed rule, which was based upon a status report completed in 1982 by a University of Hawaii Professor of Botany (Carr 1982), treated only naturally occurring individuals. The estimate at that time was 35, and is now believed to be down to 15 individuals. The comments of Ms. Elizabeth Powell, a botany graduate student presently studying the silversword, indicate that the plant is not self-compatible and that sibling incompatibility may prevent 50% of sibling matings from resulting in viable seed. She states that closely spaced, synchronously blooming plants are required for cross-pollination. As most of the out-planted individuals are from seed collected from one or two parents, and as the remaining populations are small, and the plant is monocarpic, a greater number of individuals must be propagated and new seed sources must be incorporated if the outplanting program is to be successful and the plant is to be saved from eventual extinction.

Mr. Tom K. Tagawa, testifying as a private citizen, strongly objected to the Service's statement that, "A portion of the only known extant population has been fenced by the State of Hawaii; however, the exclosure has not been effective against the more recently introduced mouflon sheep, which are currently threatening the species' survival by grazing and browsing activities." He believes that, "This statement implies that the State have [sic] constructed exclosure haphazardly and is indifferent to the protection and perpetuation of the Mauna Kea silversword," that ". . . the success of the endangered species programs depends upon the good working relationship between the Federal and State agencies," and that the Federal Government ". . . should have supported the State with grants to build a strong, durable exclosure to avoid significant adverse effects on the preservation of the Mauna Kea silversword." Dr. Donald Kyhos, Professor of Botany, University of California at Davis, Dr. Carl Christensen, commenting for the Hawaii Audubon Society, Mr. Rick Warshauer, and Ms. Powell all commented on the ineffectiveness of the exclosures. They contended that the mouflon can readily leap the 4.5 foot fence surrounding the silversword. The Service agrees, as personnel from its Honolulu Endangered Species Field Office have seen mouflon in the Wailuku exclosure. The proposed rule was referring only to the inadequacy of the height of the fence, and was not intended to imply indifference on the part of the State to the protection and preservation of the silversword. Mr. Susumu Ono, Chairperson of the Board of Land and Natural Resources, in reference to the Wailuku exclosure, stated that, "We did have problems in the beginning. However, the problem has been taken care of and the fence has proved quite adequate . . ." The construction of the exclosures and the planting of silverswords testify to the State's interest in the species. The Service agrees that the success of the endangered species program in Hawaii is dependent upon the cooperation of State and Federal agencies, and believes that it presently has a good working relationship with the State concerning these programs. Formal and informal meetings, exchange of information, funding of programs, and the cooperative development and implementation of recovery plans are all parts of this. Once a species is listed, funding is available for its conservation through cooperative agreements under section 6 of the Act.

Mr. Tagawa also questioned a statement in the proposed rule that, "[W]ithout the institution of appropriate conservation measures, the species is likely to become extinct . . ." The statement was intended to express the Service's belief that the Mauna Kea silversword requires immediate attention and management to ensure its survival. A recovery plan to address these needs has been given high priority and will be scheduled for completion as soon as possible.

In the proposed rule, under factor "D" of the Summary of Factors Affecting the Species, the Service stated that, "No regulatory mechanisms exist at the present time." Mr. Tagawa and Ms. Powell both pointed out that the silverswords grow within a State Forest Reserve, and that by law the removal, injury, or destruction of any form of plant or animal life therein is prohibited. The Service has corrected this statement in this final rule. Ms. Powell noted that the mouflon sheep in the same area are also presently being managed on a sustained-yield basis by the State Division of Forestry and Wildlife, and that the two resources are in direct conflict.

Mr. Tagawa strongly objected to having graduate or undergraduate students conduct ecological or other related botanical studies because of a statement ". . . made by three peers in the environmental fields in the past. 'None of these students were competent to conduct a serious scientific ecological study, although the excursion provided excellent experience for them . . . . Their final report, however does not in any sense consitute a significant contribution to knowledge.' " He also questioned the "creditability [sic]" of the ". . . so called environmental experts in Hawaii." Mr. Tagawa was referring to a student-originated National Science Foundation grant that was awarded to university undergraduate students, based upon their submitted proposal, and whose purpose was primarily to provide field experience for qualified undergraduates. The ecological study at issue was conducted in the rain forests on the island of Maui and had no relation to any study of the Mauna Kea silversword, which grows in the alpine and sub-alpine regions of Mauna Kea on the island of Hawaii. The quoted statement was made by a university professor. The status survey that

provided the documentation to justify listing the Mauna Kea silversword as an endangered species was compiled by Dr. Gerald D. Carr, Associate Professor of Botany at the University of Hawaii. Any information in it provided by students resulted from research leading to an advanced degree. All status-survey work was supervised, reviewed, and accepted by members of the University graduate faculty.

Another of Mr. Tagawa's concerns was the manner in which priorities were set in deciding which species to list as endangered. In Hawaii, priorities for the listing of plants have been set by the Service after consultation with local professional and amateur botanists and after considering the Service's listing priority guidelines (48 FR 43098, Sept. 21, 1983) the individuals consulted on listing priorities, including the State Botanist, botanists from the University of Hawaii and the Bishop Museum, and knowledgeable naturalists, made recommendations to the Service's botanist, who developed a list of what were considered the most endangered of the Hawaiian plants. This list was used by the Service to determine the order in which listing packages were developed for the local species of plants.

The testimony of Mr. Susumu Ono was read at the public hearing by Mr. Libert Landgraf, Administrator of the State Division of Forestry and Wildlife. Two topics, the construction of exclosures and the planting out of silverswords, and the effectiveness of the exclosure fence against the mouflon sheep have been addressed above.

Mr. Ono mentioned that former forester, L.W. Bryan, stated in his notes that he observed a single silversword above Kanakaleonui in 1950, while the proposed rule stated that "the only known collections of Mauna Kea silverswords after 1916 are from the Wailuku River population." The Service has on file nine records of occurrences of the silverswords, other than the Wailuku population, dating from 1834 to 1955. The records include the 1950 Bryan sighting as well as another made by him at a lower elevation in the Wailuku area in 1955. The proposal included only those records that had been documented by the collection of herbarium specimens.

The proposed rule, under factor "B" of the Summary of Factors Affecting the Species, refers to large quantities of fruit removed for propagation purposes and to threats due to collection for horticultural purposes. Both Mr. Ono and Ms. Powell stated that the last large collection of seed was made in 1973 by a well-intentioned individual, and that the seed eventually was given to the National Park Service and served as the core of the out-planting project. Ms. Powell further stated that the collection was probably more beneficial than detrimental to the species. The Service concurs, and has modified factor "B" to reflect these comments. Collections of whole plants for ornamental or horticultural purposes apparently have been minimal for the last 50 or 60 years.

Under the same item in the proposed rule, the Service made the statement that, "Propagation of silverswords is not easy as few flowers produce viable seed and seed germination is low." Mr. Ono stated that, although detailed germination tests have not been conducted, the State has found Mauna Kea silversword seed quite viable, but short-lived, even when stored under refrigeration. He noted that even with abundant viable seed, very few seedlings in nature become established, but believed this is due to the moisture requirements of the plant rather than its seed viability. Studies by Siegel et al. (1970), Kobayashi (1973), and Powell (information included in her written comments and oral testimony on the proposed rule) all indicate that self-incompatibility, depressed inter-sibling fertility, a narrow range of temperature tolerance, seed dormancy factors, a relatively short seed life, and the soil moisture and other edaphic requirements of the silversword species in Hawaii result in a low rate of regeneration. The highest germination rate, under optimal laboratory conditions, of seed of the Haleakala subspecies was 27.7% (Siegel et al. 1970). Mr. Kaoru Sunada, in his testimony at the public hearing, reported a germination percentage of 20% for the Haleakala plants and 6% for the Mauna Kea plants used in his propagation project.

The proposed rule stated that, "The species grows as a rosette for between 5 and 15 years before flowering." Mr. Ono commented that, "There are some naturally occurring plants which we have observed for about 15 years that have not grown appreciably and still show no indication of flowering," and that, "It is not uncommon for the silverswords planted in better sites to bloom in two to three years. We had some bloom one year after planting." A silversword plant, unless multiheaded, flowers and produces seeds once, then dies. The age at which it flowers varies, but 5 to 15 years is frequently used as an average. Younger or older flowering plants, especially under artificial stress or non-optimal conditions, are to be expected.

Mr. Ono questioned whether the Service had assessed the best scientific information available regarding the species in formulating its proposal and stated that the Service had not made an effort to contact the State Division of Forestry and Wildlife in gathering its information. He was concerned by an apparent lack of response by the Service to the public and a failure to work with the landowner (the State) while gathering status information. He believed that the Service may have been unaware of the conditions under which the remaining naturally-occurring silverswords have survived and of what was being done by the State to protect and perpetuate the species. Although he disagreed with statements made in the Service's proposal, he did agree that the silversword warranted listing and offered the support of the State Department of Land and Natural Resources in the listing. In gathering the information that led to its proposal to list the Mauna Kea silversword, the Service attempted to address all known threats to the species. The status report and first draft of the proposed rule were prepared under contract by the Research Corporation of the University of Hawaii, whose staff were in informal contact with State personnel. Any information thus provided to the Research Corporation was incorporated into the survey and proposal. The Service has also provided all its endangered plant data to the State Division of Forestry in a cooperative effort to develop a data base. Apparently, these efforts failed to reveal the State's program to plant out silverswords at Pu'u La'au. The Service believes that it has made a good-faith effort to gather information regarding the status of the species and has responded adequately to the concerns of the public and the State, as borne out by the fact that, with the exception of an interim response from the Governor of Hawaii, all the written and informal comments received, and all testimony presented at the public hearing, have supported its determination that the Mauna Kea silversword is an endangered species. Further information brought out in response to the proposed rule regarding the species' status has been incorporated into the final rule.

Mr. Ono's letter continues that the next vital step in protecting a species, after its listing, ". . . is to develop a recovery plan to which those involved are committed." He believes that the agency proposing listing should be the lead agency in formulating a recovery plan and that the landowner should be involved. He states that recovery programs initiated by the State have suffered from the lack of coordination

VOL 51
ISS 55
MR 21
1986
UMI

among agencies and from recovery activities carried out by other agencies without the State's knowledge. The Service intends to develop a recovery plan for this species and, as with all previous recovery plans, will involve all interested parties, including the landowners.

Comments from six individuals or agencies were received concerning the designation of critical habitat for the Mauna Kea silversword. Mr. Ono did not believe it necessary to designate critical habitat; the other five favored its designation. The Service continues to believe that no net benefit would be provided for the plant by designating critical habitat, and that the designation could make the species more vulnerable to acts of vandalism. The remainder of Mr. Ono's comments concerned recovery actions.

Ms. Elizabeth Powell submitted written comments on the proposal, and testified as an individual and on behalf of the Hawaii Audubon Society at the public hearing. Much of her contribution consisted of extensive historical, biological, distributional, and demographic information. Other of her comments have been incorporated above.

The correct scientific name for the Mauna Kea silversword was the concern of three individuals. Ms. Powell and Dr. Degener believe that the Mauna Kea and the Haleakala plants are distinct at the specific level. Dr. Carr, based on the master's thesis of one of his students (Meyrat et al. 1983), considers the two to be distinct at the subspecific level. The proposed rule distinguishes the two at the varietal level. Based upon research by a Service botanist, the Service now recognizes the taxon at the subspecific level.

Ms. Powell and five other commenters, in their letters or testimony, addressed problems caused by feral ungulates. Mr. Ono believed that the existing enclosures have protected, and can continue to protect, the silversword against damage by feral animals. The remainder believe the feral animals, in some comments specifically the mouflon sheep, to be a great, if not the greatest, single threat to the silversword.

Dr. Otto Degener and Mr. Kaoru Sunda supported the listing of the silversword as an endangered species. Both supplied background and historical information. Their specific comments have been incorporated above. Mr. Rick Warshauer stated that the listing of the silversword is long past due and may now be too late. His other comments also have been incorporated above.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that the Mauna Kea silversword should be classified as an endangered species. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C 1531 *et seq.*) and regulations promulgated to implement the listing provisions of the Act (codified at 50 CFR part 424) were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Argyroxiphium sandwicense* DC. ssp. *sandwicense* (Mauna Kea silversword or 'ahinahina) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* The species historically was abundant on Mauna Kea from the 8,500 foot level to the 12,000 foot level. The activity of feral animals (goats, cattle, sheep, pigs, and horses) that was first introduced in the late 18th century has eliminated the silversword from the fragile upper zones of its former range and has reduced the species throughout its range to one known natural population of about 15 individuals. Feral animal populations have vastly altered and degraded the vegetation of Mauna Kea in general (Warner 1960). Direct results of animal activity have included mechanical damage of aerial and subterranean plant parts, consumption of plant material, and dispersal of exotic plant species. Secondary effects include wind and water erosion of the thin soil mantle after it has been stripped of stabilizing vegetation.

The only known extant natural population of this species has been fenced by the State of Hawaii; however, the exclosure is too low to be effective against more recently introduced mouflon sheep, which threaten the species' survival by grazing and browsing activities.

B. *Overutilisation for commercial, recreational, scientific, or educational purposes.* The species is of horticultural and ornamental interest, and in the past was threatened by collection of seed for propagation or of entire plants for ornamental purposes. However, these activities are now believed to be minimal, and represent only a potential threat to its existence. Propagation of silverswords is not easy as few flowers produce viable seed and seed germination is low (Kobayashi 1974).

C. *Disease or predation.* The closely related Haleakala silversword is damaged by the predacious larvae of insects such as *Rhynchephestia rhabdotis* and *Tephritis cratericola*, which were found to have damaged a mean of 60% of the seeds produced. An insect thought to be the latter or a similar species has been observed on the Mauna Kea silversword (Carr 1982). As these are native insects which evolved with the silversword, they may not be a threat to the plant, at least under normal conditions. Plants have been severely grazed by introduced herbivores even within exclosures estalished for the protection of the silversword.

D. *The inadequacy of existing regulatory mechanisms.* Most of the silverswords grow within the boundaries of the Mauna Kea Forest Reserve and are thus protected by State law against removal, injury or destruction. Federal listing would automatically invoke listing under Hawaiian State law, which would provide additional protection, and which would make Section 6 funds available for conservation programs under a cooperative agreement between the State and the Service.

E. *Other natural or manmade factors affecting its continued existence.* The extremely small size of the remaining populations of the species threatens its reproductive capacity and has resulted in a reduced gene pool that may threaten its adaptive capacity. The species grows as a rosette for between 5 and 15 years before flowering. Its low reproductive potential has been severely affected by reduction of the population size. Very few individuals produce a fruit crop in any given year. For 2 or more years no plants may bloom, and in some years only 4 or 5 plants may bloom.

Concurrent with population decline in insect-pollinated species, such as the silversword, is often a loss of evolved pollinator species. The drastic alteration of the upper forest zone on Mauna Kea in general (Warner 1960) may have resulted in a parallel reduction of potential pollinators.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by the species in determining to make this rule final. Based on this evaluation, the preferred action is to list *Argyroxiphium sandwicense* ssp. *sandwicense* as endangered. This designation reflects the strong likelihood that, without the institution of appropriate conservation measures, the species is likely to

become extinct throughout its range. The reasons for which critical habitat is not being designated are discussed below.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary designate any habitat of a species which is considered to be critical habitat at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for this species at this time. As discussed under Factor "B" in the Summary of Factors Affecting the Species, *Argyroxiphium sandwicense* ssp. *sandwicense* potentially is threatened by taking, an activity difficult to control and not regulated by the Endangered Species Act with respect to plants, except for a prohibition against removal and reduction to possession of endangered plants from areas under Federal jurisdiction.

The species is known only from lands owned by the State of Hawaii and from Hawaiian Home Lands. The State is aware of the existence of the species and has taken preliminary steps for protection. Upon Federal listing the silversword will be placed upon the Hawaii State list of Endangered plants; Hawaii law prohibits taking and encourages conservation by State governmental agencies for such species. See Hawaii Rev. Stat. ch. 195D, as amended (1976 Replacement & Supp. 1984). Management for the survival and recovery of the species can be coordinated between the U.S. Fish and Wildlife Service and the State of Hawaii. No net benefit would be provided to *Argyroxiphium sandwicense* ssp. *sandwicense* through critical habitat designation, and publication of critical habitat descriptions in the **Federal Register** and local newspapers, as required by law, could make this species even more vulnerable.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States, and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibition against collection are discussed, in part, below.

Section (7)(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402, and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(2) requires Federal agencies to consult with the Service on any action that is likely to jeopardize the continued existence of a listed species. If a Federal action may affect a listed species, the responsible Federal agency must enter into formal consultation with the Service. Currently, no activities to be authorized, funded, or carried out by Federal agencies are known to exist that would affect *Argyroxiphium sandwicense* ssp. *sandwicense*.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plant species. With respect to *Argyroxiphium sandwicense* ssp. *sandwicense*, all trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, or sell or offer for sale this species in interstate or foreign commerce. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered plant species under certain circumstances. No trade in this species presently is known. It is anticipated that few trade permits involving this species will be requested.

Section 9(a)(2)(B) of the Act, as amended in 1982, prohibits the removal and reduction to possession of endangered plant species from areas under Federal jurisidiction. This prohibition now applies to *Argyroxiphium sandwicense* ssp. *sandwicense* if it is found to occur on land under Federal jurisidiction. Permits for exceptions to this prohibition are available through section 10(a) of the Act and regulations to be codified at 50 CFR 17.62 (50 FR 39681, September 30, 1985). The only known extant natural population of this species occurs on State of Hawaii or Hawaiian Home lands. It is anticipated that no collecting permits will be requested for the species. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, DC 20240 (703/235-1903 or FTS 235-1903).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Rules

Federal Register
Vol. 51, No. 55
Friday, March 21, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 275 and 276

[Amdt. No. 268]

Food Stamp Program; Administrative Review Process for Liabilities and Quality Control Arbitration Process

AGENCY: Food and Nutrition Service, USDA.

ACTION: Proposed rule.

SUMMARY: This action proposes to amend the Food Stamp Program's administrative review process through which State agencies can seek reconsideration of claims filed against them by the Food and Nutrition Service (FNS). This proposed rule streamlines and simplifies the procedures that State agencies and FNS would follow when State agencies seek reconsideration, making the administrative review process less time consuming and more efficient to administer. Further, this rulemaking establishes arbitration procedures for quality control case findings that are disputed by State agencies.

DATE: Comments on this proposed rulemaking must be received on or before May 20, 1986 to be assured of consideration.

ADDRESS: Comments should be submitted to Thomas O'Connor, Supervisor, State Management Section, Administration and Design Branch, Program Development Division, Food and Nutrition Service, USDA, Alexandria, Virginia 22302. All written comments will be open to public inspection during regular business hours (8:30 a.m. to 5:00 p.m., Monday through Friday) at 3101 Park Center Drive, Alexandria, Virginia, Room 706.

FOR FURTHER INFORMATION CONTACT: Questions regarding this proposed rulemaking should be directed to Mr. O'Connor at the above address or by telephone at (703) 756–3383.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed in relation to the requirements of Executive Order No. 12291 and Secretary's Memorandum No. 1512–1, and it has been determined that the action will not result in an annual effect on the economy of $100 million or more or a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions. Additionally, this action will not result in significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, this action has been classified as "not major." The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the Final rule related Notice to 7 CFR Part 3015, Subpart V (48 FR 29115), this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

This action has also been reviewed in relation to the requirements of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354, 94 Stat. 1164, September 19, 1980). Robert E. Leard, Administrator of the Food and Nutrition Service, (FNS), has certified that this action will not have a significant economic impact on a substantial number of small entities. The proposed rule would simplify the administrative review process for liabilities and establish arbitration procedures for quality control (QC) case findings that are disputed by State agencies. Requirements would not be placed on small businesses or small organizations. Some requirements would be placed on State agencies. However, the requirements would not have a significant economic impact on local governments.

This rule does not contain recordkeeping or reporting requirements subject to approval by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Quality Control Arbitration

Regulations issued on January 23, 1981, at 46 FR 7257, allowed State agencies to have Quality Control cases arbitrated when the State disputed the Federal review findings. Informally, procedures were developed at the regional and national levels to arbitrate disputes about case findings. There were no time limits established as part of these informal procedures. Because of an increased emphasis on timeliness, the Department believes that it is necessary to change the procedures to impose time limits on the arbitration process for FNS and State agencies. As time limits on requests for arbitration will be imposed on State agencies by this change, we have determined that these procedures should be included in the regulations. Discussed below are the significant changes from the current regulations and policy on arbitration. Comments are being sought on all aspects of the arbitration process.

Under the existing procedures, there are two levels of appeal, first is to the regional office and second to the national office of FNS. In this rulemaking, we are proposing to eliminate the appeal to the national office. This one-tiered arbitration system will bring cases to finality sooner. Thus, FNS will be able to make earlier determinations regarding States' eligibility for enhanced funding or liability for errors.

Currently, the regulations at § 275.3(c)(5) specify that the regional office shall designate the arbitrator. At the regional level under the current two-tier system, the individual designated as arbitrator has varied from region to region. Some arbitrators have worked in the Food Stamp Program; others have worked outside it. In this rulemaking, we are proposing to revise the regulation to state that the Regional Administrator or his/her designee shall serve as the arbitrator. If the Regional Administrator designates someone to serve as the arbitrator, that individual should be knowledgeable about Food Stamp policy and have the authority to carry out determinations.

Presently, there are no timeframes established for States to request arbitration of a particular case determination nor for FNS to conduct the review and make a decision. Under this proposed rulemaking, State

VOL
51
ISS
55
MR
21
1986
UMI

agencies would be given 28 calendar days to submit a request for arbitration. In the event the last day of the time limit falls on a weekend or holiday, the final date would be moved forward to the next working day. We believe that 28 days is sufficient to allow a State agency to review the regional findings to determine any disagreement and to prepare and submit a request for arbitration. Further, 28 days is consistent with current Aid to Families with Dependent Children program practices. In addition, we are also proposing a 30-day time limit for the FNS arbitrator to review a case and make a decision or to notify the State agency of the status of the case.

Administrative Review Process

The provisions of Section 14 of the Food Stamp Act of 1977 (7 U.S.C. 2023) require that State agencies aggrieved by claims issued by FNS under section 13 of the Act be given the opportunity to have the claims reviewed through an administrative review process.

Proposed rules published November 9, 1979 (44 FR 65336) gave State agencies the opportunity to seek a review of any claims against them under section 13 of the Act. These rules also proposed that State agencies might request a hearing for claims based on either negligence or on a disallowance for failure to meet the corrective action plan. The Department expected that such claims might require a more detailed review of the circumstances and might be more satisfactorily resolved if a State agency representative were allowed to present a case in person. The Department did not propose to allow hearings for all types of claims, since this would require an unnecessary and excessive commitment of manpower.

On November 21, 1980, the Department issued final rules on Federal Sanctions and State Agency Liabilities (45 FR 77258). All of the provisions of those regulations were issued as final, except the provisions pertaining to the Administrative Review Process, which were issued as interim rules with commitments solicited.

Comments received on the November 9, 1979, proposed regulations included a suggestion that State agencies be given the opportunity to have an in-person hearing on all claims that are appealed. This would include in-person hearings of appeals of issuance claims, as well as negligence claims or disallowances of funds. The Department felt that issuance claims would generally be disputes over records, such as accountability and inventory reports, and did not foresee that in-person hearings would be necessary to reach equitable decision in these cases. The Department believed that a review of the disputed records, along with any other information provided by the State agency, would be adequate. However, to ensure that the appeals process was equitable, the Department, in the interim rules published November 21, 1980, stated its willingness to grant State agencies the option of having in-person hearings in all cases.

Under the interim rules, whenever FNS asserts a claim against a State agency, the State agency may appeal the claim by requesting an administrative review. FNS claims that may be appealed are: billings based on excessive quality control error rates; billings resulting from financial losses involved in the acceptance, storage and issuance of coupons; billings based on charges of negligence or fraud; and disallowances of Federal matching funds for State agency failures to comply with the Food Stamp Act, the regulations, or the FNS-approved State Plan of Operations.

Currently, a State agency aggrieved by a claim has the option of requesting a hearing to present its position in addition to a review of the record and any written submission presented by the State agency. Unless circumstances warrant differently, appeals of quality control and negligence claims and disallowances of Federal funds are heard before a full Appeals Board appointed by the Secretary.

Appeals of other claims are heard before a single hearing official. In all cases, the person(s) reviewing the claim was not involved in the decision to file the claim.

In light of the Administration's efforts to improve and simplify program administration and the comments received on the interim procedures, the Department has reexamined the interim administrative review procedures and intends to significantly modify them. Therefore, the Department has decided to issue new regulations for public comment prior to publishing a final rule. Comments received on the interim procedures were considered in the development of this proposed rule and this preamble discusses the basis and purpose of the revisions of the interim rule that the Department is proposing in this rulemaking.

The law provides that, when a claim against a State agency is made, a State agency may request an opportunity to submit information in support of its position. The law does not mandate formal hearings. What the Department had originally envisioned as an informal discussion or review under the requirements of the Act has become a costly, time-consuming, quasi-judicial procedure. Under section 14 of the Food Stamp Act (7 U.S.C. 2023(a)), State agencies may obtain a formal judicial review by the courts through a trial *de novo* if they wish to appeal a final administrative determination. Therefore, the Department feels that the formal review by the current Appeals Board is unnecessary and should be replaced by more informal review procedures.

The Department proposes to substitute for the Appeals Board an administrative review process based solely on a single official's review of the record submitted by the State agency. This does not preclude personal contact between the reviewing official, FNS and the State agency, when necessary. However, any such contact would not affect the established timeframes for completing reviews or delay the review process. The reviewing officials, designated by the Secretary, would be an individual in a position to modify the original determination made by FNS while ensuring that the determination is in keeping with Food Stamp Program law and regulations. To assure this combination of authority to affect the original determination and program expertise, this proposal would permit the Secretary to designate an official who participated in the original decision to assert the claim against the State agency.

We believe this type of review will have practical advantages both for the Department and State agencies pursuing administrative review. Aside from the reduced procedural burdens inherent in simplification of the review process, the system will assure State agencies the opportunity to present their cases directly to an official who has broad authority to reconsider the Department's position.

While the current Appeals Board would be abolished, the role of the Executive Secretary would be retained. The Director, Administrative Review Division (ARD), FNS, who currently serves as Executive Secretary to the Appeals Board would retain the functions now being performed by the Executive Secretary. This would include acknowledgment, in writing, of all State agency requests for administrative review and informing the State agency whether the request is timely and acceptable.

Another proposed change affecting the nature of review has to do with the kinds of arguments that Senate agencies may raise during reviews of quality control billings. Currently, a State agency that fails to meet its quality control error rate target is informed of

its potential liability and has an opportunity to submit any good cause arguments for the failure. If FNS rejects the Stage agency's good cause arguments, a bill is sent to the State agency. Under the current rules the State agency may then appeal the billing through the administrative review process. Very often, many of the arguments raised by State agencies during the adminstrative review are the same as those raised during the consideration of good cause. Thus, the same arguments are being heard twice.

When Congress enacted the quality control billing provisions in the 1980 Food Stamp Amendments (Pub. L. 96–249, May 26, 1980), the possibility of good cause arguments being heard twice was realized and addressed. In the House *Report* accompanying these amendments, the House noted:

> Every State against which the Secretary asserted a claim would have the right to seek administrative and judicial review of the claim in accordance with the procedures contained in section 14 of the Act. None of these procedures would be applicable to the Secretary's review of the State's contention that it had good cause for its failure to meet the appropriate level of error. (House Report No. 96–788, page 74.)

Thus, Congress' stated method to avoid the redundancy currently being experienced was to exclude good cause arguments from the administrative review process.

The current administrative review process is being slowed down by having to consider good cause arguments that have already been rejected by the Department and which the Department is not obligated to consider again Unlike the billing itself, which is computed according to reviewable standards, good cause is an exercise of discretion which makes administrative review difficult.

To eliminate these problems, the Department proposes to prohibit State agencies from raising good cause arguments during the administrative review of quality control billings. This change would not only help to streamline the administrative review process, it would also make the Department's policy in this area the same as the policy followed in the AFDC Program. This prohibition would not limit the ability of State agencies to have quality control billings themselves reviewed through the administrative review process. It would apply only in an instance where a State agency sought to challenge the decision not to waive a sanction on the basis of good cause.

Review of Suspensions of Funds

The Department received comments on the interim rule recommending that State agencies be allowed to appeal suspensions of funds. Several State agencies argued that it was unfair to exempt suspensions from appeals because the Department could willfully tie up State agency funds through lengthy suspensions and the State agency would not have the ability to appeal the basis of the withholding.

The Department is concerned that allowing suspensions to be reviewed could result in certain cases being reviewed twice. This could occur if a review of a suspension were decided against the State agency, and at some later date the State agency sought review of the disallowance that was asserted against it as a result of the same issues that led to the initial suspension of funds. Therefore, this rule does not propose that suspensions of funds be included in the review process. Although not covered by the review process, State agencies would be free to dispute suspensions with FNS personnel and to contact the Department if they continue to feel suspensions are unwarranted.

Process Timeframes

A number of State agencies have contended that the initial 10-day limit for submitting a request for review does not allow them enough time to determine whether the FNS action was warranted and, thus, whether review should be requested. As discussed in the preamble to the interim rule, the 10-day limit is prescribed by Section 14 of the Act, and is appropriate in light of the need to expeditiously process reviews. The Department, however, is proposing to amend the regulations so that the time limit would be computed by work days rather than calendar days. This would allow State agencies additional time to study any disallowance or claims made against them. All other timeframes would continue to be computed by calendar days.

This proposed rule also clarifies the deadlines that may be extended by the reviewing official. In addition to prohibiting any extension of the deadline by which State agencies must file their initial request for administrative review, this proposed rule provides that the date that a review decision becomes final and the deadline by which a State agency must file for judicial review will not be delayed. These timeframes are set out in section 14 of the Act. Under the current rules, all other requests for the extension of any deadline contained in 7 CFR 276.7 will be granted only for good cause shown and only when received by the Director of ARD before the expiration of the particular deadline involved. The Department is proposing that any requests for extensions other than those prescribed by the law would be granted only in unusual cases and only when the requests are postmarked prior to the expiration of the particular deadline involved. These requests would be granted by the reviewing official on a case-by-case basis.

Under the current rule, State agencies have 30 days from their request for a review to submit any additional information. This means that the timeframes for submitting information begin before the State agency knows whether its request for review has been accepted. It also means that State agencies have often had to prepare their cases without knowing the Department's administrative record. In many cases, this has resulted in State agencies requesting and being granted more time to ready their arguments. In order to rectify this problem, the Department proposes to allow the State agencies 30 days from the date of their receipt of the administrative record to submit any additional information. The regulations would require the administrative record to be provided promptly. Except in unusual cases, promptly means the State agency should expect to receive the administrative record within 30 days of the request for review being accepted. The additional time gives the State agencies a greater opportunity to review the administrative record and assemble data and any other supportive information, if necessary.

Final Determinations

Under the current rules, when a hearing is not held a final determination must be made within 30 days after receipt of a State agency's information. The Department is proposing that reviews of claims under the revised system reach a final determination promptly. As noted above, the expectation is that final determinations would be made within 30 days after receipt of the State agency's information.

Other Issues

It has been suggested that claims or disallowances resulting from an alleged failure by a State agency to reduce, cancel, or suspend benefits, if such action became necessary under § 271.7, should be stayed during the review process as is the case with all other claims. A State agency violation of a Department order to reduce or cancel benefits clearly results in the State agency being out of compliance with the Food Stamp Act and Program regulations. Under section 18(b) of the

VOL 51
ISS 55
MR 21
1986
UMI

Act, (7 U.S.C. 2027(b)) the Secretary is without authority to obligate funds in excess of the amount authorized by Congress in any fiscal year and is specifically required to direct States to reduce benefits to avoid such an occurrence. Such expenditures could also result in a violation of the Anti-Deficiency Act (31 U.S.C. 665) by the Department. For these reasons, the Department needs maximum authority to enforce any directive to reduce, cancel or suspend benefits. Therefore, the Department would not, under this proposal, return any funds withheld from State agencies under § 271.7(h) during reviews. The Department is, however, including in this proposed rule a requirement that these withheld funds be returned to the State agency within 30 days of the review decision if the State agency's position is upheld.

Another commenter asked that the regulations be amended to stay the collection of a claim until a final judicial decision is reached, if the State agency requests judicial review of the matter. The Department has not amended the regulation, however, because section 14 of the Food Stamp Act specifically requires that the decision remain in effect during judicial review unless the court orders that funds be returned to the State agency.

The Department is also proposing a new provision to 7 CFR 276.7 of the regulations allowing the State agency to withdraw, at any time, its request for the review and pay the claim. While this has always been the case in practice, the Department wanted to explicitly state the policy into the regulations so that there was no confusion about it.

Finally, the Department wishes to call to your attention an amendment to section 14 of the Food Stamp Act enacted by the Food Security Act of 1985. That legislation changed the criterion a State agency would need to meet to obtain a judicial stay of an administration action. Prior to this legislative change, a State agency could obtain a judicial stay of an administrative review if it could show that irreparable injury would result if the administrative action remained in force. Under the legislative change, the courts would also consider the State agency's likelihood of prevailing on the merits of the case. The Department considers this legislative change to be "self-implementing," i.e., effective upon enactment of the statute. Given the fact that the provision is a directive aimed at the courts and that Congress gave no discretion in this area, regulations do not need to be issued to implement the policy. However, in the interest of ensuring that our regulations present a complete picture of the administrative and judicial review process, we will include this provision in another rulemaking that will be issued in the near future.

Implementation

The Department proposes that the QC arbitration rules and the revised Administrative Review Process become effective 30 days after the publication of the final rulemaking. Any QC cases submitted for review after this date would be subject to the arbitration rules. Where requests for review of claims have been filed prior to the effective date of the final rule, State agencies would still have the option of requesting a review of the record or an in-person hearing before the current Appeals Board. The 30-day transition period minimizes the overlap between requests filed under the current rule and the revised procedures. As to requests filed after the effective date of the final rulemaking, all reviews would be conducted according to the procedures set forth in the final rule.

List of Subjects

7 CFR Part 275

Administrative practice and procedure, Food stamps, Reporting and recordkeeping requirements.

7 CFR Part 276

Administrative practice and procedure, Food stamps, Fraud, Grant programs—social programs, Penalties.

Therefore, 7 CFR Parts 275 and 276 are proposed to be amended as follows:

PART 275—PERFORMANCE REPORTING SYSTEM

1. The authority citation for Parts 275 and 276 continues to read as follows:

Authority: 91 Stat. 958 (7 U.S.C. 2011–2029).

2. Section 275.3 is amended by revising paragraph (c)(5) to read as follows:

§ 275.3 Federal monitoring.

* * * * *

(c) *Validation of State Agency Error Rates.* * * *

(5) *Arbitration.* Whenever the State agency disagrees with the FNS regional office concerning individual case findings and the appropriateness of actions taken to dispose of individual cases on a case-by-case basis, the State agency may request that the dispute be arbitrated by the regional office.

(i) The FNS Regional Administrator or his/her designee shall be the arbitrator and shall sign the decision.

(ii) *Timeframes for arbitration.* (A) The State agency shall request arbitration within 28 calendar days of the date the regional office transmits its case findings to the State agency. Requests submitted later than 28 calendar days shall be denied. In the event the last day of this time period falls on a Saturday, Sunday or Federal or State holiday, the period runs to the end of the next work day.

(B) The arbitrator shall have 30 days to review the case and make a decision or to notify the State agency of the status of the case.

(iii) Full documentation of the case and the policy in question must be submitted with the request for arbitration. Requests without such documentation shall be returned to the State agency. The State agency may resubmit the request with the documentation, provided it can do so within the 28 days allowed in § 275.3(c)(5)(ii)(A).

* * * * *

PART 276—STATE AGENCY LIABILITIES AND FEDERAL SANCTIONS

3. Section 276.7 is revised in its entirety to read as follows:

§ 276.7 Administrative review process.

(a) *General.* (1) Whenever FNS asserts a claim against a State agency or disallows federal funds to collect a claim, the State agency may seek reconsideration of the claim or disallowance by requesting an administrative review. State agencies may request review of FNS billings to enforce orders to reduce, cancel or suspend benefits in accordance with § 271.7; billings based on excessive quality control error rates, except for the Department's prior determination of good cause (§ 275.25); billings resulting from financial losses involved in the acceptance, storage, and issuance of coupons (§ 276.2); billings based on charges of negligence or fraud (§ 276.3); and disallowances of Federal funds for State agency failures to comply with the Food Stamp Act, regulations or the FNS-approved State Plan of Operations (§ 276.4), but not suspensions of funds preceding disallowances (§ 276.4).

(2) A State agency aggrieved by a claim or disallowance shall be given the opportunity to have its case reviewed through a review of the record which

shall include a written submission presented by the State agency. The review shall be performed by the Secretary or his delegate. The reviewing official may be an individual who was involved in the decision to file the claim or disallow funds. At any time during the appeals process, a State agency may withdraw its request for the review and pay the Department's claim.

(b) *Notice of claims.* FNS shall provide a notice by certified mail or personal service when asserting claims against or disallowing funds to State agencies.

(c) *Filing a request for review.* A State agency aggrieved by a claim or disallowance may file a written request for review with the Director, Administrative Review Division (ARD), Food and Nutrition Service, USDA, Alexandria, Virginia 22302, requesting an opportunity to present information in support of its position. The State agency shall attach a copy of the notice which it received pursuant to § 276.7(b). Requests must be filed with the Director, ARD, or postmarked within 10 work days of the date of delivery of the notice. If the State agency does not request a review within the prescribed 10 work day period or fails, after requesting such review, to submit information pursuant to § 276.7(g) in support of its position, the administrative determination on the claim shall be final. No extension shall be granted in the time allowed for requesting review.

(d) *Computation of time.* The time period for the State agency's filing of a request for administrative review shall be computed according to work days. A work day is any day that is not a Saturday, Sunday or Federal or state holiday. All other time periods shall be computed using calendar days. In computing any period of time prescribed or allowed under these procedures, the day of delivery of any notice of action, acknowledgement, or reply shall not be included. If the last day of any time period is not a work day, the period runs until the end of the next day which is a work day.

(e) *Stay of administrative action.* The filing of a timely request for administrative review of a claim or disallowance shall automatically stay the action of FNS to collect the claim or disallowance asserted against the state agency until a decision is reached on the acceptability of the request, and in the case of an acceptable request, until a final determination has been issued. However, if a State agency requests review of any action taken against it because of its failure to comply with an order to reduce, suspend or cancel benefits in accordance with § 271.7, the disallowance and/or billing shall remain in effect during the entire review process. Should the State agency's position be upheld, disallowed funds and/or funds collected as a result of a billing shall be restored to the State agency within 30 days.

(f) *Acceptability of an appeal.* Upon receipt of a request for administrative review, the Director, ARD, shall provide the State agency with a written acknowledgement of the request. This acknowledgement shall also notify the state agency of the acceptability of the request. A request shall be acceptable if it is submitted in a timely manner as defined in § 276.7(c) and is for the purpose of obtaining review of any FNS action described in § 276.7(a).

(g) *Submitting additional information.* (1) A State agency shall have 30 days from the date of its receipt of the administrative record pursuant to § 276.7(g)(2) to submit three sets of all information it wishes the reviewing official to consider. This information shall be completed in a format prescribed by FNS and sent to the Director, ARD. In order to expedite the review process, the submission should, to the extent possible, include the following:

(i) A clear, concise identification of the issue or issues in dispute;

(ii) The State agency's position with respect to the issue or issues in dispute;

(iii) The pertinent facts and reasons in support of the State agency's position with respect to the issue or issues in dispute;

(iv) All pertinent documents, correspondence and records which the state agency believes are relevant and helpful toward a more thorough understanding of the issue or issues in dispute; and,

(v) The relief sought by the State agency.

(2) With regard to reviews of quality control billings, arguments relating to whether or not the State agency had good cause for an error rate that resulted in a billing shall not be considered by the review official. Therefore, State agencies should not submit information relating to these issues.

(3) FNS shall, upon receipt of an acceptable appeal pursuant to § 276.7(f), promptly provide one copy of the administrative record, including all documents, correspondence and records compiled by FNS in support of the claim or disallowance, to the State agency.

(h) *Final determination.* (1) For reviews of all claims, a final determination shall be made promptly after receipt of supporting information submitted by the State agency pursuant to § 276.7(g). The final determination shall take effect 30 days after delivery of the notice of the final decision to the State agency.

(2) The reviewing official shall either uphold the claim, deny the claim, or adjust the claim downward in such amounts as the reviewing official shall determine. The final determination is not subject to reconsideration.

(i) *Judicial review.* State agencies aggrieved by the final determination may obtain judicial review and trial *de novo* by filing a complaint against the United States within 30 days after the date of delivery or service of the final notice of determination, pursuant to the provisions of section 14 of the Food Stamp Act of 1977. The final determination shall remain in effect during the period the judicial review is pending unless the court temporarily stays such administrative action pending disposition of the complaint.

(j) *Extension of time.* No extension of time shall be permitted with regard to filing an initial request for an administrative review or the effective date of the final review decision or filing a complaint for judicial review. All other requests from a State agency for the extension of any deadline contained in § 276.7 of the regulations or imposed by the reviewing official shall be granted only for good cause and only when the request is postmarked prior to the expiration of the particular deadline involved. A request for an extension shall be in writing. Requests shall be granted by the reviewing official on a case-by-case basis. Filing a request for an extension stops the running of the prescribed period of time. When a request for an extension is granted, the requester shall be notified in writing of the amount of additional time granted. When a request is denied for being untimely or because good cause is not found, the requester shall be notified and the prescribed period of time shall resume from the date of the receipt of the denial.

Dated: March 17, 1986.

John W. Bode,

Assistant Secretary for Food and Consumer Services.

Federal Crop Insurance Corporation

7 CFR Part 400

[Doc. No. 0067A]

General Administrative Regulations; Late Planting Agreement Option Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) proposes to revise and reissue the Late Planting Option (7 CFR Part 400, Subpart A), effective with the 1987 and succeeding crop years. The intended effect of this rule is to: (1) Delete the adverse weather condition requirement; (2) Publish a corrected list of crop insurance regulations to which the Late Planting Option applies; (3) Provide availability of the Late Planting Option beginning with 1987 crop year fall-planted crops; and (4) Add a new subsection to comply with OMB regulations requiring codification of OMB control numbers assigned to information collection requirements. The authority for the promulgation of this rule is contained in the Federal Crop Insurance Act, as amended.

DATE: Written comments, data, and opinions on this proposed rule must be submitted not later than April 21, 1986, to be sure of consideration.

ADDRESS: Written comments on this proposed rule should be sent to the Office of the Manager, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC, 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC, 20250, telephone (202) 447–3325.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established by Departmental Regulation 1512–1 This action constitutes a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures. The sunset review date established for these regulations in January 1, 1991.

Merritt W. Sprague, Manager, FCIC, (1) has determined that this action is not a major rule as defined by Executive Order 12291 because it will not result in: (a) An annual effect on the economy of $100 million or more; (b) major increases in costs or prices for consumers, individual industries, federal, State, or local governments, or a geographical region; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets; and (2) certifies that this action will not increase the federal paperwork burden for individuals, small businesses, and other persons.

This action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Other than minor changes in language and format, the principal changes in the Late Planting Option Regulations are:

1. Section 400.3.—Add a new subsection in the Late Planting Agreement Option (LPAO) regulations to contain the control numbers assigned by the Office of Management and Budget (OMB) to information collection requirements of these regulations.

2. Section 400.5.—Delete the Tobacco (Dollar Plan) Crop Insurance Regulations (7 CFR Part 434) as this tobacco is now insured under the Tobacco (Guaranteed Production Plan) Crop Insurance Regulations (7 CFR Part 436).

Add Sweet Corn (Canning and Freezing) Crop Insurance Regulations (7 CFR Part 437) as a crop eligible for the Late Planting Option.

Allow the Late Planting Agreement (LPA) to be used beginning with 1987 crop year fall-planted crops. The availability of this option to most spring planted crops has allowed FCIC to avoid extension of final planting dates with the concurrent reduction in yields. The Agreement actually allows an extension of the final planting date with a reduction in guarantee and is more actuarially sound than the previous procedure. FCIC has allowed the program in a limited winter wheat area and the results have been favorable for both the Corporation and the insured. This change will allow the LPA to be used for all fall planted wheat, barley, oat and rye programs provided these corps are insurable under the basic policy.

3. Section 400.6.—Delete the adverse weather conditions requirement. It is difficult to determine if the planting delay is due to adverse weather conditions or some other factor. Since no actuarial basis exists for the restriction, FCIC proposes to delete it and allow an optio regardless of the reason. This change will allow the Late Planting Option to be used whenever the otherwise insurable crop is planted after the final planting date without regard to the reason.

FCIC is soliciting public comment on this proposed rule for 30 days after publication in the **Federal Register**. All written comments made pursuant to this rule will be available for public inspection in the Office of the Manager, Federal Crop Insurance Corporation, Room 4096, South Building, U.S. Department of Agriculture, Washington, DC, 20250, during regular business hours, Monday through Friday.

List of Subjects in 7 CFR Part 400

Crop Insurance; Late Planting Agreement Option.

Proposed Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby proposes to revise and reissue the Late Planting Agreement Option Regulations, Subpart A of Part 400, Title 7 of the Code of Federal Regulations, effective for the 1987 and succeeding crop years, as set forth below:

PART 400—GENERAL ADMINISTRATIVE REGULATIONS

Subpart A—Late Planting Agreement Option; Regulations for the 1987 and Succeeding Crop Years

Sec.
400.1 Availability of the Late Planting Option.
400.2 Definitions.
400.3 OMB control numbers.
400.4 Responsibilities of the insured.
400.5 Applicability to crops insured.
400.6 The Late Planting Agreement.

Authority: Secs. 506, 516, Pub. L. 75–430, 52 Stat. 73, 77, as amended (7 U.S.C. 1506, 1516).

Subpart A—Late Planting Agreement Option; Regulations for the 1987 and Succeeding Crop Years

§ 400.1 Availability of the late planting option.

The Late Planting Option shall be offered under the provisions contained in 7 CFR Parts 402, *et seq.*, within limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), only on those crops identified in § 400.4 of this subpart. All provisions of the applicable contract for the insured crop apply, except those provisions which are in conflict with this part.

§ 400.2 Definitions.

For the purposes of the Late Planting Option:

(a) "Final planting date" means the final planting date for the insured crop contained in the actuarial table on file in the service office.

(b) "Late Planting Agreement Option" means that agreement between the FCIC and the insured whereby the insured elects, and FCIC provides, insurance on acreage planted for up to 20 days after the applicable final planting date. The production guarantee applicable on the final planting date will be reduced on the acreage planted after the final planting date by 10 percent for each 5 days that the acreage is planted after the final planting date.

(c) "Production guarantee" means the guaranteed level of production under the provisions of the applicable contract for crop insurance (sometimes expressed in amounts of insurance).

§ 400.3 OMB control numbers.

OMB control numbers are contained in Subpart H of Part 400, Title 7 CFR.

§ 400.4 Responsibilities of the insured.

The insured is solely responsible for the completion of the Late Planting Option Application and for the accuracy of the data provided on that application. The provisions of this subsection shall not relieve the insured of any responsibilities under the provisions of the insurance contract.

§ 400.5 Applicability to crops insured.

The provisions of this subpart shall be applicable to the provisions of FCIC policies issued under the following regulations for insuring crops:

7 CFR Part 418 Wheat
7 CFR Part 419 Barley
7 CFR Part 420 Grain Sorghum
7 CFR Part 421 Cotton
7 CFR Part 422 Potatoes
7 CFR Part 423 Flax
7 CFR Part 424 Rice
7 CFR Part 425 Peanuts
7 CFR Part 427 Oats
7 CFR Part 428 Sunflowers
7 CFR Part 429 Rye
7 CFR Part 430 Sugar Beets
7 CFR Part 431 Soybeans
7 CFR Part 432 Corn
7 CFR Part 433 Dry Beans
7 CFR Part 435 Tobacco (Quota Plan)
7 CFR Part 436 Tobacco (Guaranteed Production Plan)
7 CFR Part 437 Sweet Corn (Canning and Freezing)
7 CFR Part 438 Tomatoes
7 CFR Part 443 Hybrid Seed
7 CFR Part 447 Popcorn

The Late Planting Option shall be available in all counties in which the Corporation offers insurance on these crops.

§ 400.6 The late planting agreement.

The provisions of the Late Planting Agreement are as follows:

U.S. DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

LATE PLANTING AGREEMENT

Insured's Name __________
Address __________
____
Contract No. __________
Crop Year __________
Crop __________

Notwithstanding the provisions of section 2 of the policy regarding the insurability of crop acreage initially planted after the final planting date on file in the service office, I elect to have insurance provided on acreage planted for 20 days after such date. Upon my making this election, the production guarantee or amount of insurance, whichever is applicable, will be reduced 10 percent for each five days or portion thereof that the acreage is planted after the final planting date. Each 10 percent reduction will be applied to the production guarantee or amount of insurance applicable on the final planting date. The premium will be computed based on the guarantee or amount of insurance applicable on the final planting date; therefore, no reduction in premium will occur as a result of my election to exercise this option. If planting continues under this Agreement after the acreage reporting date on file in the service office, the acreage reporting date will be extended to 5 days after the completion of planting the acreage to which insurance will attach under this Agreement.

Insured's signature __________
Date __________
Corporation representative's signature and Code Number __________
Date __________

COLLECTION OF INFORMATION AND DATA (PRIVACY ACT)

The following statements are made in accordance with the Privacy Act of 1974 (5 U.S.C. 552(a)).

The authority for requesting the information to be supplied on this form is the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), and regulations promulgated thereunder (7 CFR Part 400 *et seq.*). The information requested is necessary for FCIC to institute the Late Planting Agreement Option. The information may be furnished to FCIC contract agencies and loss adjusters, reinsured companies, processors, other U.S. Department of Agriculture agencies, the Internal Revenue Service, Department of Justice, other State and Federal law enforcement agencies, U.S. Government contract collection agencies and in response to orders of a court, magistrate, or administrative tribunal. Furnishing the information requested on this form is voluntary. However, failure to furnish the complete requested information may result in the Late Planting Agreement not being accepted by the Corporation.

Done in Washington, DC, on January 22, 1986.

Edward Hews,
Acting Manager, Federal Crop Insurance Corporation.

BILLING CODE 3410–08–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 917

[Plum Reg. 17, Amdt. 3, Plum Reg. 18, Amdt. 8]

Pears, Plums and Peaches Grown in California; Container and Pack Requirements; Grade and Size Requirements for Plums

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule with request for comments.

SUMMARY: This proposed rule invites comments on several changes to the container and pack requirements and grade and size requirements for shipments of fresh plums grown in California. The proposed requirements are designed to provide uniformity of sizes of plums in containers and assure adequate quality of the plum pack during the 1986 season.

DATES: Comments are due by April 7, 1986.

ADDRESSES: Comments must be sent in duplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, Room 2069, South Building, Washington, DC 20250. Comments should reference the date and page number of this issue of the **Federal Register** and will be available for public inspection in the office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: James B. Wendland, Acting Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, DC. 20250, (202) 447–5053.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA guidelines implementing Executive Order 12291 and Secretary's

Memorandum No. 1512–1 and has been determined to be a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders, issued pursuant to the Agricultural Marketing Agreement Act, and rules proposed thereunder, are unique in that they are brought about through the group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

It is estimated that approximately 608 handlers will be subject to regulation under the Marketing Order for California pears, peaches, and plums (7 CFR Part 917) during the course of the current season and that the great majority of this group may be classified as small entities. While regulations issued during the season impose some costs on affected handlers, the added burden on small entities, if present at all, is not significant.

The proposed rule is issued under the marketing agreement, as amended, and Marketing order 917, as amended (7 CFR Part 917), regulating the handling of pears, plums, and peaches grown in California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). Shipments of these California fruits are regulated by container and pack under Plum Regulation 17 (7 CFR 917.454) and by grade and size under Plum Regulation 19 (7 CFR 917.460). Because these regulations do not change substantially from season to season, they are issued on a continuing basis subject to amendment. modification or suspension as may be recommended by the applicable committee and approved by the Secretary.

It is found that good cause exists for limiting the comment period on this action to 15 days after publication in the **Federal Register** (5 U.S.C. 553) because the 1986 shipping season is expected to begin shortly. Therefore, prompt commenting on this action is necessary so that handlers can adjust in a timely manner to any possible changes resulting from this action.

This proposed rule is based upon the recommendation and information submitted by the Plum Commodity Committee, and other available information.

With respect to container and pack requirements, the committee recommended a size variance between the smallest and largest plums of ⅜ inch for plums 2¼ inch in diameter and larger packed in volume-filled containers. Currently, the maximum variation permitted is ¼ inch (or ⅜ inch) regardless of the diameter of the plums and the type of container. The proposed size variation requirement would allow handlers additional flexibility in packing larger size plums in volume-filled containers. For plums smaller than 2¼ inches in diameter packed in volume-filled containers and any size plums packed in tray packs the ¼ inch size variance would continue to apply. In addition, because the proposed ⅜ inch variance is greater than the ¼ inch variance permitted in the standard pack requirements in the United States Standards for Grades of Fresh Plums and Prunes (§§ 51.1520 to 51.1538), the current requirement that shipments of plums meet all standard pack requirements would be deleted. Instead, the proposed rule lists the specified pack requirements for shipments of plums.

With respect to size requirements, the committee recommended that all plums regulated by size be subject to a two-pound subsample of the smallest plums taken from each eight-pound sample used in checking compliance with size requirements. The volume-filled container is the most frequently used container in the California plum industry (it comprised more than 89 percent of total 1985 shipments). However, the nature of such packs allows for significant diameter variation. The additional two-pound subsample would limit such variations and help assure that the individual plums in each pack are uniformly sized.

Another proposed size requirement change would establish minimum size requirements for three varieties of plums, and would remove minimum size requirements for six varieties of plums. This change would bring the variety-specific size regulations established for plums into conformity with a long-standing industry practice of applying such regulations to varieties produced in commercially significant quantities. Shipments of the varieties that would be regulated exceeded 10,000 packages per variety during the 1985 season. Shipments of the varieties that would be removed from variety-specific size regulation fell below 5,000 packages per variety during the season.

A final size recommendation would require all varieties not subject to the variety-specific regulations to be subject to a minimum size requirement. That requirement would require the eight-pound sample to contain no more than 139 plums and the two-pound subsample of the smallest plums to contain no more than 38 plums. This change would help to improve the size and maturity of the varieties not specifically regulated by size and thereby promote the availability of suitable quality fruit in the interest of producers and consumers.

These proposals would amend Subpart—Container and Pack Regulation (7 CFR 917.454; 50 FR 39073) by revising § 917.454 (a)(1), (a)(2), and (d) and Subpart—Grade and Size Regulation (7 CFR 917.460; 50 FR 27813) by revising § 917.460(a), deleting the provisions presently contained in § 917.460(b) and redesignating the present § 917.460(c) as § 917.460(b), adding and deleting certain varieties to Table I and adding a new column to Table I, revising the redesignated § 917.460(b), and adding a new paragraph and designating it § 917.460(c).

List of Subjects in 7 CFR Part 917

Marketing agreements and orders, Pears, Plums, and Peaches from California.

1. The authority citation for 7 CFR Part 917 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

PART 917—FRESH PEARS, PLUMS, AND PEACHES GROWN IN CALIFORNIA

2. Section 917.454 (a)(1), (a)(2), and (d) are proposed to be revised to read as follows:

Subpart—Container and Pack Regulation

§ 917.454 Plum Regulation 17.

(a) * * *

(1) Such plums, when shipped in closed packages or containers, except master containers of consumer packages and individual consumer packages therein, shall meet the following pack requirements as set forth below.

(i) All packages shall be tightly packed or well filled, according to the approved and recognized methods.

(ii) The plums in the top layer of any package shall be reasonably representative in quality and size of those in the remainder of the package.

(iii) Four-basked crates shall not be packed more than three layers deep. The arrangement of the bottom layer shall be one row less one way, and may be one row less each way than the arrangement of the top layer; the arrangement of the middle layer may be the same as the top layer, or may be one row less one way than the arrangement of the top layer. In the 3½—4x5 and 3½—4x4 packs the face of each half of the crate shall be packed as a unit, with no shim between the two baskets.

(2) The diameter of the smallest and largest plums in any individual pack or container shall not vary more than one-fourth (¼) inch, except that plums which are placed in volume-fill or tight-fill type containers and have a diameter of two and one-fourth (2¼) inches or larger shall not vary more than three-eights (⅜) inch. A total of not more than five (5) percent, by count, of the plums in any package or container may fail to meet this requirement.

* * * * *

(d) When used herein "diameter" shall have the same meaning as set forth in the U.S. Sandards for Grades of Fresh Plums and Prunes (7 CFR 51.1520 to 51.1538) and all other terms shall have the same meaning as when used in the amended marketing agreement and order. "No. 12B standard fruit box" measures 2⅝ to 7⅛x11½x16⅛ inches, "No. 22D standard lug box" measures 2⅞ to 7⅛x13½x16⅛ inches, "No. 22G standard lug box" measures 7⅜ to 7½x13¼x15⅞ inches. All dimensions are given in depth (inside dimensions) by width by length (outside dimensions).

3. Section 917.460 would be revised to read as follows:

Subpart—Grade and Size Regulation

§ 917.460 Plum Regulation 19.

(a) No handler shall ship any lot of packages or containers of any plums unless such plums grade at least U.S. No. 1, except that maturity shall be determined by the application of color standards by variety or such other tests as determined to be proper by the Federal-State Inspection Service. Internal discoloration not considered serious damage and healed growth cracks emanating from the step end which do not cause serious damage shall be permitted. In addition to the above, any lot of Tragedy or Kelsey plums shall be permitted and additional 10 percent tolerance for defects not considered serious damage.

(b) No handler shall ship any package or other container of any variety of plums listed in Column A of the following Table I unless such plums are of a size that an eight-pound sample, representative of the sizes of the plums in the package or container, contains not more than the number of plums listed for the variety in Column B of said table, and that a two pound subsample of the smallest plums in each eight pound sample contains not more than the number of plums listed for the variety in Column C of said table.

BILLING CODE 3410-02-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

Station Blackout

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission is proposing to amend its regulations to require that light-water-cooled nuclear power plants be capable of withstanding a total loss of alternating current (AC) electric power (called "station blackout") for a specified duration and maintaining reactor core cooling during that period. This proposed requirement is based on information developed under the Commission's study of Unresolved Safety Issue A–44, "Station Blackout." The proposed change is intended to provide further assurance that a station blackout (loss of both offsite power and onsite emergency AC power systems) will not adversely affect the public health and safety.

DATE: The comment period expires on June 19, 1986. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received before this date.

ADDRESSES: Send comments to: The Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch. Copies of comments received may be examined and copied for a fee at the NRC Public Document Room, 1717 H Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Alan Rubin, Division of Safety Review and Oversight, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: (301) 492–8303.

SUPPLEMENTARY INFORMATION: The alternating current (AC) electric power for essential and nonessential service in a nuclear power plant is supplied primarily by offsite power. Redundant onsite emergency AC power systems are also provided in the event that all offsite power sources are lost. These systems

VOL 51
ISS 55
MR 21
1986
UMI

provide power for various safety systems including reactor core decay heat removal and containment heat removal which are essential for preserving the integrity of the reactor core and the containment building, respectively. The reactor core decay heat can also be removed for a limited time period by safety systems that are independent of AC power.

The term "station blackout" means the loss of offsite AC power to the essential and nonessential electrical buses concurrent with turbine trip and the unavailability of the redundant onsite emergency AC power systems (e.g., as a result of units out of service for maintenance or repair, failure to start on demand, or failure to continue to run after start). If a station blackout persists for a sufficient time during which the capability of the AC-independent systems to remove decay heat is exceeded, core melt and containment failure could result.

The Commission's existing regulations establish requirements for the design and testing of onsite and offsite electric power systems that are intended to reduce the probability of losing all AC power to an acceptable level. (See General Design Criteria 17 and 18, 10 CFR Part 50, Appendix A.) The existing regulations do not require explicitly that nuclear power plants be designed to assure that the core can be cooled and the integrity of the reactor coolant pressure boundary can be maintained for any specified period of loss of all AC power.

As operating experience has accumulated, the concern has arisen that the reliability of both the onsite and offsite emergency AC power systems might be less than originally anticipated, even for designs that meet the requirements of General Design Criteria 17 and 18. Many operating plants have experienced a total loss of offsite power, and more occurrences can be expected in the future. Also, operating experience with onsite emergency power systems has included many instances when diesel generators failed to start. In a few cases, there has been a complete loss of both the offsite and the onsite AC power systems. During these events, AC power was restored in a short time without any serious consequences.

In 1975, the results of the Reactor Safety Study (WASH-1400) showed that station blackout could be an important contributor to the total risk from nuclear power plant accidents. Although this total risk was found to be small, the relative importance of the station blackout accident was established. Subsequently, the Commission designated the issue of station blackout as an Unresolved Safety Issue (USI); a Task Action Plan (TAP A-44) was issued in July 1980, and work was initiated to determine whether additional safety requirements were needed. Factors considered in the analysis of risk from station blackout included: (1) The likelihood and duration of the loss of offsite power; (2) the reliability of the onsite AC power system; and (3) the potential for severe accident sequences after a loss of all AC power, including consideration of the capability to remove core decay heat without AC power for a limited time period.

The technical findings of the staff's studies of the station blackout issue are presented in NUREG-1032, "Evaluation of Station Blackout Accidents at Nuclear Power Plants, Technical Findings Related to Unresolved Safety Issue A-44." [1] Additional information is provided in supporting contractor reports: NUREG/CR-3226, "Station Blackout Accident Analyses" published in May 1983; NUREG/CR-2989, "Reliability of Emergency AC Power System at Nuclear Power Plants" published in July 1983; and NUREG/CR-3992, "Collection and Evaluation of Complete and Partial Losses of Offsite Power at Nuclear Power Plants" published in February 1985.[2] The major results of these studies are given below.

- Losses of offsite power can be characterized as those resulting from plant-centered faults, utility grid blackout, and severe weather-induced failures of offsite power sources. Based on operating experience, the frequency of total losses of offsite power in operating nuclear power plants was found to be about one per 10 site-years. The median restoration time was about one-half hour, and 90 percent of the offsite power losses were restored in approximately 3 hours (NUREG/CR-3992).
- The review of a number of representative designs of onsite emergency AC power systems has indicated a variety of potentially important failure causes. However, no single improvement was identified that could result in a significant improvement in overall diesel generator reliability. Data obtained from operating experience show that the typical individual emergency diesel generator failure rate is about 2.5×10^{-2} per demand (i.e., one chance of failure in 40 demands), and that the emergency AC power system unavailability for a plant which has two emergency diesel generators, one of which is required for decay heat removal, is about 2×10^{-3} per demand (NUREG/CR-2989).
- Given the occurrence of a station blackout, the likelihood of resultant core damage or core melt is dependent on the reliability and capability of decay heat removal systems that are not dependent on AC power. If sufficient AC-independent capability exists, additional time will be available to restore AC power needed for long-term cooling (NUREG/CR-3226).
- It was determined by reviewing design, operational, and site-dependent factors that the expected frequency of core damage resulting from station blackout events could be maintained near or below 10^{-5} per reactor-year for any nuclear plant with readily achievable diesel generator reliabilities, provided that the plant is designed to cope with station blackout for a specified duration. The duration for a specific plant is based on a comparison of the plant's characteristics to those factors that have been identified as the main contributors to risk from station blackout (NUREG-1032).

As a result of the station blackout studies, improved guidance will be provided to licensees regarding maintaining minimum emergency diesel generator reliability to minimize the probability of losing all AC power. In addition, the Commission is proposing to amend its regulations by adding a new § 50.63 and by adding a new final paragraph to General Design Criterion 17, Appendix A of 10 CFR Part 50, to require that all nuclear power plants be capable of coping with a station blackout for some specified period of time. The period of time for specific plant would be determined based on the existing capability of the plant as well as a comparison of the individual plant design with factors that have been identified as the main contributors to risk of core melt resulting from station blackout.

These factors, which vary significantly from plant to plant because of considerable differences in design of plant electric power systems as well as site-specific considerations, include: (1) Redundancy of onsite emergency AC power sources (i.e., number of sources minus the number needed for decay heat removal (2) reliability of onsite emergency AC power sources (usually diesel generators), (3) frequency of loss of offsite power, and (4) probable time to restore offsite power. The frequency of loss of, and time to restore offsite power are related to grid and switchyard reliabilities, historical weather data for severe storms, and the availability of nearby alternate power sources (e.g., gas turbines). Experience has shown that long duration offsite power outages are caused primarily by severe storms (hurricanes, ice, snow, etc.).

The objective of the proposed rule is to reduce the risk of severe accidents resulting from station blackout by maintaining highly reliable AC electric power systems and, as additional defense-in-depth, assuring that plants can cope with a station blackout for some period of time. If the proposed rule is adopted, all licensees and applicants would be required to assess the capability of their plants to cope with a station blackout (i.e., determine the amount of time the plant can maintain core cooling and containment integrity with AC power unavailable), and to have procedures and training to cope with such an event. Plants would be required to be able to cope with a specified minimum duration station blackout selected on a plant-specific basis.

On the basis of station blackout studies conducted for USI A-44, and presented in the reports referenced above, the NRC staff has developed a draft regulatory guide entitled "Station Blackout,"[3] which presents guidance on (1) maintaining a high level of reliability for emergency diesel generators, (2) developing procedures and training to restore offsite and onsite emergency AC power should either one or both become unavailable, and (3) selecting a plant-specific minimum duration for station blackout capability to comply with the proposed amendment to General Design Criterion 17. Application of the methods in this guide would result in selection of a 4-hour or 8-hour station blackout duration, depending on the specific plant design and site-related characteristics. However, applicants and licensees could propose alternative methods to that specified in the regulatory guide in order to justify other minimum durations for station blackout capability.

If the proposed rule and regulatory guide are issued, those plants with an already low risk from station blackout would be required to withstand a station blackout for a relatively short period of time and probably would need few, if any, modifications as a result of the rule. Plants with currently higher risk from station blackout would be required to withstand somewhat longer duration blackouts. Depending on their existing capability, these plants might also need to make modifications (such as increasing station battery capacity or condensate storage tank capacity) in order to cope with the longer station blackout duration. The proposed rule would require licensees to develop, in consultation with the Office of Nuclear Reactor Regulation, proposed plant-specific schedules for implementation of any needed modifications.

Additional Comments by the Commission

The proposed rule does not require that a single failure be assumed concurrent with a station blackout because station blackout goes beyond the normal single failure criterion. That is, for a station blackout to occur, four AC power supplies must fail (two offsite sources and two safety-related onsite emergency AC sources). The staff's estimated probability of the concurrent failure of all four power supplies leads us to believe that the staff should give further consideration to upgrading to safety grade the plant modifications needed (if any) to meet the proposed rule. Upgrading to safety grade will further ensure appropriate licensee attention is paid to maintaining a high state of operability and reliability. The Commission believes that the question of quality classification of modifications should be addressed by interested parties in comments on the proposed rule.

In addition to comments on the merits of the proposed rule, the Commission specifically requests comments on whether the backfit analysis for this rule adequately implements the Backfit Rule, 10 CFR 50.109.

Additional Comments by Commissioners Roberts and Zech

We agree with soliciting public comments on the proposed rulemaking on station blackout. We will be interested in comments received and staff responses associated with analysis of cost benefit, value impact, and safety improvements and the station blackout standing on the overall risk (e.g., Is the reduction of risk only a small percentage of the overall risk or is it a major component of an already small risk?). This will be one of the first proposed rules to be evaluated by the NRC under its new backfitting requirements. We would be particularly interested in specific comments assessing whether or not this proposal meets the "substantial increase in the overall protection of the public health and safety . . ." threshold now required by the backfit rule.

Separate Views of Commissioner Asselstine

I support the proposed rulemaking but believe substantial additional safety improvements beyond those called for in this rulemaking are achievable and practicable. How to prevent and mitigate a station blackout event is one of the most significant unresolved safety issues associated with nuclear power plants. Extended station blackout can result in core meltdown and loss of containment integrity. Since existing mitigation features such as containment spray would be inoperable, a station blackout could result in a large release of radioactive material to the environment.

Countries abroad that have made a serious commitment to nuclear power and to nuclear safety have, or are planning, backfit features which markedly reduce station blackout risks. For example, the new French 1300 MWe nuclear power plants are designed with a goal of coping with a station blackout for at least 20 hours. According to the NRC staff, the design features that provide this capability (listed below) permit the plant to withstand a station blackout for three days.

- A steam-driven generator provides power for a small positive displacement pump that supplies cooling for reactor coolant pump (RCP) seals and also provides power for instrumentation and controls and control room lighting necessary to withstand a station blackout. This design feature, which is also being backfitted onto all operating 900 MWe nuclear plants in France, addresses two factors that impact the ability to cope with a station blackout—RCP seal cooling with AC power unavailable and battery depletion.
- Two turbine-driven auxiliary feedwater (AFW) pumps included in the 1300 MWE French design in addition to two motor-driven AFW pumps. Most

Free single copies of the draft regulatory guide may be obtained by writing to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Technical Information and Document Control.

VOL 51
ISS 55
MR 21
1986
UMI

U.S. pressurized water reactors have one turbine-driven AFW pump in addition to two-motor-driven pumps. Therefore, the French design provides additional redundancy in the AC-independent trains of the AFW system.

- Gravity feed back-up water supply from onsite sources to the condensate storage tank provides additional water for decay heat removal via the AFW system for long-duration station blackout events, i.e., up to three days.

This three-day station blackout capability would permit sufficient time to connect a mobile gas turbine generator to provide power if AC power could not be restored from other, preferred sources. A mobile gas turbine genertor is located at, or in the vicinity of, every nuclear power plant site in France. These improvements in safety are being achieved at not unreasonable costs and are being driven by the French goal of achieving a probability of one in ten million (10^{-7}) per reactor-year for a major event such as station blackout. The Commission's rule proposes much less. It proposes an objective of one in one hundred thousand (10^{-5}) per reactor-year for station blackout caused core meltdown and an objective of only about four hours coping capability.

I would appreciate comments on whether the NRC should require substantial improvements in safety with respect to station blackout, like those being accomplished in other countries, which can be achieved at reasonable cost and which go beyond those proposed in this rulemaking.

Finding of No Significant Environmental Impact: Availability

The Commission has determine under the National Environmental Policy Act of 1969, as amended, and the Commission's regulations in Subpart A of 10 CFR Part 51, that this rule, if adopted, would not be a major Federal action significantly affecting the quality of the human environment, and therefore an environmental impact statement is not required. There would not be any adverse environmental impacts as a result of the proposed rule for the following reasons: (1) There would be no additional radiological exposure to the general public or plant employees, and (2) plant shutdown is not required so there would be no additional environmental impacts as a result of the need for replacement power. The environmental assessment and finding of no significant impact on which this determination is based are available for inspection and copying for a fee at the NRC Public Document Room, 1717 H Street, NW, Washington, DC. Single copies of the environmental assessment and the finding of no significant impact are available from Mr. Warren Minners, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: (301) 492-7827.

Paperwork Reduction Act Statement

This proposed rule amends information collection requirements that are subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). This rule has been submitted to the Office of Management and Budget for review and approval of the paperwork requirements.

Regulatory Analysis

The Commission has prepared a regulatory analysis for this regulation. The analysis examines the costs and benefits of the rule as considered by the Commission. A copy of the regulatory analysis, NUREG-1109, For Comment, "Regulatory Analysis for the Resolution of Unresolved Safety Issue A-44, Station Blackout" (Published in January 1986), is available for inspection and copying for a fee at the NRC Public Document Room, 1717 H Street, NW, Washington, DC 20555. Free single copies of Draft NUREG-1109 may be obtained by writing to the Publication Services Section, Room P-130A, Division of Technical Information and Document Control, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

The Commission requests public comment on the regulatory analysis. Comments on the draft analysis may be submitted to the NRC as indicated under the ADDRESSES heading.

Regulatory Flexibility Certification

In accordance with the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission hereby certifies that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. This proposed rule specifies that nuclear power plants be able to withstand a total loss of AC power for a specified time duration and maintain reactor core cooling during that period. These facilities are licensed under the provisions of 10 CFR 50.21(b) and 10 CFR 50.22. The companies that own these facilities do not fall within the scope of "small entities" as set forth in the Regulatory Flexibility Act or the small business size standards set forth in regulations issued by the Small Business Administration in 13 CFR Part 121.

List of Subjects in 10 CFR Part 50

Antitrust, Classified information, Fire prevention, Incorporation by reference, Intergovernmental relations, Nuclear power plants and reactors, Penalty, Radiation protection, Reactor siting criteria, Reporting and recordkeeping requirements.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 553, the NRC is proposing to adopt the following amendments to 10 CFR Part 50.

PART 50—DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

1. The authority citation for Part 50 continues to read as follows:

Authority: Secs. 103, 104, 161, 182, 183, 186, 189, 68 Stat. 936, 937, 948, 953, 954, 955, 956, as amended, sec 234, 83 Stat. 1244, as amended (42 U.S.C. 2133, 2134, 2201, 2232, 2233, 2236, 2239, 2282); secs. 201, 202, 206, 88 Stat. 1242, 1244, 1246, as amended (42 U.S.C. 5841, 5842, 5846), unless otherwise noted.

Section 50.7 also issued under Pub. L. 95-601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Sections 50.57(d), 50.58, 50.91, and 50.92 also issued under Pub. L. 97-415, 96 Stat. 2071, 2073 (42 U.S.C. 2133, 2239). Section 50.78 also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Sections 50.80-50.81 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Sections 50.100-50.102 also issued under sec. 186, 68 Stat. 955 (42 U.S.C. 2236).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273), §§ 50.10(a), (b), and (c), 50.44, 50.46, 50.48, 50.54, and 50.80(a) are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); §§ 50.10(b) and (c) and 50.54 are issued under sec. 161i, 68 Stat. 949, as amended (42 U.S.C. 2201(i)); and §§ 50.55(e), 50.59(b), 50.70, 50.71, 50.72, 50.73, and 50.78 are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

2. In § 50.2, a definition of "station blackout" is added in the alphabetical sequence to read as follows:

§ 50.2 Definitions.

* * * * *

"Station blackout" means the complete loss of alternating current (AC) electric power to the essential and nonessential switchgear buses in a nuclear power plant (i.e., loss of the offsite electric power system concurrent with turbine trip and unavailability of the onsite emergency AC power system).

3. A new § 50.63 is added to read as follows:

§ 50.63 Loss of all alternating current power.

(a) *Requirements.* Each light-water-cooled nuclear power plant licensed to operate must be able to withstand and recover from a station blackout as defined in § 50.2 for a specified duration in accordance with the requirements in paragraph (e) of General Design Criterion 17 of Appendix A of this part.

(b) *Limitation of Scope.* Paragraphs (c) and (d) of this section do not apply to those plants licensed to operate prior to [insert the effective date of this amendment] if the capability to withstand station blackout was considered in the operating license proceeding and a specified duration was accepted as the licensing basis for the facility.

(c) *Implementation—Determination of Station Blackout Duration.* (1) For each light-water-cooled nuclear power plant licensed to operate on or before [insert the effective date of this amendment], the licensee shall submit to the Director of the Office of Nuclear Reactor Regulation by [insert a date 270 days after the effective date of this amendment]:

(i) A determination of the maximum duration for which the plant as currently designed is able to maintain core cooling and containment integrity in the event of a station blackout as defined in § 50.2;

(ii) A description of the procedures that have been established for station blackout events for the duration determined in paragraph (c)(1)(i) of this section and for recovery therefrom;

(iii) An identification of the factor(s) that limit the capability of the plant to cope with a station blackout for a longer time than that determined in paragraph (c)(1)(i) of this section;

(iv) A proposed station blackout duration to be used in determining compliance with paragraph (e) of General Design Criterion 17 of Appendix A of this part, including a justification for the selection based on—

(A) The redundancy of the onsite emergency AC power sources;

(B) The reliability of the onsite emergency AC power sources;

(C) The expected frequency of loss of offsite power; and

(D) The probable time needed to restore offsite power; and

(v) An identification of the factors, if any, that limit the capability of the plant to meet the requirements of Criterion 17 for the specified station blackout duration proposed in the response to paragraph (c)(1)(iv) of this section.

(2) After consideration of the information submitted in accordance with paragraph (c)(1) of this section, the Commission will notify the licensee of its determination of the specified station blackout duration to be used in determining compliance with General Design Criterion 17 of Appendix A of this part.

(d) *Implementation—Schedule for Implementing Equipment Modifications.* (1) For each light-water-cooled nuclear power plant licensed to operate on or before [insert the effective date of this amendment], the licensee shall, within 180 days of the notification provided in accordance with paragraph (c)(2) of this section, submit to the Director of the Office of Nuclear Reactor Regulation a schedule for implementing any equipment and procedure modifications necessary to meet the requirements of General Design Criterion 17 of Appendix A of this part. This submittal must include an explanation of the schedule and a justification if the schedule does not provide for completion of the modifications within two years of the notification provided in accordance with paragraph (c)(2) of this section.

(2) The licensee and the NRC staff shall mutually agree upon a final schedule for implementing modifications necessary to comply with the requirements of Criterion 17.

4. In Appendix A, General Design Criterion 17 is revised to read as follows.

Appendix A—General Design Criteria for Nuclear Power Plants

* * * * *

II. Protection by Multiple Fission Product Barriers

* * * * *

Criterion 17—Electric power systems. (a) An onsite electric power system and an offsite electric power system shall be provided to permit functioning of structures, systems, and components important to safety. The safety function for each system (assuming the other system is not functioning) shall be to provide sufficient capacity and capability to assure that (1) specified acceptable fuel design limits and design conditions of the reactor coolant pressure boundary are not exceeded as a result of anticipated operational occurrences and (2) the core is cooled and containment integrity and other vital functions are maintained in the event of postulated accidents.

(b) The onsite electric power supplies, including the batteries, and the onsite electric distribution system, shall have sufficient independence, redundancy, and testability to perform their safety functions assuming a single failure.

(c) Electric power from the transmission network to the onsite electric distribution system shall be supplied by two physically independent circuits (not necessarily on separate rights of way) designed and located so as to minimize to the extent practical the likelihood of their simultaneous failure under operating and postulated accident and environmental conditions. A switchyard common to both circuits is acceptable. Each of these circuits shall be designed to be available in sufficient time following a loss of all onsite alternating current power supplies and the other offsite electric power circuit, to assure that specified acceptable fuel design limits and design conditions of the reactor coolant pressure boundary are not exceeded. One of these circuits shall be designed to be available within a few seconds following a loss-of-coolant accident to assure that core cooling, containment integrity, and other vital safety functions are maintained.

(d) Provisions shall be included to minimize the probability of losing electric power from any of the remaining supplies as a result of, or coincident with, the loss of power generated by the nuclear power unit, the loss of power from the transmission network, or the loss of power from the onsite electric power supplies.

(e) The reactor core and associated coolant, control, and protection systems, including the station batteries, shall provide sufficient capacity and capability to assure that the core is cooled and containment integrity is maintained in the event of a station blackout (as defined in § 50.2) for a specified duration. The following factors shall be considered in specifying the station blackout duration: (1) the redundancy of the onsite emergency AC power sources, (2) the reliability of the onsite emergency AC power sources, (3) the expected frequency of loss of offsite power, and (4) the probable time needed to restore offsite power.

Dated at Washington, DC, this 17th day of March 1986.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,
Secretary of the Commission.

Backfit Analysis

Analysis and Determination That the Proposed Rulemaking To Amend 10 CFR 50 Concerning Station Blackout Complies With the Backfit Rule 10 CFR 50.109

The Commission's existing regulations establish requirements for the design and testing of onsite and offsite electric power systems (10 CFR Part 50, Appendix A, General Design Criteria 17 and 18). However, as operating experience has accumulated, the concern has arisen regarding the reliability of both the offsite and onsite emergency AC power systems. These systems provide power for various safety systems including reactor core decay heat removal and containment heat removal which are essential for preserving the integrity of the reactor core and the containment building, respectively. In numerous instances emergency diesel generators have failed to start and run during tests conducted at operating plants. In addition, a

VOL 51 ISS 55 MR 21 1986 UMI

number of operating plants have experienced a total loss of offsite electric power, and more such occurrences are expected. Existing regulations do not require explicitly that nuclear power plants be designed to withstand the loss of all AC power for any specified period.

This issue has been studied by the staff as part of Unresolved Safety Issue (USI) A–44, "Station Blackout." Both deterministic and probabilistic analyses were performed to determine the timing and consequences of various accident sequences and to identify the dominant factors affecting the likelihood of core melt accidents from station blackout. These studies indicate that station blackout can be a significant contributor to the overall plant risk. Consequently, the Commission is proposing to amend its regulations to require that plants be capable of withstanding a total loss of AC power for a specified duration and to maintain reactor core cooling during that period.

An analysis of the benefits and costs of implementing the proposed station blackout rule is presented in NUREG–1109, Draft Report For Comment, "Regulatory Analysis for the Resolution of Unresolved Safety Issue A–44, Station Blackout." [4] The benefit from implementing the proposed rule is a reduction in the frequency of core melt per reactor-year due to station blackout and the associated risk of offsite radioactive releases. The risk reduction for 67 operating reactors is estimated to be 80,000 person-rems.[5]

The cost for licensees to comply with the proposed backfit would vary depending on the existing capability of each plant to cope with a station blackout, as well as the specified station blackout duration for that plant. The costs would be primarily for licensees to develop procedures, to improve diesel generator reliability if the reliability falls below certain levels, and to retrofit plants with additional components or systems, as necessary, to meet the proposed requirements.

The estimated total cost for 67 operating reactors to comply with the proposed resolution of USI A–44 is about $40 million. The average cost per reactor would be around $600,000 ranging from $200,000 if only a station blackout assessment and procedures and training are necessary, to a maximum of about $4 million if substantial modifications are needed, including requalification of a diesel generator.

The overall value-impact ratio, not including accident avoidance costs, is about 2,000 person-rems averted per million dollars. If cost savings to industry from accident avoidance (i.e., cleanup and repair of onsite damages and replacement power) were included, the overall value-impact ratio would improve significantly to about 8,000 person-rems averted per million dollars.

This analysis supports a determination that a substantial increase in the protection of the public health and safety will be derived from the backfit in the proposed station blackout rule, and that the backfit is justified in view of the direct and indirect costs of implementing the proposed rule.

The quantitative value-impact analysis discussed above was one of the factors considered in evaluating the proposed rule, but other factors also played a part in the decision-making process. Probabilistic risk assessment (PRA) studies performed for this USI, as well as some plant-specific PRAs, have shown that station blackout can be a significant contributor to core melt frequency, and, with consideration of containment failure, station blackout events can represent an important contributor to reactor risk. In general, active containment systems required for heat removal, pressure suppression, and radioactivity removal from the containment atmosphere following an accident are unavailable during a station blackout. Therefore, the offsite risk is higher from a core melt resulting from station blackout than it is from many other accident scenarios.

Although there are licensing requirements for guidance directed at providing reliable offsite and onsite AC power, experience has shown that there are practical limitations in ensuring the reliability of offsite and onsite emergency AC power systems. Potential vulnerabilities to common cause failures associated with design, operational and environmental factors can affect AC power system reliability. For example, if potential common cause failures of emergency diesel generators exist (e.g., in service-water or DC power support systems), then the estimated core damage frequency from station blackout events can increase significantly.

The estimated frequency of core damage from station blackout events is directly proportional to the frequency of the initiating event. Estimates of station blackout frequencies for this USI were based on actual operational experience. This is assumed to be a realistic indicator of future performance. An argument can be made that the future performance will be better than the past. For example, when problems with the offsite power grid arise, they are fixed, and therefore, grid reliability should improve. On the other hand, grid power failures may become more frequent because fewer plants are being built, and more power is being transmitted between regions, thus placing greater stress on transmission lines.

A number of foreign countries, including France, Britain, Sweden, Germany and Belgium, have taken steps to reduce the risk from station blackout events. These steps include adding design features to enhance the capability of the plant to cope with a station blackout for a substantial period of time, and/or adding redundant and diverse emergency AC power sources.

The factors discussed above support the determination that additional defense in depth provided by the ability of a plant to cope with station blackout for a specific duration is warranted. The Commission has considered how this backfit should be prioritized and scheduled in light of other regulatory activities ongoing at operating nuclear power plants. Station blackout warrants a high priority ranking based on both its status as an "unresolved safety issue" and the results and conclusions reached in resolving this issue. As noted in the implementation section of the proposed rule (§ 50.63(d)), the schedule for equipment modification (if needed to meet the requirements of the proposed rule) shall be mutually agreed upon by the licensee and NRC. Modifications that cannot be scheduled for completion within two years after NRC accepts the licensee's specified station blackout duration must be justified by the licensee.

Analysis of 50.109(c) Factors

1. Statement of the specific objectives that the proposed backfit is designed to achieve.

The NRC staff has completed a review and evaluation of information developed over the past 5 years on Unresolved Safety Issue (USI) A–44, Station blackout. As a result of these efforts, the NRC is proposing to amend 10 CFR Part 50, by the introduction of new § 50.63, "Station Blackout," and an additional paragraph to General Design Criterion 17, "Electric Power Systems" in Appendix A.

The objective of the proposed rule is to reduce the risk of severe accidents associated with station blackout by making station blackout a relatively small contributor to total core melt frequency. Specifically, the proposed rule would require all light-water-cooled nuclear power plants to be able to cope with a station blackout for a specified duration, and to have procedures and training for such an event. A draft Regulatory Guide, to be issued along with the proposed rule, would provide an acceptable method to determine the station blackout duration for each plant. The duration would be determined for each plant based on a comparison of the individual plant design with factors that have been identified as the main contributors to risk of core melt resulting from station blackout. These factors are: (1) The redundancy of onsite emergency AC power sources, (2) the reliability of onsite emergency AC power sources, (3) the frequency of loss of offsite power and (4) the probable time needed to restore offsite power.

2. General description of the activity that would be required by the licensee or applicant in order to complete the backfit.

In order to assure that each nuclear power plant is able to withstand and recover from a station blackout for a specified minimum duration, licensees would be required to assess their plants' capability to withstand and recover from a station blackout. This evaluation would include:

- Verifying the adequacy of station battery power, condensate storage tank capacity, and plant/instrument air for the station blackout duration.
- Verifying adequate reactor coolant pump seal integrity for the station blackout duration so that seal leakage due to lack of seal cooling would not result in a sufficient primary system coolant inventory reduction to lose the ability to cool the core.
- Verifying operability of equipment needed to operate during a station blackout for environmental conditions associated with total loss of AC power (i.e., loss of heating, ventilation and air conditioning).

Depending on the plant's existing capability to cope with a station blackout, licensees may or may not need to backfit hardware modifications (e.g., adding battery capacity) to comply with the proposed rule. (See item 8 for additional discussion.) Licensees would be required to have procedures and training to cope with and recover from a station blackout.

3. Potential change in the risk to the public from the accidental off-site release of radioactive material.

Based on an analysis of potential consequences presented in Section 4 of NUREG–1109, if the proposed rule were implemented, the estimated total risk reduction to the public from 67 operating reactors is 80,000 person-rem.

4. Potential impact on radiological exposure of facility employees.

For 67 operating reactors, the estimated total reduction in occupational exposure resulting from reduced core melt frequencies and associated post-accident cleanup and repair activities is 2,000 person-rem (Table 8 in NUREG–1109). No increase in occupational exposure is expected from operation and maintenance or implementing the proposed rule. Equipment additions and modifications contemplated do not require work in and around the reactor coolant system and therefore would not be expected to result in significant radiation exposure (Table 8 in NUREG–1109).

5. Installation and continuing costs associated with the backfit, including the cost of facility downtime or the cost of construction delay.

For 67 operating reactors, the total estimated cost for assessing the station blackout coping capability, procedures and training, installation of hardware backfits (if necessary), plant downtime, and operation and maintenance is $40 million. (See Tables 6 and 8 in NUREG–1109).

6. The potential safety impact of changes in plant or operational complexity, including the relationship to proposed and existing regulatory requirements.

The proposed rule for plants to be able to cope with a station blackout should not add to plant or operational complexity. The relationship between the proposed station blackout rule and proposed and existing regulatory requirements is discussed in Section 4.2 of NUREG–1109. This discussion includes the following NRC generic programs:

- Generic Issue B–56 "Proposed Actions for Enhancing Reliability of Diesel Generators at Operating Plants,"
- Generic Issue 23, "Reactor Coolant Pump Seal Failures,"
- USI A–45, "Shutdown Decay Heat Removal Requirements,"
- Generic Issue A–30, "Adequacy of Safety-Related DC Power Supply."

7. The estimated resource burden on the NRC associated with the proposed backfit and the availability of such resources.

For 67 operating reactors, the estimated total cost for NRC review of industry submittals required by the proposed rule is $500,000 (based on an estimated average of 120 person-hours per reactor; see Table 8 in NUREG–1109).

8. The potential impact of differences in facility type, design or age on the relevancy and practicality of the proposed backfit.

The proposed rule applies to all pressurized water reactors and boiling water reactors. However, in determining the specific minimim station blackout coping capability for each plant, differences in plant design (e.g., number of emergency generators) and the reliability of the offsite and onsite emergency AC power systems could result in different coping capabilities. For example, plants with an already low risk from station blackout would be required to withstand a station blackout for a relatively short period of time; and few, if any, hardware backfits would be required as a result of the proposed rule. Plants with currently higher risk from station blackout would be required to withstand somewhat longer duration blackouts; and, depending on their existing capability, may need some modifications to achieve the longer station blackout capability.

9. Whether the proposed backfit is interim or final and, if interim, the justification for imposing the proposed backfit on an interim basis.

The proposed rule is a final resolution of USI A–44; it is not an interim measure.

[4] Draft NUREG–1109 was issued for public comment in January 1986. Copies of this report are available for inspection and copying for a fee at the NRC Public Document Room, 1717 H Street, NW., Washington, DC 20555. Free single copies of Draft NUREG–1109 may be obtained by writing to the Publication Services Section, Room P–1030A, Division of Technical Information and Document Control, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

[5] The value-impact analysis in NUREG–1109 was based on plant-specific information for a total of 67 reactors. Although there are currently about 100 operating reactors, the overall value-impact ratio in NUREG–1109 would not change significantly because of the increase in the number of operating plants.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 801 0097]

Max Factor & Co.; Proposed consent agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed Consent Agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require, among other things, a Stamford, Conn. cosmetics company to make promotional allowances available on proportionally equal terms to all of its customers, and in particular, to make alternatives, such as handbills or other in-store promotional activities, available to customers for whom its basic promotional plans are not usable or economically feasible. Respondent would be required to notify all its customers that the promotional payments and alternatives are available.

DATE: Comments will be received until May 20, 1986.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th St. and Pennsylvania Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Paul W. Turley, Director, Los Angeles Regional Office, Federal Trade Commission, 11000 Wilshire Blvd., Los Angeles, CA 90024, (213) 209–7890.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

Before Federal Trade Commission

[File No. 801 0007]

Agreement Containing Consent, Order To Cease and Desist

In the Matter of Max Factor & Co., a corporation.

The Federal Trade Commission having initiated an investigation of certain acts and practices of Max Factor & Co., a corporation, and it now appearing that Max Factor & Co., hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated,

It is hereby agreed by and between Max Factor & Co., by its duly authorized officer and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent Max Factor & Co. is a corporation organized, existing, and doing business under and by virtue of the laws of the State of Delaware, with its office and principal place of business located at 50 Gatehouse Road, Stamford, Connecticut 06902.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) All rights under the Equal Access to Justice Act.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information with respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public with respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

It is ordered that for the purposes of this order, the following definitions shall apply:

A. the term "cosmetic products" shall mean cosmetics, fragrances, toiletries, and beauty aids.

B. The term "respondent's cosmetic products" shall include (a) all cosmetic products advertised, offered for sale, sold, or distributed by respondent; (b) all cosmetic products bearing any of respondent's trademarks that are advertised, offered for sale, sold, or distributed by respondent's corporate parent or a division or subsidiary of such parent; and (c) all cosmetic products advertised, offered for sale, sold, or distributed by respondent's corporate parent or a division or subsidiary of such parent as part of a program in which cosmetic products bearing any of respondent's trademarks are also advertised, offered for sale, sold, or distributed.

II

A. It is further ordered that respondent Max Factor & Co., a corporation, and its officers, directors, agents, representatives, and employees, and its successors and assigns, directly or indirectly or through any corporation, subsidiary, division or other device, shall cease and desist from paying or contracting to pay to or for the benefit of any customer anything of value as compensation or in consideration for advertising or promotional services or facilities furnished by or through such customer in connection with the advertising, offering for sale, sale, or distribution of respondent's cosmetic products in or affecting commerce, as "commerce" is defined in the Clayton Act, as amended, or the Federal Trade Commission Act, as amended, unless:

1. Respondent makes such compensation or consideration available on proportionally equal terms for alternative services or facilities that are usable and economically feasible; for all customers who compete in the distribution or resale of respondent's cosmetic products and for whom respondent's basic promotional plans are not usable or economically feasible; provided that with respect to respondent's cooperative advertising and drive plans, such alternative services or facilities may include handbills and circulars in amounts not less than 1,000, or other in-store promotional activities acceptable to respondent; and

2. All customers who compete in the distribution or resale of respondent's cosmetic products are informed in the manner provided in Paragraph II.B. of this order of the availability of such compensation or consideration.

B. It is further ordered that respondent shall inform those retailers who purchase respondent's cosmetic products, including retailers who do not purchase directly from respondent, of the availability of its promotional plans, as required by Paragraph II.A. of this order, as follows:

1. Respondent shall imprint on the smallest shipping container used for respondent's cosmetic products the legend, "Promotional allowances are periodically made available by Max Factor & Co. to all retailers. To obtain information about these promotional opportunities contact your Sales Representative or call [Mary O'Brian at our Headquarters office (212) 856–6664]"; and

2. For each promotion respondent shall cause copies of "offer letters" or similar materials explaining the availability of alternative methods of participation in respondent's advertising or promotional program or plan to be supplied to all direct purchasing retailers, and to its wholesalers or distributors in sufficient quantity for presentation or delivery by such wholesalers or distributors to each customer of such wholesaler or distributor, and shall request such wholesalers and distributors to present or deliver such materials to such customers.

C. Provided, however, that nothing herein contained shall be construed or interpreted to abridge or otherwise restrict respondent's entitlement to avail itself of the "Meeting Competition Defense," the provisions of which are contained in section 2(b) of the Clayton Act, 15 U.S.C. 13(b), as amended.

III

It is further ordered that respondent shall deliver, within thirty (30) days of the date of service upon it of this order, a copy of this order to all current sales management and sales personnel who are engaged in the sale of any of respondent's cosmetic products within the United States, and shall for a period of five (5) years thereafter deliver a copy of this order to all such future sales management and sales personnel within thirty (30) days of their employment in such positions.

IV

It is further ordered that respondent shall, within sixty (60) days after the date of service upon it of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order.

V

It is further ordered that respondent shall notify the Commission at least thirty (30) days prior to any proposed change in the respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries doing business in the United States, or any other change in respondent that may affect compliance obligations arising out of the order.

Analysis of Proposed Consent Order To Aid Public Comment

[File No. 801 0097]

The Federal Trade Commission has accepted an agreement to a proposed consent order from Max Factor & Co.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The compliant in this matter alleges that Max Factor & Co. violated section 5 of the Federal Trade Commission Act, as amended, and section 2(d) of the Clayton Act, as amended, by paying discriminatory promotional allowances to some of its customers in connection with the sale of its cosmetic products. In granting promotional allowances, respondent allegedly discriminated against particular customers in that it did not make such promotional allowances functionally available, on proportionally equal terms, to all customers competing in the sale and distribution of respondent's cosmetic products. Respondent allegedly failed to offer alternative terms and conditions to customers for whom its basic promotional allowances were not usable and suitable.

The proposed consent order requires that Max Factor & Co. cease and desist from paying promotional allowances to any customer, unless respondent provides functionally available alternatives for customers that cannot take advantage of its regular promotional programs.

The proposed consent order specifies that with respect to respondent's cooperative advertising and drive plans, such alternative services or facilities may include handbills and circulars in amounts not less than 1,000, or other in-store promotional activities acceptable to respondent.

The proposed consent order requires that respondent notify its competing customers of the availability of promotional payments in two ways. First, notice of the general availability of the promotional payments and how to obtain further information must be imprinted on respondent's shipping containers. Second, for each promotion, respondent must cause copies of materials explaining the availability of alternative methods of participation in respondent's promotional program to be

VOL 51
ISS 55
MR 21
1986
UMI

supplied to all direct purchasing retailers and to its wholesalers for presentation to each of its indirect customers.

The proposed consent order explicitly preserves for respondent the availability of the "Meeting Competition Defense," contained in section 2(b) of the Clayton Act, as amended.

Additionally, the proposed consent order requires that respondent provide copies of the order to sales personnel, that respondent file a compliance report with the Commission within sixty days after service upon it of the order, and that respondent notify the Commission of certain corporate reorganizations thirty days prior to each such proposed change.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Emily H. Rock,
Secretary.

BILLING CODE 6750-01-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 230

[Release No. 33-6630; IC-14984; S7-8-86]

Disclosure of Security Ratings by Money Market Funds

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Commission is publishing for comment three proposed rule amendments under the Securities Act of 1933 regarding the voluntary disclosure of ratings assigned by nationally recognized statistical rating organizations to money market funds. The Commission also is publishing a proposed staff guideline regarding disclosures that should be made when security ratings assigned to money market funds are used in Form N-1A, the simplified registration statement for mutual funds. The rule amendments, if adopted, would facilitate the use of money market fund ratings in the statutory and omitting prospectuses and tombstone ads of money market funds.

DATE: Comments on the proposed rule amendments must be received on or before May 16, 1986.

ADDRESS: Three copies of all comments should be submitted to John Wheeler, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comments letters should refer to File No. S7-8-86. All comments received will be available for public inspection in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549.

FOR FURTHER INFORMATION CONTACT: Jay Gould, Staff Attorney (202) 272-2107, Securities and Exchange Commission, Division of Investment Management, 450 Fifth Street, NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Commission today is publishing for comment proposed amendments to rules under the Securities Act of 1933 ("Securities Act") [15 U.S.C. 77a *et seq.*] to facilitate the use in money market fund prospectuses and certain advertisements of ratings assigned by nationally recognized statistical rating organizations ("NRSROs").[1] The proposal consists of three rule changes. The first would amend subparagraph (g) of Rule 436 under the Securities Act [17 CFR 230.436(g)] to provide that a rating assigned to a money market fund by an NRSRO is not part of a registration statement, report, or valuation prepared or certified by a person within the meaning of sections 7 and 11 of the Securities Act [15 U.S.C. 77g and 77k]. The second revision would amend Rule 134(a)(14)(i) under the Securities Act [17 CFR 230.134] to permit the disclosure of and set conditions on the use of ratings assigned to a money market fund by an NRSRO in certain communications deemed not to be a prospectus ("tombstone ads"). The third change would amend Rule 482 [17 CFR 230.482] by adding a new paragraph (e) to permit the disclosure of and set conditions on the use of money market fund ratings in certain investment company advertisements which satisfy the conditions of section 10(b) [15 U.S.C. 77j(b)] of the Securities Act ("omitting prospectuses"). If adopted, these proposed amendments would (i) eliminate the requirement of section 7 of the Securities Act that a money market fund file with its registration statement the consent of any NRSRO issuing a money market fund rating when the rating is used in the fund's prospectus; (ii) exempt from civil liability under section 11 the NRSRO issuing the rating if the rating is included in a money market fund prospectus;[2] and (iii) facilitate the use by a money market fund of an NRSRO rating in its statutory and omitting prospectuses and tombstone ads, subject to certain conditions.

While the proposed rule changes would be limited to ratings of money market fund securities, the Commission is requesting comment on whether similar changes should be considered for NRSRO ratings assigned to securities issued by unit investment trusts and other types of investment companies and, if so, under what conditions.

I. Background

A. Prior Commission Action

In 1982, the Commission amended Rule 436 to provide that a rating assigned to a class of debt securities, convertible debt securities, or class of preferred stock by an NRSRO would not be deemed part of a registration statement prepared or certified by a person within the meaning of sections 7 and 11 of the Securities Act. The effect of the action was to exempt issuers of the designated securities from obtaining consents under section 7 and exempt NRSROs from section 11 liabiity, where a rating of those securities is included in a Securities Act registration statement. The Commission took this action, in part, due to the practical problem of registrant's obtaining consents from the NRSROs to use the ratings in registration statements and the recognition that NRSROs, irrespective of consents, are subject to the antifraud provisions of the federal securities laws. The Commission also amended Rule 134 to permit issuers of debt and preferred stock to use their ratings in tombstone ads.

The Commission's 1982 action did not extend to equity securities other than preferred stock. Therefore, because money market fund shares are equity securities, a money market fund which has received an NRSRO rating must obtain the consent of the NRSRO or seek a waiver of consent under Rule 437 [17 CFR 230.437][3] before using the rating in its registration statement. Beginning in 1984, a number of money market funds obtained NRSRO ratings of their securities. These funds have been precluded from using these ratings in their registration statements filed under the Securities Act because of the refusal of the NRSRO assigning the ratings, based on concerns over the effect of Section 7[4] and section 11[5] of the Securities Act, to consent to the use of the ratings in this manner. Money market funds may, however, use their rating in certain types of sales literature, without consent, so long as the sales literature is preceded or accompanied by a statutory prospectus. They may not use their ratings in tombstone ads, though, because the Commission's 1982 revision of Rule 134 did not apply to equity securities other than preferred stock.

B. Money Market Fund Ratings

A money market fund rating purports to evaluate the safety of principal invested in a money market fund. Like ratings assigned to classes of debt securities, convertible debt securities, and preferred securities, a money market fund rating uses an alphabetical designation to indicate the NRSRO's assessment of the fund's relative degree of investment safety. One NRSRO, which provides rating of money market funds, has advised the Commission's staff that it typically considers a wide variety of factors in formulating a rating for a money market fund. These include management philosophy, operating policies and procedures; credit risk, including the types and diversity of portfolio investments; and market price exposure, specifically the degree of liquidity of investments, distribution and average length of maturities, and volatility of portfolio cash flows. The rating purports to summarize these factors and indicate the NRSRO's assessment of the fund's overall investment safety.[6]

The Commission believes that the information provided by a money market fund rating may be of interest to investors. Currently, investors are able to compare money market funds primarily on the basis of yield calculations disclosed in fund prospectuses and advertising and reported in news publications. In determining whether to invest in a particular fund, an investor also may wish to consider other factors such as preservation of capital, risk preference and management policies.[7] A money market fund rating could provide a convenient means of conveying additional information to investors in these areas. To date, relatively few money market funds have obtained ratings. Under current Securities Act requirements, funds may not use NRSRO ratings in statutory and omitting prospectuses without obtaining NRSRO expert consent, although they may use them in sales literature that is accompanied, or preceded, by a statutory prospectus. Because current requirements limit the ability of money market funds to use these ratings in prospectuses and advertising, they may operate as an impediment to funds seeking these ratings. Accordingly, the Commission believes it appropriate to consider providing money market funds greater flexibility in the disclosure of NRSRO ratings assigned to their shares.

The Commission wishes to emphasize that none of the proposed rule amendments, if adopted, would require the use of money market fund ratings. Each money market fund would be responsible for deciding whether to obtain a rating and, once obtained, whether to disclose it.[8] However, as stated in the proposed new guideline for Form N-1A and in the proposed revisions to Rules 134 and 482, a money market fund disclosing a rating in its statutory or omitting prospectus or tombstone ad must disclose the most recent rating and disclose any other rating assigned by an NRSRO and intended for public dissemination which differs materially from the one initially disclosed.

II. Proposed Rule Amendments

A. Rating Organization Consent

The proposed amendment to Rule 436(g) would provide that a rating assigned to a money market fund by an NRSRO[9] will not be considered part of a registration statement, report or valuation prepared or certified by a person within the meaning of sections 7 and 11 of the Securities Act. This proposal would, if adopted, exempt money market funds from the section 7 requirement of filing the consent of the NRSRO assigning the rating to their securities and exempt the NRSRO from civil liability as an expert under section 11 for use of the rating in that situation.

The Commission believes that exempting money market funds from the consent requirement of section 7 and NRSROs from the civil liability provisions of section 11 is a logical extension of the Commission's action in 1982 adopting Rule 436(g) and providing similar relief to issuers and NRSROs in connection with debt securities, convertible debt securities and preferred stock.[10] The proposed change should facilitate the use of money market fund ratings in registration statements and provide money market funds with greater flexibility in the disclosure

---

[1] The term "nationally recognized statistical rating organization" as used in existing Rules 134 and 436(g) and the proposed revisions to these rules and Rule 482 would have the same meaning as in the Commission's uniform net capital rule [17 CFR 240.15c3-1(c)(2)(vi)(F)]. Currently, the following organizations are considered NRSROs under the net capital rule: Duff and Phelps, Inc.; Fitch Investors Services, Inc.; Moodys Investors Services, Inc.; McCarthy, Crisanti & Maffei; and Standard & Poors Corporation. The Commission's Division of Market Regulation responds to requests for NRSRO designation through no-action letters.

[2] The NRSRO would continue to be subject the antifraud provisions of the federal securities laws. *See* section 17(a) of the Securities Act [15 U.S.C. 77q(a)]; section 10(b) of the Securities Exchange Act of 1934 ("Exchange Act") [15 U.S.C. 78j(b)] and Rule 10b-5 thereunder [17 CFR 240.10b-5]; an NRSRO which was registered as an investment adviser or subject to regulation under the Investment Advisers Act of 1940 also would be subject to section 206 of the Investment Advisers Act of 1940 [15 U.S.C. 80b-6].

[3] Rule 437 under the Securities Act sets up a procedure for the Commission, upon application by a registrant, to dispense with the written consent required by section 7.

[4] Section 7 [15 U.S.C. 77g] provides in part "[i]f any accountant, engineer, or appraiser, or any person whose profession gives authority to a statement made by him, is named as having prepared or certified a report or valuation for use in connection with the registration statement, the written consent of such person shall be filed with the registration statement. If any such person is named as having prepared or certified a report or valuation (other than a public official document or statement) which is used in connection with the registration statement but is not named as having prepared or certified such report or valuation for use in connection with the registration statement, the written consent of such person shall be filed with the registration statement unless the Commission dispenses with such filing as impracticable or as involving undue hardship on the person filing the registration statement."

[5] Section 11(a) [15 U.S.C. 77k(a)] provides in part that "[i]n case any part of the registration statement, when such part became effective, contained an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary to make the statements therein not misleading, any person acquiring such security (unless it is proved that at the time of such acquisition he knew of such untruth or omission) may, either at law or in equity, in any court of competent jurisdiction, sue [five separate categories of persons]." Section 11(a)(4) subjects to liability "every accountant, engineer, or appraiser, or any person whose profession gives authority to a statement made by him, who has with his consent been named as having prepared or certified any part of the registration statement, or as having prepared or certified any report or valuation which is used in connection with the registration statement, with respect to the statement in such registration statement, report, or valuation, which purports to have been prepared or certified by him."

[6] This NRSRO uses four categories of ratings ranging from AAm (indicating a fund where it believes safety is excellent and there is superior capacity to maintain principal value and limit exposure to loss) to Bm (indicating a fund where the NRSRO believes safety is uncertain and there is limited capacity to maintain principal value and limit exposure to loss.)

[7] For example, a money market fund with a lower yield than other funds may have arrived at this yield through a more conservative investment strategy. Disclosure of the fund's rating in its prospectus could assist the investor in evaluating the appropriateness of investing in that fund relative to others.

[8] As discussed below, the Commission is seeking comment on whether the cost of obtaining a rating would be paid by the fund, or another person such as its principal underwriter or adviser.

[9] Organizations other than NRSROs which provide ratings would continue to be required to provide consents under section 7 and would be subject to section 11 of the Securities Act.

[10] Although this proposal would extend the 1982 action to a type of equity security, securities issued by money market funds are merely equity interests in a pool of debt securities and their NRSRO ratings are based primarily on the NRSRO's assessment of these debt securities.

process without impairing investor protection. NRSROs are now, and will continue to be, subject to the antifraud provisions of the securities laws.[11] Adopting the proposed amendments to Rules 134, 436, and 482 will not alter the applicability of the antifraud provisions to NRSROs.

B. Tombstone Ads

Subparagraph (14) of Rule 134(a) would be amended to permit a tombstone ad to include a money market fund rating (or ratings) and the name or names of the NRSRO(s) assigning the rating or ratings. As in the case of Rule 436(g), the term "Nationally recognized statistical rating organization" would be defined by reference to the uniform net capital rule under the Exchange Act. To ensure that investors adequately understand the meaning of ratings used in tombstone ads, the proposed amendment to Rule 134(a) provides that the ad, if it includes any money market fund rating, must include the date of any rating and all other currently available NRSRO ratings intended for public dissemination which materially differ from one another and the name (or names) of the person(s) assigning such ratings. To ensure the currency of any advertised NRSRO money market fund rating, the rule would require that the most recent rating assigned by a NRSRO be used.

C. Omitting Prospectus

Money market funds frequently advertise their securities through the use of omitting prospectuses under Rule 482. Advertisements relying on Rule 482 may contain only information the substance of which is included in the statutory or section 10(a) [15 U.S.C. 77j(a)] prospectus. Because money market funds disclosing their ratings in their registration statements may seek to advertise the rating in a Rule 482 advertisement, the Commission proposes to amend Rule 482 under the Securities Act to indicate the conditions under which it would be permissible to use a money market fund rating in an omitting prospectus. The conditions follow those developed in proposed Guide 34 for use in Form N–1A (discussed below), but have been streamlined to accommodate the abbreviated nature of many omitting prospectuses.

III. Staff Position on the Use of Exempt Money Market Fund Ratings

In connection with the proposed amendments to Rules 134, 436(g), and 482, the Commission is publishing a proposed new guide—Guide 34—to the staff "Guidelines for Form N–1A." The proposed guideline represents the staff's interpretation on the appropriate disclosure of money market fund ratings in registration statements. The guideline generally follows Regulation S–K [17 CFR 229.10], which sets forth the Commission's basic policy on the use of security ratings of debt securities, convertible debt securities, and preferred securities in Commission filings. Guide 34 differs in some respects from Regulation S–K to accommodate the unique nature of money market funds and the ratings of their securities. While Regulation S–K advises registrants to consider disclosure of certain matters, Guide 34 calls for information which, in the staff's view, must be disclosed if a money market fund rating is to be used in Form N–1A, *e.g.*, the nature of a money market fund rating, material changes in a rating, the date of the rating, the availability of materially different ratings, a decision to discontinue a rating, and related matters. The staff considers the disclosures mandatory because the securities of a money market fund are typically highly liquid, short term, and subject to rapid turnover—factors which could cause a given rating to become quickly outdated.[12]

IV. Cost/Benefit of Proposed Action

Because the proposed rule amendments would make the use of securities ratings optional, the proposal would not impose any costs on money market funds except those associated with the required disclosure about the ratings, which would appear to be minimal. Only where it was decided that the use of a rating would be economically beneficial would the cost of obtaining and maintaining a rating be incurred. Presently, because NRSROs will not consent to expert status as to money market fund ratings, funds may use these ratings only in sales literature which accompanies, or is preceded by, a statutory prospectus. The proposed rule revisions would facilitate the use of ratings in statutory and omitting prospectuses, and in advertising materials such as tombstone ads not accompanied by a statutory prospectus, and would thus reduce the cost to funds of making their ratings known. The Commission believes that, in addition to providing greater flexibility to funds in the use of these ratings, the proposal benefits those investors who find the ratings useful in making investment decisions. The Commission requests specific comment on its assessment of the costs and benefits associated with the proposal, including specific estimates of any costs and benefits perceived by commentators.

V. Other Matters

A. Ratings of Other Types of Investment Company Securities

NRSROs have assigned ratings to the units of unit investment trusts, particularly units of insured unit investment trusts. The Commission understands that NRSROs have provided consents under section 7 to use of ratings of insured unit investment trusts and the ratings routinely have been included in unit investment trust registration statements and omitting prospectuses. Nevertheless, the Commission requests comment on whether, and under what conditions, it should consider relief with respect to unit investment trusts and other investment company ratings similar to that being proposed for money market funds.

B. Currency of Ratings

The Commission requests comment on the registration statement updating that would be required by the proposed guideline to ensure that material information about ratings is disclosed. The Commission is concerned that money market funds not be permitted to use outdated ratings, given the liquid, short term nature of their portfolios. For this reason the proposal would require that only the most recent rating assigned by each NRSRO could be used in the fund's prospectus and advertising, and that prospectus disclosure be made of any rating change, including a decision by the fund to no longer be rated.

C. Cost of Ratings

The Commission seeks information and comment on how the cost of NRSRO money market fund ratings would be paid and whether payments for ratings could be made pursuant to a distribution plan adopted under Rule 12b–1 [17 CFR 270.12b–1] under the Investment Company Act.[13]

---

[11] *See* Section 17(a) of the Securities Act, section 10(b) of the Exchange Act and Rule 10b–5 thereunder; with respect to advisers registered or subject to regulation under the Investment Advisers Act of 1940, see section 206 of the Investment Advisers Act. The five organizations which now qualify as NRSROs (see note 1, *supra*) are registered with the Commission as investment advisers.

[12] In this regard, the one NRSRO which today rates money market funds has advised the Commission staff that it reviews its money market fund ratings at least weekly to ensure currency.

[13] Rule 12b–1 permits funds to pay expenditures primarily intended to result in the sale of fund shares only under the circumstances described in the rule.

List of Subjects in 17 CFR Part 230

Advertising, Confidential business information, Investment companies, Reporting and recordkeeping requirements, Securities.

Text of Proposed Rule

Title 17, Chapter II of the Code of Federal Regulations is proposed to be amended as follows:

PART 230—RULES AND REGULATIONS, SECURITIES ACT OF 1933

1. The authority citation for Part 230 is amended by adding the following citations:

(Citations before * * * indicate general rulemaking authority)

Authority: Sections 230.100 to 230.174 issued under Sec. 19, 48 Stat. 85, as amended; 15 U.S.C. 77s, unless otherwise noted. * * *

§ 230.134 also issued under 15 U.S.C. 77b, secs. 2(10), 10(b), 10(c), 10(f) and 19(a) of the 1933 Act;

§ 230.436 also issued under 15 U.S.C. 77f, 77g, 77h, 77s(a), 78c(b), 771, 78m, 78n, 780(d), 78w(a), 78t(a), 78sss(a), 80a–37; and

§ 230.482 also issued under 15 U.S.C. 77g, 77j and 77s(a).

2. By revising paragraph (a)(14)(i) of § 230.134 to read as follows:

§ 230.134 Communications not deemed a prospectus.

* * * * *

(a) * * *

(14)(i) With respect to any class of debt securities, any class of convertible debt securities or any class of preferred stock, the security rating or ratings assigned to the class of securities by a nationally recognized statistical rating organization and the name or names of the nationally recognized statistical rating organization(s) which assigned such rating(s). With respect to any class of money market fund securities, the security rating or ratings assigned to the class of securities by a nationally recognized statitical rating organization and the name or names of the nationally recognized statistical rating organization(s) which assigned such rating(s) and the date(s) the ratings were assigned, *provided* that the communication discloses the most recent rating assigned by each such nationally recognized statistical rating organization and discloses all currently available ratings by a nationally recognized statistical rating organization of such securities which are intended for public dissemination and are materially different from one another.

* * * * *

3. By revising paragraph (g)(1) of § 230.436 to read as follows:

§ 230.436 Consents required in special cases.

* * * * *

(g)(1) Notwithstanding the provisions of paragraphs (a) and (b) of this section, the security rating assigned to a class of debt securities, a class of convertible debt securities, a class of preferred stock or a class of money market fund securities by an nationally recognized statistical rating organization shall not be considered a part of a registration statement prepared or certified by a person within the meaning of sections 7 and 11 of the Act.

* * * * *

4. By amending § 230.482 by adding paragraph (e) before the note to read as follows:

§ 230.482 Advertising by an investment company as satisfying requirements of section 10.

* * * * *

(e) In the case of a money market fund which includes in such advertisement a security rating issued by a nationally recognized statistical rating organization it shall include only the most recent rating assigned by each nationally recognized statistical rating organization and shall also include in such advertisement: (1) Any other materially different current rating intended for public dissemination and assigned to the fund by a nationally recognized statistical rating organization; (2) the name of each rating organization whose rating is disclosed and the date the rating was assigned; (3) each rating organization's definition or description of the category in which it rated the fund; (4) the relative rank of each rating within the assigning rating organization's overall classification system; and (5) a statement informing investors that a money market fund rating is not a recommendation to buy, sell, or hold the shares of the fund, and that the rating may be subject to revision or withdrawal at any time by the assigning rating organization.

5. Guideline 34 of Guidelines to Form N–1A which does not appear in the Code of Federal Regulations in published to read as follows:

Guideline 34 to Form N–1A

If a registrant includes in a registration statement filed under the Investment Company Act of Securities Act of 1933 any rating(s) assigned to a money market fund, it must include (A) any other current rating assigned to the fund and intended for public dissemination by an NRSRO ("additional NRSRO rating") that is available on the date of the initial filing to the document and that materially differs from any rating disclosed; and (B) the name of each rating organization whose rating is diclosed and the date the rating was assigned; each rating organization's definition or description of the category in which it rated the fund; the relatives rank of each rating within the assigning rating organization's overall classification system; and a statement informing investors that a money market fund rating is not a recommendation to buy, sell or hold the shares of a particular money market fund, that it may be subject to revision or withdrawal at any time by the assigning rating organization, and that each rating is to be evaluated independently of any other rating. The registrant also is to include the written consent of any rating organization that is not an NRSRO whose rating is included.

If a change in a rating already included in the registration statement is available subsequent to the filing of the registration statement, but prior to its effectiveness, the registrant must include the rating change and its date in the final prospectus. If an additional NRSRO rating which materially differs from any disclosed in the registration statement becomes available during this period, the registrant must amend the registration statement to include the additional rating and its date.

If the fund receives a materially different rating from an additional NRSRO or a change in a rating already included in the registration statement of the fund becomes available during any period in which offers or sales are being made, the registrant must immediately disclose such additional rating or rating change, and its date, by means of a sticker to the prospectus under Rule 497(d) [17 CFR 230.497(d)]. The sticker also must disclose the reason for the change in the rating.

If at any time a registrant decides to no longer disclose its rating, the registrant must immediately disclose the fact by means of a sticker to the prospectus under Rule 497(d). Where the registrant's decision to discontinue disclosure of its rating is preceded by notification from the NRSRO (or other rating organizational) that the rating is under review and is at risk of being lowered, the sticker must disclose these facts.

Regulatory Flexibility Act Certification

I, John Shad, Chairman of the Securities and Exchange Commission, hereby certify, pursuant to 5 U.S.C. 605(b), that the proposed rulemaking published in Release Nos. 33-6630 and IC-14984 (March 14, 1986) "Disclosure of Security Ratings by Money Market Funds," will not, if promulgated, have a significant economic impact on a substantial number of small entities. The reason for such certification is that the proposed rules will impose no mandatory requirements upon issuers but, instead, will remove certain regulatory impediments to the voluntary disclosure of security ratings. It is anticipated that the effects of the proposed rules will not be significant for any class of registrants. Thus, the proposed rules will not have a significant economic impact on any small entities.

John Shad,

Chairman.

Food and Drug Administration

21 CFR Ch. I

[Docket No. 86N-0063]

Over-the-Counter Marketing of Beta-Adrenergic Bronchodilators in metered-Dose Inhalers; Establishment of a Public File and Request for Comments

AGENCY: Food and Drug Administration.

ACTION: Request for comments

SUMMARY: The Food and Drug Administration (FDA) is announcing the establishment of a docket containing a public record of the comments, views, and other information submitted to the agency from interested persons concerning the over-the-counter (OTC) marketing of beta-adrenergic bronchodilator drug products in metered-dose inhalers.

DATE: Comments by April 21, 1986.

ADDRESS: Written comments to the Docket Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Conrad J. Ledet, Center for Drugs and Biologics (HFN-160), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3500.

SUPPLEMENTARY INFORMATION: FDA has established in the Dockets Management Branch, under Docket No. 86N-0063, a public file for all comments, views, and other information submitted to FDA concerning the possible OTC marketing of beta-adrenergic bronchodilators in metered-dose inhalers. At a meeting with firms that submitted applications for the OTC marketing of metered-dose bronchodilators, FDA indicated that the issue would be discussed at a May meeting of the Pulmonary-Allergy Drugs Advisory Committee. The agency also advised applicants of its preliminary view that the information submitted to date in support of the OTC marketing of these products appears to be insufficient, but that the purpose of the advisory committee meeting and the establishment of a docket would be to provide an ample opportunity for all interested parties to submit comments and information for a full consideration of the safety issues involved. Comments supporting or opposing OTC marketing should submit, among other appropriate information, information relating to the safety of OTC marketing beta-adrenergic bronchodilators in metered-dose inhalers. Drug products included in this class are albuterol, isoetharine, isoproterenol, and metaproterenol. The information submitted will be made available to the committee for its consideration at an open meeting of the committee, planned for May 1986. The exact date and detailed agenda for this open meeting will be published in the **Federal Register** at a later date. Received comments will be incorporated into this public file and may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

It is FDA's intent that the discussion at the forthcoming committee meeting be limited to a discussion of OTC marketing of beta-adrenergic bronchodilators in metered-dose inhalers as a class and not a discussion of OTC marketing of specific drug products within the class. Discussion of beta-adrenergic bronchodilators in metered-dose inhalers as a class should include the appropriate criteria that should be used to determine whether any beta-adrenergic bronchodilator in metered-dose inhaler can be safely marketed OTC. Examples of possible appropriate safety considerations include the analysis of abuse and misuse data and adverse reaction data for inhaled beta-adrenergic drugs, the need for physician supervision of the use of these drugs by patients, possible beta-adrenergic drug interactions with other drugs such as theophylline, and the ability to provide adequate labeling that addresses safety concerns and ensures safe self-medication with these products. Safety issues concerning the OTC marketing of specific beta-adrenergic drug products will not be discussed. A discussion of the OTC marketing of specific products within the class may occur at a future meeting of the Pulmonary-Allergy Drugs Advisory Committee depending upon the recommendations at the May 1986 meeting.

The committee's discussion and conclusions regarding beta-adrenergic bronchodilators in metered-dose inhalers may be considered by the agency in its preparation of a final monograph for OTC bronchodilator drug products. Such a monograph is being developed as part of the OTC drug review under Docket No. 76N-052B. The tentative final monograph (proposed rulemaking) for OTC bronchodilator drug products was published in the **Federal Register** of October 26, 1982 (47 FR 47520). Information that has been submitted to the OTC drug review will not be included in this new public file. Any interested person who has submitted information to the OTC drug review and who would like that information made available to the advisory committee should also submit the information to this public file.

It is not FDA's intent to discuss the new drug status of these products at the May meeting. Of course, if the metered-dose product contains a chlorofluorocarbon as a propellant, the product is considered adulterated and/or misbranded unless it is the subject of an approved new drug application under the provisions of 21 CFR 2.125.

Interested persons may submit written comments to the Dockets Management Branch (address above). To assure consideration of comments by the committee, the comments should be submitted on or before April 21, 1986. Two copies of any comments are to be submitted, except that individuals may submit one copy. All comments are to be identified with the docket number found in brackets in the heading of this document.

Dated: March 17, 1986.

Frank E. Young,

Commissioner of Food and Drugs.

[FR Doc. 86-6317 Filed 3-19-86; 11:11 am]

BILLING CODE 4160-01-M

---

21 CFR Part 74

[Docket No. 85N-0160]

D&C Green No. 6; Uniform Specifications

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to establish a uniform set of specifications for D&C Green No. 6 for all of its regulated uses by rescinding the specifications that were established before 1982 for the use of this color additive in sutures and by making that use subject to the specifications that the agency has established for all other uses of this color additive. FDA is also proposing to remove the provision that bars the migration of D&C Green No. 6 from a suture to the surrounding tissues. FDA is taking the latter action because this restriction is not necessary to assure the safety or suitability of the use of D&C Green No. 6 in sutures. Elsewhere in this issue of the Federal Register, FDA is issuing a final order that increases the level of D&C Green No. 6 that can be used to color certain sizes of polyglycolic acid surgical sutures, lists the use of the color additive in poly(glycolic acid-*co*-trimethylene carbonate) sutures, and moves the listing of the suture use of D&C Green No. 6 into the subpart of Part 74 for color additives in medical devices.

DATE: Comments by May 20, 1986.

ADDRESS: Written comments may be sent to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Rudolph Harris, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In the past 4 years, FDA has adopted three final rules listing new uses of D&C Green No. 6 in drugs, cosmetics, and medical devices (see 47 14138; April 2, 1982; 48 FR 13020; March 29, 1983; and the final rule published elsewhere in this issue of the **Federal Register**). As a result of these changes and of scientific advances, certain provisions of the regulations have become obsolete. FDA is therefore proposing to revise its regulations to establish a uniform set of specifications for all regulated uses of D&C Green No. 6 and to remove an obsolete restriction on its use in sutures.

I. Specifications

There currently are two sets of specifications for D&C Green No. 6. FDA established the first set of specifications in 1962 when it listed the color additive for use in polyethylene terephthalate sutures (27 FR 12828; December 28, 1962; and 33 FR 8815; June 18, 1968). These specifications have been codified at § 74.1206(b)(1) (21 CFR 74.1206(b)(1)). However, elsewhere in this issue of the **Federal Register**, FDA is publishing a final rule that moves the provisions of § 74.1206(b)(1) to § 74.3206 (21 CFR 74.3206). As a result, these specifications are now codified at § 74.3206(b)(2).

In 1982, the agency adopted a second set of specifications for D&C Green No. 6 when it permanently listed the color additive for use in externally applied drugs and cosmetics (47 FR 14138). FDA codified this new set of specifications at § 74.1206(b)(2), although the agency is now recodifying them at § 74.1206(b) (see the final rule published elsewhere in this issue of the **Federal Register**). These specifications are based on the results of methods of analysis that are, for the most part, more specific and more sensitive than those that were used in establishing the original specifications. As a result, § 74.1206(b) contains specifications for specific intermediates instead of a general specification for "intermediates." These newer specifications include a limitation on the carcinogenic impurity *p*-toluidine and restrict the levels of lead and arsenic to no more than 20 parts per million (ppm) and 3 ppm, respectively. The levels for lead and arsenic in the new specifications are higher than in the 1962 specifications. These new levels are appropriate, however, because they are consistent with the current specifications for other D&C color additives and yet still ensure the safety of the color additive.

At the time that it adopted the second set of specifications, FDA announced its intention to establish a single set of specifications for D&C Green No. 6 for all of its regulated uses (47 FR 14145). The agency is now effectuating that intent. This action is appropriate for two reasons. First, because the new specifications are more specific and are based on improved methods, they are more likely to assure the safe use of this color additive than the original specifications. Second, it is more efficient for both the agency and industry to operate under a single set of specifications.

Therefore, FDA is proposing to rescind the specifications in § 74.3206(b)(2). The agency is also proposing to redesignate § 74.3206(b)(1) as § 74.3206(b) and to amend it to provide that the color additive D&C Green No. 6 for use in medical devices shall conform to the specifications of § 74.1206(b).

II. Restriction on Migration

A. Consideration of Need for Restriction

The final rule listing D&C Green No. 6 for use in nonabsorbable polyethylene terephthalate sutures included a restriction that D&C Green No. 6 be added to sutures in such a way as to ensure that there is no migration of the color additive to the surrounding tissue (current § 74.1206(c)(3); redesignated as § 74.3206(c)(3) in the final rule published elsewhere in this issue of the **Federal Register**). This restriction was originally imposed as a suitability requirement. It has no application to absorbable sutures because such sutures, including the color additive, are designed to be absorbed by the surrounding tissue. Nevertheless, in the **Federal Register** of April 25, 1975 (40 FR 18167), when FDA amended § 74.1206 to provide for the use of D&C Green No. 6 in coloring absorbable polyglycolic acid surgical sutures, it inadvertently failed to limit the restriction on migration to nonabsorbable sutures. Consequently, this restriction now applies to polyglycolic acid sutures, which are absorbable, as well as to polyethylene terephthalate sutures, which are not.

FDA has tentatively concluded that the prohibition against migration is not necessary, is impractical for nonabsorbable sutures, and is inappropriate for absorbable sutures. Because analytical methods have become more sensitive since 1962, levels of migration that were undetectable at that time now are measurable. These low levels of migration, which would render the nonabsorbable sutures technically in violation of the current regulation, have no bearing on the suitability of the color additive for suture use.

Color additives are added to sutures to improve their visibility both during suturing and, depending upon the application, during removal of the suture after the sutured area has healed. Thus, to be suitable for use in nonabsorbable sutures, D&C Green No. 6 should be added to the sutures in a way that will ensure that the sutures will retain enough of their color to be visible for removal after healing and that will also preclude visible staining of the surrounding tissues. The petition on the use of D&C Green No. 6 that was submitted in 1982 (CAP 2C0004) includes letters from physicians attesting that the

VOL 51
ISS 55
MR 21
1986
UMI

use of D&C Green No. 6 in polyethylene terephthalate nonabsorbable sutures meets these suitability criteria. Moreover, FDA believes that physicians would not use a suture if the color additive migrated to the extent that removal of the suture would be hindered by visibility problems or that there was marked staining of the tissues. Consequently, the agency tentatively finds that a regulatory restriction on migration is not necessary to assure the suitability of D&C Green No. 6 for suture use.

B. Safety Consideration

FDA also believes that the restriction against migration is not necessary to assure the safety of the use of D&C Green No. 6 in either absorbable or nonabsorbable sutures. The safety of the listed uses of D&C Green No. 6 for coloring absorbable and nonabsorbable sutures is supported by the toxicology studies submitted with the petitions for their listings. These toxicology studies were designed to discover if there were any safety problems from exposure to any D&C Green No. 6 that migrated to the surrounding tissues. They revealed none. Further, none of the toxicology studies submitted to the agency in any of the other petitions for uses of D&C Green No. 6 give any indication that the color additive migrating from sutures poses a potential for harm.

D&C Green No. 6 is manufactured by reacting 1 molecule of quinizarin with 2 molecules of *p*-toluidine. Residual amounts of *p*-toluidine are commonly found among the impurities of this color additive. The presence of *p*-toluidine as a reaction impurity in D&C Green No. 6 is significant because Weisburger et al. have shown that *P*-toluidine is a carcinogen where ingested by mice (Ref. 1). When D&C Green No. 6 originally was listed for coloring polyglycolic acid and polyethylene terephthalate sutures, however, *p*-toluidine had not yet been shown to be a carcinogen. Therefore, FDA did not explicitly evaluate the safety of exposure to *p*-toluidine, which has recently been found to be present in D&C Green No. 6 at levels that average approximately 500 parts per million (see 47 FR 14140), when it listed the use of D&C Green No. 6 in polyethylene terephthalate sutures and in polyglycolic acid sutures.

FDA has concluded that it is possible to list a color additive like D&C Green No. 6 that has not been shown to cause cancer but that contains a carcinogenic impurity (see 47 FR 14140–14145). In deciding whether the use of such an additive is safe, FDA will consider among other things, its calculations of the upper limit of risk from lifetime exposure to the carcinogenic impurity. Evaluation of the risk from exposure to *p*-toluidine from the use of D&C Green No. 6 in polyglycolic acid and polyethylene terephthalate sutures has two parts: (1) An assessment of probable exposure to *p*-toluidine and (2) an extrapolation of the risk from *p*-toluidine observed in the animal bioassay to the possible risk to humans under conditions of use.

1. Exposure

FDA originally listed D&C Green No. 6 for use at levels not to exceed 0.1 percent in polyglycolic acid absorbable sutures and at levels not to exceed 0.75 percent in polyethylene terephthalate nonabsorbable sutures. Although the migration of D&C Green No. 6 from polyethylene terephthalate sutures makes it likely that some *p*-toluidine will move into the surrounding tissues, no data are available on the extent to which *p*-toluidine will migrate from those sutures. For the polyglycolic acid suture, which is absorbable, all of the color additive is released to tissue.

In assessing exposure to *p*-toluidine from the use of D&C Green No. 6 in sutures, the agency has estimated the amount of suture material that a person might receive over a lifetime. Considering the amount of suture material used in various types of surgery, allowing for surgery using a particularly large amount of suture, and considering the probability of multiple surgeries, the agency believes that 10 meters of suture is a reasonable estimate for lifetime use (Ref. 2). Also, to calculate the amount of color additive, the agency is assuming that all suture material is of U.S.P. size 2-0 because that is a common size for general surgery.

The agency is also making the assumptions that all of the suture material to which a person is exposed during his or her lifetime (i.e., 10 meters) contains D&C Green No. 6 at the 0.75 percent level and that all of the *p*-toluidine in the suture migrates. Thus, although (1) nonabsorbable sutures, such as polyethylene terephthalate, would be removed long before all of the color would migrate; and (2) it is extremely unlikely that a person would be exposed to only polyethylene terephthalate suture material (other types of suture materials contain either lower levels or no D&C Green No. 6), the assumptions above are used to represent a worst-case estimate for *p*-toluidine exposure from D&C Green No. 6 in sutures. Based on these assumptions, the agency estimates that lifetime-averaged exposure to *p*-toluidine from D&C Green No. 6 in sutures is not likely to exceed 0.15 nanogram per day (150 picograms per day) (Ref. 3). This estimate of exposure far exceeds the estimated level of exposure from 0.1 percent D&C Green No. 6 in U.S.P. size 2-0 polyglycolic acid sutures (0.03 nanogram per day).

2. Risk Extrapolation

In the agency's document permanently listing D&C Green No. 6 for use in externally applied drugs and cosmetics (47 FR 14138; April 2, 1982), FDA described its use of quantitative risk assessment procedures to extrapolate from the *p*-toluidine dietary dose in the animal experiment to the very low levels of human exposure. The risk analysis employed in this document relies on the same risk assessment procedures.

The simplest method for estimating risk is to compare the human lifetime-averaged systemic exposure to *p*-toluidine from sutures colored with D&C Green No. 6 to the lifetime-averaged systemic exposure of mich fed *p*-toluidine in the Weisburger et al. bioassay (Ref. 1). On this basis, using a linear extrapolation, the agency estimates the upper limit individual lifetime carcinogenic risk from exposure to sutures containing up to 0.75 percent D&C Green No. 6 is 1 in 10 billion or 1 in 100 billion, depending on the specific assumptions in the linear extrapolation procedure (Ref. 3).

The agency recognizes that exposure to *p*-toluidine from sutures is different from that encountered in the Weisburger et al. bioassay, which the agency is using for its risk extrapolation. Exposure to *p*-toluidine from sutures is parenteral and localized, while exposure in the Weisburger bioassay was through lifetime dietary administration. The agency does not wish to imply that linear time-averaging of dose from a dietary study is necessarily the best way to estimate risk from sutures. However, in the absence of explicit scientific information indicating how these exposure differences affect risk, the agency believes that the extremely small risk estimated by simple linear time-averaging of the dose provides a sufficiently large margin of safety for the agency to conclude that use of the color additive in sutures is safe.

The available toxicity data on D&C Green No. 6 and the vanishingly small risk estimate for the exposure to *p*-toluidine that results from the use of this color additive in sutures provide the basis for concluding that there is a

reasonable certainty of no harm from the possibly higher exposure to D&C Green No. 6, including *p*-toluidine, that might occur if all D&C Green No. 6 migrates from nonabsorbably polyethylene terephthalate sutures (or combinations of polyethylene terephthalate and other sutures for which D&C Green No. 6 is listed). As a result, the agency tentatively concludes that the restriction prohibiting migration of the color additive to the surrounding tissue is unnecessary to assure the safety of this use.

Because this restriction is not necessary to assure either the safety or the suitability of the sutures, FDA is proposing to remove it from the regulation.

The agency has determined under 21 CFR 25.24(a)(9) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This proposed rule will subject D&C Green No. 6 for use in sutures to the same specifications that the agency has established for the other uses of this color additive. Because the agency believes that all affected color additive manufacturers are currently able to meet these uniform specifications, FDA does not expect that any additional cost will result from the specifications outlined in the proposal. In addition, the removal of the provision that bars the migration of D&C Green No. 6 is permissive in nature, so no additional cost will be associated with this action.

FDA, in accordance with the Regulatory Flexibility Act, has considered the effect that this proposal would have on small entities including small businesses and has determined that this regulation will not result in any additional cost to manufacturers of D&C Green No. 6. Therefore, FDA certifies in accordance with section 605(b) of the Regulatory Flexibility Act that no significant economic impact on a substantial number of small entities will derive from this action.

Although this action is exempt from Executive Order 12291, the agency has analyzed the economic effects of this rule and has determined that it will not result in a major rule as defined by that Order.

Interested persons may, on or before May 20, 1986, submit to the Dockets Management Branch (address above) written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

III. References

BILLING CODE 4160-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Government National Mortgage Association

24 CFR Part 390

[Docket No. R-86-1271; FR-2135]

Guaranty of Mortgage-Backed Securities

AGENCY: Office of the President of the Government National Mortgage Association, HUD.

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise the regulations governing the date for the first scheduled monthly payment of principal and interest for a mortgage in a pool backing mortgage-backed securities. Under this rule, a mortgage would have to have a date of first scheduled monthly payment that is no more than 24 months before the issue date of the securities. The current rule requires this date to be no more than 12 months before the date on which GNMA commits to guarantee the issue of securities. This technical revision is being proposed to help implement GNMA's new automated system for handling the issuance of commitments for mortgage-backed securities.

DATE: Comments must be received by May 20, 1986.

ADDRESS: Interested persons are invited to submit written comments regarding this rule on or before the due date to the Rules Docket Clerk, Office of General Counsel, Department of Housing and Urban Development, Room 10276, 451 Seventh Street, SW., Washington, DC 20410–0500. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying during regular business hours at above address.

FOR FURTHER INFORMATION CONTACT: Richark W. Dyas, Vice President, Office of Mortgage-Backed Securities, Government National Mortgage Association, Room 6224, 451 Seventh Street, SW., Washington DC 20410–9000. Telephone: (202) 755–8772. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: GNMA is developing a new, highly automated system for dispensing and managing commitments to guarantee mortgage-backed securities. Under this new "commitment line system," issuers will request initial or additional "commitment authority," as opposed to commitments for specific pools, as is

VOL
51
ISS
55
MR
21
1986
UMI

done at present. This new system will eleminate the problems currently experienced with after-the-fact changes to the individual commitments by issuers.

In order to implement this new system, it is necessary to revise the current regulations governing the age of a mortgage eligible for pooling. Currently, the age of a mortgage is measured from the date of GNMA's commitment to guarantee the issue of securities. Since under the new "commitment line system" the date of GNMA's commitment is no longer a critical date, the rule proposes to measure the age of a mortgage from the issue date of the securities. Under this proposed rule a mortgage must have a date for the first scheduled monthly payment of principal and interest that is no more than 24 months before the issue date of the securities. This period is comparable to the period under the current regulations, which is no more than 12 months before the date on which GNMA commits to guarantee the issue of securities. Since the GNMA commitment itself is effective for a period of 12 months, the combined period for the pooling of newly-originated mortgages is currently 24 months.

Other Matters

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969. The finding is available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Room 10276, 451 Seventh Street, SW., Washington, DC 20410.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued by the President on February 17, 1981. Analysis of the rule indicates that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographical regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Under 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned certifies that this rule does not have a significant economic impact on a substantial number of small entities. The change to be effected by this rule is a technical revision. It is intended to help implement an automated tracking system; it should have little or no economic impact on any entities participating in the affected program.

The rule was listed as item 933 in the Department's Semiannual Agenda of Regulations published on October 29, 1985 (50 FR 44166, 44205), pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

Accordingly, GNMA proposes to amend 24 CFR Part 390 as follows:

PART 390—GUARANTY OF MORTGAGE-BACKED SECURITIES

1. The authority citations for Part 390, Subparts A, B, C, D, and E would be removed, and the authority citation for Part 390 would be revised to read as follows:

Authority: Secs. 306(g) and 309(a) of the National Housing Act, 12 U.S.C. 1721(g) and 1723a(a); sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

2. In § 390.7 paragraph (b) would be revised to read as follows:

§ 390.7 Mortgages.

* * * * *

(b) Have a date for the first scheduled monthly payment of principal and interest, or a date of purchase from an Association-approved auction, that is no more than 24 months before the issue date of the securities.

* * * * *

3. In § 390.27, paragraph (b) would be revised to read as follows:

§ 390.27 Mortgages.

* * * * *

(b) Have a date for the first scheduled monthly payment of principal and interest that is no more than 24 months before the issue date of the securities.

* * * * *

4. In § 390.43, paragraph (c) would be revised to read as follows:

§ 390.43 Motgages.

* * * * *

(c) Have a date for the first scheduled monthly payment of principal (which may be negative) and interest, or a date of purchase from an Association-approved auction, that is no more than 24 months before the issue date of the securities.

* * * * *

Dated: March 12, 1986.

Glenn R. Wilson, Jr.,

President, Government National Mortgage Association.

[FR Doc. 86-6226 Filed 3-20-86; 8:45 am]

BILLING CODE 4210-01-M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 9

[Notice No. 585]

North Fork of Long Island Viticultural Area

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms (ATF) is considering the establishment of a viticultural area located in Suffolk County on the North Fork of eastern Long Island, New York. The proposed viticultural area includes all of the land areas in the Townships of Riverhead, Shelter Island, and Southold. The petition was submitted by a group of Long Island grape growers and bonded viticultural area. ATF feels that the establishment of viticultural areas and the subsequent use of viticultural area names as appellations of origin in wine labeling and advertising will help consumers identify the wines they may purchase.

DATES: Written comments must be received by May 5, 1986.

ADDRESS: Send written comments to: Chief, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, DC 20044-0385 (Notice No. 585).

Copies of the petition, the proposed regulations, the appropriate maps, and written comments will be available for public inspection during normal business hours at: ATF Reading Room, Room 4406, Ariel Rios Federal Building, 12th and Pennsylvania Avenue NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Edward A. Reisman, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, 1200 Pennsylvania Avenue NW., Washington, DC 20226 (202-566-7626).

SUPPLEMENTARY INFORMATION:

Background

On August 23, 1978, ATF published Treasury Decision ATF-53 (43 FR 37672, 54624) revising regulations in 27 CFR,

Part 4. These regulations allow the establishment of definite viticultural areas. The regulations also allow the name and boundaries of an approved viticultural area to be used as an appellation of origin on wine labels and in wine advertisements.

On October 2, 1979, ATF published Treasury Decision ATF-60 (44 FR 56692) which added a new Part 9 to 27 CFR, providing for the listing of approved American viticultural areas, the names of which may be used as appellations of origin.

Section 4.25a(e)(1), Title 27, CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical features, the boundaries of which have been delineated in Subpart C of Part 9.

Section 4.25a(e)(2), outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area. The petition should include—

(a) Evidence that the name of the proposed viticutural area is locally and/or nationally known as referring to the area specified in the petition;

(b) Historical or current evidence that the boundaries of the viticultural area are as specified in the petition;

(c) Evidence relating to the geographical characteristics (climate, soil, elevation, physical features, etc.) which distinguish the viticultural features of the proposed area from surrounding areas;

(d) A description of the specific boundaries of the viticutural area, based on features which can be found on United States Geological Survey (U.S.G.S.) maps of the largest applicable scale; and

(e) A copy of the appropriate U.S.G.S. maps with the boundaries prominently marked.

Petition for "North Fork of Long Island"

AFT has received a petition proposing a viticultural area on the North Fork of eastern Long Island, New York. The proposed viticultural area is to be known as the "North Fork of Long Island." The petition was submitted by the Long Island Grape Growers Association based in Riverhead, New York. The petition was compiled by Richard T. Olsen-Harbich, Winemaker of the Bridgehampton Winery, Bridgehampton, New York and President of the Long Island Grape Growers Association.

Mr. Harbich also prepared a petition on behalf of the Bridgehampton Winery for "The Hamptons, Long Island" viticultural area. "The Hamptons, Long Island" was approved as an American viticultural area on June 17, 1985 (50 FR 20409). It includes all of the land areas in the (South Fork) Townships of Southampton and East Hampton. This viticultural area is located just across the bay from the proposed viticultural area.

The proposed North Fork of Long Island viticultural area consists of the Townships of Riverhead, Shelter Island, and Southold (including all mainland and island areas). The total area encompassed by the proposed boundaries consists of 158.5 square miles of 101,440 acres of land. There are 5 bonded wineries operating within the proposed viticultural area. The petitioner bases this petition on the following information:

Evidence of Name

According to the petitioner, the origin of the name North Fork was based on the way Long Island "forks" at its eastern end at Riverhead into the North and South Fork. The Long Island Railroad uses the term North Line and South Line to describe the rail routes that travel through those parts of Long Island. Those rail route names also point out the division between the North Shore (the area bounded by the Long Island Sound) and South Shore (the area bounded by the Atlantic Ocean) of Long Island. Today, the references North Shore and South Shore are commonly used by Long Islanders to identify the dual maritime coasts of Long Island out to the east end, where the North Fork and South Fork are formed. The two eastern Long Island forks are described as the North and South Forks. The South Fork is also commonly known as The Hamptons.

According to the petitioner, the name "North Fork" is locally used to describe the land area on the North Shore of Long Island beginning at Riverhead Township and extending east for approximately 40 miles to Orient Point. This description is supported by many publications, businesses, and landmarks which use the name North Fork to distinguish this region from the rest of Long Island. According to local phone directories there are at least 45 Long Island businesses which use the term "North Fork" as part of their name.

Evidence of Boundaries

The actual geographic area of the North Fork, although attached to a larger island, may be referred to as a peninsula. This is due to the fact that three of its boundaries are surrounded by water: The Long Island Sound to the north, the Peconic Bay to the south and the Atlantic Ocean to the east.

The proposed North Fork of Long Island viticultural area lies entirely in Suffolk County. The western boundary of the proposed North Fork appellation is the 6.5 mile long boundary line separating Brookhaven and Riverhead Townships. The boundary starts at the mouth of the Wading River and follows it in a southeasterly direction. It then heads south in a straight line cutting through Peconic River Park to meet the beginning of the Peconic River. The boundary travels east along the river until it empties into the Peconic Bay. It is at this point that the boundary line becomes three bodies of water. The Peconic Bay accounts for the rest of the southern boundary, meeting the Atlantic Ocean at Orient Point. The entire length of the North Fork from its start at the Brookhaven/Riverhead Town line, east to Orient Point, is approximately 40 miles. The North Fork is 6 miles wide at its widest point and less than .5 mile wide at its narrowest point. The townships making up the area—Riverhead (78 square miles), Shelter Island (11.5 square miles) and Southold (69 square miles)—cover a combined total of 101,440 acres of land or 158.5 square miles. Shelter Island, although a separate land area from the mainland of Long Island was included in the boundaries of the proposed North Fork viticultural area because of its immediate proximity to the area. Also, another reason for its inclusion in the proposed viticultural area is because it is composed of similar soil associations as those making up the remainder of the North Fork.

According to the petitioner, it is the sea that surrounds Long Island (and more specifically the North Fork) which makes it a unique agricultural area. According to information gathered from the book titled *History of Long Island, New York*, by Benjamin F. Thompson (1839), the sea renders it more temperate than many other places in the same latitude in the interior. Information gathered from that book states that the area is almost regularly fanned by a breeze from the ocean. It states that the air from the sea also has a powerful effect on the climate. It modulates the heat in the summer and the cold in the winter. The petitioner claims that it is this moderating effect of the water on the North Fork which makes it an area suitable for fine wine grapes.

The petitioner referred to the following statement in the book on Long Island history by Thompson: "When Long Island was discovered by Henry Hudson in 1609, he found an island covered with forests, trees loaded with fruit and grapevines of many kinds."

VOL 51
ISS 55
MR 21
1986
UMI

According to the same book, the North Fork was the home of several tribes of Indians prior to its settlement by the English. The primary tribes were Corchougs. It is from these Indians that the English settlers purchased the area known as Southold (the Indians called it Yennecock). This area is roughly equivalent to the boundaries of the proposed viticultural area; the western boundaries of Wading and Peconic Rivers to the eastern boundary of Orient Point.

According to information gathered by the petitioner from Edna Yeager, a historian of the North Fork, "The first settlers found that grapes were just waiting for the winemaker."

The petitioner claims that during Colonial times the major industry of the proposed viticultural area was agriculture. Over the years the conservatism of the farmers helped maintain the area. Today agriculture still is the major industry of the area.

Viticultural History

According to a conversation held between the petitioner and John Wickham (a fruit farmer and pioneer Long Island grape grower whose family dates back some 300 years on the North Fork), the settlers trained the native grapes onto arbors behind their homes. According to Wickham, many of the older homes still have grape arbors. European wine grapes were not used on Long Island until the Prince Nurseries started in the late 1700's. Prince Nurseries located in the Borrough of Queens (New York City), sent European vinifera vines to purchasers all over Long Island, including the North Fork. The backyard arbors were pretty much the extent of grape-growing on the North Fork for the period from 1830 to 1963. There were a few attempts at commercial grape-growing on the North Fork but these failed (most notably by a Moses Fournier who in the late 1800's planted quite a large vinifera vineyard near Mattituck).

According to the petitioner, the beginning of the successful commercial vineyards on the North Fork was in 1963. In that year John Wickham planted a selection of table grapes from Cornell University. So successful was one of the varieties that it was named "Suffolk Red," for the county where it thrieved. Mr. Wickham has grown grapes on the North Fork for over 20 years. Prior to his success, vinifera grapes did not survive because of a combination of diseases.

It is the petitioner's opinion that the success of John Wickham has led others to the North Fork. The petitioner stated that the interest in grape growing on the North Fork started slowly, but has continued at an accelerated pace in recent years. Professor John Tomkins of Cornell University held conferences in the North Fork area in 1968 and 1971. In the Suffolk County Agricultural News, Volume LV, No. 5, (1971), Tomkins wrote, "There are many good sites for grapes on Long Island. Some apple and dairy farmers are taking a real careful look at the opportunities in grape-growing."

The petitioner said that it was Professor Tomkins who steered Alex Hargrave to the North Fork. Hargrave Vineyard was planted in 1973. It was the first commercial vinifera vineyard on the North Fork in the 20th Century. The book *North Fork and Shelter Island Guidebook*, edited by James I. Masters, (1981), quoted Alex Hargrave in the following text: "The Sound and the Great Peconic Bay act as a natural thermostat in the spring and the fall, giving it a longer frost-free season than southern Virginia. The North Fork is a sliver of land almost completely surrounded by water. Compare this with the famous regions of Bordeaux which are on the leeward side of a river a couple of kilometers wide. Long Island is much more at the bord d'eau (at the waters edge) than Bordeaux. The growing season is 45 days longer than upstate. There are over 3,000 hours of sunlight (Cutchogue is the sunniest village in the state). Because there is virtually no fog on the North Fork, crops ripen three weeks earlier than the South Fork and danger from humidity is minimized. The constant offshore breezes control mildew as the leaf blades of the vine are dried within hours of rain. The North Fork is almost 100% photosynthetically efficient."

Present and Future Viticultural Situation

The total grape acreage on the North Fork is approximately 1,000 acres. The petitioner stated that by the end of 1985 it is estimated that there will be over 1,200 acres of grapes on the North Fork. He claims that Long Island's North Fork has been and is today one of the more prominent agricultural areas in New York. The petitioner states that the North Fork is known for a distinction being primarily agricultural with a substantially different character and culture than the South Fork.

According to the petitioner, the North Fork is just beginning to break out of its infancy as a viticultural region. To support this statement, he said that the North Fork has supported vinifera grapes successfully for over a decade. The petitioner said that as the second decade of North Fork grape-growing approaches, much more acreage is expected to produce a full crop as well as new plantings.

Currently, there are 5 wineries in operation on the North Fork of Long Island: Hargrave, Lenz, Jamesport, Pindar and Peconic Bay Vineyards. The petitioner claims that there are 3 other wineries scheduled for opening in 1986 at Riverhead, Laurel, and Cutchogue. The petitioner states that it is very possible that as many as 25–50 wineries could eventually be in operation on the North Fork by the end of this century.

According to the petitioner, the North Fork of Long Island and its potential for producing quality grapes and wine, represents opportunity for the prospective vintner. He said the soil and climate are suited to vinifera grape production like no other area in the Eastern United States. According to the petitioner the early results from grape plantings on the North Fork hold promise for red vinifera varietals such as Carbernet Sauvignon and Merlot.

Appropriate Maps With Boundaries Marked

The petitioner submitted 5 U.S.G.S. maps with the boundaries prominently marked on them. The boundaries of the proposed "The North Fork of Long Island" viticultural area may be found on the following maps: Riverhead, N.Y., 1956, 7.5 minute series, scaled at 1:24,000; Wading River, N.Y. edition of 1956, 7.5 minute series, scaled at 1:24,000; New York, N.Y.; N.J.; Conn., U.S. 1:250,000 series, scaled at 1:250:000, edition of 1960, revised 1979; Hartford, Conn.; N.Y.; N.J.; Mass., U.S. 1:250,000 series, scaled at 1:250,000, edition of 1962, revised 1975; and Providence, R.I.; Mass.; Conn., U.S. 1:250,000 series, scaled at 1:250,000, edition of 1947, revised 1969.

Geographical Evidence Which Distinguishes the Proposed Area From Surrounding Areas

Soils

The grape growing region of the North Fork when compared to the South Fork (The Hamptons), has distinctly different soil types. The difference in soil types begins north of the Peconic River and continues eastward toward Orient Point. According to the United States Soil Conservation Service, the major soil types which are found on the North Fork are as follows:

1. *Carver-Plymouth-Riverhead Association.* These soils are excessively well-drained and are very sandy, which may limit its farmability. They are located primarily on the perimeter of the North Fork and are usually rolling or

sloping. The natural fertility of these soils is low and the rapid permeability of water through these soils makes irrigation a desirable option for vineyards in these areas. They are found mainly along the North Shore adjoining the Long Island Sound.

Fishers and Plum Islands, although separate islands located east of the mainland of the North Fork, are composed of this same soil association.

2. *Haven-Riverhead Association.* These soils are characteristically deep and somewhat level and are located further inland on the North Fork. They are well-drained and have a medium texture. Most of these soils have a moderate to high water holding capacity and crops respond well to lime and fertilizer when grown on these soils. Due to these factors, this soil assocation (which is the predominant one of the North Fork) is considered one of the best farming areas in Suffolk County.

3. *Montauk-Haven-Riverhead Associations.* These soils are deep, nearly level to strongly sloping in character. They are well drained to moderately well drained soils. They tend to be moderately coarse in texture. They are the associations found on the North Fork areas of Robins and Shelter Island, located just south of the mainland.

The soils of the South Fork (The Hamptons), on the other hand, are somewhat different, and many more associations are present:

1. *Plymouth-Carver Association.* These soils are rolling, hilly, deep and excessively drained. Characteristically, scrub oak and other minor trees are found as cover. Permeability is rapid and natural fertility is low.

2. *Bridgehampton-Haven Association.* These soils are deep and excessively drained and have a medium texture.

3. *Montauk-Montauk, Sandy Variant—Bridgehampton Association.* These soils are deep and usually very sloping. Presently, most of this area is either idle or wooded.

4. *Montauk, Sandy Variant—Plymouth Association.* These soils are excessively drained and coarse textured. This loamy-sand is droughty but contains a black surface layer which is high in organic matter content.

5. *Montauk-Haven-Riverhead Association.* These soils are fairly well-drained and are sparsely found on the northern side of the South Fork along the Peconic Bay at Cow Neck, Noyack, North Haven, and outlying Gardiners Island. The surface layer is a silt loam, with a fine sandy loam found at deeper levels. These soils are very deep and well-suited to cultivation.

The remainder of the soils on the South Fork consist of the *Dune-Land-Tidal Marsh-Beach Association,* which make up the beach and marshland areas.

Westward from here and into New York City, the soil associations become even more foreign to those found on the eastern end of Long Island. It must also be pointed out that while various soil types found in western Long Island may be similar to those found on the North Fork, the encroachment of suburban development and industry on Long Island has made commercial agriculture and land available for it, almost non-existent in the townships west of Brookhaven.

As one can see, the soils of the North Fork and the South Fork (The Hamptons) are quite different, each giving the grapes that are grown there, a distinct and unique character. At the Town of Brookhaven/Riverhead boundary line where the forks meet, there is still some slight separation of the different soil associations. West of this area, however, the soil associations of Long Island tend to become less restricted to a distinct geographic area and much more intermingling and blending of soil series can be found. Also, there are the soils making up the "spine" of Long Island, namely "The Pine Barrens." The soils of the "Pine Barrens" can support just that; short scrubby pine forests are the only vegetation in the light, extremely sandy and unfertile soils of this area.

Land Classes are sub-divisions determined by the U.S. Soil Conservation Service to rate the capabilities of various soil series. Most of the soils on the North and South Forks fall into the Land Class members I and II, which state that "the soils contain few or moderate limitations that restrict their use." There are, however, a greater percentage of soil series on the South Fork which are listed under Land Class III, which states: "These soils have limitations that reduce the choice of plants, require special conservation practices, or both."

In general, the soils of the North Fork contain a smaller percentage of silt and loam than the soil series found on the South Fork (The Hamptons). This accounts for the fact that South Fork soils have a greater water-holding capacity than North Fork soils and require less irrigation. The soils for the North Fork are also generally slightly higher in natural fertility than the soils of the South Fork.

Climate

According to the petitioner, the climate classification for the North Fork is "humid-continental." However, this is greatly modified by the Atlantic Ocean. The maritime influence on the North Fork is significant. The surrounding water extends the period of freeze-free temperatures, reduces the range of diurnal and annual temperatures, and increases the amount of winter precipitation relative to summer.

Although the North and South Forks of Long Island are relatively close together, there are many climatic differences which exist between these two areas. These differences are due to the unique topography of the Eastern End and the relationship of the two forks to the Atlantic Ocean.

Most of the climatic data for the Eastern End of Long Island is recorded from three stations; the Cornell University Experimental Station in northeast Riverhead Township (located on the North Fork), The Greenport weather station (located on the North Fork), and the U.S. weather station in Bridgehampton (located on the South Fork). The Cornell University station has been recording weather data since the 1950's, while the Bridgehampton station has been operating for almost half a century.

According to this data there are definite climatic differences which exist between the two forks. For example, the average winter temperature on the North Fork is usually lower than that of the South Fork. This is true even though there are often much lower winter minimum temperatures recorded on the South Fork for certain cold days of the year. The reason for this is that the North Fork is further away from the Atlantic Ocean and hence does not receive as great an effect from the warmed southwest winds which come in from the Atlantic Ocean. In the winter, the prevailing winds come from the southwest and are warmed slightly by the Atlantic Ocean. In the winter, the sound, bay, and ocean have buffering effects due to their accumulation of heat from the summer and fall months. This wind will therefore buffer the temperatures of the South Fork, as it passes over, however, by the time the wind passes over the colder land and Peconic Bay and reaches the North Fork, it has lost some of its warmth and has less of a buffering effect on the temperatures of the North Fork. These breezes, along with those coming off the Long Island Sound, will almost always keep winter minimum temperatures high enough to prevent commercial vine damage.

By the time spring arrives, the ocean has cooled somewhat from the low winter temperatures. Breezes coming

VOL 51 ISS 55 MR 21 1986 UMI

from the south at this time of year will therefore become cooled by the ocean, and as they pass over the warming land, a fog will often be produced. This fog will often become trapped on the South Fork and can reduce the accumulation of sunlight and warmth for vine growth. Therefore, in the springtime, the North Fork will usually have more sunshine earlier and also have a higher average temperature.

During the summer months the southern breezes coming off the South Fork and bay will keep the average temperatures of the North Fork slightly higher. As the winds pass over the South Fork, they travel over the Peconic Bay, which is a smaller body of water and hence warmer. During the summer, the North Fork of the Island also receives a greater number of thunder storms. These storms usually arrive from the west, and are pushed over towards the North Fork by the prevailing southwest winds.

During the fall, the North Fork of Long Island can also expect slightly warmer temperatures than the South Fork. Otherwise, both forks have the benefit of enjoying a fall season consisting of a lot of sunshine and normal amounts of precipitation. The ocean effect, which alters the climate of both the North and South Fork, is considerably reduced west of Riverhead, where the island widens. The petitioner claims it is this reason along with the increased blending of soil series, which keeps either Fork from being considered part of a large Long Island appellation.

The petitioner believes that although the amount of sunshine and rainfall can have an effect on the length of the growing season, the single most important factor is the number of days between the spring and fall frosts. In data taken from the Riverhead station on the North Fork and from the Bridgehampton station on the South Fork, the petitioner states that there are differences in the frost dates for both forks. During the 11-year period from 1973–1983, the number of days between frosts, or the length of the growing season averages 195 days at Riverhead (North Fork), 201 days at Greenport (North Fork) and 188 days at Bridgehamption (South Fork).

In 7 out of the 11 years recorded, there was anywhere from 1 to over 3 weeks longer growing season on the North Fork as compared to the South Fork.

The use of heat summation of "Growing-Degree Days" is also another standard for determining climatic differences in the grape-growing areas. Heat-summation is a standard developed by the University of California at Davis, and is the measurement of the mean monthly temperatures of a single area, above 50 degrees F. The importance of heat-summation above 50 degrees F (10 degrees C) as a factor in grape quality has been indicated by Koblet and Zwicky (1965) and also by Amerine and Winkler (1944). The University of California at Davis broke down various areas into 5 climatic regions. They are as follows:

Region I—Less than 2,500 degree days
Region II—2,501–3,000 degree days
Region III—3,001–3,500 degree days
Region IV—3,501–4,000 degree days
Region V—4,001 or more degree days

The average number of degree days for 1941 through 1970 at Riverhead (North Fork) and Bridgehampton (South Fork) are as follows:

Riverhead (North Fork)—2,932
Bridgehampton (South Fork)—2,531

From the period of 1941 and through 1970, the average number of heat summation days for the Riverhead Station (North Fork) placed them between the Regions II and III. During this same period, Bridgehampton (South Fork) was placed between the Region I and II. The Growing Degree Days average for the periods of 1973–1979 averages as follows:

Riverhead (North Fork)—2,987
Bridgehampton (South Fork)—2,572

Once again, it may be observed that during the period of 1973 through 1982, the area of the Riverhead Station (North Fork) varied between Regions II and III while Bridgehampton (South Fork) area varied between Regions I and II.

As the previous data has shown there are quite a few differences between the climate of the North Fork and that of the South Fork. From the following data, one will be able to see that the climate on the rest of Long Island is also significantly different from the climate found in the North Fork:

Days of Growing Season 1973–1982 Averages

Riverhead (North Fork)	194
Bridgehampton (South Fork)	184
Brookhaven Lab (10 miles west of North Fork)	152
Patchogue (20 miles southwest of North Fork)	177
Mineola (50 miles west of North Fork)	206
Central Park NYC (60 miles west of North Fork)	222

According to the petitioner, the previous data shows the differences in growing seasons that can occur from eastern to western Long Island. The Long Island Sound, Atlantic Ocean, and bay areas are the main reasons for the North Fork's buffered climate. As the forks merge into the main body of Long Island, the effect of these waters is greatly diminished especially with southwest winds prevailing. This is evident in the data shown for both Brookhaven and Patchogue. Brookhaven, located 10 miles west of the North Fork, can have as much as 50 days (almost 2 months) less growing season than Riverhead. Patchogue (located on the south shore about 20 miles from the North Fork) can also be seen to be as much as 45 days less, with most seasons being around 1–2 weeks less than Riverhead. The data given for Mineola (a large suburban area in Nassua County about 50 miles west) and Central Park-New York City (located 60 miles west), show the increasing effect of the buffering ocean winds as the western end of the island begins to narrow once again. A great deal of this effect as well, is most likely due to the great amount of industrial warmth supplied from what is largely an urban area.

The petitioner stated that the amount of heat summation or "growing degree days" accumulated in areas west of the North Fork also differs considerably. The following data is taken from the Brookhaven National Laboratory for the periods 1973 through 1979:

Growing Degree Days Averages

Riverhead (North Fork)	2,987
Brookhaven Nat. Lab. (10 miles west)	2,403

Over the period of 1973–1979, Brookhaven averaged 584 growing days less than Riverhead. This significant difference in heat summation correlates with the shorter growing season found there, as shown previously.

The main reason the climate differs west of the North Fork is due to the lesser effect of the ocean and bay on buffering temperatures. The following data shows further, the decreasing buffering effect of the winds of the North Fork:

Minimum Temperatures 1973–1982

	Average
Riverhead (North Fork)	+4
Patchogue (20 miles west—South Shore)	−1.7
Westbury (40 miles west—Central L.I.)	−1
Wantagh (45 miles west—South Shore)	+.5

From the previous data the area of Patchogue averaged 5.7 degrees (F) colder than Riverhead; the limited data on Wantagh also shows a 3.5 degree average lower temperature for the area. The North Fork is a much narrower strip of land than the main body of Long Island, and therefore the temperature of this area is buffered to a much greater degree than the wider area west of Riverhead.

Based on the evidence provided in this notice, it is the opinion of the petitioner, that the proposed boundary for the North Fork of Long Island appellation defines an area with unique climatic and soil conditions, different from the rest of Long Island.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this notice of proposed rulemaking because the proposal is not expected (1) to have significant secondary or incidental effects on a substantial number of small entities; or (2) to impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that the notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact nor compliance burdens on a substantial number of small entities.

Compliance With Executive Order 12291

It has been determined that this proposed rulemaking is not classified as a "major rule" within the meaning of Executive Order 12291, 46 FR 13193 (1981), because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographical regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Pub. L. 96–511, 44 U.S.C. Chapter 34, and its implementing regulations, 5 CFR Part 1320, do not apply to this notice because no requirement to collect information is proposed.

Public Participation—Written Comments

ATF requests comments from all interested persons concerning this proposed viticultural area. This document proposes possible boundaries for the "North Fork of Long Island" viticultural area. However, comments concerning other possible boundaries for this viticultural area will be given consideration.

Comments received before the closing date will be carefully considered. Comments received after the closing date and too late for consideration will be treated as possible suggestions for future ATF action.

ATF will not recognize any material in comments as confidential. Comments may be disclosed to the public. Any material which the commenter considers to be confidential or inappropriate for disclosure to the public should not be included in the comments. The name of the person submitting a comment is not exempt from disclosure.

Any interested person who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his or her requests, in writing, to the Director within the 45-day comment period. The Director, however, reserves the right to determine, in light of all circumstances, whether a public hearing will be held.

Drafting Information

The principal author of this document is Edward A. Reisman, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

Authority and Issuance

PART 9—[AMENDED]

27 CFR Part 9—American Viticultural areas is amended as follows:

Par. 1. The authority citation for Part 9 continues to read as follows:

Authority: 27 U.S.C. 205.

Par. 2. The table of contents in 27 CFR Part 9, Subpart C, is amended to add the title of 9.113 to read as follows:

Subpart C—Approved American Viticultural Areas

Sec.
9.113 North Fork of Long Island

Par. 3. Subpart C is amended by adding 9.113 to read as follows:

Subpart C—Approved American Viticultural Areas

§ 9.113 North Fork of Long Island.

(a) *Name.* The name of the viticultural area described in this section is "North Fork of Long Island."

(b) *Approved Maps.* The appropriate maps for determining the boundaries of the "North Fork of Long Island" viticultural area are 5 U.S.G.S. maps. They are entitled:

(1) Wading River, N.Y. 7.5 minute series, scaled at 1:24,000, edition of 1967.

(2) Riverhead, N.Y. 7.5 minute series, scaled at 1:24,000, edition of 1956.

(3) New York, N.Y.; N.J.; Conn., U.S. 1:250,000 series, scaled at 1:250,000, edition of 1960, revised 1979.

(4) Providence, R.I.; Mass.; Conn.; N.Y., U.S., 1:250,000 series, scaled at 1:250,000, edition of 1947, revised 1969.

(5) Hartford, Conn.; N.Y.; N.J.; Mass., U.S. 1:250,000 series, scaled at 1:250,000, edition of 1962, revised 1972.

(c) *Boundaries.* The boundaries of the proposed viticultural area are as follows:

The proposed North Fork of Long Island viticultural area is located entirely within eastern Suffolk County, Long Island, New York. The proposed viticultural area boundaries consist of all of the land areas of the North Fork of Long Island, New York, including all of the mainland, shorelines and islands in the Townships of Riverhead, Shelter Island and Southold, New York.

(1) The point of beginning is on the Wading River, N.Y., 7.5 minute series U.S.G.S. map at the northern boundary of the Brookhaven/Riverhead Township lines on the Long Island Sound approximately 500 feet east of the mouth of the Wading River;

(2) The boundary goes south on the Brookhaven/Riverhead Town line for approximately 6.5 miles until it meets the Peconic River approximately 1 mile east of U.S. Reservation Brookhaven National Laboratory;

(3) Then the boundary travels east on the Peconic River (Brookhaven/Riverhead Town line) for 2.7 miles until it meets the Riverhead/Southampton Township line on the Riverhead, N.Y. U.S.G.S. map;

(4) It then goes east on the (Riverhead/Southampton Township line) for 4.2 miles until it reaches an area where the Peconic River widens north of Flanders;

(5) Then the boundary proceeds east to Orient Point then west along the shoreline, beaches, islands and mainland areas of the North Fork of Long Island described on the "New York," "Providence," and "Hartford"

VOL
51
ISS

BILLING CODE 4810-31-M

POSTAL SERVICE

39 CFR Parts 310 and 320

Restrictions on Private Carriage of Letters; Withdrawal of Proposed Rule; Advance Notice of Proposed Rulemaking and Request for Information

AGENCY: Postal Service.

ACTION: Withdrawal of proposed rule; advance notice of proposed rulemaking and request for information.

SUMMARY: On October 10, 1985, the Postal Service published in the Federal Register (50 FR 41462) a proposed modification and clarification of the regulations on the Private Express Statutes, with minor and procedural revisions on October 22, 1985 (50 FR 42729) and November 8, 1985 (50 FR 46464). The proposed rule, which is hereby being withdrawn, dealt for the most part with the carriage of international letters by private firms who remail them outside the United States.

The Postal Service received a significant number of comments on the proposed rule. Following review of the comments, the Chairman of the Board of Governors of the Postal Service issued a statement, which is reproduced below. The Chairman noted, among other things, that the remail issue has generated considerable controversy about the proper scope of the Private Express Statutes and implementing regulations. Accordingly, the Chairman announced that a new rulemaking proceeding will be initiated as soon as a factual record is fully developed. The Postal Service has sent a letter to each commenter, a sample of which is reproduced below, requesting information for that record. The principal purpose of this notice is to request the same information from other members of the public.

DATE: Withdrawal of the proposed rule is effective March 20, 1986. Comments and information needed to develop a full and factual record must be received on or before April 30, 1986.

ADDRESS: Written comments and information should be addressed to the General Counsel, Law Department, United States Postal Service, Washington, DC 20260-1113. Copies of all written comments will be available for inspection and photocopying between 9:00 a.m. and 4:00 p.m., Monday through Friday, in Room 5128, 955 L'Enfant Plaza, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Charles D. Hawley, (202) 268-2970.

SUPPLEMENTARY INFORMATION: As noted above, the Postal Service is undertaking to develop a factual record in preparation for a new rulemaking proceeding and has sent a letter to each commenter soliciting information for that record. The Postal Service requests the same information from other members of the public. Accordingly, a sample of the letter is reproduced here, along with the Statement of the Chairman of the Board.

List of Subjects in 39 CFR Parts 310 and 320

Postal Service, Computer technology, Advertising.

W. Allen Sanders,

Associate General Counsel, Office of General Law and Administration.

March 14, 1986.

Dear ———: For the reasons more fully discussed in the enclosed statement by John McKean, Chairman of the Board of Governors, the Postal Service is undertaking to gather information and develop a factual record in preparation for the initiation of a new rulemaking proceeding relating to the practice of international remailing. We are writing to you, as a person who submitted comments in response to our earlier notice of proposed rulemaking on this subject, to solicit information for that record.

The particular focus of our inquiry is the appropriate scope of a new suspension of the Private Express Statutes which may be necessary to serve the interests of our customers. We solicit information from you as to the kind or kinds of private services which in your experience have met, or in your estimation would meet, your needs or the needs of the public, with respect to letters being sent to addressees in foreign countries, more satisfactorily than those provided by the postal Service. Of greatest value to us in this respect would be information that addresses such points as the following:

- The nature of the correspondence;
- The degree of urgency and the type of harm that would be caused by delay;
- Any differential in promptness of service between letters that are "remailed" and those sent through the Postal Service;
- Whether the correspondence is eligible for private carriage under the current loss-of-value test of the suspension for extremely urgent letters (see 39 CFR 320.6 (b), copy attached);
- The extent to which the correspondence is intra-company;
- The extent to which letters privately carried to foreign countries are "remailed" or are delivered to the adresses by private means;
- Any estimate of the volume of letters "remailed" over the past year;
- Any differential in cost between letters privately carried and letters sent through the Postal Service;
- The extent to which considerations of cost rather than speed of delivery determine the choice of carrier for letters sent overseas; and
- The extent to which a suspension for remailing would preserve the benefits of desirable competition between the Postal Service and private companies.

This is by no means an exhaustive list of points that may be material to the development of the full factual record that we need as a basis for proposing a new suspension of the Statutes. We welcome any additional information and urge that it be as factual and specific as possible. We also solicit your views as to the scope of a suspension which will best serve the relevant interests, and we invite you to suggest specific language for an implementing regulation.

We anticipate proceeding in accordance with the following schedule:

April 30, 1986—Responses due to solicitation of information for factual record.

May 22-23, 1986—Meeting with interested persons to discuss responses and parameters of proposed suspension.

June 16, 1986—Publish notice of proposed rulemaking in Federal Register.

July 16, 1986—Comments due on proposed rule.

August 29, 1986—Publish notice of final rule.

We ask that you send your response so as to reach me not later than Wednesday, April 30, 1986.

We are withdrawing the earlier proposal in order to avoid uncertainty over its status while this new proceeding is pending. To the extent that the earlier proposal dealt with the suspension for extremely urgent letters on matters other than international remailing, we anticipate initiating a further proposal in the near future.

If you have questions, my telephone number is (202) 268-2970.

Sincerely,

Charles D. Hawley,

Assistant General Counsel, General Administrative Law Division, Law Department.

Enclosures.

39 CFR 320.6(b)

(b)(1) For letters dispatched within 50 miles of the intended destination, delivery of those dispatched by noon must be completed within 6 hours or by the close of the addresse's normal business hours that day, whichever is later, and delivery of those dispatched after noon and before midnight must be completed by 10 A.M. of the addresse's next business day. For other letters, delivery must be completed within 12 hours or by noon of the addressee's next business day. The suspension is available only if the value or usefulness of the letter would be lost or greatly diminished if it is not delivered within these time limits. For any part of the shipment of letters to qualify under this paragraph (b), each of the letters must be extremely urgent.

(2) Letters sent from the 48 contiguous states of the United States to other jurisdictions of the United States or to other nations are deemed "delivered" when they are in the custody of the international or overseas carrier at its last scheduled point of departure from the 48 contiguous states. Letters sent from other jurisdictions of the United States or from other nations into the 48 contiguous states are deemed "dispatched" when they are in the custody of the domestic carrier, having been passed by United States Customs, if applicable, at the letters' point of arrival in the 48 contiguous states.

(3) Except as provided in this paragraph (b)(3), the times and time limits specified in paragraph (b)(1) of this section are not applicable to any locations outside the 48 contiguous states. The times and time limits specified in paragraph (b)(1) are applicable to letters dispatched and delivered wholly within Alaska, Hawaii, Puerto Rico or a territory or possession of the United States. The regulations provided in paragraph (b)(2) relating to the delivery and dispatch of letters are applicable by analogy to letters shipped between these jurisdictions and other nations.

Statement of John R. McKean, Chairman, United States Postal Service Board of Governors, on Remail Issue

March 4, 1986

As some of you may be aware, the Postal Service recently initiated a rulemaking concerning its regulations under the Private Express Statutes. That rulemaking involved the rules bearing on the carriage of international mail by private firms who remail it outside the United States.

In response to this proposed rulemaking, the Postal Service has received a significant number of comments. The Board of Governors has been kept informed of the nature of these comments.

The remail issue has generated considerable controversy about the proper scope of the monopoly under which we operate. It is worth emphasizing that Congress entrusted us with this monopoly not for our own benefit but in order to let us better serve the American people. The critical question raised by this rulemaking is whether enforcement of the monopoly in this context would advance or retard consumer welfare and the interests of this nation.

It is the sense of the Board that private sector competition with the Postal Service in the provision of international remailing services can—and already does—produce significant benefits for the public. Ultimately, even the Postal Service itself can benefit from this kind of competition.

Many businesses appear to view the private sector alternative as preferable to the service we are providing—preferable in terms of price and service. That tells us something important about the way we are now doing our job in this area. The monopoly was not intended to protect us from having to face up to our own shortcomings. I am glad to say that the competition from private remailers has already spurred us on to improve our own efforts and be more competitive in providing international mail services.

As things now stand, therefore, remail services would appear to advance consumer welfare while at the same time fostering innovation and economic efficiency.

The Board of Governors does not believe that any attempt to suppress this kind of competition would advance the long-term objectives of the Postal Reorganization Act or otherwise enhance the welfare of our customers and the American people. Yet we have to deal with the laws and regulations now on the books. As now drafted, they do not appear to leave room for the lawful operation of international remail services. At the very least there is a serious question on this point.

The Board of Governors believes that the appropriate course of action under these circumstances is to change our regulations to make them conform to sound public policy. Accordingly, we are announcing today that the Postal Service will soon be initiating another rulemaking proceeding, this time to remove the cloud that now hangs over the international remail services and preserve the benefits of desirable competition between the Postal Service and private companies.

The Private Express Statutes permit us to suspend their application when the public interest so requires. Such a suspension must be predicated on a fully developed factual record. The Postal Service intends to take the steps necessary to gather information in this regard and proceed with a new rulemaking as quickly as possible.

Private land mobile radio services, Radio.

In the matter of Amendment of Part 90 of the Commission's rules to permit secondary fixed tone signalling and alarm operations by end users of trunked SMRS systems; [PR Docket No. 86-78].

VOL 51
ISS 55
MR 21
1986
UMI

This is a summary of the Commission's notice of proposed rule making, PR Docket No. 86–78, Adopted March 6, 1986, and released March 13, 1986.

The full text of Commission decisions are available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of the Notice of Proposed Rule Making

1. On November 5, 1985, the American SMR Network Association, Inc. (ASNA) petitioned the Commission to amend Part 90 of the rules and regulations to allow trunked Specialized Mobile Radio Service (SMRS) end users to conduct fixed operations on mobile service frequencies. The rule changes sought by ASNA would simply extend to end users of trunked 800 MHz SMRS systems the same option available to licensees in certain Public Safety and Industrial Radio Services of using mobile service frequencies for fixed signalling operations. Under the ASNA proposal such fixed use would be secondary to base/mobile communications and subject to the technical limitations put forth in § 90.235.

2. In response to the ASNA petition the Commission proposed to allow trunked SMRS end users to conduct fixed tone signalling and alarm operations on their authorized mobile service frequencies. It was the Commission's belief that allowing such operations would facilitate more effective use of these channels without significantly increasing the potential for interference. Under the Commission proposal any such fixed use must meet the technical requirements specified under § 90.235. Further any fixed transmitters would not count toward meeting the Commission's loading requirements specified in §§ 90.366 and 90.631.

3. This is a non-restricted notice and comment rulemaking proceeding. *See* § 1.1231 of the Commission's rules, 47 CFR 1.1231, for rules governing permissible *ex parte* contacts.

4. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 605, it is certified that the proposed rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

5. The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or record keeping, labeling, disclosure, or record retention requirements; and will not increase or decrease burden hours imposed on the public.

6. Accordingly, notice is hereby given of rule making to amend Part 90 of the Commission's rules and regulations, in accordance with the proposal set forth in the attached Appendix. The proposed amendment to the rules is issued pursuant to authority contained in sections 4(i) 303(b), 303(f), 303(g), and 303(i) of the Communications Act, as amended.

7. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.1415 and 1.419, interested parties may file comments on or before May 5, 1986, and reply comments on or before May 20, 1986. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Part 90 of the Commission's Rules is proposed to be amended as follows:

PART 90—[AMENDED]

1. The authority citation for Part 90 continues to read as follows:

Authority: Sections 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303 unless otherwise noted.

2. Section 90.235 is amended by revising the introductory paragraph, adding a new paragraph (c) and changing old paragraph (c) to (d).

§ 90.235 Secondary fixed tone signalling and alarm operations.

In the Local Government, Police, Fire, Highway Maintenance, Forestry Conservation, Power, and Petroleum Radio Services, fixed operations may be authorized for tone or impulse signalling on mobile service frequencies above 25 MHz within the area normally covered by the licensee's mobile system. Such operations will be on a secondary basis to the primary mobile service operation of any other licensee. Such fixed operations are also permitted on trunked SMR systems operating on frequencies available under Subpart M or frequencies in the SMRS Pools listed in Subpart S of this Part.

(a) * * *

(b) * * *

(c) Secondary fixed signalling on frequencies authorized under Subpart M or on SMRS Pool frequencies authorized under Subpart S may be used for any of the purposes specified in subparagraphs (a) and (b) of this section.

(d) All such secondary signalling shall be subject to the following requirements:

Deprtment of Defense Federal Acquisition Regulation Supplement Cost and Price Management

Correction

In FR Doc. 86–4471 beginning on page 7296 in the issue of Monday, March 3, 1986, make the following correction: In the sixth line of the "DATE" paragraph, "DAR Case 85–215" should read "DAR Case 85–219".

BILLING CODE 1086-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

Migratory Bird Hunting; Proposed 1986–87 Migratory Game Bird Hunting Regulations (Preliminary)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rulemaking.

SUMMARY: The U.S. Fish and Wildlife Service (hereinafter the Service) proposes to establish hunting seasons, daily bag and possession limits, and shooting hours for designated groups or species of migratory game birds in the conterminous United States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands during 1986–87. The Service annually prescribes migratory bird hunting regulations. These regulations provide hunting opportunities, a popular form of outdoor recreation, to the public and aid Federal and State governments in the management of migratory game birds. The Service also proposes to amend § 20.1 of 50 CFR Part 20 by adding a paragraph that serves to clarify the conditions under which a memorandum of understanding between the Service and Indian tribes on the management of migratory birds within a reservation or Indian Territory may be employed and permits such agreements to be formalized.

DATES: The comment period for proposed regulations frameworks for Alaska, Hawaii, Puerto Rico, and the Virgin Islands will end on June 19, 1986; for other early-season proposals (seasons opening before October 1) on July 14, 1986; and for late-season proposals (seasons opening on or about October 1 or later) on August 25, 1986. The comment period on the proposal to amend § 20.1 will end May 1, 1986. Public Hearings: Early-Season Regulations, including those for Alaska, Hawaii, Puerto Rico, and the Virgin Islands—June 19, 1986, at 9 a.m.; Late-Season Regulations—August 1, 1986, at 9 a.m.

ADDRESSES: Comments and requests to testify may be mailed to Director, (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Matomic Building, Room 536, Washington, DC 20240. Comments received may be inspected from 8 a.m. to 4 p.m. at the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Room 536, Matomic Building, 1717 H Street, NW., Washington, DC. Both public hearings will be held in the Auditorium, Interior Department Building, 18th and C streets, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Rollin D. Sparrowe, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, DC 20240 (202) 254–3207.

SUPPLEMENTARY INFORMATION: The Fish and Wildlife Service proposes to establish hunting seasons, bag and possession limits, and shooting hours for migratory game birds during 1986–87 under §§ 20.101 through 20.107 of subpart K of 50 CFR 20.

"Migratory game birds" are those migratory birds so designated in conventions between the United States and several foreign nations for the protection and management of these birds. During the 1986–87 hunting season, regulations are proposed for certain designated members of the avian families *Anatidae* (ducks, geese, brant, and swans); *Columbidae* (doves and pigeons); *Gruidae* (cranes); *Rallidae* (rails, coots, and moorhens and gallinules); and *Scolopacidae* (woodcock and snipe). These proposals are described under Proposed 1986–87 Migratory Game Bird Hunting Regulations (Preliminary) in this document.

Notice of Intention To Establish Open Seasons

The notice announces the intention of the Director, U.S. Fish and Wildlife Service, to establish open hunting seasons, daily bag and possession limits, and shooting hours for certain designated groups or species of migratory game birds for 1986–87 in the contiguous United States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands.

Factors Affecting Regulations Process

This is the first in a series of proposed and final rulemaking documents for migratory game bird hunting regulations. Proposed shooting hours and season frameworks, including daily bag and possession limits, are set forth for various groups of migratory game birds for which these regulations ordinarily do not vary significantly from year to year.

The proposals set forth here and the schedule by which more detailed proposals for these and other species will be developed depend upon a number of factors. Among these are the times when various annual population, habitat, and harvest surveys are conducted and results are available for analysis; times of migration and other biological considerations; and times during which hunting may be allowed. The regulatory process for migratory game birds is strongly influenced by the times when the best and latest information is available for consideration in the development of regulations. For these reasons, the overall regulations process for hunting seasons and limits is divided into the following segments: (1) Regulations for migratory game birds in Alaska, Puerto Rico, the Virgin Islands, and Hawaii; (2) seasons in the remainder of the United States opening prior to October 1 (early seasons); and (3) seasons opening in the remainder of the United States about October 1 and later (late seasons). Regulations development for each of the three categories will follow similar but independent schedules. Proposals relating to the harvest of migratory game birds that may be initiated after publication of this proposed rulemaking will be made available for public review in supplemental proposed rulemakings to be published in the **Federal Register**. Also, additional supplemental proposals will be published for public comment in the **Federal Register** as population, habitat, harvest, and other information becomes available.

Because of the late dates when certain of these data become available, it is anticipated that comment periods on some proposals will necessarily be abbreviated. Special circumstances that limit the amount of time which the Service can allow for public comment are involved in the establishment of these regulations. Specifically, two considerations compress the time in which the rulemaking process must operate: the need, on one hand, to establish final rules at a time early enough in the summer to allow State agencies to adjust their licensing and regulatory mechanisms and, on the other hand, the lack before late-July of current data on the status of most waterfowl.

Publication of Regulatory Documents

The establishment of migratory bird hunting regulations in the United States involves a series of regulatory announcements published in the **Federal Register** in accordance with the Administrative Procedure Act. The publication of these documents is divided into three phases, as follows:

1. Proposed rulemakings—proposals to amend Subpart K (and other subparts when necessary) of 50 CFR Part 20, including supplementary proposed migratory game bird hunting regulations, and/or regulations frameworks which prescribe shooting hours, season lengths, bag and possession limits, and outside dates within which States may make season selections.

2. Final rulemakings—frameworks. Final migratory game bird regulations frameworks which prescribe shooting hours, season lengths, bag and possession limits, and outside dates within which States may make season selections.

3. Final rulemakings—season selections. Amendments to the various specific sections of Subpart K (and other subparts when necessary) of 50 CFR Part 20 based on the final regulations frameworks and on season selections communicated by the States to the Service.

Major steps in the 1986–87 regulatory cycle relating to public hearings and **Federal Register** notifications are illustrated in the accompanying diagram.

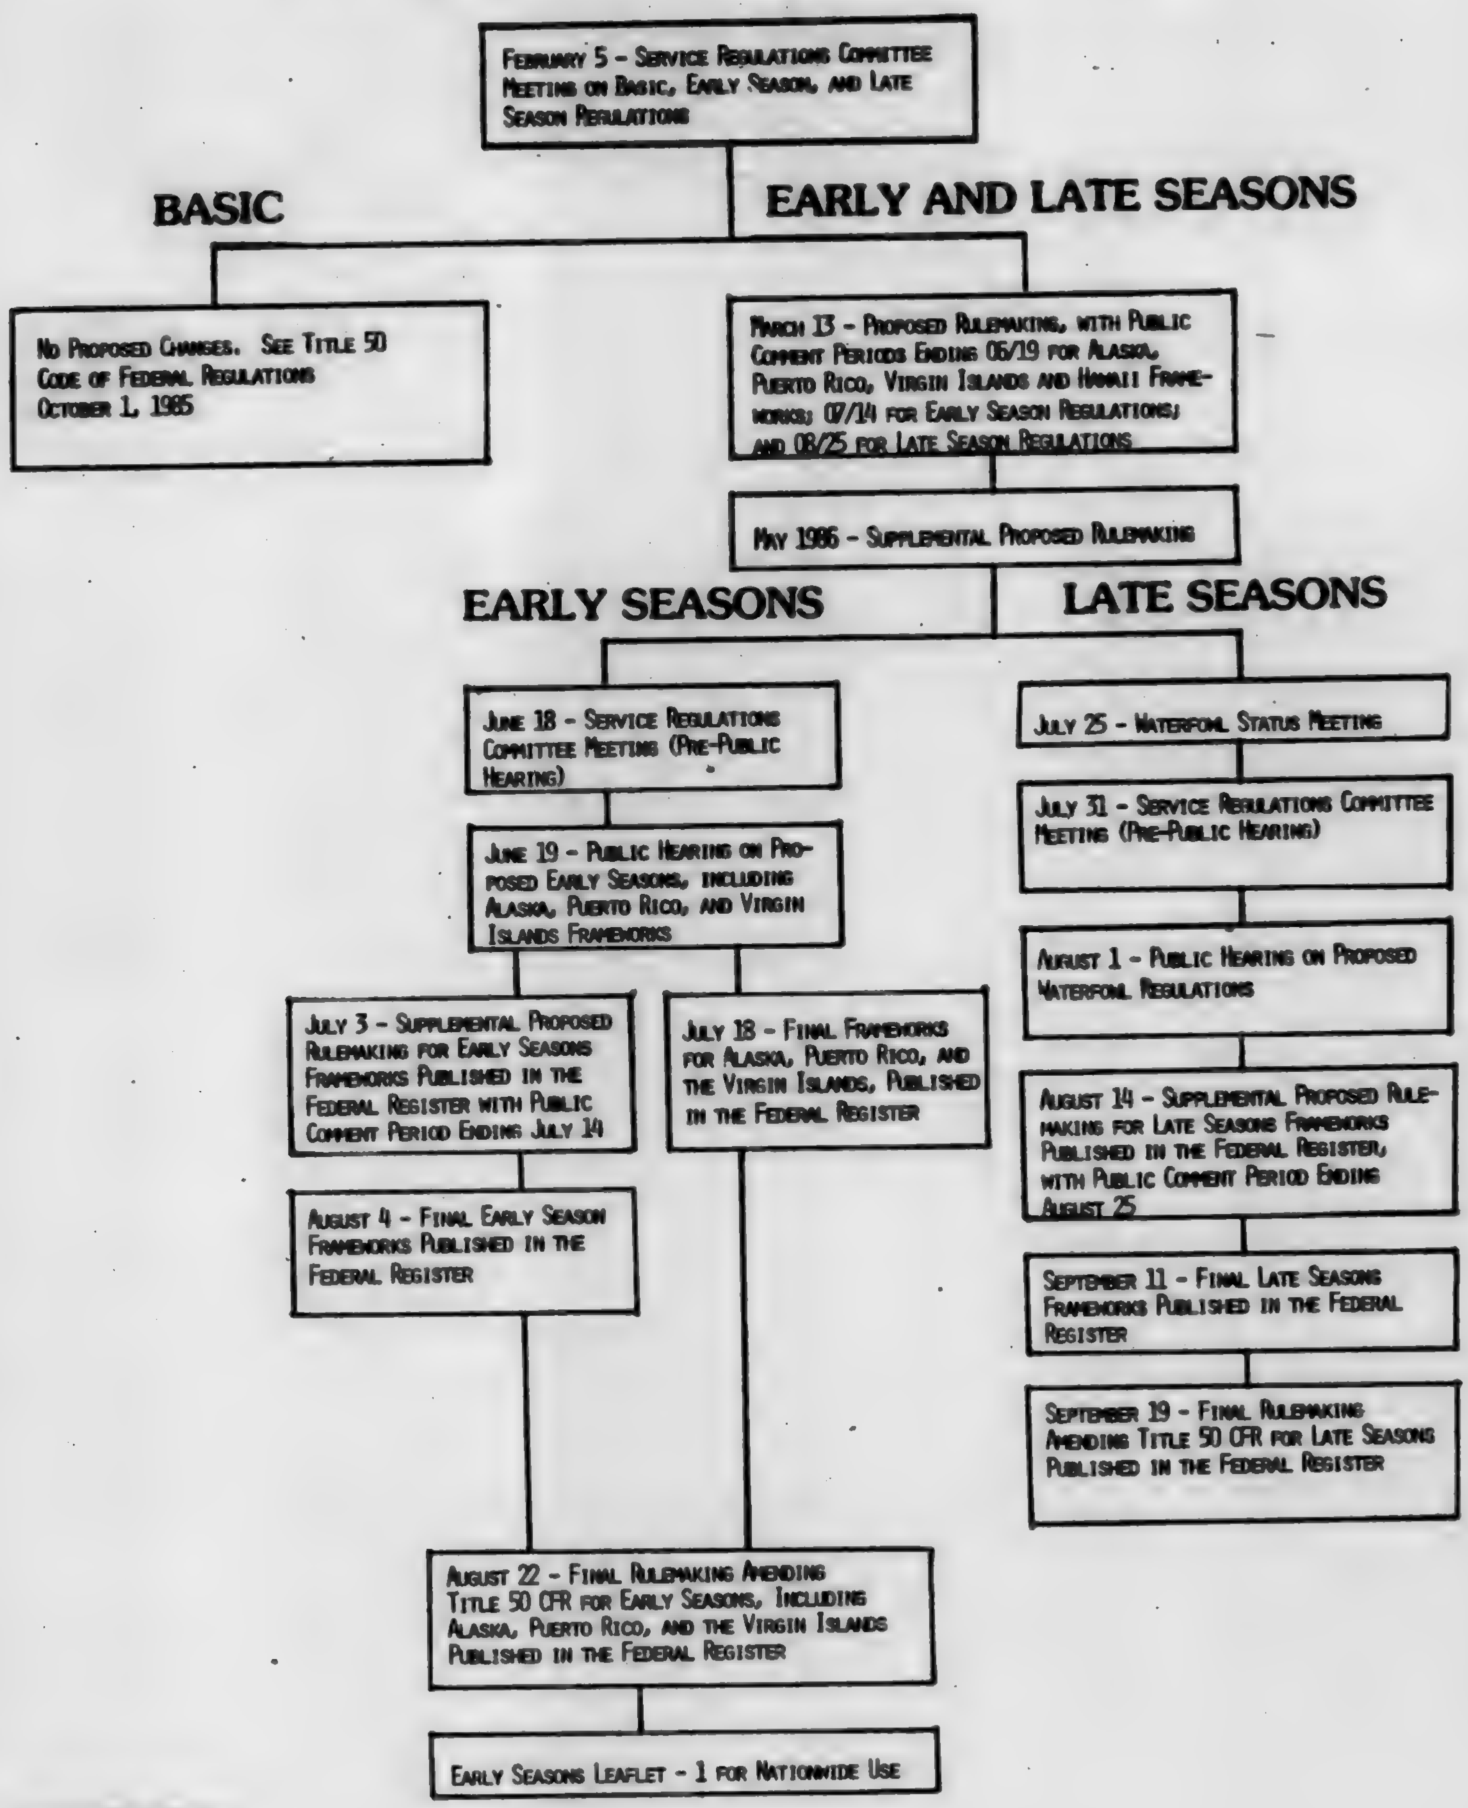
1986 SCHEDULE OF REGULATIONS MEETINGS AND FEDERAL REGISTER PUBLICATIONS



February 5 - Service Regulations Committee Meeting on Basic, Early Season, and Late Season Regulations
BASIC
EARLY AND LATE SEASONS
No Proposed Changes. See Title 50 Code of Federal Regulations October 1, 1985
March 13 - Proposed Rulemaking, with Public Comment Periods Ending 06/19 for Alaska, Puerto Rico, Virgin Islands and Hawaii Frameworks; 07/14 for Early Season Regulations; and 08/25 for Late Season Regulations
May 1986 - Supplemental Proposed Rulemaking
EARLY SEASONS
LATE SEASONS
June 18 - Service Regulations Committee Meeting (Pre-Public Hearing)
June 19 - Public Hearing on Proposed Early Seasons, including Alaska, Puerto Rico, and Virgin Islands Frameworks
July 3 - Supplemental Proposed Rulemaking for Early Seasons Frameworks Published in the Federal Register with Public Comment Period Ending July 14
July 18 - Final Frameworks for Alaska, Puerto Rico, and the Virgin Islands, Published in the Federal Register
August 4 - Final Early Season Frameworks Published in the Federal Register
August 22 - Final Rulemaking Amending Title 50 CFR for Early Seasons, Including Alaska, Puerto Rico, and the Virgin Islands Published in the Federal Register
Early Seasons Leaflet - 1 for Nationwide Use
July 25 - Waterfowl Status Meeting
July 31 - Service Regulations Committee Meeting (Pre-Public Hearing)
August 1 - Public Hearing on Proposed Waterfowl Regulations
August 14 - Supplemental Proposed Rulemaking for Late Seasons Frameworks Published in the Federal Register, with Public Comment Period Ending August 25
September 11 - Final Late Seasons Frameworks Published in the Federal Register
September 19 - Final Rulemaking Amending Title 50 CFR for Late Seasons Published in the Federal Register

BILLING CODE 4310-55-C

All dates shown for frameworks and seasons in the Service's regulatory documents are inclusive.

Non-toxic shot regulatory proposals and final regulations are published separately under § 20.21 of subpart C and § 20.108 of Subpart K.

Objectives of the Migratory Bird Hunting Regulations

The objectives of these annual regulations are as follows:

1. To provide an opportunity to harvest a portion of certain migratory game bird populations by establishing legal hunting seasons.
2. To limit harvest of migratory game birds to levels compatible with their ability to maintain their populations.
3. To avoid the taking of endangered or threatened species so that their continued existence is not jeopardized, and their conservation is enhanced.
4. To limit taking of other protected species where there is a reasonable possibility that hunting is likely to adversely affect their populations.
5. To provide equitable hunting opportunity in various parts of the country within limits imposed by abundance, migration, and distribution patterns of migratory game birds.
6. To assist, at times and in specific locations, in preventing depredations on agricultural crops by migratory game birds.

The management of migratory birds in North America is international in scope, and involves other nations, notably Canada and Mexico. Within the United States, other Federal agencies, State conservation agencies, national and regional conservation groups, universities, and the public provide much support to the achievement of these objectives.

Data Used in Regulatory Decisions.

The establishment of hunting regulations for migratory game birds in the United States during the 1986–87 season will take into consideration available population information, data from harvest surveys, and information on habitat conditions. Consideration will also be given to accumulated data and trends. The main sources of data result from operational surveys conducted by the U.S. Fish and Wildlife Service in cooperation with the Canadian Wildlife Service, Direccion General de la Flora y Fauna Silvestres of Mexico, State and Provincial wildlife agencies, and others. The Service will also consider technical information provided by consultants of the four waterfowl flyway councils. The information from these sources will be analyzed by the Service with an opportunity for the public to review and provide comments on management rationales and proposed regulations, either in public hearings, by correspondence, or other communications.

Various surveys are used to ascertain the status, condition, and trends of migratory game bird populations. These include annual surveys of major waterfowl wintering habitats in the United States and in portions of Mexico each January; aerial surveys of major waterfowl production areas in the United States and Canada in May and early June for breeding population data, and again in July for production information; nationwide surveys in the United States and Canada of waterfowl hunters and the waterfowl harvest, including their geographical and temporal distributions, and species, age, and sex composition of the harvest; and band recovery information. Waterfowl breeding pair and production surveys also provide information on the abundance, duration, and quality of water and other habitat conditions in major production areas. Information on waterfowl populations and habitat conditions outside the aerial survey area is furnished by cooperating State, Provincial, and private agencies. Banding information provides insight into shooting pressures sustained by migratory game bird populations under different population levels and types of regulations. When viewed over many years, information on harvests and regulations is useful for predicting approximate harvest levels which may result from various regulations changes.

Many of the surveys conducted primarily for ducks also provide information on geese. In addition, satellite imagery is used to monitor the rate at which snow and ice disappear from subarctic and arctic breeding grounds traditionally used by most species and the greatest numbers of North American geese. Field observations of geese in the fall and winter also provide information on the production success of the past breeding season. Special population surveys are undertaken for many identifiable populations of geese throughout the year.

An annual call-count survey conducted nationwide in the United States in late May and early June provides information on the breeding population of mourning doves. Information from past years and the current year is used to establish population trends. An annual singing-ground survey is conducted throughout the woodcock breeding range in the eastern United States and Canada. Insight into production success is obtained from wing-collection surveys of woodcock hunters in the United States and Canada; data from these surveys indicate the age and sex composition of the harvest and its geographical and temporal distribution. Accumulated and current data are examined for possible long-term trends in population size and productivity. Information on white-winged dove populations in Texas and the Southwest is provided by cooperating State agencies. Spring surveys of sandhill cranes are conducted annually with emphasis on the key staging area of the species along the Platte River in central Nebraska. The Service also solicits information on these and other species from knowledgeable individuals. Last year the Service continued the study to determine if its Waterfowl Harvest Survey can be adjusted to measure harvest trends in migratory shore and upland game birds. Results should be made available in March 1986.

Definitions of Flyways

Flyways are administrative units with broad biological-ecological similarities frequently used for reference in setting hunting regulations on many migratory game birds. These are defined as follows:

Atlantic Flyway: Connecticut, Delaware, Florida, Georgia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, and West Virginia.

Mississippi Flyway: Alabama, Arkansas, Illinois, Indiana, Iowa, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Ohio, Tennessee, and Wisconsin.

Central Flyway: Kansas, Nebraska, North Dakota, Oklahoma, South Dakota, and Texas; Colorado and Wyoming east of the Continental Divide; Montana east of Hill, Chouteau, Cascade, Meagher and Park Counties; and New Mexico east of the Continental Divide but outside the Jicarilla Apache Indian Reservation.

Pacific Flyway: Arizona, California, Idaho, Nevada, Oregon, Utah, and Washington; those portions of Colorado and Wyoming lying west of the Continental Divide; New Mexico west of the Continental Divide plus the Jicarilla Apache Indian Reservation; and in Montana, the counties of Hill, Chouteau, Cascade, Meagher, and Park, and all counties west thereof. Flights of most migratory game birds breeding or produced in Alaska are more strongly

VOL
51
ISS
55
MR
21
1986
UMI

oriented to this flyway than to the other flyways.

Definitions of Mourning Dove Management Units

Mourning Dove Management Units are administrative units based upon a reasonable delineation of independent mourning dove population segments encompassing the principal breeding, migration, and United States wintering areas for each population. They are used for reference in setting mourning dove hunting regulations and are defined as follows:

Eastern Management Unit: Alabama, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, and Wisconsin.

Central Management Unit: Arkansas, Colorado, Iowa, Kansas, Minnesota, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming.

Western Management Unit: Arizona, California, Idaho, Nevada, Oregon, Utah, and Washington.

Stabilized Regulations for Duck Hunting

In 1979, a five-year program of stabilized waterfowl hunting regulations was initiated in Canada through the cooperation of the Canadian Wildlife Service and the 3 Prairie Provinces. In 1980 the U.S. Fish and Wildlife Service, with support from the Flyway Councils and other organizations, joined Canada in this program by stabilizing season lengths and bag limits for a 5-year period beginning with the 1980–81 season at the 1979–80 hunting season level. During this five-year program, Canada and the United States have cooperated in investigating the relationship between duck populations and ducks harvests continentally in the absence of annual changes in season lengths and bag limits. The July 1, 1980 **Federal Register** (at 45 FR 44546) advised that the Service planned to take this action in connection with an evaluation program to be conducted in cooperation with the Canadian Wildlife Service. The immediate goal of the study is to develop a strategy to manage duck harvests. The long-term goal is to identify management steps to maintain North American duck populations.

Cooperative U.S.-Canadian investigations of the stabilized regulations program have focused on the mallard. Although, the 1984–85 hunting season marked the final harvest period in the program, field activities, including banding, radio-telemetry, and nesting studies continued through 1985. Because of the time required for analysis and interpretation of data collected, a final, comprehensive report on the evaluation of stabilized regulations will not be available until late 1986.

Migratory Bird Hunting on Indian Reservations

In the September 3, 1985, **Federal Register** (50 FR 35762), the Service implemented interim guidelines for establishing special migratory bird hunting regulations on Federal Indian reservations, Indian Territory, and ceded lands, and amended Section 20.110 of 50 CDE Part 20 by prescribing final hunting regulations for certain tribes in the 1985–86 hunting season. The guidelines provide appropriate flexibility for tribes members to exercise their reserved hunting rights while ensuring that the migratory bird resource receives necessary protection. On December 5, 1985, (at 50 FR 49670), the Service gave notice of its intent to continue to employ the interim guidelines and establish special migratory bird hunting regulations for interested Indian tribes in the 1986–87 hunting season. The Service recognizes that some changes in the guidelines may be necessary and has kept the comment period on them open indefinitely. Use of the guidelines is not necessary if a tribe wishes to observe the hunting regulations established in the State(s) in which the reservation is located.

One of the guidelines applies solely to hunting by tribal memberss with reserved hunting rights on their reservations (including Indian Territory). It provides for hunting regulations outside of usual Federal frameworks but consistent with the closed season requirement mandated by the 1916 Migratory Bird Treaty with Canada. In an August 21, 1985, environmental assessment and in development of the guidelines, the Service concluded that the migratory bird harvest by tribal hunters was not large and indicated the intention of employing a memorandum of understanding to reach mutual agreement on hunting regulations with interested tribes that wish for the Service to recognize their traditional hunting practices. The Service proposes to amend § 20.1 (Scope of regulations) of 50 CFR Part 20 by adding a paragraph to clarify the conditions under which a memorandum of understanding may be employed and to permit such agreements to be made. The paragraph is as follows:

(c) *Hunting by tribal members on Federal Indian Reservations.*

The regulations contained in this Part do not apply to the taking, possession, or transportation of migratory game birds by members of Federally-recognized Indian tribes if: (1) Such taking, possession, or transportation occurs within the boundaries of the tribe's reservation (including Indian Territory); (2) the tribal government has entered into a memorandum of understanding with the U.S. Fish and Wildlife Service on the management of migratory birds within the reservation or Indian Territory; and (3) the tribal members possess legitimate hunting rights created or reserved by treaty, statute, Executive order, agreement, or other law.

The Service welcomes comments on this proposal. All such comments should be submitted to the Service by May 1, 1986, at the address shown under the addresses section of this document.

Subsistence Hunting in Alaska

On January 24, 1986, the U.S. District Court in Alaska ruled that the Migratory Bird Treaty Act did not apply to Native subsistence hunting for migratory birds in Alaska. *Alaska Fish and Wildlife Federation and Outdoor Council* v. *Jantzen*, No. J84–013 CIV. The Court ruled that subsistence hunting in Alaska is governed by the 1925 Alaska Game Law of 1925, 43 Stat. 739, as amended, 54 Stat. 1103–04 (1940). Under the Court's order, Alaska Natives may harvest migratory waterfowl during any season of the year when they are in need of food and other sufficient food is not available until such time as the Department adopts regulations pursuant to section 3(h)(2) of the Fish and Wildlife Improvement Act, 16 U.S.C. § 712(1).

The Service is assessing this decision in order to determine what action is needed for the 1986 and 1987 spring and summer subsistence hunting seasons in Alaska. The Service will announce any actions to be taken in a future **Federal Register** notice(s).

Hearings

Two public hearings pertaining to 1986–87 migratory game bird hunting regulations are scheduled. Both meetings will be conducted in accordance with 455 DM 1 of the Department Manual. One June 19 a public hearing will be held at 9 o'clock in the Auditorium of the Department of the Interior Building, on C Street, between 18th and 19th Streets, NW., Washington, DC. This hearing is for the purpose of reviewing the status of mourning doves, woodcock, band-tailed pigeons, white-winged and white-tipped doves, rails, gallinules, common snipe, and sandhill cranes. Proposed hunting regulations will be discussed for these species plus regulations for migratory game birds in Alaska, Puerto Rico, and the Virgin Islands; September teal seasons in the Mississippi and Central Flyways; special September waterfowl seasons in designated States; special sea duck seasons in the Atlantic Flyway, and special falconry seasons. On August 1 a public hearing will be held at 9 o'clock in the Auditorium of the Department of the Interior Building, address above. This hearing is for the purpose of reviewing the status and proposed regulations for waterfowl not previously discussed at the June 19 public hearing. The public is invited to participate in both hearings.

Persons wishing to participate in these hearings should write the Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Matomic Building, Room 536, Washington, DC 20240, or telephone (202) 254–3207. Those wishing to make statements should file copies of them with the Director before or during each hearing.

Public Comments Solicited

Based on the results of current migratory game bird studies and having due consideration of all data and views submitted by interested parties, the amendments resulting from these proposals will specify open seasons, shooting hours, and bag and possession limits for doves, pigeons, rails, gallinules, woodcock, common snipe, coots, cranes, and waterfowl; coots, cranes, common snipe and waterfowl in Alaska; migratory game birds in Puerto Rico and the Virgin Islands; and mourning doves in Hawaii.

The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons are invited to submit written comments, suggestions, or recommendations regarding the proposed amendments.

The Director intends that finally adopted rules be as responsive as possible to all concerned interests. He therefore desires to obtain the comments and suggestions of the public, other concerned governmental agencies, and private interests on these proposals.

Final promulgation of migratory game bird hunting regulations will take into consideration all comments received by the Director. Such comments, and any additional information received, may lead the Director to adopt final regulations differing from these proposals. Interested persons are invited to participate in this rulemaking by submitting written comments as follows:

For comments on Proposed 1986–87 Migratory Game Bird Hunting Regulations (Preliminary) write to: Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Matomic Building, Room 536, Washington, DC 20240.

Comments received on the proposed annual regulations will be available for public Inspection during normal business hours at the Service's office in Room 536, Matomic Building, 1717 H Street, NW., Washington, DC. The Service will consider but may not respond in detail to each comment. Specific comment periods will be established for each of the three series of proposed rulemakings. All relevant comments will be accepted through the closing date of the last comment period on the particular proposal under consideration. As in the part, the Service will summarize all comments received during the comment period and respond to them.

Flyway Council Meetings

The Service published a final rule in the **Federal Register** dated December 22, 1981 (46 FR 62077) which established certain procedures in the development of the annual migratory game bird hunting regulations. This rule took effect on January 21, 1982. One provision is to publish notification of meetings of waterfowl flyway councils where Department officials will be in attendance. In this regard, Departmental representatives will be present at the following spring meetings of the various flyway councils:

DATES: March 22, 1986

—Pacific Flyway Council, 2:00 p.m.

March 23, 1986

—Atlantic Flyway Council, 10:00 a.m.
—Mississippi Flyway Council, 9:00 a.m.
—Central Flyway Council, 8:30 a.m.
—National Waterfowl Council, 3:00 p.m.

ADDRESS: Council meetings will be held at the MGM Grand Hotel, Reno, Nevada as follows:

Atlantic Flyway Council, Metro Room B, Mezzanine Level
Mississippi Flyway Council, Capitol Room I, Lobby Level
Central Flyway Council, Capitol Room 4, Lobby Level
Pacific Flyway Council, Palace Room, Mezzanine Level
National Waterfowl Council, Capitol Room 4, Lobby Level

NEPA Consideration

In 1975 the Service determined that the annual migratory bird hunting regulations constituted a major Federal action signficantly affecting the quality of the human environment under the National Environmental Policy Act of 1969. Consequently, the "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75–54)" was prepared and filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the **Federal Register** on June 13, 1975 (40 FR 25241). In addition, several environmental assessments have been prepared on specific matters which serve to supplement the material in the Final Environmental Statement (FES). These have addressed regulations for various species of migratory game birds and hunting strategies. Endangered

Species Act Consideration

Prior to issuance of the 1986–87 migratory game bird hunting regulations, consideration will be given to provisions of the Endangered Species of 1973, as amended. (16 U.S.C. 1531–1543; hereinafter the Act) to insure that hunting is not likely to jeopardize the continued existence of any species designated as endangered or threatened or modify or destroy its critical habital and is consistent with conservation programs for those species. Consultations under section 7 of this Act may cause changes to be made to proposals in this and future supplemental proposed rulemaking documents.

In particular, the Service notes that it has published in the **Federal Register** on January 6, 1986 at 51 FR 409, a proposal to implements additional steel-shot-only zone for the protection of the bald eagle and of migratory waterfowl. In that Notice, the Service pointed out that should such a zone be judged necessary to conservation of the bald eagle, and implementation prevented by a failure of the relevant State wildlife agency to consent, the Service will not open the zone to waterfowl hunting. The Service here reiterates this position, which will be reflected, as necessary, in the final rule.

Regulatory Flexibility Act, Executive Order (E.O.) 12291, and the Paperwork Reduction Act.

In complying with these requirements during the 1981–82 regulatory development cycle, and with Office of Management and Budget concurrence, the Service prepared a Determination of Effects, a Preliminary Regulatory Impact Analysis (PRIA), a Final Regulatory Impact Analysis (FRIA), and a Memorandum of Law. For further information see the **Federal Register**: March 25, 1981, at 46 FR 18669; August

17, 1981, at 46 FR 41739; August 21, 1981, at 46 FR 42643; and September 18, 1981, at 46 FR 46543. The rules for the 1981–82 hunting season were determined to be "major," because the expenditures arising from these regulations exceed $100 million annually and represent a major Federal action.

An updated FRIA, focusing on waterflowl hunting, was completed by the Service March 3, 1983. New economic information was utilized from the *1980 National Survey of Fishing Hunting, and Wildlife-Associated Recreation* which indicated that hunters expended $638 million for migratory bird hunting in 1980. The Service estimated the expenditures for waterfowl hunting in 1980 to be $317 million (adjusted to 1981 dollars).

A Determination of Effects approved by the Assisted Secreatry, Fish and Wildlife and Parks, on February 21, 1986 concluded that the hunting frameworks being proposed for 1986–87 were "major" rules, subject to regulatory analysis. In accordance with Office of Management and Budget instructions, the Service recently prepared an update of the 1981 Final Regulatory Impact Analysis for use in development of the 1986–87 migratory bird hunting regulations to incorporate new economic information and waterfowl hunter activity and harvest information from the 1984–85 season. The summary of the 1986 update of the 1981 FRIA follows:

> New information which the can be compared to that appearing in the 1985 update of the 1981 Final Regulatory Impact Analysis (FRIA) includes estimates of the 1984 fall flight of ducks from surveyed areas, and hunter activity and harvest information from the 1984–85 hunting season. The data indicate that fall flights of ducks remained the same as those of 1983–84 in all flyways. Hunter numbers declined and hunter days and seasonal trips per hunter increased while there was no change in the total fall fight. This again demonstrate that non-regulatory factors, e.g., weather, local availability of ducks, habitat conditions, and local economy, also affect hunter participation and the resulting benefits of duck hunting to the economy.

Copies of the supplemental FRIA are available upon request from the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Matomic Building—Room 536, 18th and C Street, NW., Washington, DC 20240.

The Department of the Interior has determined that this document is a major rule under E.O. 12291 and certifies that this document will have a signficant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

The Service plans to issue its Memorandum of Law for the migratory game bird hunting regulations at the time the first of these rules is finalized.

Authorship

The primary author of the proposed rules on annual hunting regulations Morton M. Smith, Office of Migratory Bird Management, working under the direction of Rollin D. Sparrowe, Chief, (202) 254–3207.

List of Subjects in 50 CFR Part 20

Hunting, Wildlife, Exports, Imports, Transportation.

PART 20—[AMENDED]

For the reasons set forth in the preamble, 50 CFR Part 20 is proposed to be amended as follows:

I. The authority for 50 CFR Part 20 continues to read as follows:

Authority: Migratory Bird Treaty Act, sec. 3, Pub. L. 65–186, 40 Stat. 755 (16 U.S.C. 704); sec. 3(h), Pub. L. 95–616, 92 Stat. 3112 (16 U.S.C. 712), unless otherwise noted.

II. In § 20.1, paragraph (c) is added to read as follows:

§ 20.1 Scope of regulations.

* * * * *

(c) *Hunting by tribal members on Federal Indian Reservations.*

The regulations contained in this Part do not apply to the taking, possession, or transportation of migratory game birds by members of Federally-recognized Indian tribes if: (1) such taking, possession, or transportation occurs within the boundaries of the tribe's reservation (including Indian Territory); (2) the tribal government has entered into a memorandum of understanding with the U.S. Fish and Wildlife Service on the management of migratory birds within the reservation or Indian Territory; and (3) the tribal members possess legitimate hunting rights created or reserved by treaty, statute, Executive Order, agreement, or other law.

III. Proposed 1986–87 Migratory Game Bird Hunting Regulations (Preliminary).

The following general framework and guidelines for hunting certain waterfowl, sandhill cranes, mourning doves, white-winged doves, white-tipped doves, Zenaida doves, scaly-naped pigeons, band-tailed pigeons, moorhens and gallinules, rails, coots, common snipe, and woodcock during the 1986–87 season are proposed. Changes or possible changes, when noted, are in relation to 1985–86 final frameworks or regulations. In this respect, minor date changes due to annual variation in the calendar dates of specific days of the week, are regarded as "no change." All mentioned dates are inclusive. Where applicable, information is provided about proposals for change already submitted to the Service or expected to be submitted in the near future. These and the Service's responses or comments follow the frameworks being proposed. Service views on the items in this proposed rulemaking are subject to change depending on public comments, and additional data and information that may be received later.

In connection with some of the general framework and guidelines of this proposed rulemaking, the Service believes it is time to weigh the cumulative effect of zoning and other special duck management strategies (experimental seasons) on the resource. Information produced by the Service's harvest survey, while meaningful at flyway and regional levels, may not be fully satisfactory for evaluation of some experimental seasons. Until some better informed judgments can be made, the Service believes that present duck hunting zones should not be modified, new duck hunting zones or experimental duck seasons should not be initiated, and decisions concerning operational status for existing experimental duck seasons should be deferred. The Service has requested assistance in this assessment from the four flyway councils.

The proposed changes from the 1985–86 final frameworks are described below:

1. *Shooting hours.* (No change.) Basic shooting hours beginning one-half hour before sunrise and ending at sunset are proposed with the option that more restrictive shooting hours within this framework may be selected by the States or may be established for special seasons.

2. *Frameworks for ducks in the conterminous United States—outside dates, season length and bag limits.* (Possible change.) In 1985, survey information indicated declines in the breeding indices for nine out of 10 important game ducks, including the lowest breeding indices for mallards and pintails in the 31 years of survey records. The forecasted duck fall flight was the smallest on record, and there were other long- and short-term indicators that duck populations were reduced. As a result, the Service initiated various duck season framework restrictions in 1985. Pending the availability of current duck population, habitat and harvest

information, and the receipt of recommendations from the four flyway councils, specific duck framework proposals for opening and closing dates, season lengths and bag limits are deferred. Exceptions to the regular duck season frameworks are given in various numbered items that follow.

3. *American black ducks.* (Possible change.) In 1983 a program to further restrict harvest of American black ducks was developed and initiated in cooperation with flyway councils, State wildlife agencies, and private organizations. The program's harvest restrictions were to remain in place for a period of 3–5 years to facilitate the evaluation of the effects of hunting on the status of the species. However, if the protection provided to the species by the harvest restrictions is considered inadequate, there is provision for modification of the restrictions prior to completion of the program. Alternatives were discussed in an Environmental Assessment, *Proposed Hunting Regulations on Black Ducks, 1983,* (available upon request to the Service).

The duck season framework restrictions initiated in 1985 resulted in some Atlantic Flyway States altering their black duck harvest control strategies that had been in place since 1983. Prior to establishment of the 1986–87 hunting regulations, the Service intends to assess the effect of the black duck harvest management program in the Atlantic and Mississippi Flyways, as well as each member State's harvest reduction strategy, in relation to achieving the goal of a 25% reduction in black duck harvest from the 1977–81 harvest level (5-year average). Those strategies that have not reached the goal will be reviewed and further restrictions imposed.

4. *Wood ducks.* (No change.) In 1977 regulations for this species were changed to permit southeastern States the option of an early-October hunting season during which no special bag and possession limits applied under conventional regulations; under point system regulations, the species was placed in the mid-point category. The criteria for such seasons were described in the **Federal Register** dated May 25, 1977 (42 FR 26669), and are summarized and updated for informational purposes:

> The southeastern United States is defined as Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee and Virginia. The Service proposes to again consider regulations aimed at additional wood duck harvest in the southeastern States only within the following guidelines:
>
> A. In 1986 States in the southeastern United States may split their regular duck hunting season in such a way that a hunting season not to exceed 9 consecutive days occurs between October 8 and October 16.
>
> B. During this period under conventional regulations, no special restrictions within the regular daily bag and posession limits established for the Flyway in 1986 shall apply to wood ducks, and under the point system, the point value for wood ducks shall be reduced from the high to the mid-point category. For other species of ducks daily bag and possession limits shall be the same as established for the Flyway under conventional or point system regulations.
>
> C. In addition, the extra teal option available to States in the Atlantic and Mississippi Flyways that select conventional regulations and do not have a September teal season may be applied during the period.
>
> D. This exception to the daily bag and possession limits for wood ducks shall not apply to that portion of the duck hunting season that occurs after October 16.
>
> E. This special provision for wood ducks shall be regarded as experimental, and subject to annual and final evaluations by participating States of population, harvest, banding, and other available information.
>
> F. The experiment shall be conducted for a specified time period to be agreed upon between the Service and participating States.

The Service proposes to retain this option for the 1986 season.

5. *See ducks.* (No change.) A maximum open season of 107 days for taking scoter, eider, and oldsquaw ducks is proposed during the period between September 15, 1986, and January 20, 1987, in all coastal waters and all waters of rivers and streams seaward from the first upstream bridge in Maine, New Hampshire, Massachusetts, Rhode Island, and Connecticut; in those coastal waters of New York lying in Long Island and Block Island Sounds and associated bays eastward from a line running between Miamogue Point in the town of Riverhead to Red Cedar Point in the town of Southampton, including any ocean waters of New York lying south of Long Island; in any waters of the Atlantic Ocean and in any tidal waters of any bay which are separated by at least 1 mile of open water from any shore, island, and emergent vegetation in New Jersey, South Carolina, and Georgia; and in any waters of the Atlantic Ocean and in any tidal waters of any bay which are separated by at least 800 yards of open water from any shore, island, and emergent vegetation in Delaware, Maryland, North Carolina, and Virginia. Such areas shall be described, delineated, and designated as special sea duck hunting areas under the hunting regulations adopted by the respective States. In all other areas of these States and in all other States in the Atlantic Flyway, sea ducks may be taken only during the regular open season for ducks and they must be included in the regular duck season conventional or point-system daily bag and possession limits.

The daily bag limit is 7 and the possession limit is 14, singly or in the aggregate of these species. Within the special sea duck areas during the regular duck season in the Atlantic Flyway, States may set, in addition to the regular limits, a daily bag limit of 7 and a possession limit of 14 scoter, eider, and oldsquaw ducks, singly or in the aggregate of these species.

Any State desiring its sea duck season to open in September must make its selection no later than July 31, 1986. Those States desiring their sea duck season to open after September may make their selection at the time they select their waterfowl seasons.

6. *September teal season.* (No change.) An open season on all species of teal may be selected by Alabama, Arkansas, Colorado (Central Flyway portion only), Illinois, Indiana, Kansas, Kentucky, Louisiana, Mississippi, Missouri, New Mexico (Central Flyway portion only), Ohio, Oklahoma, Tennessee, and Texas in areas delineated by State regulations.

Shooting hours are from sunrise to sunset daily. The season may not exceed 9 consecutive days between September 1 and September 30, 1986, with a bag limit of 4 teal daily and 8 in possession. States must advise the Service of season dates and special provisions to protect non-target species by July 31, 1986.

7. *Extra teal option.* (No change.)

A. States in the Atlantic Flyway (except Florida), not selecting the point system may select an extra teal limit of no more than 2 blue-winged or 2 green-winged teal or 1 of each daily and no more than 4 singly or in the aggregate in possession for 9 consecutive days during the regular duck season.

B. States in the Mississippi and Central Flyways selecting neither a teal or early duck season in September nor the point system may select an extra daily bag and possession limit of 2 and 4 blue-winged teal, respectively, for 9 consecutive days designated during the regular duck season.

These extra limits are in addition to the regular duck bag and possession limits.

8. *Experimental September Duck Seasons.* Kentucky, Tennessee, and Florida conducted experimental duck seasons during the 1981–83 waterfowl seasons. Regulatory provisions in effect during the 3-year studies were continued through 1984 while each State prepared the final report of its study. In 1985 the Service agreed with the recommendation of the Mississippi

VOL 51 ISS 55 MR 21 1986 UMI

Flyway Council's Lower Region Regulations Committee that additional information was needed regarding the effects of the September duck seasons on the survival rates of wood ducks in Kentucky and Tennessee, and continued these seasons as experimental. In lieu of an Atlantic Flyway Council recommendation, the Service also continued the 1985–86 September duck season in Florida as experimental.

1984 was the final year of a 6-year experimental duck season in Iowa. In response to a recommendation from the Mississippi Flyway Council's Upper Region Regulations Committee, the Service continued the experimental season in Iowa through 1985–86. The State's final report is due by the 1986 winter meeting of the Mississippi Flyway Council Technical Section.

The Service proposes to continue the September duck seasons in Florida, Kentucky, Tennessee and Iowa as experimental in 1986–87 unless final or progress reports provide evidence of a detrimental effect on any segment of the duck resource.

Additional information. At the July 31, 1985, Service Regulations Committee Meeting, the Atlantic Flyway Council recommended that the experimental September duck season in Florida be granted operational status.

Response. The Service notes again its belief that until some better informed judgments can be made regarding the cumulative effect of special duck management strategies on the resource, decisions regarding operational status for existing experimental duck seasons should be deferred.

9. *Special scaup season.* (No change.) States in the Atlantic, Mississippi, and Central Flyways may select a special scaup-only hunting season not to exceed 16 consecutive days, with daily bag and possession limits of 5 and 10 scaup, respectively, subject to the following conditions:

A. The season must occur between October 1, 1986, and January 31, 1987, all dates inclusive.

B. The season must occur outside the open season for any other ducks except sea ducks.

C. The season is limited to areas mutually agreed upon between the State and the Service prior to August 31, 1986, and

D. These areas must be described and delineated in State hunting regulations.

E. In lieu of a special scaup-only season, Vermont may, for the Lake Champlain Zone, select a special scaup and goldeneye season not to exceed 16 consecutive days, with a daily bag limit of 3 scaup or 3 goldeneyes or 3 in the aggregate, and a possession limit of 6 scaup or 6 goldeneyes or 6 in the aggregate, subject to the same provisions that apply to special scaup seasons elsewhere.

10. *Extra scaup option.* (No change.) As an alternative to a special scaup-only season, States in the Atlantic, Mississippi, and Central Flyways, except those selecting the point system, may select an extra daily bag and possession limit of 2 and 4 scaup, respectively, during the regular duck hunting season, subject to conditions C and D listed for special scaup seasons. These extra limits are in addition to the regular duck limits and apply during the entire regular duck season.

11. *Mergansers.* (No change.) States in the Atlantic and Mississippi flyways may select separate bag limits for mergansers in addition to the regular duck bag limits during the regular duck season. The bag limit is 5 mergansers daily and 10 in possession. Elsewhere, mergansers are included within the regular daily bag and possession limits for ducks. The restriction on hooded mergansers of 1 daily and 2 in possession is continued in the Atlantic, Mississippi, and Central Flyways.

12. *Canvasback and redhead ducks.* In 1983 the Service initiated a program whereby the focus of canvasback harvest regulations was changed from one of area closures to one of restrictive bag limits, and an experimental canvasback season was implemented in portions of the closed area in the Atlantic Flyway. This program and alternatives were presented in an Environmental Assessment, *Proposed Hunting Regulations on Canvasback Ducks, 1983* (copies available upon request to the Service). A condition of the harvest program is that all possible actions including a closure on canvasback hunting will be considered should the indicated breeding population of canvasbacks decline below 500,000 birds, consisting of an eastern population of at least 360,000 and a western population of 140,000 canvasbacks. These figures are to be derived from 3-year averages of aerial breeding pair surveys. The intent is to manage the harvest of canvasbacks separately by eastern and western populations. The current continential breeding population index for canvasbacks is near the 500,000 bird level, that for the eastern is 343,000 and the western is 160,000 (1983–85 average). The 1986 breeding population survey data and harvest information from the 1985–86 season will be available in July. At that time the Service, in coordination with the flyway councils, will review the data and consider specific changes in the hunting frameworks for the canvasback.

13. *Duck Zones.* The Service reiterates its earlier statement that it believes present duck hunting zones should not be modified and no new duck hunting zones should be initiated until some better informed judgments regarding their cumulative effect on the resource can be made. The Service intends to continue these constraints until zoning proposals are again considered.

States in all Flyways may split their waterfowl season into two segments. Previously, States in the Atlantic and Central Flyways, in lieu of zoning could split their seasons for ducks or geese into three segments. Since it is proposed that new duck zones not be authorized, a 3-way split is also not offered to States not presently utilizing that option for ducks.

In the June 13, 1984 **Federal Register** (at 49 FR 24421) the Service proposed the following for Louisiana: apply Central Flyway duck season length in its West Zone, Mississippi Flyway duck season length in its East Zone, and Mississippi Flyway bag limits in both zones. The season as proposed was not initiated but the 5 additional days in the west zone was continued during 1985–86. The Service will review this issue in subsequent **Federal Register** documents.

14. *Frameworks for geese and brant in the conterminous United States—outside dates, season length and bag limits.* The Canadian Wildlife Service, the four waterfowl flyway councils, State conservation agencies, and others traditionally provide population and harvest information useful in setting annual regulations for geese and brant. The midwinter survey, the past season's waterfowl harvest surveys, and satellite imagery and ground studies for May and June of 1986 will provide additional information.

Atlantic Flyway. (No change). Seasons and bag limits are deferred pending receipt of additional information and recommendations. No significant changes from those in effect in 1985–86 are anticipated at this time.

Additional information. In a letter dated November 15, 1985, the State of Georgia requested a limited season during 1986–87 on Canada geese previously transplanted in the State.

Response. The Service defers action on the request until such time that the Atlantic Flyway Council reviews it and submits a recommendation.

Mississippi Flyway. (No change.) Seasons and bag limits are deferred pending receipt of additional information and recommendations. No significant changes from those in effect in 1985–86 are anticipated at this time.

Harvests of the Eastern Prairie and Mississippi Valley (MVP) Populations of Canada geese in this flyway are controlled in part by quota allocations and harvest objectives. Specific quotas will be established after population management objectives, recent population information, production information, and expected fall flights have been taken into consideration. In quota areas it is intended that the entire quota can be safely taken without detriment to population, and that such harvests are appropriate considering population objectives. Goose seasons in quota areas end when the quota has been achieved and the season terminated by State action, emergency order under § 20.26 of CFR 50, or when the permissible number of hunting days has expired. Specific procedural information for seasons closures of quota areas will be included in the final regulations.

Additional information. The General Accounting Office (GAO) by letter dated February 5, 1986, Transmitted to the Department of interior a copy of their report entites *Mississippi Valley Population of Canada Geese: Flyway Management Obstacles.* GAO also supplied a copy to each Mississippi Flyway State. The Department must respond to this report.

The Service anticipates full discussion by the Mississippi Flyway Council regarding MVP management issues. In earlier correspondence to the Mississippi Flyway Council Chairman, the Service identified what it believes to be three principal issues needing close attention for MVP management.

a. Review of the overall MVP program in light of experience to date with harvest controls and progress toward the population objective.

b. Review all States harvest objectives for MVP geese. Provision should be made regarding future MVP harvests in States not now harvesting MVP geese. Further, the harvest of MVP geese in States outside of what is considered the principal MVP range needs to be considered.

c. Criteria should be developed for the establishment of control/quota zones and the necessary monitoring systems.

The cooperation of all states involved in MVP management will be essential in achieving the goal of the Flyway Council's management program. A Departmental response to the GAO report will be developed prior to the due date of April 5, 1986.

Central Flyway. (No change.) Seasons and bag limits are deferred pending additional information and recommendations. No significant changes from those in effect in 1985–86 are anticipated at this time.

Pacific Flyway. (No change.) As a result of available information indicating that substantial declines in populations of dusky Canada geese, Pacific Flyway Greater white-fronted geese, cackling Canada geese and Pacific brant had occurred in recent years, the Service initiated various harvest restrictions on these species in 1984. Additional measures were required for some of the populations in 1985. No significant changes from the restrictive regulations in effect in 1985–86 are anticipated at this time but the Service understands there may be some additional concerns about these species this year. Specific season frameworks, season lengths, an daily bag limits for geese are deferred pending additional information and recommendations.

15. *Tundra Swan.* (No change.) The Fllowing frameworks for tundra swans are proposed. In Utah, Nevada, Montana (Central and Pacific Flyways), North Dakota, and South Dakota an open season for taking a limited number of tundra swans may be selected subject to the following condition:

A. Execept in the Central Flyway portion of Montana, the season must run concurrently with the duck season; in the Central Flyway poriton of Montana, the season mut run concurrent with the goose season;

B. In Utah, no more than 2,500 permits may be issued authorizing each permittee to take 1 tundra swan;

C. In Nevada, no more than 650 permits may be issued authorizing each permittee to take 1 tundra swan in either Churchill, Lyon, or Pershing Counties;

D. In Montana (Pacific Flyway portion only), no more than 500 permits may be issued authorizing each permittee to take 1 tundra swan in either Teton or Cascade Counties;

E. In Montana (Central Flyway portion only), no more than 500 permits may be issued authorizing each permittee to take 1 tundra swan;

F. In North Dakota, no more than 500 permits may be issued authorizing each permittee to take 1 tundra swan;

G.

G. In South Dakota, no more than 1,000 permits may be issued authorizing each permittee to take 1 tundra swan;

H. States must employ a method to assure that hunters validate their harvest.

In North Carolina an experimental seson for taking a limited number of tundra swans may be selected subject to the following conditions:

A. The season may be 90 days and must run concurrently with the snow goose season.

B. The state agency must issue permits and obtain harvest and hunter participation data.

C. No more than 6,000 permits may be issued, authorizing each permittee to take 1 tundra swan.

16. *Sandhill cranes.* (No change.) Pending evaluation of harvest data from the 1985–86 season, seasons for hunting sandhill cranes may be selected within specified areas in Arizona, Colorado, Kansas, New Mexico, Texas, Oklahoma, North Dakota, South Dakota, Montana, and Wyoming with no substantial change in dates from the 1985–86 seasons. The daily bag limit will be 3 and the possession limit 6 sandhill cranes, except in special season areas in Arizona and Wyoming where the limit is 2 cranes per season for 200 and 250 permit holders, respectively. The provision for a Federal sandhill crane hunting permit is continued in all the above areas except special season areas in Arizona and Wyoming.

Additional information. By letter dated January 13, 1986, Wyoming advised the Service it intended to submit to the Pacific and Central Flyway Councils a proposal for an operational sandhill crane—Canada goose hunting season for the Eden-Farson agricultural areas of Sweetwater and Sublette Counties in southwestern Wyoming. The Service awaits the Councils' reviews and recommendations on the proposal.

17. *Coots.* (No change.) Within the regular duck season, States in the Atlantic, Mississippi, and Central Flyways may permit a daily bag limit of 15 and a possession limit of 30 coots; States in the Pacific Flyway may permit 25 coots daily and in possession, singly or in the aggregate with gallinules.

18. *Common Moorhens (formerly Common Gallinules) and Purple Gallinules.* (No change.) States in the Atlantic and Mississippi Flyways may select hunting seasons between September 1, 1986, and January 20, 1987, of not more than 70 days. Central Flyway States may select hunting seasons between September 1, 1986 and January 18, 1987, or not more than 70 days. Any state may split its moorhen/gallinule season without penalty. The daily bag and possession limits may not exceed 15 and 30 common moorhens and purple gallinules, singly or in the aggregate of the two species, respectively. States may select moorhen/gallinule seasons at the time they select their waterfowl seasons. In

VOL 51
ISS 55
MR 21
1986
UMI

this case, daily bag and possession limits will remain the same.

States in the Pacific Flyway must select their moorhen/gallinule hunting seasons within the waterfowl seasons. A moorhen/gallinule season selected by any State or portion thereof in the Pacific Flyway may be the same as but not exceed its waterfowl season, and the daily bag and possession limits may not exceed 25 coots and moorhens, singly or in the aggregate of the two species.

19. *Rails.* (No change.) The States included herein may select seasons between September 1, 1986, and January 20, 1987, on clapper, king, sora, and Virginia rails as follows:

The season length for all species of rails may not exceed 70 days, and any State may split its rail season into two segments without penalty.

Clapper and King Rails.

A. In Rhode Island, Connecticut, New Jersey, Delaware, and Maryland, the daily bag and possession limits may not exceed 10 and 20 clapper and king rails, respectively, singly or in the aggregate of these two species.

B. In Texas, Louisiana, Mississippi, Alabama, Georgia, Florida, South Carolina, North Carolina, and Virginia, the daily bag and possession limits may not exceed 15 and 30 clapper and king rails, respectively, singly, or in the aggregate of the two species:

C. The season will remain closed on clapper and king rails in all other States.

Sora and Virginia Rails.

In addition to the prescribed limits for clapper and king rails, daily bag and possession limits not exceeding 25, singly or in the aggregate of sora and Virginia rails, may be selected in States in the Atlantic, Mississippi, and Central Flyways, and portions of Colorado, Montana, New Mexico, and Wyoming in the Pacific Flyway. No hunting season is proposed for rails in the remainder of the Pacific Flyway.

20. *Common snipe.* (No change.) States in the Atlantic, Mississippi, and Central Flyways may select hunting seasons between September 1, 1986, and February 28, 1987, not to exceed 107 days, except that in Maine, Vermont, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware, Maryland, and Virginia the season must end no later than January 31. Seasons between September 1, 1986, and February 28, 1987, not exceeding 93 days, may be selected in the Pacific Flyway portions of Montana, Wyoming, Colorado, and New Mexico.

All States in the Pacific Flyway, except those portions of Colorado, Montana, New Mexico, and Wyoming in the Pacific Flyway, must select their snipe season to run concurrently with their regular duck season. In these Pacific Flyway States, except portions of the four States noted previously, it will be unlawful to take snipe when it is unlawful to take ducks.

Daily bag and possession limits may not exceed 8 and 16, respectively. Any State may split its snipe season into two segments.

States or portions thereof in the Atlantic, Mississippi, and Central Flyways may defer selection of snipe seasons until they choose their waterfowl seasons in August. In that event, the daily bag and possession limits will remain the same but shooting hours must conform with those for waterfowl.

21. *Woodcock.*

A. Central and Mississippi Flyways. (No change.)

States in the Central and Mississippi Flyways may select hunting seasons of not more than 65 days with daily bag and possession limits of 5 and 10, respectively, to occur between September 1, 1985 and February 28, 1986. States may split their woodcock season without penalty.

B. Atlantic Flyway. (No change.)

The number of woodcock in the Atlantic Flyway has significantly declined since the 1960s. In 1982, the Service implemented an October 1 framework opening date for woodcock hunting in the Atlantic Flyway in order to provide additional protection to woodcock populations. The October 1 opening was continued in 1983 and 1984. In 1985 the Service initiated a program whereby the hunting regulations for woodcock in the Atlantic Flyway were adjusted to bring harvest opportunities to a level commensurate with the current population status. No changes in seasons and bag limits from those in effect in 1985–86 are anticipated at this time pending an evaluation of the changes implemented. For the 1986–87 hunting season in the Atlantic Flyway the Service proposes the following:

States in the Atlantic Flyway may select hunting seasons of not more than 45 days with daily bag and possession limits of 3 and 6, respectively, to occur between October 1, 1986 and January 31, 1987. States may split their woodcock season without penalty.

New Jersey may select woodcock hunting seasons by north and south zones divided by State Highway 70. The season in each zone may not exceed 35 days.

22. *Band-tailed pigeons.* (No change.)

Pacific Coast States California, Oregon, and Washington and the *Nevada* counties of Carson City, Douglas, Lyon, Washoe, Humboldt, Pershing, Churchill, Mineral and Storey. These States may select hunting seasons not to exceed 30 consecutive days between September 1, 1986, and January 15, 1987. The daily bag and possession limits may not exceed 5 band-tailed pigeons.

California may zone by selecting hunting seasons of 30 consecutive days for each of the following two zones:

A. In the counties of Alpine, Butte, Del Norte, Glenn, Humboldt, Lassen, Mendocino, Modoc, Plumas, Shasta, Sierra, Siskiyou, Tehama, and Trinity; and

B. The remainder of the State.

In *Nevada* each hunter must have in possession a valid band-tailed pigeon hunting permit issued by the State.

Four-Corners States (Arizona, Colorado, New Mexico, and Utah). These States may select hunting seasons not to exceed 30 consecutive days between September 1 and November 30, 1986. The daily bag and possession limits may not exceed 5 and 10, respectively. The season shall be open only in the areas delineated by the respective States in their hunting regulations. New Mexico may divide its State into a North Zone and a South Zone along a line following U.S. Highway 60 from the Arizona State line east to Interstate Highway 25 at Socorro and along Interstate Highway 25 from Socorro to the Texas State line. Between September 1 and November 30, 1986, in the North Zone, and October 1 and November 30, 1986, in the South Zone; hunting seasons not to exceed 20 consecutive days in each zone may be selected.

23. *Mourning doves.* (No change.) States were offered an option of a season length of 70 half or full days with a daily bag and possession limit of 12 and 24, respectively, or a season length of 60 half or full days with a daily bag limit and posseeion limit of 15 and 30, respectively. States were allowed to select hunting zones without penalty and to split the season into not more than 3 time periods.

The Service proposes to offer these option, again during the 1986–87 hunting season, pending results of the call-count survey and receipt of additional information and recommendations.

Between September 1, 1986, and January 15, 1987, except as otherwise provided, States may select hunting seasons and bag limits as follows:

Eastern Management Unit: All States east of the Mississippi River and Louisiana.

A. Shooting hours between one-half hour before sunrise to sunset daily.

B. Hunting seasons of not more than 70 full or half days with daily bag and possession limits not to exceed 12 and 24 doves, respectively. As an alternative, seasons not exceeding 60 full or half days and limits of 15 and 30 doves, respectively, may be selected. Under either option, the season may run consecutively or be split into not more than three time periods.

C. As an option to the above, Alabama, Georgia, Illinois, Louisiana, and Mississippi may elect to zone their State as follows:

a. Two zones per State as described in 48 FR 35103.

b. Within each zone, these States may select hunting seasons of not more than 70 days (or 60 under the alternative) which may run consecutively or be split into not more than three periods.

c. The hunting seasons in the South Zones of these States may commence no earlier than September 20, 1986.

Central Management Unit: Arkansas, Colorado, Iowa, Kansas, Minnesota, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming.

A. Shooting hours between one-half hour before sunrise to sunset daily.

B. Hunting seasons of not more than 70 days with daily bag and possession limits not to exceed 12 and 24 doves, respectively. As an alternative, seasons not exceeding 60 days, and limits of 15 and 30 doves, respectively, may be selected. Under either option, the season may run consecutively or be split into not more than three periods.

C. In New Mexico, daily bag and possession limits of mourning and white-winged doves may not exceed 12 and 24 (or 15 and 30 under the alternative), singly or in the aggregate of the two species.

D. In addition to the basic framework and the alternative, Texas may divide the State into three zones for purposes of dove hunting in accordance with zoning proposals prviously approved by the Service and he Central Flyway Council. The various zones are described in 50 FR 33740.

a. The hunting seasons may be split into not more than two periods except as noted below.

b. The North and Central Zones may have seasons of not more than 70 (or 60 under the alternative) days between September 1, 1986, and January 25, 1987.

C. The South Zone may have a season of not more than 70 (or 60 under the alternative) days between September 20, 1986, and January 25, 1987. In the special white-winged dove portion of the South Zone, a limited mourning dove season may be held concurrently with the 2-day white-winged dove season and with shooting hours coinciding with those for white-winged doves. However, the remaining 68 (or 58 under the alternative) days must be within the September 20, 1986, through January 25, 1987 period.

d. The daily bag limit may not exceed 12 (or 15 under the alternative) mourning, white-winged, and white-tipped doves in the aggregate, no more then 2 of which may be white-winged doves nor 2 of which may be white-tipped doves; the possession limit may not exceed 24 (or 30 under the alternative) doves in the aggregate including no more than 4 white-winged and 4 white-tipped doves.

Western Management Unit: Arizona, California, Idaho, Nevada, Oregon, Utah, and Washington.

A. Shooting hours of one-half hour before sunrise to sunset daily.

B. Hunting seasons of not more than 70 full days with daily bag limits not to exceed 12 and 24 doves, respectively, which may run consecutively or be split into not more than three periods.

C. As an alternative, except in Arizona, seasons not exceeding 60 days and limits of 15 to 30 doves, respectively, may run consecutively or be split into not more than 3 periods.

24. *White-winged and white-tipped doves.* (No change). Arizona, California, Nevada, New Mexico, and Texas may select hunting seasons between September 1 and December 31, 1986, and daily bag limits as stipulated below.

Arizona may select a hunting season of not more than 29 consecutive days running concurrently with the first period of the split mourning dove season. The daily bag limit may not exceed 12 mourning and white-winged doves in the aggregate, no more than 6 of which may be white-winged doves, and a possession limit twice the daily bag limit after the opening day.

Nevada, in the counties of Clark and Nye, and in the *California* counties of Imperial, Riverside, and San Bernardino, the daily bag and possession limits of mourning and white-winged doves may not exceed 12 and 24, respectively singly or in the aggregate, with a 70-day season, or 15 and 30 if the 60-day option for mourning doves is selected; however, in either season, the bag and possession limits of white-winged doves may not exceed 10 and 20, respectively.

New Mexico may select a hunting season with daily bag and possession limits not to exceed 12 and 24 (or 15 and 30 if the 60-day option for mourning doves is selected) white-winged and mourning doves, respectively, singly or in the aggregate of the 2 species. Dates, limits, and hours are to conform with those for mourning doves.

Texas may select a hunting season of not more than 2 days for the special white-winged dove area of the South Zone. The daily bag limit may not exeeed 10 white-winged, mourning, and white-tipped doves in the aggregate, including no more than 2 mourning doves and 2 white-tipped doves; and the possession limit may not exceed 20 white-winged, mourning, and white-tipped doves in the aggregate including no more than 4 mourning doves and 4 white-tipped doves in possession.

In addition, Texas may also select a hunting season of not more than 70 (or 60 under the alternative) days to be held between September 1, 1986, and January 25, 1987, and coinciding with the mourning dove season. The daily bag limit may not exceed 12 white-winged, mourning and white-tipped doves (or 15 under the alternative) in the aggregate, of which not more than 2 may be white-winged and not more than 2 of which may be white-tipped doves. The possession limit may not exceed 24 white-winged, mourning, and white-tipped doves (or 30 under the alternative) in the aggregate, of which not more than 4 may be white-winged doves and not more than 4 which may be white-tipped doves.

Florida may select a white-winged dove season of not more than 70 (or 60 under the alternative) days to be held between September 1, 1986, and January 15, 1987, and coinciding with the mourning dove season. The daily bag limit of both species in the aggregate may not exceed 12 (or 15 under the alternative), of which not more than 4 may be whitewings. The possession limit of both species in the aggregate may not exceed 24 (or 30 under the alternative) of which not more than 8 may be whitewings.

Additional Information. In 1985, because of declines in white-winged dove numbers as a result of reduced citrus habitat, the Service shortened the normal 4-day white-winged dove season in Texas' special white-winged dove area of its South Zone to 2 days. Texas chose not to open the 2-day season in 1985–86 but has indicated it may recommend a return to the 4-day season for 1986–87. Service action is deferred pending receipt of 1986 status information on whitewings and their nesting habitat.

25. *Migratory bird hunting seasons in Alaska.* The Service proposes to allow Alaska to continue their stabilized duck

VOL 51 ISS 55 MR 21 1986 UMI

hunting frameworks during the 1986–87 season.

Proposed Frameworks for Selecting Open Season Dates for Hunting Migratory Birds in Alaska, 1986–87

Outside Dates: Between September 1, 1986, and January 28, 1987, Alaska may select seasons on waterfowl, snipe, and sandhill cranes, subject to the following limitations;

Shooting Hours: One-half hour before sunrise to sunset daily.

Hunting Seasons:

Ducks, geese, and brant—107 consecutive days in each of the following: North Zone (State Game Management Unit 11–13 and 17–26); Gulf Coast Zone (State Game Management Units 5–7, 9, 14–16, and 10-Unimak Island only); Southeast Zone (State Game Management Units 1–4); Pribilof and Aleutian Islands Zone (State Game Management Unit 10-except Unimak Island); Kodiak Zone (State Game Management Unit 8). The season may be split without penalty in the Kodiak Zone. Exceptions: The season is closed on Canada geese from Unimak Pass westward in the Aleutian Island chain. Throughout the State there is no open hunting season for Aleutian and Cackling Canada geese.

Snipe and sandhill cranes—An open season concurrent with the duck season.

Daily Bag and Possession Limits:

Ducks—Except as noted, a basic daily bag limit of 7 and a possession limit of 21 ducks. Daily bag and possession limits in the North Zone are 10 and 30, and in the Gulf Coast Zone they are 8 and 24, respectively. In addition to the basic limit, there is a daily bag limit of 15 and a possession limit of 30 scoter, eider, oldsquaw, harlequin, and American and red-breasted mergansers, singly or in the aggregate of these species.

Geese—A basic daily bag limit of 6 and a possession limit of 12, of which not more than 4 daily and 8 in possession may be Greater white-fronted (white-fronted) or Canada geese, singly or in the aggregate of these species. In addition to the basic limit, there is a daily bag limit of 4 and a possession limit of 8 Emperor geese.

Brant—A daily bag limit of 4 and a possession limit of 8.

Common snipe—A daily bag limit of 8 and a possession limit of 16.

Sandhill cranes—A daily bag limit of 3 and a possession limit of 6.

26. *Migratory game birds in Puerto Rico and in the Virgin Islands.* (No change.)

Proposed Frameworks for Selecting Open Season Dates for Hunting Migratory Birds in Puerto Rico, 1986–87.

Shooting hours: Between one-half hour before sunrise and sunset daily.

Ducks, Coots, Moorhens, Gallinules, and Snipe

Outside Dates: Between November 5, 1986, and February 28, 1987, Puerto Rico may select hunting seasons as follows.

Hunting Seasons: Not more than 55 days may be selected for hunting ducks, common moorhens (common gallinules), and common snipe. The season may be split into 2 segments.

Daily Bag and Possession Limits:

Ducks—Not to exceed 4 daily and 8 in possession, except that the season is closed on the ruddy duck (*Oxyura jamaicensis*); the White-cheeked pintail (*Anas bahamensis*); West Indian whistling (tree) duck (*Dendrocygna arborea*); fulvous whistling (tree) duck (*Dendrocygna bicolor*), and the masked duck (*Oxyura dominica*), which are protected by the Commonwealth of Puerto Rico.

Coots—There is no open season on coots, i.e., common coots (*Fulica americana*) and Caribbean coots (*Fulica carabaea*).

Common Moorhens—Not to exceed 6 daily and 12 in possession, except that the season is closed on purple gallinules (*Porphyrula martinica*).

Common snipe—Not to exceed 6 daily and 12 in possession.

Closed Areas: No open season for ducks, moorhens and gallinules, and snipe is prescribed in the Municipality of Culebra and on Desecheo Island.

Doves and Pigeons

Outside Dates: Puerto Rico may select hunting seasons between September 1, 1986, and January 15, 1987, as follows.

Hunting Seasons: Not more than 60 days for Zenaida, mourning, and white-winged doves, and scaly-naped pigeons.

Daily Bag and Possession Limits: Not to exceed 10 doves of the species named herein, singly or in the aggregate, and not to exceed 5 scaly-naped pigeons.

Closed Areas: No open season for doves and pigeons in prescribed in the following areas:

Municipality of Culebra and Desecheo Island—closed under Commonwealth regulations.

Mona Island—closed to protect the reduced population of white-crowned pigeon (*Columba leucocephala*), known locally as "Paloma cabeciblanca."

El Verde Closure Area—consisting of those areas of the municipalities of Rio Grande and Loiza delineated as follows: (1) all lands between Routes 956 on the west and 186 on the east, from Route 3 on the north to the juncture of Routes 956 and 186 (Km 13.2) in the south; (2) all lands between Routes 186 and 966 from the juncture of 186 and 966 on the north, to the Caribbean National Forest Boundary on the south; (3) all lands lying west to Route 186 for one (1) kilometer from the juncture of Routes 186 and 956 south to Km 6 on Route 186; (4) all lands within Km 14 and Km 6 on the west and the Caribbean National Forest Boundary on the east; and (5) all lands within the Caribbean National Forest Boundary whether private or public. The purpose of this closure is to afford protection to the Puerto Rican parrot (*Amazona vittata*) presently listed as an endangered species under the Endangered Species Act of 1973.

Cidra Municipality and Adjacent Closure Areas consisting of all of Cidra Municipality and portions of Aguas Buenas, Caguas, Cayey, and Comerio Municipalities as encompassed within the following boundary: beginning on Highway 172 as it leaves the Municipality of Cidra on the west edge, north to Highway 156, east on Highway 156 to Highway 1, south on Highway 1 to Highway 765, south on Highway 765 to Highway 763, south on Highway 763 to the Rio Guavate, west along Rio Guavate to Highway 1, southwest on Highway 1 to Highway 14, west on Highway 14 to Highway 729, north on Highway 729 to Cidra Municipality, and westerly, northerly, and easterly along the Cidra Municipality boundary to the point of beginning. The purpose of this closure is to protect the Plain (Puerto Rican plain) pigeon (*Columba inornata wetmorei*), locally known as "Paloma Sabanera," which is present in the above locale in small numbers and is presently listed as an endangered species under the Endangered Species Act of 1973.

Proposed Framework for Selecting Open Season Dates For Hunting Migratory Birds in the Virgin Islands, 1986–87

Shooting Hours: Between one-half hour before sunrise and sunset daily.

Ducks

Outside Dates: Between December 1, 1986, and January 31, 1987, the Virgin Islands may select a duck hunting season as follows.

Hunting Seasons: Not more than 55 consecutive days may be selected for hunting ducks.

Daily Bag and Possession Limits: Not to exceed 4 daily and 8 in possession, except that the season is closed on the ruddy duck (*Oxyura jamaicensis*); White-cheeked pintail (*Anas bahamensis*); West Indian whistling (tree) duck (*Dendrocygna arborea*); fulvous whistling (tree) duck (*Dendrocygna bicolor*), and the masked duck (*Oxyura dominica*).

Doves and Pigeons

Outside Dates: The Virgin Islands may select hunting seasons between September 1, 1986, and January 15, 1987, as follows.

Hunting Seasons: Not more than 60 days for Zenaida doves and scaly-naped pigeons throughout the Virgin Islands.

Daily Bag and Possession Limits: Not to exceed 10 Zenaida doves and 5 scaly-naped pigeons.

Closed Season: No open season is prescribed for common ground-doves or quail doves, or other pigeons in the Virgin Islands.

Local Names for Certain Birds.

Zenaida dove (*Zenaida aurita*)—mountain dove.

Bridled quail dove (*Geotrygon mystacea*)—Barbary dove, partridge (protected).

Common Ground-dove (*Columbina passerina*)—stone dove, tobacco dove, rola, tortolita (protected).

Scaly-naped pigeon (*Columba squamosa*)—red-necked pigeon, scaled pigeon.

27. *Migratory game bird seasons for falconers.* (No change).

Proposed Special Falconry Frameworks

Extended Seasons: Falconry is a permitted means of taking migratory game birds in any State meeting Federal falconry standards in 50 CFR 21.29(k). These States may select an extended season for taking migratory game birds in accordance with the following:

Framework Dates: Seasons must fall within the regular season framework dates and, if offered and accepted, other special season framework dates for hunting.

Daily Bag and Possession Limits: Falconry daily bag and possession limits for all permitted migratory game birds shall not exceed 3 and 6 birds, respectively, singly or in the aggregate, during regular hunting seasons and extended falconry seasons.

Regulations Publication: Each State selecting the special season must inform the Service of the season dates and publish said regulations.

Regular Seasons: General hunting regulations, including seasons, hours, and limits, apply to falconry in each State listed in 50 CFR 21.29(k) which does not select an extended falconry season.

Note.—In no instance shall the total number of days in any combination of duck seasons (regular duck season, sea duck season, September teal season, special scaup season, special scaup and goldeneye season, or falconry season) exceed 107 days for a species in one geographical area.

28. *Hawaii mourning doves.* (No change.) The mourning dove is the only migratory game bird occurring in Hawaii in numbers to permit hunting. It is proposed that mourning doves may be taken in Hawaii in accordance with regulations set by the State of Hawaii as has been done in the past and subject to the applicable provisions of Part 20 of Title 50 CFR. Such a season must be within the constraints of applicable migratory bird treaties and annual regulatory frameworks. These constraints provide that the season must be within the period of September 1, 1986, and January 15, 1987, the length may not exceed 60 (or 70 under the alternative) days; and the daily bag and possession limits may not exceed 15 and 30 (or 12 and 24 under the alternative) doves, respectively. Other applicable Federal regulations relating to migratory game birds shall also apply.

29. *Migratory Bird Hunting on Indidn Reservations.* In the September 3, 1985, **Federal Register** (50 FR 35762) the Service implemented interim guidelines for migratory bird hunting regulations on Federal Indian reservations, Indian territory and ceded lands, and established special hunting regulations for certain tribes in the 1985–86 hunting season. The Service intends to employ the guidelines and establish special migratory game bird hunting regulations for interested Indian tribes in 1986–87; however, the comment period on the guidelines remains open. In the December 5, 1985, **Federal Register** (50 FR 49870), the Service published a notice requesting proposals from Indian tribes that wish to establish special 1986–87 migratory game bird hunting regulations. In a later **Federal Register** document the Service will publish for public review the pertinent details of proposals received from tribes.

Dated: March 7, 1986.

50 CFR Part 23

Transfer of Nile Crocodile Population in Botswana to Appendix II of the Convention on International Trade in Endangered Species of Wild Fauna and Flora

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of amendment to appendix; request for comments.

SUMMARY: The Convention on International Trade in Endangered Species of Wild Fauna and FLora (CITES) regulates trade in certain animal and plant species. Appendices I, II, and III to CITES list those species for which trade is controlled. Any nation that is a Party to CITES may propose amendments to Appendices I and II for consideration by the other Parties. The Republic of Botswana has proposed that the population of the Nile crocodile (*Crocodylus niloticus*) in the Republic of Botswana be transferred from Appendix I to Appendix II subject to an annual export quota of 2,000 specimens. This proposal is being considered under the postal procedure provided by CITES. The Republic of Botswana entered a reservation on the Nile crocodile when acceding to CITES because the Republic of Botswana did not believe the species to be endangered. The transfer of this population of the Nile crocodile, subject to export quotas, would allow limited trade in this species. The Republic of Botswana does not believe the Nile crocodile to be endangered in their country and believes quotas would permit proper utilization of this resource. The Fish and Wildlife (Service) requests information on this population and asks for comments on the proposal in order to transmit relevant information on the proposal to the CITES Scecretariat by April 12, 1986. The Service wil have until at least May 12, 1986, to register an objection, if any, to the proposed amendment, and thereby necessitate a vote on the proposed amendment.

DATES: Relevant information received by April 8, 1986, will be considered in formulating a reply to the CITES Secretariat. All information and comments received by April 21, 1986 will be considered in developing the final United States position on the proposed amendment.

ADDRESSES: Please send correspondence concerning this notice to the Office of Scientific Authority, Mail stop: Room 527, Matomic Building, U.S. Fish and Wildlife Service, Washington, DC 20240. The full text of the proposed amendment and notification from the CITES Secretariat, as well as materials received will be available for public inspection from 8:00 a.m. to 4:00 p.m. Monday through Friday in Room 537, 1717 H Street, NW., Washington, DC.

SUPPLEMENTARY INFORMATION:

Background

Postal procedures for amending the list of wildlife and plant species included in Appendices I and II to CITES are provided in Article XV of CITES. Under this article, any Party may propose an amendment for consideration between the meetings of the Parties. In response, any Party may transmit comments, information, and data to the CITES Secretariat within 60 days of the date when the Secretariat Communicated its recommendations on such proposal to the Parties. As soon as possible thereafter, the Secretariat will then communicate the replies received together with its own recommendations to the Parties. If the Secretariat receives no objection within 30 days of communicating these replies and recommendations, the proposal is adopted and enters into effect 90 days later. If any Party objects during the 30-day period, the proposal is submitted to a postal vote. The proposal then could be adopted by a two-thirds majority of those Parties casting an affirmative or negative vote, provided that at least one-half of all Parties cast a vote or indicate their abstention within 60 days.

The Republic of Botswana has submitted a proposal, for consideration under the postal procedure, to transfer the Botswana population of Nile crocodile (*Crocodile niloticus*) from Appendix I to Appendix II subject to an annual export quota of 2,000 specimens. The Secretariat sent the proposal together with its own recommendations to the Parties on February 12, 1986. This material was received by the Office of Scientific Authority on March 3, 1986. The closing date for receipt of comments and information by the Secretariat is April 13, 1986.

Information in the Proposal

The Republic of Botswana provided information, as summarized below, in support of its proposal. Both historically and at present, the Nile crocodile in the Republic of Botswana occurs in the few perenial rivers of the country including associated swamps and lakes, especially Lake Ngami and the Okavango Swamps which has a mean area of 10,000 km^2. Although no proper census has been undertaken mainly because of the difficulty in conducting a census in the *Phragmites/Papyrus* infested Okavango Swamps where the crocodiles are principally found, qualitative observations indicate that the population is not only healthy, but rapidly recovering from the effects of past exploitation (Graham, 1976; Medem, 1981; Slogrove, 1985 are referenced in the proposal).

Apart from drought, which causes some of the smaller rivers and streams to dry up, the crocodile's habitat is secure. Although there is talk of taking water from the Okavango Swamps for mining and domestic use, there is also a proposal to declare most of this swamp area as a wildlife management area. Regardless, some 3,800 km^2 of the Okavango Delta is included in a game reserve where no hunting or capture of any species is allowed, and at least 100 km of the Linyanti/Chobe river system falls within the Chobe National Park. Reportedly, the Nile crocodile is given complete protection along almost 1,000 km out of a total of 1,760 km of river length and lake shoreline along which the Nile crocodile occurs.

The Republic of Botswana legislation classifies the crocodile as a game animal and hunting licenses and capture permits are required. During the last 10 years, the allowed hunting quota has been 150 per annum. In addition, in recent years two crocodile farms have been assigned capture quotas amounting to a total of about 1,600 crocodiles and 12,000 eggs for a 3-year period. However, only 380 crocodile and about 700 eggs have been collected according to information in the proposal. The killing of an animal in cases where crocodile attack people and/or livestock is also legal.

The Republic of Botswana entered a reservation when it acceded to CITES because it did not believe that the crocodiles were endangered. However, estimates of the number of crocodiles taken or exported during previous periods are 7,600 (between 1957 and 1974); 10,000 (1957–1969); and 40,000 (1959–1969) as reported by Graham, 1976; Blomberg, 1976; and Medem, 1981, respectively (as referenced in the proposal). Because many thousands of crocodiles had been killed for their skins, the Republic of Botswana banned commercial hunting in 1975, and established an annual hunting quota of only 150 crocodiles. The Republic of Botswana says that it has developed effective legal machinery to control overharvest, and they believe that the population has recovered sufficently and can now be cropped. In spite of its reservation, the Republic of Botswana reports that restrictions by other CITES countries have closed markets for legally taken crocodiles.

The Republic of Botswana has indicated that if its proposed amendment is adopted by the Parties, the Republic of Botswana will immediately withdraw its reservation and will implement a marking system mutually acceptable with the CITES Secretariat so as to ensure proper enforcement of the quota system.

The Republic of Botswana contends that the transfer of the Nile crocodile population in the Republic of Botswana to Appendix II and establishment of an appropriate quota will not only ensure preservation of this population, but also will allow export of crocodiles killed to protect humans and livestock, and support crocodile farms, and therefore crocodiles will be seen as "paying for [their] own conservation."

Comments of the CITES Secretariat

The Secretariat provided the following comments and recommendation on this proposal. At the Fifth Meeting of the Conference of the Parties, Malawi presented a proposal which called for downlisting of the species subject to export quotas for some nine African countries. This amendment was accepted by the Parties [refer to 50 FR 48212]. Noting that the Republic of Botswana did not request a quota for the export of Nile crocodile specimens at the Fifth Meeting of the Parties (COP5), the Secretariat believes that a quota of 2,000 specimens would have been granted to the Republic of Botswana if one had been requested at COP5. Annual report quotas established for Nile crocodiles populations in other countries were set at 20 for Cameroon, 1,000 for the Congo, 150 for Kenya, 1,000 for Madagascar, 500 for Malawi, 1,000 for Mozambique, 5,000 for Sudan, 1,000 for the United Republic of Tanzania, and 2,000 for Zambia. [The Nile crocodile population in Zimbabwe had been transferred from Appendix I to Appendix II subject to ranching provisions at the Fourth Conference of the Parties.]

The Secretariat noted that the proposal indicated that ranching and captive breeding have started in the Republic of Botswana and that the quota would cover the products of these operations, and therefore the effects on the wild populations should be limited.

Further, the Secretariat reported that, although the questionnaire accompanying the proposal indicated that only 15 skins were exported per year, the CITES statistics indicted the export of 1,164 skins from 1979 to 1982, of which 1,158 were reportedly imported into the Federal Republic of Germany in 1979.

The Secretariat also noted that no indication of the population size is given, despite a request made by the Secretariat to the Republic of Botswana for such information. Nevertheless, the Secretariat provisionally supports the request and recommends the adoption of this proposed amendment, but will communicate its final recommendations after receipt of comments and information received from the Parties, including an indication of the population size.

Information Sought

The service requests any information that might be useful in developing a response to the Secretariat, and in developing the final United States position. Please transmit any such information and comments to the Service on or before the dates given above. The Service will develop a position on the proposal after additional information is available, including consideration of all comments received, any population estimate provided, and clarification of earlier harvest estimates. The final United States decision as to whether to support or oppose the proposal or abstain from voting is to be based on the best available biological and trade information, including comments received in response to this notice, and any further comments transmitted to us by the Secretariat.

This notice was prepared by Dr. Charles W. Dane, Chief, Office of Scientific Authority, under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et. seq.)

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of availability of a revised fishery management plan and request for comments.

SUMMARY: NOAA issues this notice that the South Atlantic Fishery Management Council (Council) has submitted revisions to the Fishery Management Plan for the Atlantic Swordfish Fishery (FMP) for Secretarial review and is requesting comments from the public. The revisions to the FMP are intended to augment the management program for Atlantic swordfish and is in response to disapproval of §§ 611.61, 630.4, 630.5, 630.7, 630.21, 630.24, and 630.25.

DATE: Comments on the FMP revisions should be submitted on or before April 15, 1986.

ADDRESS: All comments should be sent to Jack T. Brawner, Regional Director, NMFS, Southeast Region, 9450 Koger Boulevard, St. Petersburg, Florida 33702. Clearly mark, "Comments on Atlantic Swordfish Plan revisions", on the envelope.

Copies of the FMP revisions are available upon request from the South Atlantic Fishery Management Council, Southpark Building, Suite 306, 1 Southpark Circle, Charleston, South Carolina 29407–4699.

FOR FURTHER INFORMATION CONTACT: Rodney C. Dalton (Regional Plan Coordinator), 813–893–3722.

SUPPLEMENTARY INFORMATION: Section 304(b)(3) of the Magnuson Fishery Conservation and Management Act, as amended, (16 U.S.C. 1801 *et. seq.*) provides a procedure whereby a Council may modify a partially disapproved FMP and submit it to the Secretary of Commerce (Secretary) for an accelerated review and approval or disapproval. This act also requires that the Secretary, upon receiving the revised plan, must immediately publish a notice that the revised plan is available for public review and comment. The Secretary will consider the public comments in determining whether to approve the revised plan.

The revisions to the FMP propose measures for managing foreign fisheries that have an incidental catch of swordfish and domestic fisheries for swordfish in the Atlantic, Gulf of Mexico, and Caribbean. On May 2, 1985, the Environmental Protection Agency published a notice of availability of the final environmental impact statement for this plan (50 FR 18717).

Regulations proposed by the Council and based on this revised plan are scheduled to be published within 10 days.

(16 U.S.C. 1801 *et. seq.*)

Dated: March 18, 1986.

Richard B. Roe,

Director, Office of Fisheries Management, National Marine Fisheries Service.

BILLING CODE 3510–22–M

---

50 CFR Part 661

Ocean Salmon Fisheries off the Coasts of Washington, Oregon, and California

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of public hearings.

SUMMARY: The Pacific Fishery Management Council (Council) will hold public hearings concerning the 1986 ocean salmon fishing regulation options off the coasts of Washington, Oregon, and California.

DATE: Written comments concerning the Council's proposed ocean fishery management options for 1986 are invited through April 4, 1986. Individuals or organizations desiring to comment in person may do so at the public hearings. See "**SUPPLEMENTARY INFORMATION**" for dated, times, and locations of the hearings.

ADDRESSES: Written comments should be sent to the Pacific Fishery Management Council, Metro Center, Suite 420, 2000 SW. First Avenue, Portland, OR 97201. Copies of the 1986 salmon status report and the Council's regulation options are available at this address. An impact analysis of the Council's proposed option is being developed by the Salmon Plan Development Team and should be available just prior to and at the public hearings.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph Greenley (Executive Director), 503–221–6352.

SUPPLEMENTARY INFORMATION: The Council will meet on April 7–11 at the Eureka Inn, Eureka, California, to consider the input from the public hearings and written comments received, and to hear additional comments from its advisors and the public. The Council will then develop its recommendations for the 1986 ocean salmon fishing season regulations for submission to the Secretary of Commerce.

The hearings will take place at the following locations:

April 1, 1986—7:00 p.m.

Sheraton-Renton Inn, Evergreen Ballroom A, 800 Ranier Avenue, South, Renton, WA 98055.

California Department of Fish & Game, First Floor Auditorium Resource Building, 1416 Ninth Street, Sacramento, CA 95814.

Thunderbird Motor Inn, North & South Umpqua Room, 1313 North Bayshore Drive, Coos Bay, OR 97420.

April 2, 1986—7:00 p.m.—Elks Hall, 453–11th Street, Astoria, OR 97103.

Arizona State University; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No. 85-138R. Applicant: Arizona State University, Tempe, AZ 85287. Instrument: X-Ray Powder Diffractometer, Model D/MAX-RB and Accessories. Manufacturer: Rigaku Corporation, Japan. Original notice of this resubmitted application was published in the **Federal Register** of May 3, 1985.

Comments: None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. Reasons: The foreign instrument provides a combination of high intensity and high resolution for studies of thin film deposits in substrates. This capability is pertinent to the applicant's intended purpose. We know of no domestic instrument or apparatus of equivalent scientific value to the foreign intrument for the applicant's intended use.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

Columbia University; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No.: 85-269. Applicant: Columbia University, New York, NY 10027. Instrument: Spectropolarimeter, Model J-500A. Manufacturer: Japan Spectroscopic Co., Ltd., Japan. Intended Use: See notice at 50 FR 34537.

Comments: None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. Reasons: The foreign instrument provides measurement of circular dichroism spectra and high frequency switching (50,000 times per second) between left- and right-circularly polarized light. The National Institutes of Health advises in its memorandum dated January 22, 1986 that (1) this capability is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Emory University; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No.: 86-047. Applicant: Emory University, Atlanta, GA 30322. Instrument: Monolayer Surface Balance. Manufacturer: Mayer Feintechnik, West Germany. Intended Use: See notice at 50 FR 52821.

Comments: None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States. Reasons: The foreign instrument is capable of determining pressure-area isotherms for fatty acids and other lipids. This capability is pertinent to the applicant's intended purpose. We know of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Ohio State University; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of the 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14, and Constitution Avenue, NW., Washington, DC.

Docket No.: 85–229. Applicant: The Ohio State University, Columbus, OH 43210. Instrument; STEM-SE attachments with Ion Getter Pumps. Manufacturer: Carl Zeiss, West Germany. Intended Use; See notice at 50 FR 30217.

Comments: None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States Reasons: This is a compatible accessory for an instrument previously imported for the use of the applicant. The instrument and accessory were made by the same manufacturer. The National Institutes of Health advises in its memorandum dated February 6, 1986 that the accessory is pertinent to the intended uses and that it knows of no comparable domestic accessory.

We know of no domestic accessory which can be readily adapted to the instrument.

Southern Research Institute; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 86–046. Applicant: Southern Research Institute, Birmingham, AL 35355–5305. Instrument: High Resolution Mass Spectrometer, Model MM7070S with Accessories. Manufacturer: VG Instruments Inc., United Kingdom. Intended use: See notice at 50 FR 52820.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides a guaranteed mass resolution of 40,000 (10% valley definition), a mass range of 2600 amu at 6 Kv, a maximum scan rate below m/z 600 of 0.1 seconds/decade and a sensitivity of 2.5×10^{11} amps for mass 369 in the fast atom bombardment mode. This capability is pertinent to the applicant's intended purpose. We know of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

COMMISSION ON THE BICENTENNIAL OF THE CONSTITUTION

Meeting

AGENCY: Commission on the Bicentennial of the Constitution.

ACTION: Notice of meeting.

SUMMARY: This Notice announces a forthcoming meeting of the Commission on the Bicentennial of the United States Constitution, to be held in Washington, DC, and chaired the Commission's Chairman, Chief Justice Warren E. Burger.

Date and time: Sunday, April 13, 1986 at 1:30 p.m.; Monday, April 14, 1986 at 9:00 a.m. and 12:15 p.m.

Place

On April 13, in the East Conference Room of the Supreme Court Building, at 1 First Street, NE., Washington, DC. On April 14, from 9:00 a.m. to 12:00 noon, in the West Conference Room of the Supreme Court Building; from 12:15 to 3:30 p.m., in the East Conference Room.

Status

On April 14, the morning meeting will be a public hearing in open session; on April 13 and 14, the afternoon meetings will be executive sessions, closed to the public.

Press

On Monday, April 14, from 8:15 to 8:45 a.m., a session with the press will be held in the Lawyers Lounge, second floor, of the Supreme Court Building. The open session public hearing on April 14 will also be open to print and broadcast media.

Agenda

Executive Sessions. Evaluations of proposed projects, examination of Commission budgets, appropriations and personnel structure, review of office space problems, personnel selection procedures, proposed legislation and regulations, status of negotiations on potential national commemorative programs.

Open Session: Progress reports on commemorative plans and programs, announcement of project recognition decisions, discussion of regional and national bicentennial projects, and reception of testimony from witnesses presenting proposals and programs for the bicentennial of the Constitution.

Statements

The Commission is interested in hearing from all persons and organizations with proposed plans, projects or programs which would enhance the bicentennial commemoration of the U.S. Constitution, the Bill of Rights or the founding of the Federal Government. All such statements which can be prepared prior to the Commission meetings on April 13 and 14 should be filed with the Commission on or before April 4, 1986. All written statements so filed will be reviewed by the Commission and its staff.

Presentations

At the public hearing on April 14, available time will permit only a few oral presentations. The Commission will notify in advance those witnesses who have been asked to appear and will limit oral presentations to those selected.

FOR FURTHER INFORMATION CONTACT: Gene Mater, Special Assistant to the Director, 734 Jackson Place, NW., Washington, DC 20503, Tel: (202) USA-1787.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to give the Commission an opportunity to review the current status of operations and to report on its activities. It will also provide an opportunity for witnesses and persons filing statements to advise the Commission about proposed bicentennial plans and programs.

Dated: March 11, 1986.

Mark W. Cannon,

Staff Director.

BILLING CODE 634-001-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Import Limit for Certain Cotton Apparel Products Produced or Manufactured in Uruguay

March 18, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 24, 1986. For further information contact Nathaniel Cohen, Trade Reference Assistant, Office of Textile and Apparel, U.S. Department of Commerce (202) 377–4212.

Background

The Governments of the United States and Uruguay have agreed to further amend their Bilateral Wool Textile Agreement of December 30, 1983 and January 23, 1984, as amended, to establish a specific limit of 47,700 dozen for women's, girls' and infants' cotton coats in Category 335, produced or manufactured in Uruguay and exported during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986. The United States Government has decided to control imports at the new limit. Accordingly, in the letter which follows this notice, the Chairman of CITA directs the Commissioner of Customs to establish this limit. The limit is being adjusted to reflect carryforward in the amount of 1,050 dozen, used during the previous agreement period. The adjusted limit will be 46,650 dozen.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

March 18, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, and the Arrangement Regarding the International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Wool Textile Agreement of December 30, 1983 and January 23, 1984, as amended, between the Governments of the United States and Uruguay; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on March 24, 1986, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Category 335, produced or manufactured in Uruguay and exported during the twelve-month period which begin on January 1, 1986 and extends through December 31, 1986, in excess of 46,650 dozen.[1]

Textile products in Category 335 which have been exported to the United States prior to January 1, 1986 shall not be subject to this directive.

Textile products in Category 335 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

This limit is subject to adjustment in the future according to the provisions of the bilateral agreement of December 30, 1983 and January 23, 1984, which provide, in part, that: (1) The specific limit may be adjusted for carryover and carryforward and (2) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Announcing Import Levels for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Brazil, Effective on April 1, 1986

March 18, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on April 1, 1986. For further information contact Nathaniel Cohen, Trade Reference Assistant, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

Background

The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement, effected by exchange of notes dated August 7 and 29, 1985, between the Governments of the United States and the Federative Republic of Brazil establishes an aggregate specific limit and, within the aggregate, individual specific limits for cotton, wool and man-made fiber textiles and textile products in Categories 300/301, 310/318, 313, 315, 317, 319, 334/335, 336, 337, 338/339, 347/348, 350, 352, 359/659, 361, 363, 369pt. (dish towels in T.S.U.S.A. numbers 365.6615, 366.1720, 366.1740, 366.2020, 366.2040, 366.2420, and 366.2440), 445/446, 604, 614, 638/639, 647/648, 666, and 669pt. (polypropylene bags in T.S.U.S.A. number 385.5300), produced or manufactured in Brazil and exported during the agreement year which begins on April 1, 1986 and extends through March 31, 1987. The new agreement includes sublimits for corduroy coats and trousers in Categories 334/335 and 347/348, amounting to 20 percent of the

---

1986
UMI

overall limit established for each of these two categories. The limit for Category 361 is adjusted downward by 27,000 numbers for carryforward used during the previous agreement period. In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements, directs the Commissioner of Customs to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of textile products in the foregoing categories, produced or manufactured in Brazil and exported during the twelve-month period which begins on April 1, 1986 and extends through March 31, 1987, in excess of the designated restraint limits. This letter also directs that charges be made against the limit for Category 604 as a result of an administrative arrangement described in the directive to the Commissioner of Customs, published in the **Federal Register** on February 19, 1986 (51 FR 6024).

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 14, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of August 7 and 29, 1985 between the Governments of the United States and the Federative Republic of Brazil; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on April 1, 1986, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textiles and textile products in the following categories, produced or manufactured in Brazil and exported during the twelve-month period which begins on April 1, 1986 and extends through March 31, 1987, in excess of the following restraint limits:

Category	12-month restraint limits
300-369, 400-469, and 600-670	288,000,000 square yard equivalents.
300/301	6,886,210 pounds.
310/318	3,180,000 square yards.
313	31,800,000 square yards.
315	14,310,000 square yards.
317	12,986,000 square yards.
319	10,600,000 square yards.
334/335	72,080 dozen of which not more than 14,416 dozen shall be in T.S.U.S.A. nos. 381.4610, 381.4650, 384.3705, 384.3720, 384.3755, 384.3763, 384.3766, 384.3770, 384.3772, 384.3774.
336	37,100 dozen.
337	103,880 dozen.
338/339	558,500 dozen.
347/348	477,000 dozen of which not more than 95,400 dozen shall be in T.S.U.S.A. nos. 381.0542, 381.6230, 381.6260, 384.0722, 384.0724, 384.0726, 384.0729, 384.4735, 384.4740, 384.4746.
360	63,600 dozen.
362	371,000 dozen.
359/659	5,830,000 square yards equivalent.
361	460,000 numbers.
363	14,310,000 numbers.
369pt.[1]	636,000 pounds.
445/446	84,640 dozen.
604	477,000 pounds.
614	5,300,000 square yards.
638/639	212,000 dozen.
647/648	477,000 dozen.
666	1,696,000 pounds.
669pt.[2]	2,120,000 pounds.

[1] In Category 369pt., only T.S.U.S.A. nos. 365.6615, 366.1720, 366.1740, 366.2020, 366.2040, 366.2420, 366.2440.

[2] In Category 669pt., only T.S.U.S.A. no. 385.5300.

In carrying out this directive, cotton, wool and man-made fiber textile products in the foregoing categories, produced or manufactured in Brazil, and exported to the United States on and after April 1, 1985 and extending through March 31, 1986, shall, to the extent of any unfilled balances, be charged against the restraint limits established for such goods during that twelve-month period. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the limits set forth in this directive. In Category 604, 112,161 pounds should be charged to the limit for the period which begins on April 1, 1986 and extends through March 31, 1987.

The limits set forth above are subject to adjustment pursuant to the provisions of the bilateral agreement of August 7 and August 29, 1985 between the Governments of the United States and the Federative Republic of Brazil which provide, in part, that: (1) Specific limits may be exceeded by designated percentages; (2) specific limits may be increased by carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate future adjustments under the foregoing provisions of the bilateral agreement will be made to you by letter.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924.) December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 533 (1)(a).

Sincerely,

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Cancellation of Staged Entry for Certain Cotton Textile Products Produced or Manufactured in Bangladesh

March 18, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 28, 1986. For further information contact Diana Solkoff, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

On March 3, 1986 a notice was published in the **Federal Register** (51 FR 7312), which, among other things, established staged entry periods for imports of cotton textile products in Category 340 (men's and boys' woven cotton shirts), produced or manufactured in Bangladesh and exported during the twelve-month period which began on February 1, 1985 and extends through January 31, 1986. It has been determined that the remaining staged entry period is no longer needed and it is being cancelled.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 (FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14,

1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986)

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

March 18, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: To facilitate implementation of the Bilateral Cotton and Man-Made Fiber Textile Agreement, effected by exchange of notes dated February 19 and 24, 1986, between the Governments of the United States and the People's Republic of Bangledesh, I request that, effective on March 28, 1986, you cancel the remaining staged entry period established in the directive of February 28, 1986 for cotton textile products in Category 340, produced or manufactured in Bangladesh.

The Committee for the Implementation of Textile Agreements had determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Correction

In FR Doc. 86-5651 beginning on page 8868 in the issue of Friday, March 14, 1986, make the following correction: On page 8869, in the first column, the second line from the bottom should read "139-7601".

BILLING CODE 1505-01-M

COMMODITY FUTURES TRADING COMMISSION

Commodity Exchange, Inc., Grade 1 Copper Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Availability of the terms and conditions of proposed commodity futures contract.

SUMMARY: The Commodity Exchange, Inc. ("Comex") has applied for designation as a contract market in Grade 1 copper. The Director of the Division of Economic Analysis of the Commodity Futures Trading Commission ("Commission"), acting pursuant to the authority delegated by Commission Regulation 140.96, has determined that publication of the proposal for comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before May 20, 1986.

ADDRESS: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Reference should be made to the Comex Grade 1 copper futures contract.

FOR FURTHER INFORMATION CONTACT: Rick Shilts, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581, (202) 254-7303.

Copies of the terms and conditions of the proposed Comex Grade 1 copper futures contract will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Copies of the terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254-6314.

Other materials submitted by the Comex in support of its application for contract market designation may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1984)), except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the terms and conditions of the proposed futures contract, or with respect to other materials submitted by the Comex in support of its application, should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581.

Issued in Washington, DC on March 17, 1986.

Paula A. Tosini,

Director, Division of Economic Analysis.

BILLING CODE 6450-01-M

Economic Regulatory Administration

Final Consent Order With Suburban Propane Gas Corp.

AGENCY: Economic Regulatory Administration, Energy.

ACTION: Final Action on Proposed Consent Order.

SUMMARY: The Administrator of the Economic Regulatory Administration (ERA) has determined that a proposed consent order between the Department of Energy (DOE) and Suburban Propane Gas Corporation (Suburban) shall be made final as proposed. The Consent Order resolves the issues of Suburban's compliance for the period November 1973 through October 1978 with DOE's regulations regarding resales of propane, butane and natural gasoline. Suburban will pay to the DOE $1,800,000 for distribution pursuant to 10 CFR Part 205, Subpart V. Persons claiming to have been harmed by Suburban's alleged overcharges will be able to present their claims for refunds in an administrative claims proceeding before the Office of Hearings and Appeals (OHA). The decision to make the Suburban Consent Order final was made after a full review of written comments from the public.

FOR FURTHER INFORMATION CONTACT: Ben L. Lemos, Director, Office of Field Operations, Economic Regulatory Administration, U.S. Department of Energy, 1403 Slocum, Second Floor, Dallas, Texas 75207. Tel: (214) 767–4646.

SUPPLEMENTARY INFORMATION:

I. Introduction
II. Comments Received
III. Analysis of Comments
IV. Decision

I. Introduction

On February 3, 1986, ERA published a Notice announcing a proposed Consent Order between DOE and Suburban which would resolve matters pertaining to Suburban's compliance with the regulations regarding resales of propane, butane and natural gasoline (51 FR 4218). The proposed Consent Order required Suburban to pay $1,800,000 for the settlement of alleged overcharges of $2,059,997 plus interest.

The February 3 Notice sets forth ERA's view that the settlement is favorable to the government and in the public interest. The Notice solicited written comments from the public relating to the adequacy of the terms and conditions of the settlement, and whether the settlement should be made final.

II. Comments Received

ERA received one timely written comment. The comment addressed only the ultimate disposition or distribution of the Suburban settlement funds. The adequacy of the settlement amount or the terms and conditions of the proposed Consent Order was not addressed. The commenters were: Attorneys General of Arkansas, Delaware, Iowa, Louisiana, North Dakota, Rhode Island, Utah and West Virginia.

III. Analysis of Comments

The February 3 Notice solicited written comments to enable the ERA to receive information from the public relevant to the decision as to whether the proposed Consent Order should be finalized as proposed, modified or rejected.

The comments received voiced no objection to the basis or adequacy of the settlement and were supportive in regard to the use of the special refund procedures of Subpart V. Indeed, the Attorneys General stated that the States should receive any funds remaining after distributions to identifiable injured parties.

ERA has determined that the distribution of the settlement funds should be the subject of a separate Subpart V proceeding conducted by OHA, to be initiated shortly after publication of this Notice. This is consistent with ERA's general policy that the special refund procedures of Subpart V are best suited for cases, such as this, in which ERA cannot readily identify the injured parties or their relative amount of economic harm.

Comments on the actual disbursement of money accordingly will not be addressed here, but will be referred to OHA for consideration in the Suburban Consent Order claims proceeding.

The review and analysis of the comments did not provide any information that would support the modification or rejection of the proposed Consent Order with Suburban. Accordingly, ERA concludes that the Consent Order is in the public interest and should be made final.

IV. Decision

By this Notice, and pursuant to 10 CFR 205.199J, the proposed Consent Order between Suburban and DOE executed on October 21, 1985, is made a final order of the Department of Energy; effective on the date of publication of this Notice in the **Federal Register**.

Issued in Dallas, Texas on the 6th day of March, 1986.

Ben L. Lemos,

Director, Office of Field Operations, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Energy Information Administration

Alternative Fuel Price Ceilings and Incremental Price Threshold for High Cost Natural Gas

The Natural Gas Policy Act of 1978 (NGPA) (Public Law 95–621) signed into law on November 9, 1978, mandated a new framework for the regulation of most facets of the natural gas industry. In general, under Title II of the NGPA, interstate natural gas pipeline companies are required to pass through certain portions of their acquisition costs for natural gas to industrial users in the form of a surcharge. The statute requires that the ultimate costs of gas to the industrial facility should not exceed the cost of the fuel oil which the facility could use as an alternative.

Pursuant to Title II of the NGPA, section 204(e), the Energy Information Administration (EIA) herewith publishes for the Federal Energy Regulatory Commission (FERC) computed natural gas ceiling prices and the high cost gas incremental pricing threshold which are to be effective April 1, 1986. These prices are based on the prices of alternative fuels.

FOR FURTHER INFORMATION CONTACT: Leroy Brown, Jr., Department of Energy, Energy Information Administration, 1000 Independence Avenue, S.W., Room BE–034, Washington, D.C. 20585, Telephone: (202) 252–6077.

Section I.

As required by FERC Order No. 50, computed prices are shown for the 48 contiguous States. The District of Columbia's ceiling is included with the ceiling for the State of Maryland. FERC, by an Interim Rule issued on April 2, 1981, in Docket No. RM79–21, revised the methodology for calculating the monthly alternative fuel price ceilings for State regions. Under the revised methodology, the applicable alternative fuel price ceiling published for each of the contiguous States shall be the lower of the alternative fuel price ceiling for the State or the alternative fuel price ceiling for the multistate region in which the State is located.

The price ceiling is expressed in dollars per million British Thermal Units (BTU's). The method used to determine the price ceilings is described in Section III.

State	Per million BTU's
Alabama	2.24
Arizona [1]	2.49
Arkansas	2.60
California [1]	2.49
Colorado [2]	2.52
Connecticut [1]	2.50
Delaware [1]	2.72

[1] Region based price as required by FERC Interim Rule, issued on April 2, 1981, in Docket No. RM–79–21.

[2] Region based price computed as the weighted average price of Regions E, F, G, and H.

Section II. Incremental Pricing Threshold for High Cost Natural Gas

The EIA has determined that the volume-weighted average price for No. 2 distillate fuel oil landed in the greater New York City Metropolitan area during January 1986 was $30.77 per barrel. The EIA has implemented a procedure to partially compensate for the two-month lag between the end of the month for which data are collected and the beginning of the month for which the incremental pricing threshold becomes effective. The prices found in *Platt's Oilgram Price Report* are given for each trading day in the form of high and low prices for No. 2 fuel oil in Metropolitan New York and Northern New Jersey. A lag adjustment factor was calculated using the average of the low posted price for these two areas for the ten trading days ending March 14, 1986, and dividing that price by the corresponding average price computed from prices published by Platt's for the month of January 1986. This lag adjustment factor was applied to the January price yielding $23.60 per barrel. In order to establish the incremental pricing threshold for high cost natural gas, as identified in the NGPA, Title II, section 203(a)(7), this price was multiplied by 1.3 and converted to its equivalent in millions of BTU's by dividing by 5.8. Therefore, the incremental pricing threshold for high cost natural gas, effective April 1, 1986, is $5.29 per million BTU's.

Section III. Method Used to Compute Price Ceilings

The FERC, by Order No. 50, issued on September 29, 1979, in Docket No. RM79–21, established the basis for determining the price ceilings required by the NGPA. FERC also, by Order No. 167, issued in Docket No. RM81–27 on July 24, 1981, made permanent the rule that established that only the price paid for No. 6 high sulfur content residual fuel oil would be used to determine the price ceilings. In addition, the FERC, by Order No. 181, issued on November 6, 1981, in Docket No. RM81–28, established that price ceilings should be published for only the 48 contiguous States on a permanent basis.

A. Data Collected

The following data were required from all companies identified by the EIA as sellers of No. 6 high sulfur content (greater than 1 percent sulfur content by weight) residual fuel oil: for each selling price, the number of gallons sold to large industrial users in the months of November 1985, December 1985, and January 1986.[3] All reports of volume sold and price were identified by the State into which the oil was sold.

B. Method Used to Determine Alternative Price Ceilings

(1) Calculation of Volume-Weighted Average Price

The prices which will become effective March 1, 1986, (shown in Section I) are based on the reported price of No. 6 high sulfur content residual fuel oil, for each of the 48 contiguous States, for each of the 3 months, November 1985, December 1985, and January 1986. Reported prices for sales in November 1985 were adjusted by the percent change in the nationwide volume-weighted average price from November 1985 to January 1986. Prices for December 1985 were similarly adjusted by the percent change in the nationwide volume-weighted average price from December 1985 to January 1986. The volume-weighted 3-month average of the adjusted November 1985 and December 1985, and the reported January 1986 prices were then computed for each State.

(2) Adjustment for Price Variation

States were grouped into the regions identified by the FERC (see Section III.C.). Using the adjusted prices and associated volumes reported in a region during the 3-month period, the volume-weighted standard deviation of prices was calculated for each region. The volume-weighted 3-month average price (as calculated in Section III.B.(1) above) for each State was adjusted downward by two times this standard deviation for the region to form the adjusted weighted average price for the State.

(3) Calculation of Ceiling Price

The lowest selling price within the State was determined for each month of the 3-month period (after adjusting up or down by the percent change in oil prices at the national level as discussed in Section III.B(1) above). The products of the adjusted low price for each month times the State's total reported sales volume for each month were summed over the 3-month period for each State and divided by the State's total sales volume during the 3 months to determine the State's average low price. The adjusted weighted average price (as calculated in Section III.B.(2)) was

---

[3] Large Industrial User—A person/firm which purchases No. 6 fuel oil in quantities of 4,000 gallons or greater for consumption in a business, including the space heating of the business premises. Electric utilities, governmental bodies (Federal, State, or Local), and the military are excluded.

VOL 51
ISS 55
MR 21
1986
UMI

compared to this average low price, and the higher of the values was selected as the base for determining the alternative fuel price ceiling for each State. For those States which had no reported sales during one or more months of the 3-month period, the appropriate regional volume-weighted alternative fuel price was computed and used in combination with the available State data to calculate the State alternative fuel price ceiling base. The State's alternative fuel price ceiling base was compared to the alternative fuel price ceiling base for the multistate region in which the State is located and the lower of these two prices was selected as the final alternative fuel price ceiling base for the State. The appropriate lag adjustment factor (as discussed in Section III.B.4) was then applied to the alternative fuel price ceiling base. The alternative fuel price (expressed in dollars per gallon) was multiplied by 42 and divided by 6.3 to estimate the alternative fuel price ceiling for the State (expressed in dollars per million BTU's).

There were insufficient sales reported in Region G for the months of November 1985, December 1985, and January 1986. The alternative fuel price ceilings for the States in Region G were determined by calculating the volume-weighted average price ceilings for Region E, Region F, Region G, and Region H.

(4) Lag Adjustment

The EIA has implemented a procedure to partially compensate for the two-month lag between the end of the month for which data are collected and the beginning of the month for which ceiling prices become effective. It was determined that *Platt's Oilgram Price Report* publication provides timely information relative to the subject. The prices found in *Platt's Oilgram Price Report* publication are given for each trading day in the form of high and low prices for No. 6 residual oil in 20 cities throughout the United States. The low posted prices for No. 6 residual oil in these cities were used to calculate a national and a regional lag adjustment factor. The national lag adjustment factor was obtained by calculating a weighted average price for No. 6 high sulfur residual fuel oil for the ten trading days ending March 14, 1986, and dividing that price by the corresponding weighted average price computed from prices published by Platt's for the month of January 1986. A regional lag adjustment factor was similarly calculated for four regions. These are: one for FERC Regions A and B combined; one for FERC Region C; one for FERC Regions D, E, and G combined; and one for FERC Regions F and H combined. The lower of the national or regional lag factor was then applied to the alternative fuel price ceiling for each State in a given region as calculated in Section III.B. (3).

Listing of States by Region

States were grouped by the FERC to form eight distinct regions as follows:

Region A

Connecticut
Maine
Massachusetts
New Hampshire
Rhode Island
Vermont

Region B

Delaware
Maryland
New Jersey
New York
Pennsylvania

Region C

Alabama
Florida
Georgia
Mississippi
North Carolina
South CArolina
Tennessee
Virginia

Region D

Illinois
Indiana
Kentucky
Michigan
Ohio
West Virginia
Wisconsin

Region E

Iowa
Kansas
Missouri
Minnesota
Nebraska
North Dakota
South Dakota

Region F

Arkansas
Louisiana
New Mexico
Oklahoma
Texas

Region G

Colorado
Idaho
Montana
Utah
Wyoming

Region H

Arizona
California
Nevada
Oregon
Washington

Dated: March 19, 1986.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. CP86-348-000 et al.]

Natural Gas Certificate Filings; ANR Pipeline Co. et al.

1. ANR Pipeline Company

[Docket Nos. CP86-348-000, et al.]

March 18, 1986.

Take notice that on February 26, 1986, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP86-348-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas on behalf of Standard Gas Marketing Company (SGM), a marketing subsidiary of Sohio Petroleum Company, and, incident thereto, the construction and operation of delivery facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

ANR proposes to provide transportation services for SGM pursuant to a transportation agreement between the parties dated November 19, 1985, as amended February 13, 1986, for a term of 5 years and year to year thereafter. Pursuant to the agreement, ANR proposes to transport up to 14,000 dt equivalent, and such other quantities as the parties may agree, of natural gas per day which SGM would sell and deliver through pipeline facilities to be constructed to connnect Potlatch Corporation, an industrial end-user, in Desha County, Arkansas. In order to accomplish delivery of the transported natural gas, ANR further proposes to construct and operate delivery facilities consisting of a hot tap, side valve and associated measurement facilities at the proposed point of interconnection with SGM's facilities in either Chicot County, Arkansas or Bolivar County, Mississippi. The estimated cost of these facilities is approximately $300,000.00, which would be reimbursed to ANR by SGM. ANR explains that it would transport SGM's gas from various

receipt points in offshore and onshore Texas, Oklahoma and Kansas.

For volumes transported from Oklahoma, onshore Texas and Kansas, ANR proposes to charge SGM (1) 36.8 cents per dt equivalent if the volumes are delivered in Chicot County, Arkansas or Bolivar County, Mississippi, or (2) if the volumes are delivered in Chicot County, Arkansas, 10.6 cents per dt equivalent for gas transported from ANR's West Cameron Block 167, or if the volumes are delivered in Bolivar County, Mississippi, 12.1 cents per dt equivalent. For deliveries of the offshore volumes at either delivery point ANR proposes to charge SGM an additional charge equal to the overrun rate charged by the High Island Offshore System for any gas transported through such system for the account of SGM. ANR would transport and deliver the volumes, as adjusted for fuel use and lost-and-unaccounted-for gas, to SGM at one of the proposed points of delivery, for the account of Potlatch.

Comment date: April 8, 1986, in accordance with Standard Paragraph F at the end of this notice.

2. Tennessee Gas Pipeline Company, a Division of Tenneco Inc.

[Docket Nos. CP86-179-000, CP86-179-001]

March 17, 1986.

Take notice that on November 1, 1985, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP86-179-000 an application, as amended February 28, 1986, in Docket No. CP86-179-001, pursuant to section 7 of the Natural Gas Act for a certficate of public convenience and necessity authorizing the transportation of up to 40 billion Btu equivalent of natural gas per day for Tenngasco Corporation (Tenngasco), acting as agent for United Illuminating Company (United Illuminating), and the addition of four delivery points for the proposed tranportation service and for permission and approval to abandon such transportation service, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Pursuant to the terms of their transporation agreement, dated October 30, 1985, as amended February 7, 1986, Tennessee requests authorization to transport up to 40 billion Btu equivalent of gas per day, less gas for Tennessee's fuel uses, gas lost, and unaccounted-for and plant volume reduction (PVR) due to processing,[1] for Tenngasco, acting as agent for United Illuminating. Tennessee states that it has been informed that United Illuminating desires quantities of gas in excess of 40,000 Mcf per day. As a result of the Commission's directive to Tennessee issued on July 22, 1985, in Opinion No. 240, 32 FERC ¶61,086, Tennessee is stating the transportation quantity of gas on a thermal basis rather than a volumetric basis.

Tennessee requests authorization to add four delivery points for the proposed transportation service. Two of the additional delivery points are to Algonquin Gas Transmission Company (Algonquin Gas) at the interconnection between Tennessee and Algonquin Gas at Wallingford, Connecticut, and at the interconnection between Tennessee and Algonquin Gas at Mendon, Massachusetts. The other two additional delivery points are to Southern Connecticut Gas Company (Southern Connecticut) at the interconnection between Tennessee and Southern Connecticut at Westpoint, Connecticut, and at the interconnection between Tennessee and Southern Connecticut at Trumbull, Connecticut.

Tennessee states that is has been informed by Tenngasco, as agent for United Illuminating, that United Illuminating desires to receive gas supplies for a longer period of time than the period which was stated in the transportation agreement filed with Tennessee's initial application. Tennessee states that the proposed transportation service would expire on December 31, 1990, rather than December 31, 1988. Therefore, Tennessee requests abandonment authorization to be effective 11:59 p.m. CST, December 31, 1990, at which time transportation service rendered by Tennessee pursuant to the agreement would terminate.

In accordance with the agreement, Tennessee states that it would charge a rate for this transportation service, based upon Tennessee's Rate Schedule IT, as shown on its effective FERC Gas Tariff Sheet No. 22. It is indicated that the rates for transportation of PVR, if any, would also be based on Tennessee's Rate Schedule IT and the rate for transportation of liquids, if any, would be established pursuant to the provisions of the agreement.

The Commission published a Notice of Tennessee's application in the **Federal Register** on December 13, 1985 (50 F.R. 51910), in Docket No. CP86-179-000.

Comment date: April 7, 1986, in accordance with Standard Paragraph F at the end of this notice.

3. Transcontinental Gas Pipe Line Corporation

[Docket No. CP86-343-000]

March 18, 1986.

Take notice that on February 24, 1986, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP86-343-000 an application pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing Transco to transport natural gas on behalf of XMCO, Inc. (XMCO), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco requests authorization herein to transport up to 20,000 Mcf of natural gas per day on behalf of XMCO, on an interruptible basis, pursuant to a transportation agreement between Transco and XMCO dated May 31, 1985, as amended October 30, 1985. It is averred that such quantities would be purchased by Florida Gas Transmission Company (Florida) for its system supply from XMCO in the Boykin Church field, Smith County, Mississippi, and would be received by Transco from Mississippi Fuel Company (Fuelco) at the existing points of interconnection between facilities of Transco and Fuelco in Clark and Jefferson Davis Counties, Mississippi. It is indicated that Transco would deliver such quantities at existing points of interconnection between the facilities of Transco and Florida in Vermilion and St. Helena Parishes, Louisiana. Transco states that the initial term of this transportation would be 10 years and would continue on yearly basis thereafter.

Transco further states that, initially, it would charge 6.90 cents per dt equivalent of gas for all such quantities transported to Florida for the account of XMCO, and would not retain initially, any of such quantities to compensate for compressor fuel and line loss make-up. Pending issuance of the requested certificate, self-implementing transportation commenced September 1, 1985 pursuant to Subpart G of Part 284 of the Commission's Regulations (Docket No. ST85-520), it is stated.

Transco submits that by filing subject application, it is not electing "non-discriminatory access" as such term is described and defined in §§ 284.8(b) and 284.9(b) of the Commission's Regulations.

---

[1] PVR is defined to include fuel, shrinkage and other uses or losses of gas resulting from the processing of the gas.

VOL 51 ISS 55 MR 21 1986 UMI

Comment date: April 8, 1986, in accordance with Standard Paragraph F at the end of this notice.

4. United Gas Pipe Line Company

[Docket No. CP85-906-001]

March 18, 1986.

Take notice that on February 28, 1986, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP85-906-001 an amendment to its application filed in Docket No. CP85 906-000 pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing construction of facilities to connect two processing plants to its existing pipeline system, in Livingston and Calcasieu Parishes, Louisiana, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

The amendment reflects that United now proposes to install facilities to tap its pipeline at locations in Livingston and Calcasieu Parishes as originally proposed and additionally to install and operate 355 feet of lateral lines at the Livingston Parish location.

It is stated that in its application, United requested authorization to construct taps to connect proposed processing plants to be owned and operated by an affiliate, PetroUnited Products Inc. (PetroUnited). It is further stated that the parties have been unable to resolve certain issues regarding payback of plant volume reduction volumes by PetroUnited to United and that, therefore, the parties have mutually agreed to the withdrawal of PetroUnited from the project. United states that it would construct and operate both plants and the connecting facilities. United indicates that it is not requesting authorization to construct and operate the processing plants because it believes that they are exempt from jurisdiction under section 7(c) of the Natural Gas Act by reason of § 2.55(a) of the Commission's Regulations.

United estimates it would cost $149,935 to install the connecting facilities, which would be financed from funds on hand.

Comment date: April 8, 1986, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filled, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-6258 Filed 3-20-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. EL85-18-000]

City of Tacoma, Washington v. The Washington Water Power Co. et al.; Order Setting Matter for Investigation and Hearing

Issued: March 17, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

On December 28, 1984, Puget Sound Power & Light Company (Puget), on behalf of the members of the Pacific Northwest Coordination Agreement (PNCA or Agreement) filed a letter dated June 27, 1984, sent by the City of Tacoma, Washington (Tacoma) to PNCA members [1] stating that Tacoma sought to increase its rates for certain services provided under the PNCA, pursuant to section 14(j) of that agreement.

The PNCA provides for the coordinated operation of the electric systems of 16 utilities in order to make the maximum possible use of hydroelectric capacity in the Pacific Northwest. To this end, the Agreement provides for both the sale and exchange of hydroelectric and thermal capacity and energy and for the storage of water for hydroelectric generation. Section 14(j) provides that the parties may agree to amend the charges for the services provided in the PNCA and that, if they cannot agree, the parties subject to the Commission's jurisdiction shall submit the matter to the Commission for determination of charges to become effective thereafter.[2] Section 14(j) further provides that the charges shall become effective prospectively at the beginning of the contract year following the Commission's determination. Since several of the PNCA signatories did not agree to the proposed revisions, Puget, in accordance with the agreement, submitted the matter to the Commission for our resolution.[3]

Notice of Tacoma's complaint was published in the **Federal Register**, with comments due on or before February 25, 1985. Timely motions to intervene were filed by Snohomish, Seattle, Eugene, Chelan, Douglas County, Pend Oreille, and Grant County, (collectively referred to herein as Municipals), and by BPA. Seattle and Eugene joined Tacoma in requesting revised rates. The Municipals and BPA requested intervenor status.

On February 25, 1985, the IOUs filed an answer to Tacoma's complaint. The answer alleged that Tacoma's request lacked sufficient legal or factual content upon which the IOUs could respond or comment. The IOUs further stated that the present rates under the PNCA are just and reasonable and, therefore, no increase in the rates is warranted. On that same date, the IOUs filed a motion requesting that the Commission direct Tacoma to amend its request setting forth, in detail, the basis in fact or law for each of the proposed rate changes.

On May 25, 1985, Tacoma filed a motion to amend and supplement the original complaint. On May 30, 1985, Tacoma filed an amended complaint. As a legal basis for its requested changes, Tacoma states that, unless there are reasonable increases in the charges under the PNCA, Tacoma will be subsidizing other members of the PNCA. Tacoma maintains that subsidization is prohibited by the constitution of the State of Washington. In addition, Tacoma states that, since the inception of the PNCA, charges have been determined by way of comparison with BPA's rates and that, in keeping with historical practice, its proposed rates are intended to track BPA's current rates.

Tacoma states that the rates for the two major services (interchange Energy imbalance and Interchange Capacity Imbalance) have been derived historically by reference to BPA's rates. Tacoma states, for example, that the charge for Interchange Energy under the original PNCA was equivalent to BPA's H-4 nonfirm rate and that there have been several increases in BPA's nonfirm rate since 1964 with corresponding increases in the Interchange Energy charges. Tacoma notes that BPA's current nonfirm energy charge is 22 mills/kWh. As to the charge for Interchange Capacity under the PNCA, Tacoma maintains that it has been set historically at 115% of BPA's firm capacity charge. Tacoma notes that BPA's latest proposed firm capacity charge is $1.12/kW/week, and that the Interchange Capacity charge under the PNCA is now no longer sufficient.

In support of its proposed charges for Interchange Energy Service, Holding Interchange Energy Service, and Transfers to Avoid Spill, Tacoma states that these services are similar to Stored Energy Service under the PNCA and that the charges should be raised to a level equivalent to the current charge for Stored Energy Service. The current charge for stored energy is 3 mills/kWh when returned during heavy load hours and 1 mill/kWh when returned during light load hours.

On July 1, 1985, the IOUs answered the amended complaint. According to the IOUs, Tacoma does not allege that the present rates are unjust or unreasonable under section 206 of the Federal Power Act, that the present rates are less than Tacoma's or any other party's cost of providing service, or that Tacoma's costs have increased since the present rates took effect. The IOUs contend that charges under Section 14 of the PNCA should be based on the costs of the services provided, while recognizing the benefits obtained by the parties to the agreement. They state that Tacoma, in essence, is proposing rates for hydro transactions based upon the city's perception of the market value of power, even though such market value is determined by the cost of thermal generating resources. The jurisdictional utilities also dispute Tacoma's specific allegations regarding the various charges presently collected for services performed under the PNCA. Finally, they deny that the present charges result in improper subsidization by Tacoma or violate the constitution of the State of Washington.

On July 16, 1985, BPA filed a motion for leave to file an answer out of time to Tacoma's amended complaint.[5] In its answer, BPA proposes its own changes to the rates addressed by Tacoma and to rates for several other services under the PNCA.

On July 31, 1985, Puget filed an answer opposing BPA's motion to answer out of time and, in the alternative, a motion for permission to answer BPA's new issues. According to Puget, BPA's motion should be denied because it failed to show extraordinary circumstances that would justify making an untimely filing. According to Puget, the Commission was not obligated to issue notice of Tacoma's amended complaint. Therefore, BPA's reason for its failure to timely answer the amended complaint is allegedly not sufficient to permit the untimely pleading. Puget also states that the relief requested by Tacoma in its amended complaint is identical to that requested in the original complaint and that BPA errs in suggesting otherwise. If the Commission grants BPA's motion, Puget requests that it and other respondents be permitted to respond BPA's pleading. In support, Puget alleges that BPA's answer goes beyond the scope of Tacoma's complaint and raises entirely new issues.[6]

On August 15, 1985, Grant County filed a response to BPA's pleading. According to Grant County, the Commission's Rules of Practice and Procedure bar BPA from using its answer to request Commission approval of new charges for services under the PNCA. According to Grant County, the PNCA also bars BPA from seeking the proposed changes because BPA did not follow the proper procedure, as set forth in Section 14(j) of the PNCA. On August 20, 1985, Chelan, Douglas, Eugene, and Seattle filed a joint answer to BPA's filing, adopting Grant County's position.

On August 20, 1985, the IOUs filed an answer to BPA's pleading and moved to strike those portions of BPA's answer in which it proposed new charges under the PNCA. The jurisdictional utilities also complain that BPA has failed to follow the procedures set forth in section 14(j) of the PNCA. In addition, they object to BPA's proposed rates on the ground that they are not cost-based.

Discussion

Under Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the timely, unopposed motions to intervene serve to make the Municipals and BPA parties to this proceeding. Pursuant to Rule 102 of the Commission's Rules of Practice and Procedure (18 CFR 385.102), the IOSs are, as respondents to Tacoma's complaint, automatically parties to this proceeding.

Tacoma, in its complaint, proposes to increase charges under the PNCA only for certain selected services. Under the present circumstances, we believe that such a proposal is too narrow. The PNCA deals with an unusual abundance of hydroelectric generation. The predominance of hydro generation requires a particularly close interdependency among utilities due to the need for extensive coordinated water storage and release in order to maximize the benefits and use of the regional water resources. In this comprehensive plan, the thermal systems also play an important role in allowing the predominantly hydro systems to operate reliably. These thermal systems provide a firm source of power to back up hydro resources and provide a market for surplus hydro power. Various parties to this proceeding recognize that the various charges are interrelated. BPA, in its response to Tacoma's amended complaint, proposes to increase charges for services under the PNCA in addition to those for which Tacoma proposes changes. The IOUs stated, in the letter originally transmitting Tacoma's

---

[1] The members of the PNCA are: The Washington Water Power Company (Water Power), the Montana Power Company (Montana), Pacific Power & Light Company (PP&L), Portland General Electric Company (PGE), Puget Sound Power & Light Company (Puget), Bonneville Power Administration (BPA), the Eugene Water & Electric Board (Eugene), the City of Seattle (Seattle), Washington, Grant County Public Utility District No. 2 (Grant County), Pend Oreille County Public Utility District No. 1 (Pend Oreille), Douglas County Public Utility District No. 1 (Douglas), Cowlitz County Public Utility District No. 1, Colockum Transmission Company, Inc., Chelan County Public Utility District No. 1 (Chelan), the City of Tacoma, and Snohomish County Utility District No. 1 (Snohomish).

[2] The five investor-owned utilities (IOUs) subject to the Commission's rate jurisdiction under the Federal Power Act (FPA) are Puget, PGE, PP&L, Water Power, and Montana. BPA is separately subject to Commission rate jurisdiction in certain respects under the Pacific Northwest Electric Power Planning and Conservation Act.

[3] The filing by Puget of Tacoma's letter is in the nature of a complaint by Tacoma regarding the present rates charged under the PNCA. The IOUs and Tacoma have requested that we treat Tacoma's letter as a complaint under section 206 of the FPA, and we have done so.

[4] 50 FR 4263 (1985).

[5] As grounds for its untimely pleading, BPA states that it mistakenly expected Tacoma's amended complaint to be noticed in the Federal Register.

[6] On August 9, 1985, the Commission's Secretary granted Puget's motion for leave to file an answer and gave all parties until August 20, 1985, to respond to BPA's answer.

VOL 51
ISS 55
MR 21
1986
UMI

proposed charges, that if any charges are revised, all present charges listed in section 14 of the PNCA should be reviewed.

The present rates under the PNCA have been in effect since 1980 and may no longer be just and reasonable. In light of the period of time which has passed since the present rates became effective, the proposals by BPA and Tacoma for revision to some or all of these charges, and the particular features of the PNCA, we shall set for hearing, pursuant to section 206 of the Federal Power Act, the justness and reasonableness of all the rates currently charged under the PNCA by the IOUs.[7] Any modification to the IOUs' present rates shall become effective following a final determination by the Commission, pursuant to the terms of section 14(j) of the PNCA.

The Commission also notes that, while BPA and the municipals have contracted not to exceed the IOUs' rates under the PNCA, to the extent they may lawfully do so, neither BPA's nor the municipals' rates are subject to the rate setting standards or procedures of the Federal Power Act. The standards and procedures applicable to the municipals rates are found, if at all, in State legislation or regulations. The standards and procedures for establishing BPA's rates are found in section 7 of the Pacific Northwest Electric Power Planning and Conservation Act (Northwest Power Act). The Commission is not empowered to initiate investigations of BPA's rates under that Act. The Commission does, however, have authority to review BPA's rates pursuant to section 7 of the Northwest Power Act, when those rates are submitted to the Commission by BPA pursuant to the procedures established in the Northwest Power Act. Thus, BPA's costs and revenues relating to PNCA services will be considered in the context of a BPA regional rate proceeding under section 7(a) of the Northwest Power Act. We note that BPA has not previously filed its PNCA rates as a separate rate schedule with the Commission or indicated whether any existing schedules accommodate the PNCA services. As BPA's rates are subject to Commission approval, BPA will be directed to file its current and future PNCA rates with the Commission so that they may be separately identified and reviewed in BPA regional rate proceedings. In addition, BPA should elaborate on its view of the interrelationship between the PNCA and the Northwest Power Act requirements as pertinent to the criteria for Commission review.

The Commission notes that the parties have a history of settling PNCA rate proceedings. We encourage efforts toward such a resolution here as well in the interest of expedition and mutuality.

The Commission Orders

(A) The IOUs' motion to strike certain portions of BPA's answer to Tacoma's amended complaint is denied.

(B) BPA's motion to file an answer to Tacoma's amended complaint is granted.

(C) BPA is hereby directed to submit the rate schedules and explanatory material discussed in the body of this order.

(D) Pursuant to the authority contained in, and subject to the jurisdiction conferred upon the Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly section 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and Regulations under the Federal Power Act (18 CFR Ch. 1), a public hearing shall be held concerning the justness and reasonableness of the IOUs' present rates for services under the PNCA.

(E) A presiding administrative law judge, to be designated by the Chief Administrative law judge, shall convene a prehearing conference, to be held within approximately fifteen (15) days of the date of this order, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. The presiding judge is authorized to establish procedural dates and to rule upon all motions (except motions to dismiss), as provided for in the Commission's Rules of Practice and Procedure.

(F) Subdocket -000 of Docket No. EL85-18 is hereby terminated. Subdocket No. EL85-18-001 is hereby assigned to the evidentiary hearing ordered herein.

(G) The Secretary shall promptly publish this order in the **Federal Register**.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CI86-255-000]

Hadson Gas Systems, Inc.; Application for Blanket Certificate of Public Convenience and Necessity and for Order Permitting and Approving Pre-Granted Abandonment

March 18, 1986.

Take Notice that on March 11, 1986, Hadson Gas Systems, Inc. ("Hadson") applied for a blanket certificate of public convenience and necessity authorizing (1) Hadson to make sales of all duly certificated natural gas for resale in interstate commerce, (2) authorizing sales of natural gas by others to Hadson for resale in interstate commerce, (3) authorizing sales for resale of natural gas by others through Hadson acting as their agent, and (4) authorizing the pregranted abandonment of all sales for resale for which sales certificate authority is requested herein. This application is filed pursuant to sections 4 and 7 of the Natural Gas Act ("NGA") and Part 157 of Title 18 of the Code of Federal Regulations.

The certificate and abandonment authority sought herein, if granted, will enable Hadson to purchase from various producers and resell natural gas which remains subject to the NGA jurisdiction of the Federal Energy Regulatory Commission ("Commission") and will allow producers to sell such gas to Hadson. It will also allow Hadson to act as agent in sales by producers of natural gas which remains subject to the NGA. Hadson is not seeking abandonment of producer-pipeline commitments, nor any transportation authority. A more detailed description of the authority Hadson seeks is contained in its Application which is on file with the Commission and open for public inspection.

Hadson is willing to subject itself to the Commission's NGA jurisdiction to the extent, and only to the extent, of its participation in these jurisdictional transactions. Hadson requests that the Commission clarify and declare that Hadson will be subject to the Commission's NGA jurisdiction only to the extent necessary to effectuate the requested authority and only with respect to its participation in the transactions authorized.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 1, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants party to the proceedings. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

---

[7] In light of our action and the opportunity that has been provided for other parties to respond to BPA's answer to Tacoma's amended complaint, we shall deny Puget's motion to strike portions of BPA's pleading. Whether or not BPA should have followed a different procedure for questioning other rates under the PNCA, the Commission is empowered to set all the PNCA rates for investigation on its own motion.

[Docket No. CI84-392-002]

Hunt Petroleum Corp.; Merger and Change of Name

March 18, 1986.

Take notice that on February 28, 1986, Hunt Petroleum Corporation (HPC) of 2800 Thanksgiving Tower, Dallas, Texas 75201, filed an application pursuant to § 154.92(d)(1) of the Commission's regulations requesting a redesignation of the certificates and rate schedules of Hunt Petroleum Corporation (HPC), Grand Isle Oil and Gas Company (GIOAGC), and Louisiana-Hunt Petroleum Corporation (LHPC) to Hunt Petroleum Corporation, effective December 31, 1985, all as more fully shown in Exhibit A and in the application on file with the Commission and open to public inspection.

Hunt Petroleum Corporation (HPC) and Grand Isle Oil and Gas Company (GIOAGC) merged with and into Louisiana-Hunt Petroleum Corporation (LPHC) on December 31, 1985. LPHC the surviving corporation, then changed its name to Hunt Petroleum Corporation as of the same date as the merger.

Any person desiring to be heard or to make any protest with reference to said applications should on or before April 1, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not seve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

LLOXY Holdings, Inc.; Petition To Amend Certificates of Public Convenience and Necessity and To Redesignate Rate Schedules

March 18, 1986.

Take notice that on February 20, 1986, LLOXY Holdings, Inc. (LLOXY), of 225 Baronne Street, New Orleans, Louisiana 70163, filed an application pursuant to §§ 154.91, *et seq.*, (and §§ 157.23, *et seq.*, of the Regulations [18 CFR 154.91, *et seq.*, and 157.23, *et seq.*, (1985)], requesting that the Commission amend the certificates of public convenience and necessity heretofore issued to Louisiana Land Offshore Exploration Company, Inc. (Louisiana Land) and the related rate schedules to reflect the merger of Louisiana Land into LLOXY effective November 1, 1984, all as more fully shown in Exhibit II and in the application on file with the Commission and open to public inspection.

In addition, LLOXY requests that the Commission proceedings in which Louisiana Land was heretofore a party-applicant, party-respondent, or intervenor reflect this name change.

Any change desiring to be heard or to make any protest with reference to said applications should on or before April 1, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

Office of Hearings and Appeals

Proposed Decisions and Orders; Week of February 24 Through February 28, 1986

During the week of February 24 through February 28, 1986, the proposed decisions and orders summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to applications for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these proposed decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except Federal holidays.

Dated: March 14, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

OHR'S Fuel Wallingford Connecticut, KEE-0012

Ohr's Fuel filed an Application for Exception from the Form EIA-782B reporting requirement. The exception request, if granted, would relieve the firm from its obligation to file the monthly report. On February 25, 1986, the Department of Energy issued a Proposed Decision and Order which determined that the exception request be denied.

Phelps Petroleum Company, Burnside, Kentucky, HEE-0169

Phelps Petroleum Company filed an Application for Exception from the Form EIA-782B reporting requirement. The exception request, if granted, would relieve the firm from its obligation to file the monthly report. On February 25, 1986, the Department of Energy issued a Proposed Decision and Order which determined that the exception request be denied.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[ER-FRL-2988-5]

Environmental Impact Statements; Availability of EPA Comments

Availability of EPA comments prepared March 3, 1986 through March 7, 1986 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382-5075/76. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in **Federal Register** dated February 7, 1986 (51 FR 4804).

Draft EISs

ERP No. DA-APH-A82105-00, Rating 3, Rangeland Grasshopper Cooperative Management Program, U.S. **SUMMARY:** EPA is concerned with the adequacy of the EIS due, first, to the absence of a serious explanation of a comprehensive Integrated Pest Management Approach including the use of the biological control agent Nosema locustae and, second, the inadequate characterization of the potential impacts from the chemical spraying alternative on humans and non-target wildlife.

ERP No. D-CDB-C89025-NY, Rating LO, Brooklyn Renaissance Plaza, Construction and Operation, Special Permit, UDAG, NY. **SUMMARY:** EPA anticipates that no significant environmental impacts would result from implementation of this project.

However, EPA suggested that additional information on air quality impacts be included in the final EIS.

ERP No. D-FHW-F40284-OH, Rating EC2, US 422 Relocation, I-271 to OH-44, 404 Permit, Right-of-Way Acquisition, OH. **SUMMARY:** EPA is concerned with potential noise, air, and wetlands/drinking water impacts. EPA recommended that additional analysis and mitigation measures be included in the final EIS.

ERP No. DS-JUS-A82113-00, Rating LO, Cannabis Eradication on Non-Federal and Indian Lands in the Contiguous U.S. and HI. **SUMMARY:** EPA offers no further comments on this action.

Final EISs

F-COE-E23005-AL, Huntsville Spring Branch and Indian Creek System, DDT Contamination Isolation, Olin's Remedial Action Plan, Permits (COE—404 and 10; TVA—26A, FWS—Refuge Use), Redstone Arsenal, Wheeler Reservoir, Tennessee, R., AL. **SUMMARY:** EPA finds that our concerns were satisfactorily addressed in the final EIS, and we have no objections to the project.

ERP No. F-HUD-G85177-OK, Shenandoah Planned Community Development, Mortgage Insurance, OK. **SUMMARY:** EPA finds the final EIS unresponsive to previous environmental concerns and information request regarding the inclusion and evaluation of the completed Superfund investigative study of the Compass Industries site prior to the filing of the final EIS. EPA recommended that a supplemental EIS be prepared. EPA asks that no decision be made on the approval of the FHA mortgage insurance application until NEPA and any required remedial clean-up activity is completed.

Dated: March 18, 1986.

Allan Hirsch,

Director, Office of Federal Activities.

Coast Region of the State. It is EPA's policy to solicit public comment on applications involving active ingredients which have not been previously registered for a food use. Accordingly, EPA is soliciting comments before making the decision whether or not to grant this emergency exemption.

DATE: Comments must be received on or before April 7, 1986.

ADDRESS: Three copies of written comments, bearing the identification notation "OPP-180690" should be submitted by mail to:

Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

In person, bring comments to: Room 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain Confidential Business Information must be provided by the submitter for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed pursuant to this notice will be available for public inspection in Rm. 236, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT:

By Mail: Jim Tompkins, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460

Office location and telephone number: Room 716D, Crystal Mall 2, 1921 Jefferson Davis Highway, Arlington, VA (703-557-1806).

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption

The Applicant has requested the Administrator to issue a specific exemption to permit the use of TILT, EPA Reg. No. 100-617, on rice to control sheath blight caused by *Rhizoctonia solani.*

Information in accordance with 40 CFR Part 166 was submitted as part of this request. TILT is currently registered for use on grasses grown for seed.

The Applicant states that the incidence of rice sheath blight has increased since the late 1960s and has severely reduced rice yields in various locations. The Applicant predicts that the disease situation will continue and even worsen because of the following factors: (1) The susceptibility of all currently available long-grain rice varieties and particularly the newly adopted, high-yielding semi-dwarf types; (2) the incidence of aerial web blight in soybeans during the fall of 1985 (Aerial web blight of soybeans is caused by the same fungus that causes sheath blight in rice and soybeans are a major rotational crop for rice.); and (3) the registered use rates of benomyl do not control sheath blight sufficiently to achieve an economic return.

According to the Applicant, crop rotation, host resistance and deep tillage are alternatives to chemical control to minimize yield loss caused by sheath blight. All three alternative control methods plus chemical control are used to the extent possible, but have not resulted in acceptable control, particularly in plantings of the new semi-dwarf varieties. Available methods of control are not expected to provide economic control next season due to increased presence of the fungi and the wide-spread adoption of the semi-dwarf cultivars. Yields of the semi-dwarf cultivars were reduced nearly 2½ times the amount of traditional varieties by equivalent levels of sheath blight. However, a return to standard height varieties for purposes of reduced disease loss would result in a net production loss of 3 million hundredweight.

The Applicant plans to treat up to 180,000 acres using 10,000 gallons of product. Applications are proposed from May 1, through September 30, 1986. Applications will be made by certified aerial applicators. Applications will not be made within 41 days of harvest or to stubble, ratoon crop rice, or headed rice. Water drained from treated areas may not be used to irrigate other crops. The Applicant indicates that treatment of affected acreage with TILT in 1986 could save growers at least $10.1 million.

This notice does not constitute a decision by EPA on this application. Use of the pesticide TILT has been determined to be of public interest, and therefore, the Agency has decided that public notice and opportunity for public comment pursuant to 40 CFR 166.24 is called for as a part of the information adjudication for specific exemptions. Accordingly, interested persons may submit written views on this subject to the Program Management and Support Division at the address given above.

The Agency will review and consider all comments received during the comment period in determining whether to issue this emergency exemption request.

Dated: March 14, 1986.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[OPP-00223; FRL-2990-8]

FIFRA Scientific Advisory Panel; Partially Closed Meeting of Subpanel

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: There will be a 1-day meeting of a subpanel of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel to review an application submitted pursuant to section 5 of FIFRA by the Monsanto Company for an EPA experimental use permit (EUP) for a genetically engineered microbial pesticide. The meeting will be open to the public from 9 a.m. to 2 p.m. and closed to the public from 2 p.m. to 4 p.m.

DATE: Tuesday, April 22, 1986.

ADDRESS: The meeting will be held at: Hyatt-Regency Hotel-Crystal City, 2799 Jefferson Davis Highway, Arlington, VA. (703-486-1234).

FOR FURTHER INFORMATION CONTACT:

By mail: Stephen L. Johnson, Executive Secretary, FIFRA Scientific Advisory Panel, Office of Pesticide Programs (TS-769C), 401 M. St. SW., Washington, D.C. 20460.

Office location and telephone number: Rm. 1121, Crystal Mall, Building No. 2, Arlington, VA, (703-557-7695).

SUPPLEMENTARY INFORMATION:

I. Notification of Meeting

The Federal Advisory Committee Act (FACA) (5 U.S.C. App. I (1982)) requires that timely notice of each meeting of an advisory committee be published in the **Federal Register**. The interim regulations of the General Services Administration (GSA) (41 CFR Parts 101 through 106) implementing FACA generally require 15 days notice of the meeting. The subpanel is to meet in order to review an application submitted pursuant to section 5 of FIFRA by the Monsanto Company for an EUP for a genetically engineered microbial pesticide. This application proposes small scale field testing in corn of *Pseudomonas fluorescens* isolate Ps 3732-3-7 or isolate 112-12, engineered to contain the delta endotoxin gene from *Bacillus thuringiensis* var. *kurstaki*. The purpose of the EUP is to assess the efficicy of the product on root associated lepidopteran insects following the planting of corn seeds which have been treated with the product prior to planting.

II. Reasons for Closed Meeting

Section 10(d) of FACA provides that an advisory committee meeting may be closed to the public "in accordance with subsection (c) of section 552b of title 5, United States Code." Subsection (c)(4) of 5 U.S.C. 552b provides that an advisory committee meeting may be closed to the public when it is determined that material to be considered at the meeting consists of trade secrets and commercial or financial information obtained from a person and privileged or confidential (hereafter "CBI"). The Agency has determined that the Monsanto submission contains information that is CBI. Therefore, insofar as the subpanel will review CBI in the April 22, 1986 meeting, provision must be made for a portion of the meeting of the subpanel to be conducted in executive session. A written determination that the meeting shall be closed from 2 p.m. to 4 p.m. was made by the Administrator on March 14, 1986, pursuant to section 10(d) of FACA for the following reasons:

1. The Monsanto submission contains CBI.
2. Making the submission public would disclose information that could do substantial harm to Monsanto's competitive position.
3. The Monsanto product is at an early stage of development, i.e., 1 to 3 years before the company would normally request a registration from EPA. Thus, Monsanto is anxious to protect its product for as long as possible, in order to prevent competitors from unfairly benefitting from its research and development efforts.

The Agency intends to make a verbatim transcript of the subpanel meeting, which will be available to the public from the portion of the open meeting. If, upon review of that portion of the transcript from the executive session, EPA should determine that any portions of the transcript do not contain exempt material, EPA will make those portions of the transcript also available to the public.

The agenda for this meeting is:

1. Review of an application by the Monsanto Company for an EUP for a genetically engineered microbal pesticide.
2. Consideration of EPA's scientific assessment and issues in response to the EUP.

Copies of documents pertaining to the above agenda items may be obtained by contacting:

By mail: Information Services Section, Program Management and Support Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC. 20460.

Office location and telephone number: Rm. 236, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA.

Any member of the public wishing to submit written comments should contact Stephen L. Johnson at the address or phone listed under "**FOR FURTHER INFORMATION CONTACT.**" Interested persons are permitted to file such statements before the meeting, and may, upon advance notice to the Executive Secretary, present oral statements to the subpanel. There is no limit on written comments for consideration by the subpanel, but oral statements before the subpanel are limited to approximately 15 minutes. Persons wishing to make oral and/or written statements should notify the Executive Secretary and submit 10 copies of written comments and oral written testimony no late than April 11, 1986, in order to ensure appropriate consideration by the subpanel. Information submitted in any comment concerning this notice may be claimed confidential by marking any part of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. Those comments which do not contain CBI will be included in the public record. Comments submitted not marked CBI may be disclosed publicly by EPA without prior notice to the submitter.

Dated: March 18, 1986.

John A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-761-DR]

Major Disaster and Related Determinations; Montana

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Montana (FEMA-761-DR), dated March 15, 1986, and related determinations.

DATED: March 15, 1986.

FOR FURTHER INFORMATION CONTACT: Sewall H.E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472 (202) 646-3616.

Notice: Notice is hereby given that, in a letter of March 15, 1986, the President declared a major disaster under the authority of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5121 *et seq.*, Pub. L. 93-288), as follows:

I have determined that the damage in certain areas of the State of Montana resulting from severe storms, ice jams, and flooding, beginning on or about February 24, 1986, is of sufficient severity and magnitude to warrant a major-disaster declaration under Pub. L. 93-288. I therefore declare that such a major disaster exists in the State of Montana.

In order to provide Federal assistance, you are hereby authorized to allocate, from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under Pub. L. 93-288 for Public Assistance will be limited to 75 percent of total eligible costs in the designated area.

The time period prescribed for the implementation of section 313(a), priority to certain applications for public facility and public housing assistance, shall be for a period not to exceed six months after the date of this declaration. Notice is hereby given that, pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Mr. David P. Grier IV of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of Montana to have been affected adversely by this declared major disaster and are designated eligible as follows: Deer Lodge, Glacier, Pondera, Sanders, Teton, and Toole Counties for Public Assistance only.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

Julius W. Becton, Jr.,

Director, Federal Emergency Management Agency.

FEDERAL MARITIME COMMISSION

Agreement Name Change

Agreement No.: 207-010884.

Title: Trans Freight Lines, Inc. Joint Service Agreement.

Synopsis: By letter dated March 11, 1986, the Commission was advised by the Attorney for Trans Freight Lines that (1) Trans Freight Lines expects to commence operations as a joint service under FMC Agreement No. 207-010884; (2) change its name from Trans Freight Lines, Inc. to Trans Freight Lines; and (3) will succeed to the business and interests under its respective agreements and tariffs effective March 17, 1986. The following agreements are involved:

No. 202-000093 North Europe—U.S. Pacific Freight Conference

No. 202-010270 Gulf-Europe Freight Association

No. 202-010636 U.S. Atlantic—North Europe Conference

No. 202-010637 North Europe—U.S. Atlantic Conference

No. 202-010656 North Europe—U.S. Gulf Freight Association

No. 217-010792 TFL/Lykes Bros. Space Charter Agreement

No. 202-010848 North Europe—Virgin Islands Rate Agreement

No. 203-010851 Advisory Commission Study Agreement

No. T-3991 South Carolina State Ports Authority/TFL Terminal Lease

No. T-4091 Galveston Wharves/TFL Terminal Lease

No. 224-010611 Massport-TFL Terminal Lease.

Dated: March 18, 1986.

By the Order of the Federal Maritime Commission

John Robert Ewers,

Secretary.

[FR Doc. 86-6275 Filed 3-20-86; 8:45 am]

BILLING CODE 6730-01-M

Notice of Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-003753-005.

Title: Port of Baltimore Terminal Agreement.

Parties:

Maryland Port Administration (MPA)
ITO Corporation of Baltimore (ITO)

Synopsis: The proposed amendment would extend ITO's current lease at MPA's South Locust Point Marine Terminal from its scheduled April 30, 1986 expiration date to January 31, 1987. The parties have requested a shortened review period.

Agreement No.: 202-010676-012.

Title: Mediterranean/U.S.A. Freight Conference.

Parties:

Achille Lauro
C.I.A. Venezolana de Navegacion
Compania Trasatlantica Espanola, S.A.
Costa Line
d'Amico Societa di Navigazione per Azioni
Farrell Lines, Inc.
Flota Mercante Grancolombiana S.A.
"Italia" di Navigazione, S.P.A.
Jugolinija
Jugooceanija
Lykes Lines
Med-America Express Service
Nedlloyd Lines
Nordana Line/Dannebrog Lines AS
Sea-Land Service, Inc.
Zim Israel Navigation Company, Ltd.

Synopsis: The proposed amendment would modify the agreement to provide that any chartering of vessel space between the members will be done pursuant to the terms of a new Annex B which is incorporated by reference.

Agreement No.: 224-010900.

Title: San Francisco Port Commission Terminal Agreement.

Parties:

San Francisco Port Commission
Japan Line, Ltd.

Synopsis: The proposed agreement calls for the utilization of the Port of San Francisco by Japan Line as its published, regularly scheduled Northern California port of call. Japan Line jointly with Evergreen Marine Corp. guarantees a minimum annual thruput of loaded containers and in return will pay less than 100 percent of wharfage and dockage charges. The parties have requested a shortened review period.

Agreement No.: 024-010901.

Title: Port of Galveston Terminal Agreement.

Parties:

The Board of Trustees of the Galveston Wharves (Wharves)
Del Monte Fresh Fruit Company (Del Monte)

Synopsis: The proposed agreement would permit the Wharves to assign Del Monte preferential first call at Pier 18 on berth, shed space and upland marshaling areas. It would also provide Del Monte reduced tariff charges after minimum annual tonnage thresholds are achieved. The initial term of the agreement is five (5) years. The parties have requested a shortened review period.

Agreement No.: 224-010903.

Title: Agreement and Lease between the Maryland Port Administration and Atlantic Container Line, Ltd.

Parties:

Atlantic Container Line, Ltd. (ACL)
Maryland Port Administration (MPA)

Synopsis: The agreement and lease provides ACL with 18.49 acres at Dundalk Marine Terminal for three years. ACL will receive an annual tonnage discount based on the achievement of tonnage beyond a guaranteed level of cargo throughput on the terminal. The parties have requested a shortened review period.

By Order of the Federal Maritime Commission.

Dated: March 18, 1986.

John Robert Ewers,

Secretary.

Mid Town Bancorp, Inc., et al.; Applications To Engage de Novo Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 10, 1986.

A. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Mid Town Bancorp Inc.*, Chicago Illinois; to provide *de novo* through its subsidiary, Mid Town Development Corporation, Chicago, Illinois, real estate development and rehabilitation loans, pursuant to § 225.25(b)(1)(iii) of Regulation Y.

B. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Central Arizona Bancorp.*, Chandler, Arizona; to engage *de novo* through its subsidiary, Central Arizona Mortgage Corporation, Chandler, Arizona, in mortgage banking and commercial finance activities relating to residential and commercial real estate, pursuant to § 225.25(b)(1) (iii) and (iv) of Regulation Y.

Board of Governors of the Federal Reserve System, March 17, 1986.

BILLING CODE 6210-01-M

United Jersey Banks; Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 22521(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may

express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 14, 1986.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *United Jersey Banks,* Princeton, New Jersey; to engage in making or acquiring commercial, consumer and mortgage loans, pursuant to § 225.25(b)(1) of the Act.

Board of Governors of the Federal Reserve System, March 17, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

United Southeastern Bancshares, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and §225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than April 11, 1986.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President), 104 Marietta Street NW., Atlanta, Georgia 30303:

1. *United Southeastern Bancshares, Inc.,* Athens, Alabama; to become a bank holding company by acquiring 100 percent of the voting shares of Athens-Limestone Bank, Athens, Alabama.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on March 14, 1986.

Social Security Administration

(Call 301-594-5706 for copies of packages)

Subject: Letter to Employer Requesting Information About Wages Earned by Beneficiary—Extension—(0960-0034)

Respondents: Businesses or other for-profit institutions; Small businesses or organizations

VOL 51
ISS 55
MR 21
1986
UMI

Subject: Transitional Employment Training Demonstration Data—Extension—(0960-0387)
Respondents: Individuals or households; State or local governments; Non-profit institutions; Small businesses or organizations
Subject: Statement Regarding the Inferred Death of an Individual by Reason of Continued and Unexplained Absence—Extension—(0960-0002)
Respondents: Individuals or households
Subject: Authorization for the Social Security Administration to Obtain Account Records from a Financial Institution—Revision—(0960-0293)
Respondents: Businesses or other for-profit institutions; Small businesses or organizations
Subject: Certificate of Support—Extension—(0960-0001)
Respondents: Individuals or households
OMB Desk Officer: Judy A. McIntosh.

Office of Human Development Services

(Call 202–472–4415 for copies of packages)

Subject: National Study of the Incidence and Prevalence of Child Abuse and Neglect—Reinstatement—
Respondents: State or local governments
OMB Desk Officer: Judy A. McIntosh.

Public Health Service

(Call 202–245–2100 for copies of packages)

Health Resources Services Administration

Subject: Reporting Requirements for Reviews by Health Systems Agencies and State Health Planning and Development Agencies under State Certificate of Need Programs—Reinstatement—(0915-0070)
Respondents: State of local governments; Businesses or for-profit institutions; Non-profit institutions; Small businesses or organizations
OMB Desk Officer: Bruce Artim.

Copies of the above information collection clearance packages can be obtained by calling the Reports Clearance Officer on the number shown above.

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503, Attn: (name of OMB Desk Officer).

Dated: March 17, 1986.

K. Jacqueline Holz,

Deputy Assistant Secretary for Management Analysis and Systems.

BILLING CODE 4150-04-M

Statement of Organization, Functions and Delegations of Authority

Part A, Office of the Secretary, of the Statement of Organization, Functions and Delegations of Authority for the Department of Health and Human Services is amended to reflect the changes in responsibilities for the security functions. Specifically, Chapter AF, Office of the Inspector General (as last amended at 50 FR 45491, October 31, 1985); Chapter AH, Office of the Assistant Secretary for Personnel Administration (as last amended at 50 FR 20850, May 20, 1985); and Chapter AMS, Office of Facilities and Management Services (as last amended at 50 FR 45488, October 31, 1985) are amended. These changes transfer personal security services to the Immediate Office of the Secretary, employee and facility protection services to the Office of Facilities and Management Services, and personnel-related security services to the Office of the Assistant Secretary for Personnel Administration.

These changes are as follows:

1. Amend Chapter AF, Office of the Inspector General as follows:

a. Delete from section AF.20 Functions, paragraph E, The Office of Investigations, subparagraph (f). Reletter subparagraphs (g), (h), (i), (j), (k), and (1) as (f), (g), (h), (i), (j), and (k).

b. Delete from section AF.20, paragraph E, subparagraph (3)(c) items (iii) and (iv) and renumber items (v), (iv) and (vii) as (iii), (iv), and (v).

2. Amend Chapter AH, Office of the Assistant Secretary for Personnel Administration as follows:

a. Amend Section AH.20 Functions, subsection C, Office of Personnel Operations, subparagraph 2, Division of Executive Personnel and Career Development by: changing the word "Career" in the title to "Employee" and by adding the following at the end of the subparagraph: Establishes, implements, and directs programs for personnel and document security.

3. Amend Chapter AMS, Office of Facilities and Management Services as follows:

a. Add to section AMS.20 Functions, subsection E, Telecommunications a new item 9 to read:

9. Maintains employee and facility protection for buildings and employees in the Southwest Complex area.

Dated: March 13, 1986.

John J. O'Shaughnessy,

Assistant Secretary for Management and Budget.

[FR Doc. 86-6218 Filed 3-20-86; 8:45 am]

BILLING CODE 4150-04-M

Statement of Organizations, Functions and Delegations of Authority

Part H, Public Health Service, Chapter HB, Health Resources and Services Administration and Part F, Health Care Financing Administration, of the Statement of Organization, Functions and Delegations of Authority for the Department of Health and Human Services are amended to reflect the transfer of responsibility for the Health Maintenance Organization Program from the Health Resources and Services Administration to the Health Care Financing Administration. Specifically, Chapter HB (as last amended at 50 FR 21357, May 23, 1985) and Chapter F, Health Care Financing Administration (as last amended at 51 FR 1042, January 9, 1986) are amended. This change is made in order to more closely coordinate the Health Maintenance Organization Program with the Medicare Program and improve the objectives of both programs to improve health care and the use of prepaid health care.

The changes are as follows:

1. Amend Chapter HB, Health Resources and Services Administration as follows:

(a) Delete from HB.20 the entire subsection beginning with "Office of the Associate Director for Health Maintenance Organizations (HBHE)" through, and including the entire functional statement for "Division of HMO Compliance (HBHE4)."

(b) Delete from HB.20, from the subsection beginning "Bureau of Health Maintenance Organizations and Resources Development" the term "Health Maintenance Organizations and" from the title and delete items (3), (4), (5), and (6) from the same subsection. Renumber items (7) through (13) as items (3) through (9).

2. Amend Chapter F, Health Care Financing Administration, Section F.20 Office of the Administrator by adding a new subsection C, titled Office of Health Maintenance Organizations. Transfer the entire deleted subsections identified in paragraph 1(a) of this Notice to this new subsection, deleting the title "Office of the Associate Director for Health Maintenance Organizations (HBHE)" and the following from the titles of the various subordinate organizations: "(HBHE2), (HBHE3) and (HBHE4)."

3. Amend Chapter F, Health Care Financing Administrator, Section F. 30 Delegations of Authority by adding a new subsection W, to read as follows:

W. The authority under Title XIII of the Public Health Services Act (42 U.S.C. 300e et. seq.), as amended, concerning the Health Maintenance Organizations.

4. Amend Chapter F, Health Care Financing Administration, Section F. 40 Reservations of Authority by adding a new subsection 4. to read as follows:

4. Under Title XIII of the Public Health Service Act. The Secretary shall exercise the authority pertaining to reports to Congress.

5. Amend Chapter F. Health Care Financing Administration, Section F. 50 Limitations of Authority by deleting subparagraph 2.d., relettering 2.e. as 2.d, and deleting subparagraph 3.b. and relettering 3.c. as 3.b.

6. The May 1, 1978 Delegation of Authority to the Assistant Secretary for Health, delegating Title XIII, Health Maintenance Organizations, of the Public Health Service Act, as Amended; and section 1876(b)(2)(A) of the Social Security Act, as Amended; and the January 19, 1977 Delegation of Authority to the Assistant Secretary for Health delegating authority to Title XIII of the Public Health Services Act and Amendments to the Social Security Act (Pub. L. 94–460), section 202(a) Determination of Organizational Compliance to the Provision of section 1301 (b) and (c) are hereby superseded. The Administrator of the Health Care Financing Administration will exercise these authorities under previous delegations from the Secretary.

Dated: March 14, 1986.

Otis R. Bowen,

Secretary.

BILLING CODE 4160-17-M

Cardiokymography for Diagnosing Coronary Artery Disease

The Public Health Services (PHS), through the Office of Health Technology Assessment (OHTA), announces that it is coordinating a reassessment of what is known of the safety, clinical effectiveness, appropriateness, and use of cardiokymography. Specifically, we are interested in the clinical utility of cardiokymography as it is used in diagnosing coronary artery disease and its sensitivity and specificity when compared with other methods of cardiac screening and diganosis.

The PHS assessment consists of a synthesis of information obtained from appropriate organizations in the private sector and from PHS agencies and others in the Federal Government. PHS assessments are based on the most current knowledge concerning the safety and clinical effectiveness of a technology. Based on this assessment, a PHS recommendation will be formulated to assist the Health Care Financing Administration (HCFA) in establishing Medicare coverage policy. Any person or group wishing to provide OHTA with information relevant to this assessment should do so in writing within 90 days from the date of publication of this notice.

The information being sought is a review and assessment of past, current, and planned research related to cardiokymography, a bibliography of published, controleld clinical trials and other well-designed clinical studies. Information related to the characteristics of the patient population most likely to benefit, the clinical acceptability, and the effectiveness of this technology is also being sought. Specifically, the interchangeability of cardiokymography with electrocardiography, and the need for adjunctive cardiokymography with electrocardiography is of interest.

Written material should be submitted to: Ernest Feigenbaum, M.D., Office of Health Technology Assessment, Park Building, Rm. 3–10, 5600 Fishers Lane, Rockville, MD 20857, (301) 443–4990.

Dated: March 7, 1986.

Enrique D. Carter,

Director, Office of Health Technology Assessment, National Center for Health Services Research and Health Care Technology Assessment.

DEPARTMENT OF THE INTERIOR

Office of the Secretary

President's Commission on Americans Outdoors

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the President's Commission on Americans Outdoors (Commission) will be held Thursday, April 3, 1986, starting at 9:00 a.m. in the Meeting Room of Faneuil Hall, One Faneuil Place, Boston, MA 02201. Due to the number of speakers requesting time to address the Commission a second hearing room has been designated for Thursday, April 3, 1986, starting at 9:00 a.m., in the City Council Chambers, One City Hall Plaza, Boston, MA 02201.

Thisl will be a hearing to obtain information on the kinds of programs that are provided and opportunities afforded in recreation programs in this country. Attendees have been invited by the Commission for this public hearing; however interested parties may request time to testify by contacting the Commission.

The meeting is open to the public, interested persons may attend. The Commission contact is Mr. James Gasser, and he may be contacted at the President's Commission on Americans Outdoors, P.O. Box 18547, 1111—20th Street, NW., Washington, DC 20036–8547, (202) 634–7310.

Dated: March 17, 1986.

Victor H. Ashe,

Executive Director, President's Commission on Americans Outdoors.

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget (OMB) for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed information collection requirement and related forms and explanatory material may be obtained by contacting the Service's clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made directly to the Service clearance officer and the OMB Interior Desk Officer, Washington, DC 20503, telephone 202-395-7313.

Title: Request for Banding Data.

Abstract: The report is completed by licensed bird banders and provides banding data when a bird band recovery report on a specific band number is received and there is no matching band data on file. Such data is used by Federal, State, and Provincial personnel, conservation organizations, and scientific cooperators to aid in the study of population size, mortality and survival rates, longevity and migration patterns of birds. Band recovery information is also used in the preparation of the annual United States and Canadian Wildlife Service's hunting and shooting regulations.

Form Number: 3-860a
Frequency: On occasion
Description of Respondents: Individuals and households, and licensed bird banders
Annual Responses: 4,000
Annual Burden Hours: 133.

Acting Service Clearance Officer: James E. Pinkerton, telephone 202-653-7499, Room 859, Riddell Building, U.S. Fish and Wildlife Service, Washington, DC 20240

Dated: March 5, 1986.

BILLING CODE 4310-55-M

Bureau of Land Management

[W-94205]

Wyoming; Proposed Reinstatement of Terminated Oil and Gas Lease

Pursuant to the provisions of Pub. L. 97-451, 96 Stat. 2462-2466, and Regulation 43 CFR 3108.2-3 (a) and (b)(1), a petition for reinstatement of oil and gas lease W-94205 for lands in Niobrara County, Wyoming was timely filed and was accompanied by all the required rentals accruing from the date of termination.

The lessee has agreed to the amended lease terms for rentals and royalties at rates of $10.00 per acre, or fraction thereof, per year and 16⅔ percent, respectively.

The lessee has paid the required $500.00 administrative fee and $106.25 to reimburse the Department for the cost of this Federal Register notice. The lessee has met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease W-94205 effective May 1, 1985, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Andrew L. Tarshis,
Chief, Leasing Section.

BILLING CODE 4310-22-M

[Designation Order MT-025-6601; Supersedes Designation Order MT-060-002]

Montana Off-Road Vehicle Designation

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Off-Road Vehicle Designation Decision.

Decision

Notice is hereby given relating to the use of off-road vehicles on public lands in accordance with the authority and requirements of Executive Orders 11644 and 11989, and regulations contained in 43 CFR Part 8340. Off-road vehicle use on the following described lands under administration of the Bureau of Land Management is limited to designated roads except for permitted and licensed use authorized by the authorized officer. Permits and licenses will be restricted to the person holding the grazing lease for the purpose of maintaining and constructing new livestock facilities and to Bureau of Land Management employees for the purpose of resource management. The 3,760 acre area affected by the designation is known as the Southwest End Allotment (Action area) located within the Billings Resource Area. This final designation is the result of land use decisions made in the 1984 Billings Resource Management Plan. This designation is published as final today. Under 43 CFR 4.21, an appeal may be filed within 30 days with the Interior Board of Land Appeals.

Limited Designations

A. Approximately 3,760 acres are designated as limited to designated roads or to permitted or licensed use. This acreage is described as:

T. 3 N., R. 25 E.,
  Secs. 5, 8, 9, and 17: All.
T. 3 N., R. 25 E.,
  Sec. 6, lots 1 and 2, S½NE¼;
  Sec. 7, lots 1 and 2, E½, E½W½;
  Sec. 20, N½N½;
  Sec. 31, E½.

All motorized vehicle use is limited in this area to protect the fragile environment, cultural values, scenic values, vegetational values, and to prevent undue erosion.

This designation becomes effective upon publication in the **Federal Register** and will remain in effect until rescinded or modified by the authorized officer. An environmental assessment describing the impacts of this designation is available for inspection at the Billings Resource Area Office.

FOR FURTHER INFORMATION CONTACT: District Manager, Miles City District, BLM, P.O. Box 940, Miles City, Montana 59301, or Area Manager, Billings Resource Area, BLM, 810 East Main, Billings, Montana 59105.

Dated: March 12, 1986.

Robert A. Teegarden,
Acting District Manager.

Agency for International Development

Joint Committee on Agricultural Research and Development of the Board for International Food and Agricultural Development; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, notice is hereby given of the sixteenth meeting of the Joint Committee on Agricultural Research and Development (JCARD) of the Board for International Food and Agricultural Development (BIFAD) on April 1 and 2, 1986.

The purpose of the meeting is to receive reports and recommendations and to discuss the Proposal to extend the Peanut Collaborative Research Support Program (CRSP); to discuss the proposal to extend the Small Ruminent CRSP as well as to receive reports on and discuss AID's nutrition programs. A deliberation on the current role of JCARD will take place and JCARD will receive Panel reports on and discuss Agricultural Policy for AID. JCARD will assess the impact of proposed agricultural, rural development and nutrition budget. The Committee will review institution building plans in Africa and review BIFAD's role in monitoring and evaluating AID's Title XII Projects.

JCARD will meet from 1:15 p.m. to 5:00 p.m. on April 1 and from 8:30 a.m. to 12:15 p.m. on April 2, 1986. The meeting will be held in Room 1406 in the State Department. The meeting is open to the public. Any interested person may attend, may file written statements with the Committee before or after the meeting, or may present oral statements in accordance with procedures established by the Committee, and to the extent the time available for the meeting permits.

Dr. John Stovall, BIFAD Support Staff, is the designated A.I.D. Advisory Committee Representative at the meeting. It is suggested that those desiring further information write to him in care of the Agency for International Development, BIFAD Support Staff, Washington, DC 20523 or telephone him at (202) 647-7332.

Dated: March 18, 1986.

John Stovall,
AID Advisory Committee Representative, Joint Committee on Agricultural Research and Development, Board for International Food and Agricultural Development.

INTERSTATE COMMERCE COMMISSION

Intent to Engage in Compensated Intercorporate Hauling Operations

This is to provide notice as required by 49 U.S.C. 10524(b)(1) that the named corporations intend to provide or use compensated intercorporate hauling operations as authorized in 49 U.S.C. 10524(b).

A. 1. Parent company and address of principal office: A&M Building Systems, Inc., 2610 E. Mabry Drive, P.O. Box 1450, Clovis, New Mexico 88101.

2. Wholly-owned subsidiary which will participate in the operations, and state of incorporation: A&M Farm & Ranch, Inc., 2600 E. Mabry Drive, P.O. Box 1450, Clovis, New Mexico 88101 (Inc. in New Mexico).

B. 1. Parent corporation and address of principal office: Brown Pipe Company, 640-646 W. 19th Street, P.O. Drawer 1408, Jasper, Alabama 35501.

2. Wholly-owned subsidiaries which will participate in the operations, and State(s) of Incorporation:

(i) Brown Pipe Company of Tennessee, Inc., a Tennessee corporation (will engage in operations but not hauling).

(ii) Heavy Haulers, Inc., an Alabama corporation (will be exclusive hauler for intercorporate group).

C. 1. The parent corporation is: Hauserman, Inc., 5711 Grant Avenue, Cleveland, Ohio 44105.

2. The wholly-owned subsidiaries which will participate in the operations and states of incorporation are:

SunarHauserman, Inc., Ohio,
SunarHauserman, Ltd. Waterloo, Ontario, Canada

D. 1. Parent corporation and address of principal office: K mart Corporation, 3100 West Big Beaver Road, Troy, Michigan 48084.

2. Wholly-owned subsidiaries which will participate in the operations and their states of incorporation:

Bishop Buffets, Inc.—Iowa
Furr's Cafeterias, Inc.—Texas
K mart Apparel corp.—New York

E. 1. Parent corporation and address of principal office: PetroSource

BILLING CODE 7035-01-M

[Finance Docket No. 30789]

Indiana Rail Road Co.; Exemption; Acquisition and Operation

Indiana Rail Company has filed a notice of exemption to acquire and operate the Illinois Central Gulf Railroad Company's line between Indianapolis and Sullivan, IN, and a branch from Bloomington to Victor, IN. Any comments must be filed with the Commission and served on Carl M. Miller, 407 Broadway, P.O. Box 346, New Haven, IN 46774.

The notice is filed under 49 CFR 1150.31. If the Notice contains false or misleading information, the exemption is void *ab initio.* Petitions to revoke the exemption under 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: March 14, 1986.

By the Commission, Director Jane F. Mackall, Office of Proceedings.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

[No. MC-F-16951]

Philadelphia, Bethlehem & New England Railroad Co. & Bethlehem Steel Corp., Control; Bethtran, Inc.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: Pursuant to 49 U.S.C. 11343(e), the Commission exempts from the prior approval requirements of 49 U.S.C. 11343, *et seq.*, the acquisition of control by Bethlehem Steel Corporation and the Philadelphia, Bethlehem and New England Railroad Company of BETHTRAN, Inc. (BETHTRAN). BETHTRAN will become a motor common carrier through its proposed purchase of and merger with Carrier Express, Inc. (MC-181662).

DATE: This exemption will be effective on March 20, 1986.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275-7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Room 2229, Interstate Commerce Commission Building, Washington, DC 20423 or call 289-4357 (DC Metropolitan area) or toll free (800) 424-5403.

Decided:

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley. Vice Chairman Simmons concurred in the result. Commissioner Lamboley concurred in the result with a separate expression.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB-55 (Sub 161)]

Seaboard System Railroad, Inc.; Abandonment in Russell, Macon, Bullock, and Montgomery Counties, AL; Findings

The Commission has found that the public convenience and necessity permit the Seaboard System Railroad, Inc., to abandon its 71.95-mile rail line between milepost SL-755.13 at Mahrt and milepost SL-827.08 at Eastmont, in Russell, Macon, Bullock and Montgomery Counties, AL.

A certificate will be issued authorizing this abandonment unless within 15 days after this publication the Commission also finds that: (1) A financially responsible person has offered assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and the applicant no later than 10 days from publication of this Notice. The following notation must be typed in bold face on the lower left-hand corner of the envelope containing the offer: "Rail Section, AB-OFA." Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

James H. Bayne,

Secretary.

Drug Enforcement Administration

Manufacturer of Controlled Substances; Application

Pursuant to § 1301.43(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on January 10, 1986, Mallinckrodt, Inc., Department C.B., Mallinckrodt and Second Streets, St. Louis, Missouri 63147, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Cocaine (9041)	II
Codeine (9050)	II
Diprenorphine (9058)	II
Etorphine hydrochloride (9059)	II
Dihydrocodeine (9120)	II
Oxycodone (9143)	II
Hydromorphone (9150)	II
Diphenoxylate (9170)	II
Hydrocodone (9193)	II
Levorphanol (9220)	II
Methadone (9250)	II
Methadone-intermediate, 4-cyano-2-dimethylamino-4, 4-diphenyl butane (9254).	II
Bulk dextropropoxyphene (non-dosage forms) (9273).	II
Morphine (9300)	II
Thebaine (9333)	II
Opium extracts (9610)	II
Opium fluid extracts (9620)	II
Tincture of opium (9630)	II
Powdered opium (9639)	II
Granulated opium (9640)	II
Oxymorphone (9652)	II
Noroxymorphone (9668)	II
Fentanyl (9801)	II

Any other such applicant and any person who is presently registered with DEA to manufacture such substances, may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street NW., Washington, DC 20537, Attention: DEA Federal Register Representative (Room 1112), and must be filed no later than April 21, 1986.

Dated: March 14, 1986.

BILLING CODE 4510-28-M

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a party of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue NW., Room S-3504, Washington, DC 20210.

Modifications to General Wage Determinations

The numbers of the decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume, State, and page number(s). Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

General Wage Determination Publication

General Wage determination issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 80 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. The subscription cost is $277 per volume. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC, this 14th day of March 1986.

James L. Valin,

Assistant Administrator.

BILLING CODE 4510-27-M

Pension and Welfare Benefits Administration

[Application Numbers D-5598 and D-5776]

Proposed Amendments to Prohibited Transaction Exemption (PTE) 81-6 Involving Lending of Securities by Employee Benefit Plans

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of proposed amendments to PTE 81-6.

SUMMARY: This document contains a notice of pendency before the Department of Labor of proposed amendments to PTE 81-6. PTE 81-6 is a class exemption that permits the lending of securities by employee benefit plans to certain broker-dealers and banks which are parties in interest with respect to such plans. The proposed amendments, if adopted, would affect participants, beneficiaries and fiduciaries of plans engaging in the described transactions, broker-dealers and banks affected by the amendments, and certain corporate surety companies.

DATES: Written comments should be received by the Department on or before May 21, 1986.

EFFECTIVE DATE: If adopted, these proposed amendments would be effective as of January 23, 1981, the effective date of PTE 81-6.

ADDRESSES: All written comments (preferably at least three copies) should be sent to: Office of Regulations and Interpretations, Pension and Welfare Benefits Administration, Room N-5669, Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210, Attention: Lending of Securities. The applications pertaining to the exemptive relief proposed herein (Application D-5598 and D-5776) and the comments received will be available for public inspection in the Public Documents Room of the Pension and Welfare Benefits Administration, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Paul Kelty of the Office of Regulations and Interpretations, Pension and Welfare Benefits Administration, U.S. Department of Labor, (202) 523-8882. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of proposed amendments to PTE 81-6 (46 FR 7527, January 23, 1981). PTE 81-6 provides an exemption from the prohibited transaction restrictions of section 406(a)(1) (A) through (D) of the Employee Retirement Income Security Act of 1974 (ERISA or the Act) and from the taxes imposed by section 4975 (a) and (b) of the Internal Revenue Code (the Code) by reason of section 4975(c)(1) (A) through (D) of the Code.

PTE 81-6 permits an employee benefit plan to lend securities to a broker-dealer registered under the Securities Exchange Act of 1934 (the 1934 Act) or to a bank, provided certain conditions are met. These conditions include a requirement that the lending plan must receive from the borrower collateral consisting of cash, securities issued or guaranteed by the United States Government or its agencies, or irrevocable bank letters of credit. In the absence of an exemption, securities lending transactions would be prohibited under circumstances where the borrowing broker-dealer or bank is a party in interest or disqualified person with respect to the plan under section 3(14) of ERISA or section 4975(e)(2) of the Code.

Manufacturers Hanover Trust Company (Manufacturers Hanover) requested the first proposed amendment in an application dated June 29, 1984 (Application No. D-5598). The amendment would add certain broker-dealers which are exempted from registration under the 1934 Act to the categories of securities borrowers with whom plans may engage in transactions

in reliance on the class exemption.

The second proposed amendment was requested by Merrill Lynch, Pierce, Fenner & Smith (Merrill Lynch) in an application dated September 20, 1984 (Application No. D-5776). The amendment would expand the types of permissible collateral under the exemption to include qualifying irrevocable surety bonds.

According to the applicants, all the conditions already contained in PTE 81-6, with the exception of those modified by this proposal, would continue to be met under the proposed amendments. These conditions include a requirement that neither the borrower nor any affiliate has any discretionary authority or control regarding the investment of plan assets involved in the transaction or provides investment advice with respect to those assets. In addition, the plan must receive collateral having a market value of at least 100 percent of that of the borrowed securities, and the level of the collateral must be maintained at 100 percent or higher. Any lending of securities in reliance on the exemption must be made under a written agreement, and each loan must be terminable by the plan at any time.

The Department is proposing the amendments to PTE 81-6 pursuant to section 408(a) of ERISA and section 4975(c)(2) of the Code [1] and in accordance with ERISA Procedure 75-1 (40 FR 18471, April 28, 1975).

Information collection requirements contained in PTE 81-6 have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511) and have been assigned OMB #1210-0065 approved for use through May 31, 1987.

A. Broker-Dealers Exempt from Registration Under the 1934 Act

Manufacturers Hanover acts as trustee for a number of employee benefit plans and other, non-ERISA accounts and also operates a centralized securities lending program. Under this program, securities are loaned at the discretion of Manufacturers Hanover from a pool of available securities to banks and broker-dealers making specific requests for certain loans. Because of the centralized nature of the program, it is difficult to determine in advance whether a broker or dealer is a party in interest in regard to a particular plan.

The proposed amendment would expand the scope of PTE 81-6 to permit Manufacturers Hanover and other market participants to lend securities to broker-dealers who are exempt from registration under section 15(a)(1) of the 1934 Act because they trade principally in Federal Government and Agency securities exempt from registration under section 3(a)(12) of the 1934 Act. The applicant states that the approximately 30 such broker-dealers are generally subject to the other provisions of the 1934 Act, including section 10 thereof which prohibits the use of manipulative or deceptive devices in connection with the purchase or sale of securities.

Approximately twelve of the broker-dealers so exempted from registration are primary reporting dealers in Government securities who report their security positions and other data to the Federal Reserve System on a daily basis.[2] In addition, a number of the exempted broker-dealers are secondary dealers in Government securities who also report their security positions and other data to the Federal Reserve System. Finally, several of the exempted broker-dealers are subsidiaries of larger registered broker-dealers, which are publicly held corporations that must furnish certain information relating to financial responsibility to the Securities and Exchange Commission.

In a letter dated May 28, 1985, the American Bankers Association (the ABA) stated that its members are often approached by potential borrowers which are Government securities dealer subsidiaries of major registered broker-dealers. The ABA indicated that banks, acting as fiduciaries of employee benefit plans, are reluctant to lend securities to such dealers because they are not registered broker-dealers under the 1934 Act. The ABA further indicated that banks would like to make securities loans to such dealers subject to the safeguards of PTE 81-6.

B. Certain Surety Bonds Used as Acceptable Collateral

Paragraph 2 of PTE 81-6 requires that, when a plan lends securities to a party in interest, the borrower must provide collateral consisting of cash, securities issued or guaranteed by the U.S. Government or its agencies, irrevocable bank letters of credit issued by a person other than the borrower or an affiliate thereof, or a combination of these forms. The plan receives from the borrower collateral either by physical delivery or by book entry in a securities depository which has a market value equal to at least 100 percent of the market value of the loaned securities. Further, under paragraph 6 of the exemption, the collateral must be maintained at no less than 100 percent at all times during the term of a securities loan.

The proposed amendment would expand the kinds of collateral eligible under the exemption to include irrevocable surety bonds issued by insurance companies engaged in the business of issuing such bonds in support of obligations of third persons. The bonds could be issued only by corporate surety companies that are acceptable sureties on Federal bonds under authority granted by the Secretary of the Treasury pursuant to section 6 through 13 of Title 6, United States Code. These companies are authorized to issue surety bonds in the fulfillment of the bonding requirements set forth in section 412 of ERISA.[3] A list of surety companies acceptable on Federal bonds is maintained by the Department of the Treasury and is published annually in Treasury Circular 570.

According to the applicant, a surety bond, like a bank letter of credit, is the functional equivalent of a guaranty. A surety bond evidences the independent obligation of the surety which assures payment to the beneficiary of the bond. The obligation survives any default by, or bankruptcy of, the underlying obligor. Moreover, as in the case of banks, the permissible business and investment activities of sureties are closely regulated by law and the procedures which govern the issuance of surety bonds are designed to ensure that the beneficiaries of the bonds are paid in a timely manner.

The applicant contends that the

---

[1] Section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978), effective December 31, 1978 (44 FR 1065, January 3, 1979), transferred the authority of the Secretary of the Treasury to issue exemptions of this type to the Secretary of Labor.

In the discussion of the exemption, references to sections 406, 408 and 3(14) of ERISA should be read to refer as well to the corresponding provisions of section 4975 of the Code.

[2] See the preamble to a proposed amendment to class exemption 81-8 (involving short-term investments) for a discussion of reporting dealers (49 FR 27379, July 3, 1984). The amendment was finalized on April 9, 1985 (50 FR 14043).

[3] Section 412(a) of ERISA requires that, with certain exceptions, every fiduciary of an employee benefit plan and every person who handles funds or other property of the plan must be bonded as provided in section 412.

VOL 51
ISS 55
MR 21
1986
UMI

availability of surety bonds as acceptable collateral under PTE 81–6 will enhance the ability of plans to enter into securities lending transactions. The cost incurred by borrowers in providing the types of collateral currently permitted under the exemption are at times restrictive. The expense of obtaining surety bond coverage will often be less than the cost of providing the same level of an alternative form of collateral. Under the proposal, the borrowing broker-dealer or bank will enter into arrangements with one or more sureties under which the surety will agree to issue surety bonds in favor of the lending plan. At the time of each loan, the borrower will deliver to the plan cash, Government or Agency securities, irrevocable bank letters of credit, irrevocable surety bonds, or any combination thereof.

Merrill Lynch represents that a surety bond issued in favor of a plan under the proposed irrevocable amendment will have the following characteristics. The bond will evidence the irrevocable and unconditional obligation of the surety to make payments to the plan. Further, it will evidence the independent obligation of the surety to the plan, separate and distinct from the primary obligation of the borrower to the plan under the loan agreement. The bond will be payable upon presentation of the bond by the plan to the surety, with no more than a reasonable period of notice required for payment. It will be payable in immediately available funds, without counterclaim, setoff, deduction, defense, abatement, suspension or deferment of any kind. Each surety bond also will provide that, in the event of termination of a loan and failure of the borrower to promptly return the borrowed securities, the plan will be entitled to draw under the bond to the extent of the amount thereof in a manner comparable to that specified in paragraph 8 of PTE 81–6. Paragraph 8 provides, in part, that, if a loan is terminated and the borrower fails to return the borrowed securities or equivalent within a certain time, the plan may purchase securities identical to those borrowed and apply the collateral to the payment of the purchase price.

Based on the foregoing representations and the additional protections already embodied in PTE 81–6, it appears to the Department that sufficient safeguards are present for the protection of plan assets involved in the transactions. Therefore, the Department has decided to propose the amendments requested by the applicants.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of ERISA does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of ERISA and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of ERISA which require, among other things, that a fiduciary discharge his or her duties respecting the plan solely in the interests of the participants and beneficiaries of the plan; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of ERISA, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries, and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed amendments, if granted, will be supplemental to, and not in derogation of, any other provisions of ERISA and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Written Comments

All interested persons are invited to submit written comments on the proposed amendments to the address and within the time period set forth above. All comments will be made a part of the record. Comments should state the reasons for the writer's interest in the proposed amendments. Comments received will be available for public inspection with the referenced applications at the above address.

Proposed Amendments

Under section 408(a) of ERISA and section 4975(c)(2) of the Code and in accordance with ERISA Procedure 75–1, the Department proposes to amend PTE 81–6 as set forth below.

1. The first sentence of the exemption is amended to read:

"Effective January 23, 1981 the restrictions of section 406(a)(1) (A) through (D) of the Act and the taxes imposed by section 4975 (a) and (b) of the Code by reason of section 4975(c)(1) (A) through (D) of the Code shall not apply to the lending of securities that are assets of an employee benefit plan to a broker-dealer registered under the Securities Exchange Act of 1934 (the 1934 Act) or exempted from registration under section 15(a)(1) of the 1934 Act as a dealer in exempted Government securities (as defined in section 3(a)(12) of the 1934 Act) or to a bank, if:"

2. Paragraph 2 of the exemption is amended to read:

"The plan receives from the borrower (either by physical delivery or by book entry in a securities depository) by the close of the lending fiduciary's business on the day in which the securities lent are delivered to the borrower, collateral consisting of cash, securities issued or guaranteed by the United States Government or its agencies, irrevocable bank letters of credit issued by a person other than the borrower or an affiliate thereof, or irrevocable surety bonds issued by a corporate surety company other than the borrower or an affiliate thereof which is authorized to issue the bonds referred to in section 412(a) of the Act, or any combination thereof, having, as of the close of business on the preceding business day, a market value or, in the case of letters of credit or surety bonds, a stated amount, equal to not less than 100 percent of the then market value of the securities lent;"

Signed at Washington, DC, this 17th day of March 1986.

Dennis M. Kass,

Assistant Secretary for Pension and Welfare Benefits, U.S. Department of Labor.

BILLING CODE 4510-29-M

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Archaeology/Physical Anthropology; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Archaeology/Physical Anthropology.
Date and time: April 7 and 8, 1986 and April 21 and 22, 1986, 9:00 a.m.—5:00 p.m. each day.
Place: Univ. of New Mexico faculty club, Albuquerque, NM (4/7&8), Clarion Hotel, 1500 Canel St., New Orleans, LA (4/21–4/23).
Type of meeting: Closed.
Contact person: Dr. John Yellen, Program Director, Anthropology Program, Room 320, National Science Foundation, Washington, DC 20550: (202) 357–7804.
Purpose of meeting: To provide advice and recommendations concerning support for archaeology and physical anthropology.

Agenda: To review and evaluate research proposals as part of the selection process for awards.
Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data, such as salaries, and information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.
Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF on July 6, 1979.

Dated: March 18, 1986.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

Advisory Panel for Biological Instrumentation; Meeting

In accordance with the Federal Advisory Committee Act, as amended Pub. L. 92–463. as amended, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Biological Instrumentation.
Date and time: Tuesday, April 8, 1986 from 5:00 p.m. to 9:00 p.m. Wednesday, April 9, 1986 from 8:30 a.m. to 6:00 p.m. and Thursday, April 10, 1986 from 8:30 a.m. to 5:00 p.m.
Place: Asilomar Conference Center, Pacific Grove, California, 93950.
Type of meeting: Closed.
Contact person: John C. Wooley, Program Director, Biological Instrumentation, Room 325E, Telephone: 202/357–7652.
Purpose of advisory panel: To provide advice and recommendations concerning support for research instrumentation.
Agenda: To review and evaluate research proposals as part of the selection process for awards.
Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data, such as salaries, and information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.
Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF on July 6, 1979.

Dated: March 18, 1986.

Rebecca Winkler,

Committee Management Officer.

Advisory Panel for Ecology; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Ecology.
Date and time: April 9, 1986—12:00 noon to 5:00 p.m. April 10 and 11, 1986—8:30 a.m. to 5:00 p.m. each day.
Place: Room 1141, National Science Foundation, 1800 G Street, NW., Washington, DC 20550.
Type of meeting: Closed.
Contact person: Dr. Patrick W. Flanagan, Program Director, Ecology (202) 357–9734, Room 1140, National Science Foundation, Washington, DC 20550.
Purpose of panel: To provide advice and recommendations concerning support for research in ecology.
Agenda: Review and evaluation of research proposals and projects as part of the selection process of awards.
Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.
Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF on July 6, 1979.

Dated: March 18, 1986.

Materials Research Advisory Committee Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Materials Research Advisory Committee
Place: Rooms 540, National Science Foundation, 1800 "G" Street, NW., Washington, DC 20550
Date: Thursday April 10 and Friday 11, 1986
Time: 8:30 a.m.–5:00 p.m., both days
Type of meeting: Part Open (Thursday a.m., Friday) Part Closed (Thursday p.m.)
Contact person: Dr. Lewis H. Nosanow, Director, Division of Materials Research, Room 408, National Science Foundation, Washington, DC, 20550, Telephone: (202) 357–9794
Summary minutes: May be obtained from the Contact Person, Dr. Lewis H. Nosanow, at the above stated address.
Purpose of subcommittee: To provide advice and recommendations concerning support of materials research.

Agenda

Thursday Morning, April 10, 1986 (Open)

8:30 a.m. Organizational matters; adoption of minutes
9:00 a.m. Status Report on Division activities
10:30 a.m. Briefing on Budget for FY 1986 and FY 1987
12:00 noon Working Lunch

Thursday Afternoon, April 11, 1986 (closed)

1:00 p.m. Review and discussion of CMS Section Oversight and Report.
5:00 p.m. Adjourn

Friday, April 11, 1986 (Open)

8:30 a.m. Organizational matters; election of chairman for FY'87
9:00 a.m. DMR Long Range Plans
11:00 a.m. Meeting with NSF Director
12:00 noon Working Lunch
1:00 p.m. Discussion of role and participation of women, minorities and handicapped in materials research
2:00 p.m. Continuation of LRP and Budget Discussion
3:00 p.m. Plans for future MRAC activities
5:00 p.m. Adjourn

Reasons for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information,

Advisory Panel for Psychobiology; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L., 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Psychobiology.

Date and time: April 9–11, 1986, 8:30 a.m.—5:00 p.m. each day.

Place: National Science Foundation, 1800 G Street, NW., Room 1243, Washington, DC.

Type of meeting: Part Open—Open April 9, 9:00 a.m.—11:00 a.m. Closed April 9, 11:00 a.m.—5:00 p.m. Closed April 10 and 11, 8:30 a.m.—5:00 p.m.

Contact person: Dr. Fred Stollnitz, Program Director, Psychobiology Program, Room 320, National Science Foundation, Washington, DC 20550, Telephone (202) 357–7949.

Summary minutes: May be obtained from the contact person as listed.

Purpose of subpanel: To provide advice and recommendations concerning support for research in psychobiology.

Agenda: Open—April 9, 9:00 a.m.—11:00 a.m. General discussion of trends and opportunities in Psychobiology.

Closed—to review and evaluate research proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

Dated: March 18, 1986.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Subcommittee on Davis-Besse (Restart); Meeting

The ACRS Subcommittee on Davis-Besse (Restart) will hold a meeting on April 9, 1986, Room 1167, 1717 H Street, NW., Washington, DC.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Wednesday, April 9, 1986—1:30 P.M. Until the Conclusion of Business

The Subcommittee will continue its review of the Davis-Besse restart.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed; whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Herman Alderman (telephone 202/634–1414) between 8:15 A.M. and 5:00 P.M. Persons planning to attend this meeting are urged to contact one of the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: March 17, 1986.

Morton W. Libarkin,

Assistant Executive Director for Project Review.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards, Subcommittee on Reactor Operations; Meeting

The ACRS Subcommittee on Reactor Operations will hold a meeting on April 9, 1986, Room 1046, 1717 H Street, NW., Washington, DC.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Wednesday, April 9, 1986—8:30 a.m. Until 12:30 p.m.

The Subcommittee will review recent operating events.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee may exchange preliminary views regarding matters to be considered during the balance of the meeting. The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr.

Herman Alderman (telephone 202/634–1414) between 8:15 A.M. and 5:00 P.M. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: March 17, 1986.

Morton W. Libarkin,

Assistant Executive Director for Project Review.

BILLING CODE 7590-01-M

Documents Containing Reporting or Record Keeping Requirements; Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Types of submission: revision.

2. The title of the information collection: 10 CFR 50.63. Station Blackout.

3. How often the collection is required: One time.

4. Who will be required or asked to report: Nuclear power plant licensees and applicants for operating licenses.

5. An estimate of the number of responses: 125.

6. An estimate of the total number of hours needed to complete the requirement or request: 15,000 hours.

7. An indication of whether section 3504(h), Pub. L. 96–511 applies: No.

8. Abstract: NRC is requesting a clearance for proposed rule 10 CFR 50.63, Station Blackout which requires licensees and applicants for operating licensees to submit information to support the length of time nuclear power plants can withstand a total loss of all alternating current power.

ADDRESSES: Copies of the transmittal may be inspected or obtained for a fee from NRC Public Document Room, 1717 H Street, NW., Washington, DC 20555.

FOR FURTHER INFORMATION CONTACT:

Comments and questions should be directed to the OMB reviewer, Jefferson B. Hill (202) 395–7340.

NRC Clearance officer's R. Stephen Scott, (301) 492–8585.

Dated at Bethesda, Maryland, this 17th day of March 1986.

For the Nuclear Regulatory Commission.

Patricia G. Norry,

Director, Office of Administration.

[FR Doc. 86–6265 Filed 3–20–86; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50–413]

Duke Power Co., et al; Consideration of Issuance of Amendment To Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–35, issued to Duke Power Company, et al, (the licensee), for operation of the Catawba Nuclear Station, Unit 1 located in York County, South Carolina.

The proposed amendment would extend, on a one-time basis, by a maximum of five months until the first refueling outage (currently scheduled on September 28, 1986) those 18-month Technical Specification (TS) surveillances associated with the Engineering Safety Features (ESF) which can only be conducted with Unit 1 in Cold Shutdown or Refueling. Normally, since such refueling outages occur about every 18-months, extension beyond the 18-month surveillance interval required by the Technical Specifications for the ESF testing is usually not necessary. However, due to the extended length of Unit 1 startup program and cycle 1, the licensee must either request an extension or be forced to shutdown prior to the first refueling outage.

The proposed amendment is in accordance with the licensee's request dated February 12, 1986, as supplemented by letters dated March 3, 4, and 11, 1986. The changes would be accomplished by adding a footnote usually stating that this surveillance need not be performed until prior to entering Hot Shutdown, Hot Standby or Startup, as applicable, following the Unit 1 first refueling outage. The footnote would be added to the Surveillance Requirements included in the following categories:

1. ESF Actuation on Safety Injection

This category includes Surveillance Requirements 4.1.2.2c; 4.3.1.1, Table 4.3–1, Item 17; 4.3.2.1; 4.3.2.2; 4.5.1.1.1d.; 4.5.2e.; 4.5.3.1; 4.7.3b.1); 4.7.3b.2); 4.7.4b.1); 4.7.4b.2); 4.7.7d.2) and 4.8.1.1.2g.10)

2. Portions of Diesel Generator Testing

This category includes Suveillance Requirements 4.8.1.1.2g.7) and 4.8.1.1.2g.8)

3. Phase A and B Containment Isolation

This category includes Surveillance Requirements 4.6.1.8d.2); 4.6.3.2a.; 4.7.3b.1); 4.6.2c.; 4.6.3.2b.; 4.6.6.2; 4.7.3b.1) and 4.7.4b.1)

4. ESF Actuation on Loss-of-Offsite Power

This category includes Surveillance Requirements 4.7.4b.2); 4.8.1.1.2g.4); 4.8.1.1.2g.6)a); 4.8.1.1.2g.6)b) and 4.8.1.1.2g.9)

The postponement of Surveillance Requirement 4.6.6.2 for the Containment Valve Injection Water System also requires a one-time exemption from the 24 month maximum surveillance interval required by 10 CFR 50, Appendix J, Section III.C.2.(b) regarding Type C local leak rate tests. This exemption to Appendix J is currently under consideration by the NRC staff.

In accordance with the previous Surveillance Requirements integrated tests are conducted to verify the overall ESF capability. The licensee's application considers that the extension requested is justified based on the fact that other periodic surveillances required by the Technical Specifications on individual components such as diesel generators, pumps, valves, fans and circuits will continue to be performed as required. These periodic surveillances ensure that individual components will remain operable.

Before issuance of the proposed license amendment the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The following provides an analysis using the standards of 10 CFR 50.92.

(1) This proposed amendment would not significantly increase the probability or consequences of an accident previously evaluated. The probability of

VOL 51 ISS 55 MR 21 1986 UMI

previously evaluated accidents is not affected since the proposed changes will only affect ESF components, thus normal plant operation will not be affected. The consequences of a previously evaluated accident will not be significantly increased since the affected ESF components and circuitry will be tested as required by other applicable Technical Specification Surveillance Requirements. This amendment request would only affect the ESF actuation of ESF components by extending the required surveillance by five months. This increase is not viewed as significant when coupled with the other surveillances conducted on the individual components and circuitry.

(2) This proposed amendment would not create the possibility of a new or different kind of accident from any accident previously evaluated since the design and operation of the plant will not be affected.

(3) This proposed amendment would not cause a significant reduction in a margin of safety. The extension of time in which to do the required surveillance would be five additional months beyond that allowed by the Technical Specifications. Coupled with the fact that individual component and circuit tests are conducted on a regular basis as provided in other Technical Specifications, there is not significant reduction in a margin of safety. An increase in safety is gained by the avoidance of an additional cooldown and heatup cycle on the Reactor Coolant System.

Based on the above discussion, the staff proposed to determine that this amdendment, which provides an extension of the 18-month surveillance interval for the testing associated with the ESF, does not involve significant hazards considerations.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S.Nuclear Regulatory Commission, Washington, DC. 20555. Comments may also be delivered to Room 4000, Maryland National Bank Building, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Monday through Friday. Copies of comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC.

By April 21, 1986, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interests may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularly the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding; The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspects(s) of the subject matter of the proceding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the perition without requesting leave of the Board up to fifteen (15) days priur to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitation in the order granting leave to intervene, and have the opportunity to participate in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination of the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards considerations, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10 days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following messaged addressed to D.S. Hood: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Mr. William L. Porter, Duke Power Company, P.O. Box 33189, Charlotte, North Carolina, 28242, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated February 12, 1986, and its supplements dated March 3, 4, and 11, 1986 which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the York County Library, 138 East Black Street, Rock Hill, South Carolina, 29730.

Dated at Bethesda, Maryland, this 18th day of March 1986.

BILLING CODE 7590-01-M

[Docket No. 50–344]

Portland General Electric Co.; Denial of Amendment To Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) has denied in part a request by the licensee for an amendment to Facility Operating License No. NPF–1, issued to the Portland General Electric Company (the licensee), for operation of the Trojan Nuclear Plant (the facility), located in Columbia County, Oregon.

The amendment, as proposed by the licensee, would have modified the Trojan Technical Specifications, Section 4.5.3.1, concerning the surveillance requirements for the Emergency Core Cooling System (ECCS) when the reactor is in the Hot Shutdown Operating Mode. The licensee's application for the amendment was dated March 12, 1985. Notice of Consideration of Issuance of this amendment was published in the **Federal Register** on October 9, 1985 (50 FR 41255). All of the requested changes were granted except the requests related to the definition of Containment Integrity (Specification 1.8), which the licensee requested be withdrawn by letter dated August 22, 1985, and the requests related to Section 4.5.3.1.

Notice of the issuance of Amendment No. 114 will be published in the Commission's next regular **Federal Register** notice.

The request to modify Section 4.5.3.1 concerning the surveillance requirements for the ECCS when the reactor is in the Hot Shutdown Operating Mode was denied.

At present Section 4.5.3.1 states "The ECCS subsystem shall be demonstrated Operable per the applicable Surveillance Requirements of 4.5.2". The request proposes to revise this specification to explicitly state which surveilliance requirements (of 4.5.2) are applicable in this Mode. This request was found unacceptable because the licensee has not demonstated a significant need for this proposed revision, and that it could confuse, rather than clarify, present requirements.

The licensee was notified of the Commission's denial of this request by letter dated.

By April 21, 1986, the licensee may demand a hearing with respect to the denial described above and any person whose interest may be affected by this proceeding may file a written petition for leave to intervene.

A request for a hearing or petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Attention: Docketing and Service Branch, or maybe delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC, by the above date.

A copy of any petitions should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to James W. Durham, Sr., Vice President, General Counsel and Secretary, Portland General Electric Company, 121 SW. Salmon Street, Portland, Oregon 97204.

For further details with respect to this action, see (1) the application for amendment dated March 12, 1985, and (2) the Commission's letter to Portland General Electric Company dated March 12, 1986, and the enclosed Safety Evaluation which are available for public inspection at the Commission Public Document Room, 1717 H Street NW., Washington, DC, and at the Multnomah County Library, 801 SW. 10th Avenue, Portland, Oregon. A copy of Item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of PWR Licensing–A.

Dated at Bethesda, Maryland, this 12th day of March 1986.

For the Nuclear Regulatory Commission.

Acting Director, PWR Project Directorate No. 3, Division of PWR Licensing–A.

[FR Doc. 86–6269 Filed 3–20–86; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50–395]

South Carolina Electric & Gas Co., South Carolina Public Service Authority; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Prior Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–12, issued to South Carolina Electric & Gas Company and South Carolina Public Service Authority (the licensee), for operation of the Virgil C. Summer Nuclear Station, Unit 1, located in Fairfield County, South Carolina.

The amendment would revise Technical Specification 3/4.4.5, "Steam Generators" and its bases. The revision would allow steam generator tube imperfections to be addressed by the Westinghouse P–STAR evaluation method as an alternative to the current requirement for tube plugging. Under the P–STAR evaluation method, if tube imperfections located within the tubesheet are below the distance P–STAR (the top 1.25" of the tubesheet), and the tube with imperfections has an intact tube directly above it (one row higher in number, same column), then the tube need not be plugged. The licensee's application for amendment was dated January 16, 1986.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 21, 1986, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the

VOL 51 ISS 55 MR 21 1986 UMI

proceeding must file a written petition for leave to intervene. If a request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and License Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Lester S. Rubenstein (petitioner's name and telephone number); (date petition was mailed); (plant name); and (publication date and page number of this **Federal Register** notice). A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Randolph R. Mahan, South Carolina Electric & Gas Company, P.O. Box 764, Columbia, South Carolina 29218, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated January 16, 1986, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Fairfield County Library, Garden and Washington Streets, Winnsboro, South Carolina 29180.

Dated at Bethesda, Maryland this 14th day of March 1986.

For the Nuclear Regulatory Commission.

Lester S. Rubenstein,

Director, PWR Project Directorate No. 2, Division of PWR Licensing-A.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-23015; File No. SR-AMEX-86-8]

Self-Regulatory Organizations; Proposed Rule Change by the American Stock Exchange, Inc., Relating to Matching by Traders

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 10, 1986, the American Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The American Stock Exchange, Inc. ("AMEX" or "Exchange") proposes to clarify its policy regarding the matching of orders by options traders affiliated with the same member organization.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Exchange policy concerning matching is intended to prevent a single firm or a joint account from obtaining a larger portion of a match by "packing the crowd". The Exchange proposes to clarify the policy regarding when options traders who are affiliated with the same member or member organization may match orders in the trading crowd. The proposed policy is set forth in an information circular which will be distributed to the Amex membership.

In brief, the proposed Circular reconfirms that traders who are in joint account, or who are associated with the same member organization may not match orders. A limited exception to this policy will be made, however, if such traders who are associated with the same member firm have demonstrated that they are not affiliated with one another. If traders are associated with the same member organization but are not affiliated with one another, they would be permitted to match *subject to a limitation:* If two or more such traders are on parity in a trading crowd, they would be entitled to that proportion of the trade which they could obtain if there were only two such affiliated traders. The Exchange will make determinations upon request as to whether such traders are in fact affiliated with one another, using the control test set forth in Exchange Rule 904, which governs aggregation of accounts in the context of position limits.[1]

For example, assume 150 contracts are to be traded and four traders who are associated with the same member firm but are deemed non-affiliates of one another are in a trading crowd with one unrelated trader, and each is bidding for 50 contracts. If all five are on parity, the unrelated trader will receive 50 contracts and the four other traders will share the remaining 100 contracts, each receiving 25 contracts. That is, the four traders affiliated with the same firm will be entitled to only two matches.

The proposed change is consistent with the requirements of the Securities Exchange Act of 1934 ("1934 Act") and the rules and regulations thereunder applicable to the Exchange by clarifying a policy which is intended to ensure fairness in the execution of orders in the trading crowd. Therefore, the proposed rule change is consistent with section 6(b)(5) of the 1934 Act, which provides in pertinent part, that the rules of the Exchange be designed to promote just and equitable principles of trade and to protect the investing public.

B. Self-Regulatory Organization's Statement on Burden on Competition

The AMEX believes that the proposed rule change will not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange's Trading Practices and Procedures Sub-Committee has endorsed the proposed rule change.

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 11, 1986.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 13, 1986.

Shirley E. Hollis,

Assistant Secretary.

[Release No. 34-23018; File No. SR-CBOE-85-51]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Order Approving Proposed Rule Change

On December 31, 1985, the Chicago Board Options Exchange, Incorporated ("CBOE") submitted to the Securities and Exchange Commission ("Commission") pursuant to section 19(b)(1) under the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b-4 under the Act,[2] a proposed rule change to allow CBOE to introduce, in "unusual market conditions," series of individual stock options up to two strike prices intervals above and below the current price of the underlying security. CBOE's rules currently allow CBOE to introduce series of individual stock options only one strike price interval above and below the current market price of the underlying security. Under the proposal, if series were available for a particular option class with strike prices of 95, 100 and 105, and the price of the underlying stock rises to 105 (or falls to 95) under unusual market conditions, the CBOE could introduce new series with strike prices of 110 and 115 (or 90 and 85).[3]

Under exiting CBOE rules, CBOE could only introduce series with a strike price of 110 (or 90) in these circumstances.

CBOE expains that the criteria the Exchange will consider in determining whether unusual market conditions exist for the purposes of this proposal include intra-day and short-term day-to-day price movements of the underlying securities, requests for additional strike prices by customers and market makers, the potential burden on market makers

---

[1] 15 U.S.C. 78s(b)(1)(1982).

[2] 17 CFR 240.19b-4 (1985).

[3] CBOE has classes of options in which it may use different strike price intervals. Thus, stocks trading under $25 per share, may have intervals of two and one-half ponts, or greater, and stocks trading above $50 per share may have intervals of five points. CBOE indicates that the two strike price intervals above the market allowed by the filing refers to intervals in use for that class at the time. Telephone conversaton between Fredric M. Krieger, Associate General Counsel, CBOE, and Alden Adkins, Attorney, Division of Market Regulation, SEC, on March 14, 1986. SEC. For example, if five point intervals are in use for a class, the filing allows CBOE to add strike prices ten points (two five point intervals) above the current market; if 10 point intervals are in use, the filing allows CBOE to add strike prices 20 points (two ten-points intervals) above the current market. While CBOE can change intervals for a class, e.g., from five to ten points, it cannot in essence use two different intervals simultaneously. For example, the proposal does not alllow the addition of strike prices 20 points away from the market in a class that at that time has five-point intervals.

1986
UMI

of maintaining additional strike prices, and the availability in other expiration months of additional strike prices in the same options.[4] The Exchange indicates that it is expected that the Exchange will add prices where "in general volatility has increased," where the stock recently has moved from one strike price through the next strike price, where intra-day price movements "have or are expected to exceed" a strike price interval, or where the value of the closest out-of-the-money option is "in excess of a reasonably low price . . . for effective hedging of positions."[5] CBOE also states that "greater deference" will be given to adding a second out-of-the-money strike price to options on stocks trading in excess of $50.00, because the intervals for such options "were historically 10 points."[6]

The proposed rule change was noticed in Securities Exchange Act Release No. 22789 (January 13, 1986), 51 FR 2615 (January 17, 1986). No comments were received on the proposed rule change.

CBOE states that the proposed rule change is motivated by "recently volatile stock market activity," which can cause stock priced to "move precipitously through existing strike prices." [7] According to CBOE, when stock prices move rapidly, the price of out-of-the-money options increases to take into account this increased volatility.[8] Under the proposal, when a stock exhibits unusual volatility CBOE could add strike prices two intervals above (or below) the current market price of the underlying stock, thus providing a lower priced out-of-the-money option (the series two intervals above the current market) than CBOE can currently provide (series one interval above the current market).

Moreover, CBOE indicates that there is a two-day lag time between the time of announcement of a new strike price and the time it is available for trading. CBOE believes that the proposal will allow CBOE, in unusual market conditions, in essence to anticipate rapid, dramatic price movements by listing series two intervals above (or below) the market. Should the movement materialize, there will be at-the-money series available that might not be available under CBOE's current rules.[9]

The Commission previously has indicated that proposals to allow an increase in the number of series available in an option class need to strike a balance between accommodating the demand of market participants or the need for investment flexibility and causing excessive dilution of liquidity in an increased number of open options series.[10] The Commission believes the CBOE proposal satisfies this test.

First, in light of CBOE's inability to add new strike prices in less than two days, CBOE's proposal may be the only practical means of ensuring the relatively constant availability of at-the-money or near-the-money monthly series of stock options when price volatility increases significantly. Second, the Commission notes that CBOE's proposal permits at most a fairly small absolute increase in the number of stock option series that may be outstanding at one time. As described, CBOE's proposal permits the introduction at any ont time of only one series more than allowed under CBOE's current rules. Third, CBOE's proposal limits the introduction of this additional series to "unusual market conditions" [11] and only allows, but does not require, that the new series be introduced even then.[12]

In sum, the Commission finds that CBOE's proposal should not result in a substantial increase in the number of individual stock options series outstanding, and may ensure the more consistent availability of at-the-money or near-the-money series in volatile markets. For these reasons, the Commission finds that the potential benefits of this proposal in accommodating market participants' investment needs and objectives outweigh the possible adverse effects on market liquidity and dispersion of interest the proposal might cause. Accordingly, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6 of the Act [13] and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[14] that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[15]

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. IC-14993; File No. 812-5830]

Application and Opportunity for Hearing; The Prudential Variable Contract Account-II

March 17, 1986.

Notice is hereby given that The Prudential Variable Contract Account-11 ("Applicant" or "VCA-11"), a separate account of the Prudential Insurance Company of America ("Prudential"), Prudential Plaza, Newark, New Jersey 07101, filed an application on April 20, 1984, and an amendment thereto on January 22, 1986, for an order of the Commission pursuant to section 6(c) of the Investment Company Act of 1940 ("Act"), exempting Applicant from the provisions of section 2(a) (41) of the Act and Rules 2a-4 and 22c-1 promulgated thereunder, to the extent necessary to permit it to use the amortized cost valuation method for the purpose of valuing the short-term debt obligations held in its portfolio. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below. Such persons are also referred to the Act for the complete text of those provisions that are relevant to the application.

The application states that Applicant is registered under the Act as an open-end, diversified management investment company. Prudential is Applicant's investment manager. Applicant states that it was organized for the purpose of

[5] *Id.*

[6] *Id.* As noted above, CBOE has indicated that it would not use the proposed change to add, for example, strike prices two 10 point intervals above the market to a class using five point intervals. Note 3, *supra*.

[7] File No. SR-CBOE-85-51, at 3.

[8] *Id*

[9] *Id.* Should the anticipated price movement not materialize, CBOE could delist the new series if no trading has occurred in those series or if no open interest remains in the series. *See* CBOE Rule 5.4.05.

[10] Securities Exchange Act Release No. 21644 (January 9, 1985) 50 FR 2360 approving proposal by the American Stock Exchange, Inc. to introduce series of index options two strike prices above (or below) the current market value of the index, and up to three intervals above (or below) the current index value in usual market conditions.

[11] The Commission is satisfied that the criteria CBOE will consider in determining whether unusual market conditions exist for purposes of this rule, see text accompanying notes 4-6, *supra*, are appropriate. Moreover, the Commission expects the CBOE to maintain a log of those instances in which it determines to invoke this authority.

[12] Finally, as described above, should CBOE list a new series in anticipation of a large price movement that does not materialize, CBOE would be able to delist that series prior to any actual trades occurring in that series Note 9, *supra*.

[14] 15 U.S.C. 78s(b)(1)(1982).

[15] 17 CFR 200.30-3(a)(12)(1985).i21Dated: March 14, 1986.

funding certain group variable contracts (the "Contracts") issued by Prudential. Applicant's operations are conducted under the general supervision of a Committee (which, for purposes of the Act, is the functional equivalent of a board of directors). The Contracts are issued in connection with pension and profit-sharing plans which qualify for favorable treatment under various provisions of the Internal Revenue Code of 1954. Generally, participants in the Contracts may transfer amounts held under the Contracts between Applicant and either Prudential Variable Account-10 ("VCA-10"), another separate account invested primarily in equity securities, or a fixed-dollar contract.

Applicant further states that its investment objective is to seek as high a level of current income as is consistent with the preservation of capital and liquidity. Applicant seeks this objective by investing in money market instruments payable in United States dollars. To date, Applicant's assets have been invested solely in money market instruments with a remaining maturity of 60 days or less, and it has used the amortized cost method of valuation to value those securities. Under the amortized cost method of valuation, securities are originally valued at the cost at which they were purchased, and their value is adjusted daily to account for amortization of any premium or for accretion of any discount.

Applicant states that it intends to purchase United States dollar denominated money market instruments with a remaining maturity of one year or less. Applicant proposes to use the amortized cost valuation method for the purpose of valuing these instruments.

According to Applicant, the primary concern that the Commission has expressed about use of the amortized cost valuation method has been that this method of valulation may, in times of sharp increases or decreases in interest rates, result in dilultion of shareholders' interests in investment companies. Applicant states that in order to protect against such dilution, prior exemptions granted by the Commission and Rule 2a-7 under the Act to permit money market funds to use amortized cost valuation contain a series of conditions designed to assure that use of amortized cost valuation will not result in excessive dilution or other unfair results to shareholders. Applicant further states that, in connection with the valuation of its short-term debt securities, it is willing to consent to the imposition of what are in substance the same conditions as those generally imposed by the Commission in prior exemptive orders and Rule 2a-7 under the Act, except for the condition requiring a stable net asset value per share.

According to Applicant, it cannot maintain a stable price per share, one of the conditions contained in the prior exemptive orders and Rule 2a-7, since a participant's VCA-11 accumulation account is expressed in units, the value of which change daily to reflect VCA-11's investment income and any change in the value of securities VCA-11 holds. Applicant states that, under several previous applications, the applicants proposed, and the exemptive orders required, the maintenance of a "shadow accounting" system under which the applicant would establish a unit value of $1.00 to be used solely for purposes of monitoring compliance with the exemptive order. The account in question would then credit on a daily basis additional "shadow units" valued at $1.00 each to participants to reflect the investment income of the account.

Applicant submits that there is no necessary relationship between use of the amortized cost valuation method and the maintenance of a stable price for each share of an investment company. Applicant asserts that inclusion of this condition in prior exemptive orders and Rule 2a-7 came about because money market funds that sought exemptions to permit them to use amortized cost valuation did so to facilitate their ability to maintain a stable price per share for the convenience of their shareholders. Applicant further asserts that the establishment of a "shadow accounting" system does not provide any greater protection to participants in accounts using that system against the dilution of their interests than do the conditions of this application. Applicant submits that the "undervaluation" or "overvaluation" of interests that would be permissible under the conditions set forth below are the same as would be allowed under the "shadow accounting" system. Applicant states that it seeks to use amortized cost valuation for short-term debt obligations held in VCA-11 in order to achieve significant savings in administrative costs, particularly those resulting from the elimination of the necessity to attempt to obtain daily estimates of the market value of the short-term debt obligations contained in VCA-11's portfolio.

Applicant submits that use of amortized cost valuation in connection with its operations is especially unlikely to result in any dilution or other unfair results to shareholders because it is not a money market fund, but rather a particular type of investment vehicle for variable contracts. Applicant asserts that participants in the Contracts will tend to have a longer range investment perspective than shareholders in money market funds, since withdrawals from the contracts may involve the payment of deferred sales charges and adverse federal income tax consequences. Applicant further submits that if transfers to or from VCA-11 do occur when interest rates shift, the conditions sit forth below will provide investors in VCA-11 with the same protection against dilution of their interests as is provided by the conditions in Rule 2a-7, notwithstanding the absence of a stable net asset value.

Applicant therefore requests exemption from the provisions of section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 promulgated thereunder to the extent necessary to permit it to use the amortized cost valuation method for the purpose of valuing the short-term debt obligations it holds. Applicant states it is willing to consent to the entry of an order by the Commission conditioning the grant of its exemptive request upon the following conditions:

(1) In supervising the operations of Applicant and delegating special responsibilities involving portfolio management to its investment adviser, the VCA-11 Committee undertakes (as a particular responsibility within the overall duty of care owed to participants in VCA-11) to establish reasonably designed procedures, taking into account current market conditions and Applicant's investment objective, to minimize the deviation between Applicant's value per unit, as determined through use of the amortized cost method of valuation, and its value per unit, as determined through use of available market quotations.

(2) Included within the procuedures to be adopted by the VCA-11 Committee shall be the following:

(a) Review by the VCA-11 Committee, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of Applicant's net asset value per unit, as determined by using available market quotations, from its amortized cost value per unit, and the maintenance of records of such review. To fulfill this condition, Applicant will use actual quotations or estimates of market value reflecting current market conditions chosen by the VCA-11 Committee in the exercise of its discretion to be appropriate indicators of value, which may include, *inter alia*, (1) quotations or estimates of market value for individual portfolio instruments, or (2) values obtained from

VOL
51
ISS

UMI

yield data relating to classes of money market instruments published by reputable sources.

(b) In the event such deviation from the amortized cost value per unit exceeds one-half of one percent (0.5%), a requirement that the VCA–11 Committee will promptly consider what action, if any, should be initiated.

(c) If the VCA–11 Committee believes the extent of any deviation from Applicant's amortized cost value per unit may result in material dilution or other unfair results to participants in Applicant, it will take such action as it deems appropriate to eliminate or reduce to the extent reasonably practicable such dilution or unfair results, which may include: selling portfolio instruments prior to maturity to realize capital gains or losses or to shorten Applicant's average portfolio maturity; or using a net asset value per unit as determined by using available market quotations.

(3) Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of minimizing the deviation between its amortized cost value per unit and its value per unit as determined by using available market quotations, provided, however, that it will not (a) purchase any instrument with a remaining maturity of greater than one year (except that securities held subject to repurchase agreements having a term of one year or less from the date of delivery may have maturity dates in excess of one year from the date of delivery of the repurchase agreement) or (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days. If the disposition of a portfolio instrument should result in a dollar weighted average portfolio maturity in excess of 120 days, Applicant's available cash will be invested in such a manner as to reduce such average maturity to 120 days or less as soon as reasonably practicable. The maturity of portfolio securities held by Applicant shall be calculated as set forth in Rule 2a–7 under the Act.

(4) Applicant will record, maintain, and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in subparagraph (1) above, and Applicant will record, maintain, and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the VCA–11 Committee's considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the VCA–11 Committee's meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with section 31(b) of the Act, as if such documents were records required to be maintained pursuant to rules adopted under section 31(a) of the Act.

(5) Applicant's portfolio investments will be limited, including repurchase agreements, to those United States dollar-denominated instruments which the VCA–11 Committee determines present minimal credit risks, and which are of high quality. For this purpose, "high quality" instruments shall mean those instruments which are rated by any major rating agency within its two highest rating categories or, in the case of any instrument that is not rated, of comparable quality as determined by the VCA–11 Committee.

(6) If any action is taken pursuant to paragraph 2(c) above, VCA–11 will report such action on Form N–SAR covering the period in which the action was taken and, pursuant to Instruction 77N of Form N–SAR, will attach a statement to the form describing with specificity the nature and circumstances of such action.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than April 11, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for the request, and the specific issues, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Airport Noise; Receipt of Compatibility Program and Request for Review

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the Noise Exposure Maps submitted by Baton Rouge Metropolitan Airport (BTR) under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96–193) and 14 CFR Part 150 are in compliance with applicable requirements. The FAA also announces that it is reviewing a proposed noise compatibility program that was submitted for Baton Rouge Metropolitan Airport under Part 150 in conjunction with the noise exposure map, and that this program will be approved or disapproved on or before September 3, 1986.

EFFECTIVE DATE: The effective date of the FAA's determination on the Noise Exposure Maps and of the start of its review of the associated noise compatibility program is March 7, 1986. The public comments period ends May 6, 1986.

FOR FURTHER INFORMATION CONTACT: Donald C. Harris, Federal Aviation Administration, Southwest Region, Airports Division, ASW–611C, P.O. Box 1689, Fort Worth, Texas 76101. Telephone: (817) 877–2609 or FTS 734–2609

Comments on the proposed Noise Compatibility Program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA finds that the Noise Exposure Maps submitted for Baton Rouge Metropolitan Airport are in compliance with applicable requirements of Part 150, effective March 7, 1986. Further, FAA is reviewing a proposed noise compatibility program for that airport which will be approved or disapproved on or before September 3, 1986. This notice also announces the availability of this program for public review and comment.

Under section 103 of Title I of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator may submit to the FAA a noise exposure map which meets applicable regulations and which depict noncompatible land uses as the date of submission of such maps, a description of projected aircraft operations, and the ways in which such operations will affect such map. The Act requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies and persons using the airport.

An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of Federal Aviation Regulation Part 150 promulgated pursuant to Title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposed for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

Baton Rouge Metropolitan Airport submitted to the FAA on July 31, 1985, Noise Exposure Maps, descriptions and other documentation which were produced during a 1984 update of an Airport Noise Control and Land Use Compatibility (ANCLUC) study previously accepted by FAA in October 1982. It was requested that the FAA review this material as the Noise Exposure Maps, as described in section 103(a)(1) of the Act, and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under section 104(b) of the Act.

The FAA has completed its review of the Noise Exposure Maps and related descriptions submitted by Baton Rouge Metropolitan Airport. The specific maps under consideration in the submission are: the Noise Exposure Map and the tabular report of land use impact for 1984 conditions; and the Noise Exposure Map and tabular report of land use impact for 1989. The FAA has determined that these maps for Baton Rouge Metropolitan Airport are in compliance with applicable requirements. This determination is effective on March 7, 1986. FAA's determination on an airport operator's Noise Exposure Maps is limited to a finding that the maps were developed in accordance with the procedures contained in Appendix A of FAR Part 150. Such determination does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program, or to fund the implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under Section 103 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or on interpreting the noise exposure map to resolve questions concerning, for example, which properties should be covered by the provisions of section 107 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA's review of Noise Exposure Maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator which submitted those maps, or with those public and planning agencies with which consultation is required under section 103 of the Act. The FAA has relied on the certification by the airport operator, under § 150.21 of FAR Part 150, that the statutorily required consultation has been accomplished.

The FAA has formally received the noise compatibility program for Baton Rouge Metropolitan Airport, also effective on March 7, 1986. Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will be completed on September 3, 1986.

The FAA's detailed evaluation will be conducted under the provisions of 14 CFR Part 150, § 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, or be reasonably consistent with obtaining the goal of

VOL 51 ISS 55 MR 21 1986 UMI

reducing existing noncompatible land uses.

Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments, other than those properly addressed to local land use authorities, will be considered by the FAA to the extent practicable. Copies of the Noise Exposure Maps, the FAA's evaluation of the maps, and the proposed noise compatibility program are available for examination at the following locations:

Federal Aviation Administration, National Headquarters, 800 Independence Avenue, SW., Room 617, Washington, DC 20591;
Federal Aviation Administration, Southwest Region Office, Airports Division, ASW–600, P.O. Box 1689, Fort Worth, TX 76101;
Greater Baton Rouge Airport District, Suite 212, Ryan Terminal Building, Baton Rouge, LA 70807.

Questions may be directed to the individual named above under the heading, "For Further Information Contact."

Issued in Forth Worth, Texas, on March 7, 1986.

C.R. Melugin, Jr.,

Director, Southwest Region.

BILLING CODE 4910-13-M

Definitions of Small Entity and Significant Economic Impact for Making Determinations Required by the Regulatory Flexibility Act of 1980

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Invitation for public comment on proposed additional definitions of small entity and Significant Economic Impact for making determinations required by the Regulatory Flexibility Act of 1980.

Background and Purpose

Under the Regulatory Flexibility Act of 1980 (RFA), Federal agencies considering and promulgating regulations relating to small businesses generally utilize small business size criteria developed pursuant to the Small Business Act. Because FAA's regulations are specific to particular products or services, these industries require standards that apply to specialized products and services defined more precisely than 4-digit Standard Industrial Classification (SIC) categories. But the SBA's final rule on small business size standards (49 FR 5024), is limited to 4-digit SIC codes. Therefore, the SBA size standards are not appropriate to the FAA's needs. In this case the agency is permitted, after consultation with the SBA Office of Advocacy, to establish small business definitions which are more appropriate to the activities of the FAA. Such standards regarding size of firm and value of significant impact have been adopted by the FAA.

FAA's standards for "size" and "significant" economic impact are stated in FAA Order 2100.14 for SIC codes and/or product lines which FAA regulations affect:

Aircraft and aircraft parts manufacturers (3721);
Aircraft engine and engine parts manufacturers (3724);
Manufacturers of aircraft parts and auxiliary equipment not elsewhere classified (3728);
Operators of aircraft for hire (4511);
Airports (4582);
Aircraft repair facilities (4582, 7629, 7699);
Pilot schools (8299); and
Not-for-profit aviation organizations.

In the absence of a small entity "size" definition in the FAA order, FAA officials use the Small Business Administration's (SBA) definition in Title 13 of the Code of Federal Regulations, and if lacking a specific "significant" cost threshold, they use the lowest significant cost threshold listed in Order 2100.14.

FAA is now proposing to amend its definitions of small entity and significant economic impact by incorporating into FAA Order 2100.14, "Regulatory Flexibility Criteria and Guidance," threshold values for twenty-nine (29) entity types not currently specified in the order.

This is the third notice to appear in the **Federal Register** describing FAA's efforts to specify its size and significant economic impact standards for making Regulatory Flexibility Act determinations. Previous notices were:

(1)Public Notice, July 29, 1982, 47 FR 32825; (2) Public Notice, August 31, 1984, 49 FR 34597.

FAA's first notice proposed definitions of small entity and significant economic impact for several aviation industries, and guidance for making determinations required by the RFA. That notice solicited public comment on the proposed definitions and guidance.

The second notice explained FAA's responses to the public comments and published FAA Order 2100.14, FAA's final guidance for the conduct of regulatory flexibility analyses and reviews. It also defined the criteria for rulemaking officials to determine if a proposed or existing rule has a significant economic impact on a substantial number of small entities.

For Further Information Contact

James R. Olavarria, Regulatory Analysis Branch, APO–210, Systems Analysis Division, Office of Aviation Policy and Plans, Federal Aviation Administration, Department of Transportation, Federal Office Building 10–A, 800 Independence Avenue, SW., Washington, DC 20591, telephone 202–426–3070. Additional copies of this notice may be obtained from the same address.

Invitation for Public Comments

Interested persons are invited to submit written comments on these standards as they may desire. Communications should be mailed in duplicate to FAA, APO–210, 800 Independence Avenue SW., Washington, DC 20591. Comments should be received on or before May 5, 1986.

Method of Establishing Size Standards

New standards are now being proposed for twenty-nine entity types. To establish the proposed size thresholds, the FAA followed three steps.

Step 1 Analyze the size distribution of entities in each industry, based on employment. FAA considered the number of firms, the relative sizes of firms, clusters of similar size firms, and the extent to which entities distribute in particular size ranges. FAA arrived at an initial threshold estimation for small size by identifying the number of employees where a distinct boundary was observed between relatively small versus medium or large entity clusters.

Step 2 Analyze the relative concentration of employment among the entities in the industry, and examine the extent of industry dominance by large firms.

Within an industry, relative employment share tends to indicate relative market share. That is, a small percentage of industry wide employment indicates a small market share. Since regulatory costs most adversely affect small entities which have a relatively small market share over which to spread costs, FAA sought threshold levels that would identify small entities as those having both fewer employees and the smallest percentage of industry wide employment.

A concentrated market exists where a small percentage of entities accounts for a large percentage of total industry employment. A relatively high threshold level is sought in concentrated industries because regulatory relief for all but the few very large market dominant entities encourages competition. In highly competitive industries lower thresholds are sought because regulatory costs most adversely affect the smallest entities at entry level.

Major conglomerates are clearly not small size entities, but in industry analyses, they tend to obscure the relative market positions of small and medium size entities. Therefore, the FAA computed total employment percentages for each entity type both including and excluding major conglomerates before arriving at a revised preliminary estimate of a threshold value. This dual analysis helped identify market leaders in each entity type and suggested, within the context of the stepwise analysis, where maximum economies of scale appear to be achieved.

Step 3 Consult with industry experts, particularly in the private sector, to validate the preliminary estimates. The consultations bolstered the confidence FAA has in the data and statistical analyses upon which the preliminary estimates were formulated. This step validated FAA's tentative estimations from the analyses regarding market concentration, market leadership, size in the growth cycle at which mature companies are able to compete most effectively, sizes at which certain types of entities most efficiently can absorb regulatory costs, and sizes at which entities achieve maximum economies of scale. The FAA used this additional validating information to confirm or adjust the preliminary estimated threshold values so they most accurately reflect true market conditions.

The following example of how the three steps were applied in the analysis of one entity type, aircraft seats (SIC 2531), illustrates the general method used to arrive at the proposed size threshold values for all twenty-nine entity types.

Example: *Step One* shows that the distribution of entities in the aircraft seats entity type contains two identifiable clusters of like size entities. (See Table 6, Percentage Distribution of Entity Types by Number of Employees: Aircraft Seats.) A cluster of entities that each employ from 1 person up to 90 people accounts for approximately 44 percent of the entities in the distribution, and a second cluster of entities, each with more than 500 employees accounts for over 28 percent of the entities in the distribution. The remaining entities are evenly distributed in the range between 90 and 500 employees. This clustering suggests an initial estimated threshold between 90 and 500 employees.

Step Two shows (also from Table 6) that over 99 percent of the employment in this entity type is concentrated among entities with over 1000 employees. Since most of these entities are large, diversified aerospace corporations, including all of their employment data in the analysis gives an unrealistic picture of actual market concentration. An analysis excluding this group shows that employment is still concentrated, with over 62 percent of remaining employment contained in entities employing at least 391 people. This step suggests that the market is highly concentrated among firms with more than 390 employees. Therefore, this step suggests a tentative estimated threshold near 390 employees.

Step Three, consultation with knowledgeable industry sources familiar with this entity type, indicated that this market is dominated by a few large entities. Further, the sources identified as market leaders, entities in the 450 to 1,000 employee range. Some smaller specialized firms also have established a market niche in modifications to smaller aircraft.

The Proposed Size Threshold based upon these three steps is 450 employees because there is no cluster of medium size businesses of like size with fewer than 500 employees; employment is concentrated in industries with more than 390 employees (an indication of concentration in market share); and knowledgeable industry sources identified market leaders, which are firms employing more than 450 employees.

Small Size Standards for Twenty-Nine Entity Types

Small entities are proposed to be those businesses which are independently owned and operated and not longer than the threshold level presented for each of the twenty-nine entity types in Table 1.

TABLE 1.—SIZE THRESHOLD VALUES

Standard industrial classification	Entity type	Size threshold
0721	Aerial Agricultural and Pest Control.	30
2399	Parachutes	900
	Aircraft Seat Belts, Except Leather.	1,000
	Aircraft Tiedown Strap Assemblies, Except Leather.	1,000
2531	Aircraft Seats	450
3011	Aircraft Tires and Inner Tubes	1,000
3069	Rubberized Survival Equipment	500
3537	Pallets and Containers	300
3585	Aircraft Environmental Control Equipment.	150
3592	Fuel Control Equipment, Including Carburetors.	750

TABLE 1.—SIZE THRESHOLD VALUES—Continued

Standard industrial classification	Entity type	Size threshold
	Aircraft Pistons and Piston Rings	90
	Aircraft Engine Valves	90
3599	Other Aircraft Valves, N.E.C.	1,000
3647	Aircraft Lighting Systems and Fixtures.	300
3662	Aircraft Communications Equipment.	750
	Aircraft Navigational Equipment	750
3691	Aircraft Batteries	1,000
3694	Engine Starting and Electrical Generating Equipment.	250
	Spark Plugs for Internal Combustion Engines.	1,000
	Voltage Regulators	1,000
3811	Aircraft Flight Instruments	250
3829	Aircraft Fuel System Instruments	1,000
	Aircraft Engine Instruments	200
	Aircraft Measuring Instruments, N.E.C.	450
	Air Traffic Control Equipment	1,000
7622	Aircraft Radio Equipment Repair	30
7319	Aerial Advertising, Including Skywriting.	10
8299	Aircraft Maintenance Technician Schools.	150
7699	Parachute Lofts	90

Explanation of Tables 2–30

Each table shows, for one entity type, the percentage distribution of total employment within the entity type according to predefined employment level intervals. Also shown is the percentage distribution of entities (firms) according to the same intervals. To show the tables in manageable size, only those intervals are shown in the tables in which at least one entity resides. That is, if no entity employs 61 to 90 persons, that interval "61–90" does not appear in the table because it is associated with zero percent employment and zero entities (firms).

Note that while the distributions shown in the tables are structured according to arbitrarily predefined intervals for uniform presentation of results, the proposed thresholds were formulated based upon the actual ordered data for individual firms, not the intervals shown. Therefore the explanation that accompanies each distribution may state an employment number that is more exact than the broad interval in the distribution shown in the table.

TABLE 2.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aerial agricultural and pest control		
Number of employees	Percent of total employment	Percent of entities
1 to 30	3.59	87.36
31 to 60	.67	3.83
61 to 90	.70	1.53
91 to 120	.82	1.53
121 to 150	.96	1.15
151 to 180	.35	.38

TABLE 2.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES—Continued

Aerial agricultural and pest control		
Number of employees	Percent of total employment	Percent of entities
211 to 240	.46	.38
271 to 300	1.36	.77
301 to 330	.71	.38
361 to 390	.83	.38
451 to 500	1.13	.38
501 to 1,000	3.47	.77
>to 1,000	84.74	1.15

Proposed Size Threshold: 30.

Explanation: Regulations and high capital requirements represent a barrier to entry for small entities. A substantial share of this market is captured by 87 percent of the entities. Each entity in the 87 percent employs 30 or fewer people, and they collectively account for over 22 percent of employment when entities with more than 1,000 employees are excluded.

TABLE 3.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Parachutes		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.80	40.00
31 to 60	3.20	20.00
181 to 210	16.00	20.00
501 to 1,000	80.00	20.00

Proposed size threshold: 500.

Explanation: The market consists of commercial aviation applications and military applications. Most of the larger manufacturers serve the military market and as such are not included in the analysis since the FAA does not certificate them. The market is dominated by a few large entities with more than 500 employees each.

TABLE 4.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft seat belts, except leather		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.01	22.86
91 to 120	.04	11.43
121 to 150	.01	2.86
271 to 300	.03	2.86
451 to 500	.05	2.86
501 to 1,000	.10	2.86
>1,000	99.76	54.28

Proposed Size Threshold: 1,000.

Explanation: Entities which manufacture seat belts are included among airline companies, airframe assemblers, automotive parts manufacturers, medium sized safety equipment manufacturers and small specialized businesses which perform aircraft modifications. Large automotive parts manufacturers and several major airframe manufacturers are industry leaders. Over 54 percent of the entities, including all of the industry leaders have more than 1,000 employees. Market share is concentrated among entities with more than 1,000 employees.

TABLE 5.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft tiedown strap assemblies, except leather		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.06	50.00
121 to 150	.50	25.00
>1,000	99.44	25.00

Proposed Size Threshold: 1,000.

Explanation: No discernable national market exists; this product is manufactured on an in-house basis by entities requiring this product. Entities with fewer than 1,000 employees account for less than 1 percent of the total industry employment.

TABLE 6.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft Seats		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.01	20.00
31 to 60	.03	15.56
61 to 90	.03	8.89
91 to 120	.01	2.22
151 to 180	.02	2.22
181 to 210	.02	2.22
211 to 240	.05	4.44
241 to 270	.03	2.22
271 to 300	.09	6.67
391 to 420	.04	2.22
451 to 500	.11	4.44
501 to 1,000	.33	8.89
>1,000	99.22	20.00

Proposed Size Threshold: 450.

Explanation: The industry is very vertically integrated, particularly among manufacturers of commercial aircraft, as many of the airframe manufacturers make their own seats. Specialized seat manufacturers outfit some commuter aircraft, but this is an extremely small market. Employment is concentrated among the market leaders, which have more than 450 employees.

TABLE 7.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft tires and inner tubes		
Number of employees	Percent of total employment	Percent of entities
>1,000	100.00	100.00

Proposed Size Threshold: 1,000.

Explanation: A very small number of entities employ less than 1,000, while the market is dominated by a few large rubber companies. Virtually all of industry employment is in entities with more than 1,000 employees. There is a high degree of market concentration with economies of scale achieved at sizes larger than 1,000 employees.

TABLE 8.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Rubberized survival equipment		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.16	19.35
31 to 60	.69	25.81
61 to 90	.56	12.90
181 to 210	.71	6.45
211 to 240	.39	3.23
241 to 270	.44	3.23
501 to 1,000	4.77	12.90
>1,000	92.28	16.13

Proposed Size Threshold: 500.

Explanation: This market is dominated by large, diversified entities. All identified market leaders have more than 950 employees, although there may be some medium sized entities with between 500 and 950 employees. Over 97 percent of the industry employment is concentrated among entities with over 500 employees.

TABLE 9.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Pallets and containers		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.13	21.88
31 to 60	.37	15.63
61 to 90	.23	6.25
91 to 120	.20	3.13
151 to 180	.25	3.13
181 to 210	.33	3.13
241 to 270	.41	3.13
271 to 300	.48	3.13
501 to 1000	7.80	18.75
>1,000	89.78	21.88

Proposed Size Threshold: 300.

Explanation: This industry supplies cargo handling equipment to the commercial aviation industry. The market is quite substantial and includes participation entities of all sizes. The market is competitive. Smaller entities hold their own against larger competitors, with all market leaders employing more than 500 persons. Economies of scale are minimal in this entity type. Entities with more than 300 employees account for over 97 percent of the industry employment, while there is a clearly identifiable group of entities with fewer than 300 employees.

TABLE 10.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft environmental control equipment		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.01	11.76
31 to 60	.10	17.65
61 to 90	.19	17.65
91 to 120	.09	5.88
121 to 150	.12	5.88
241 to 270	.20	5.88
501 to 1000	1.27	11.76
>1,000	98.01	23.53

Proposed Size Threshold: 150.

Explanation: Most aircraft heating and cooling equipment is manufactured by airframe manufacturers as part of their own aircraft. However, some entities produce package units or make modifications to small aircraft in order to enhance environmental control features. These non-airframe, heating and cooling equipment manufacturers often employ small numbers. Entities with more than 150 employees account for over 98 percent of the industry employment. No entity among a clearly recognized group with 150 or fewer employees is considered dominant in the field.

TABLE 11.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Fuel control equipment, including carburetors		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.01	13.79
31 to 60	.01	6.90
61 to 90	.03	10.34
91 to 120	.01	3.45
121 to 150	.02	3.45
181 to 210	.05	6.90
271 to 300	.03	3.45
361 to 390	.04	3.45
>1,000	99.80	48.28

Proposed Size Threshold: 750.

Explanation: Fuel control equipment includes carburetors and fuel injection systems for reciprocating engines and fuel mixture regulators for jet engines. The latter are such an integral part of the engine that there are very few component manufacturers other than the engine original equipment manufacturers. Market participation in the former is more distributed and competitive. Entities with more than 750 employees account for over 99 percent of industry employment. Data on medium sized entities indicates that market share falls off for companies with fewer than 1,000 employees. Economies of scale for non-original equipment manufacturers are thought to be achieved near 750 employees.

TABLE 12.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft pistons and piston rings		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.37	60.00
31 to 60	.24	10.00
61 to 90	.32	10.00
>1,000	99.08	20.00

Proposed Size Threshold: 50.

Explanation: Aircraft equipped with reciprocating engines are primarily small aircraft and rotorcraft. These engines are relatively small and the piston and piston ring technology used is similar to that used in automotive and light truck applications. Therefore many of the same entities participate in both the automotive and aerospace markets. As a result there is extreme diversity of firm sizes and a highly competitive market in this entity type. Many small component manufacturers with 50 or fewer employees compete against large engine original equipment manufacturers. Approximately 70 percent of the identified entities employ 50 or fewer persons.

TABLE 13.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft engine valves		
Number of employees	Percent of total employment	Percent of entities
1 to 30	45.65	83.33
31 to 60	54.35	16.67

Proposed Size Threshold: 50.

Explanation: This entity type is similar in market characteristics to manufacturers of aircraft pistons and piston rings, described above, and contains many of the same entities. All of the entities identified, not including original equipment manufacturers, have 50 or fewer employees.

TABLE 14.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Other aircraft engine valves not elsewhere classified		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.00	8.16
31 to 60	.02	10.20
61 to 90	.03	8.16
91 to 120	.02	4.08
121 to 150	.06	8.16
151 to 180	.02	2.04
181 to 210	.04	4.08
331 to 360	.03	2.04
361 to 390	.04	2.04
421 to 450	.09	4.08
501 to 1,000	.16	4.08
>1,000	99.48	42.86

Proposed Size Threshold: 1,000.

Explanation: This entity type manufactures a variety of pneumatic and hydraulic valves used primarily in mechanical control functions on aircraft. There is one group of very large diversified manufacturers and another group of small specialized component manufacturers. The principal market for the latter group is in component modifications. The larger entities dominate the market. Entities with more than 1,000 employees account for more than 42 percent of the entities and 99 percent of the employment.

TABLE 15.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft lighting fixtures and systems		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.06	30.77
31 to 60	.05	7.69
61 to 90	.05	3.85
91 to 120	.06	3.85
121 to 150	.09	3.85
151 to 180	.09	3.85
181 to 210	.11	3.85
271 to 300	.17	3.85
501 to 1,000	.66	7.69
>1,000	98.66	30.77

Proposed Size Threshold: 300.

Explanation: This entity type includes manufacturers of both interior and exterior lighting systems. A few specialized entities and airframe original equipment manufacturers dominate this specialized market. Several entities with employment over 300 are among the market leaders, while many of the smaller size entities are primarily engaged in minor product modifications rather than original equipment manufacture. Entities employing more that 300 persons account for over 99 percent of industry employment.

VOL 51 ISS 55 MR 21 1986 UMI

TABLE 16.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft communications equipment		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.01	16.36
31 to 60	.04	10.91
61 to 90	.02	3.64
91 to 120	.03	3.64
121 to 150	.04	3.64
181 to 210	.05	3.64
211 to 240	.06	3.64
271 to 300	.04	1.82
301 to 330	.04	1.82
391 to 420	.06	1.82
501 to 1,000	.59	9.09
>1,000	99.04	40.00

Proposed Size Threshold: 750.

Explanation: This entity type is a segment of the broader avionics industry. It includes some of the leading electronics, aerospace, and computer manufacturers in the United States as well as high technology communications firms. While the market is not especially concentrated, most participants are large, diversified corporations. The trend toward market concentration by large size entities has accelerated in recent years as larger aerospace firms have acquired some of the leading medium-size entities. Economies of scale are achieved at relatively large sizes because of high capital requirements for market entry, the requirement for a strong and widespread reputation for technical excellence, and the high cost of regulatory compliance. Entities with employment over 750 account or more than 40 percent of the entities and more than 99 percent of the industry employment. Those with employment under 750 have had difficulty remaining competitive as independently owned and operated entities.

TABLE 17.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft navigational equipment		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.01	12.33
31 to 60	.01	8.22
61 to 90	.01	5.48
91 to 120	.00	1.37
121 to 150	.03	6.85
181 to 210	.03	4.11
211 to 240	.03	4.11
241 to 270	.02	2.74
271 to 300	.02	2.74
361 to 390	.02	1.37
451 to 500	.02	1.37
501 to 1000	.15	6.85
>1000	99.54	42.47

Proposed Size Threshold: 750.

Explanation: This entity type is a segment of the broader avionics industry. It includes some of the leading electronics, aerospace, and computer manufacturers in the United States. While the market is not very concentrated, most entities are large, diversified corporations. The trend toward market concentration by large size entities has accelerated in recent years as larger aerospace firms have acquired some of the leading medium-size entities. Economies of scale are achieved at relatively large sizes because of high capital requirements for market entry, the requirement for a strong and widespread reputation for technical excellence, and the high cost of regulatory compliance. There are some small, single product line entities, but they often have difficulty establishing the necessary reputation and eventually sell their patent rights to larger companies. Entities with employment over 750 account for more than 42 percent of the entities and more than 99 percent of the industry employment. Entities employing under 750 have had difficulty being competitive as independently owned and operated entities.

TABLE 18.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft batteries		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.01	20.00
151 to 180	.05	20.00
>1,000	99.94	60.00

Proposed Size Threshold: 1,000.

Explanation: In this limited market, a small number of firms manufacture aircraft storage batteries. Market share is concentrated among large diversified corporations, while a few small entities tend to compete successfully by dealing in specialized applications. Entities with employment over 1,000 account for 60 percent of the entities and over 99 percent of industry employment.

TABLE 19.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Engine starting and electrical generating equipment		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.02	27.27
31 to 60	.01	4.55
61 to 90	.03	9.09
91 to 120	.02	4.55
121 to 150	.03	4.55
241 to 270	.10	9.09
421 to 450	.08	4.55
501 to 1,000	.28	9.09
> 1,000	99.43	27.27

Proposed Size Threshold: 250.

Explanation: This entity type includes manufacturers of starting motors, ignition coils, generators, alternators and related products. As with most engine rlated equipment, engine original equipment manufacturers make up a large segment of the industry. The market is relatively competitive since much smaller entities have been able to compete successfully with the conglomerates which are industry leaders. A group of similar size entities employing 250 of fewer have a disproportionately low marker share based on employment share.

TABLE 20.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Spark plugs for internal combustion engines		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.03	25.000
121 to 150	.88	25.00
>1,000	99.09	50.00

Proposed Size Threshold: 1,000.

Explanation: The aviation market is very limited because the product is used only for small aircraft. As with other types of reciprocating engine equipment, the technology base is the same as that used in automotive applications. The market is extemely concentrated and dominated by two firms, each with over 1,000 employees. A few smaller firms are active with very small market share.

TABLE 21.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Voltage regulators		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.04	75.00
>1,000	99.96	25.00

Proposed Size Threshold: 1,000.

Explanation: Large engine original equipment manufacturers dominate this highly concentrated market.

TABLE 22.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft flight instruments		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.01	19.74
31 to 60	.02	7.89
61 to 90	.02	6.58
121 to 150	.04	6.58
151 to 180	.01	1.32
181 to 210	.03	3.95
211 to 240	.02	2.63
241 to 270	.03	2.63
271 to 300	.02	1.32
361, to 390	.02	1.32
391 to 420	.02	1.32
501 to 1,000	.21	6.58
>1,000	99.55	38.16

Proposed Size Threshold: 250.

Explanation: While most producers manufacture both instruments (avionics) and non-electronic instruments (airspeed indicators, altimeters, cabin pressure guages, and others), the tendency among large diversified companies has been toward concentration in the avionics market. The larger non-electronic flight instrument market is substantially more competitive. Smaller companies have achieved economies of scale in the production of a single product line. Additionally, smaller entities have been able to make small cosmetic changes in standard instruments through the FAA administered Parts Manufacturer Approval (PMA) and Supplemental Type Certificate procedures. This ability has allowed smaller entities to compete without incurring significant research or product development costs. Entities with employment over 1,000 account for more than 38 percent of entities and more than 99 percent of employment. Successful medium size companies have achieved economies of scale in the range of 250 to 400 employees, and there is a concentration of employment share for medium size entities among those with more than 250 employees.

TABLE 23.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft Fuel System Instruments		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.02	12.50
31 to 60	.02	3.13
61 to 90	.05	6.25
91 to 120	.03	3.13
121 to 150	.09	9.37
151 to 180	.06	3.13
211 to 240	.07	3.13
241 to 270	.07	3.13
271 to 300	.17	6.25
361 to 390	.11	3.13
391 to 420	.12	3.13
>1,000	99.17	43.75

Proposed Size Threshold: 1,000.

Explanation: This entity type includes manufacturers of fuel flow measuring instruments, fuel level indicators, fuel system controls, and related electronic instruments The manufacturers are characteristic of avionics manufacturers. The market is not very concentrated, but leading firms tend to be relatively large manufacturers of a wide range of scientific and industrial instrumentation. Since the need for a strong national reputation, high capital requirements and regulations are obstacles to smaller non-diversified entities, few small entities are in this entity type. Entities in this industry with fewer than 1000 employees have had difficulty remaining competitive as independently owned and operated businesses. Entities with more than 1000 employees account for over 43 percent of the entities and over 93 percent of industry employment.

TABLE 24.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft engine instruments		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.01	27.59
31 to 60	.01	3.45
61 to 90	.05	10.34
91 to 120	.02	3.45
181 to 210	.04	3.45
211 to 240	.04	3.45
271 to 300	.05	3.45
361 to 390	.07	3.45
501 to 1,000	.11	3.45
>1,000	99.59	37.93

Proposed Size Threshold: 200.

Explanation: These manufacturers of engine controls, tachometers, EGT controls, intake and exhaust temperature probes, etc. produce both electronic instruments and hydraulic and pneumatic devices. The electronics manufacturers are similar to those in the avionics industry. Their market is concentrated. The manufacturers of hydraulic and pneumatic devices are in a very competitive market because product differentiation is difficult and price competition is an important factor. Smaller entities have achieved economies of scale in the production of single product lines.

TABLE 25.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft measuring instruments not elsewhere classified		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.04	26.67
31 to 60	.05	6.67
61 to 90	.03	3.33
121 to 150	.21	10.00
151 to 180	.08	3.33
181 to 210	.09	3.33
271 to 300	.13	3.33
451 to 500	.23	3.33
501 to 1,000	.30	3.33
>1,000	98.83	36.67

Proposed Size Threshold: 450.

Explanation: This industry manufactures a wide range of both electronic and non-electronic instrumentation. Its structural characteristics are similar to those entity types which manufacturer flight instruments, fuel system instruments and engine instruments; a mixed structure. Some industry segments are concentrated and others are competitive. Entities with more than 450 employees account for over 43 percent of the entities and 99 percent of industry employment, and entities employing between 450 to 1,000 persons account for over 46 percent of all employment by entities with no more than 1,000 employees.

TABLE 26.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Air traffic control equipment		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.01	5.26
61 to 90	.07	15.79
91 to 120	.03	5.26
121 to 150	.04	5.26
151 to 180	.05	5.26
181 to 210	.05	5.26
211 to 240	.07	5.26
501 to 1,000	.18	5.26
>1,000	99.51	47.37

Proposed Size Threshold: 1,000.

Explanation: This entity type is a segment of the broader avionics industry. It includes some of the leading electronics, aerospace, and computer manufacturers in the United States as well as high technology communications firms. While the market is not especially concentrated, most participants are large, diversified corporations. The trend toward market concentration by large size entities has accelerated in recent years as larger aerospace firms have acquired some of the leading medium-size entities. Economies of scale are achieved at relatively large sizes because of high capital requirements for market entry, the requirement for a strong and widespread reputation for technical excellence, and the high cost of regulatory compliance. Entities with employment over 1,000 account for more than 47 percent of the entities and more than 99 percent of the industry employment. Those with employment under 1,000 have had difficulty remaining competitive as independently owned and operated entities.

TABLE 27.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aircraft radio equipment repair		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.13	64.09
31 to 60	.11	10.51
61 to 90	.09	5.40
91 to 120	.09	3.65
121 to 150	.08	2.62
151 to 180	.04	1.02
181 to 210	.08	1.31
211 to 240	.02	.44
241 to 270	.03	.58
271 to 300	.04	.58
301 to 330	.04	.58
331 to 360	.05	.58
361 to 390	.02	.29
391 to 420	.04	.44
421 to 450	.03	.29
451 to 500	.10	.88
501 to 1,000	.07	.58
>1,000	98.97	6.26

Proposed Size Threshold: 30.

Explanation: This entity type is two tiered. A tier of large size entities includes repair stations that are part of large corporations, government fleets or airline companies. The other tier includes repair stations which employ fewer than 450 persons and serve primarily the general aviation market. Approximately 45 percent of employment in this smaller tier is in entities employing fewer than 150 persons, including a preponderance of small "mom and pop" operations. Industry wide, approximately 64 percent of the entities each employ no more than 30 persons.

TABLE 28.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aerial advertising, including skywriting		
Number of employees	Percent of total employment	Percent of entities
1 to 30	9.30	95.46
>1,000	90.70	4.54

Proposed Size Threshold: 10.

Explanation: This very small and specialized entity type performs two kinds of aerial advertising—skywriting and banner towing. Skywriting is a vanishing art, with only a small number of entities still active. Banner towing is the major segment of aerial advertising. Most firms are very small and have few aircraft. Entities employing fewer than 10 persons account for over 60 percent of the entities and less than 30 percent of industry employment.

TABLE 29.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Aerial advertising, including skywriting		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.01	8.54
31 to 60	.07	12.20
61 to 90	.01	1.22
91 to 120	.05	3.66
151 to 180	.02	1.22
181 to 210	.06	2.44
211 to 240	.07	2.44
241 to 270	.11	3.66
271 to 300	.21	6.10
301 to 330	.05	1.22
331 to 360	.05	1.22
391 to 420	.12	2.44
451 to 500	.07	1.22
501 to 1,000	1.54	17.07
>1,000	97.57	35.37

Proposed Size Threshold: 150.

Explanation: There are five general categories of aircraft maintenance technician schools: State sponsored programs, university programs, community college programs, vocational-technical school programs, and private aerotechnical schools. Programs range in size from small "mom and pop" operations at small airports to large aerotechnical institutes. All leading aerotechnical programs employ at least 100 persons. Because a large segment of this entity type includes large universities, community colleges, and state governments which offer programs, even some of the large leading private maintenance technician programs would be at a competitive disadvantage in their ability to absorb regulatory costs, when compared to the larger diversified institutions.

TABLE 30.—PERCENTAGE DISTRIBUTION OF ENTITY TYPES BY NUMBER OF EMPLOYEES

Parachute lofts		
Number of employees	Percent of total employment	Percent of entities
1 to 30	.04	60.00
31 to 60	.02	4.00
61 to 90	.03	4.00
91 to 120	.04	4.00
121 to 150	.06	4.00
181 to 210	.15	8.00
> to 1,000	99.66	16.00

Proposed Size Threshold: 90.

Explanation: Parachute lofts are certificated by FAA under 14 CFR Part 149 to provide parachute rigging, repair, alteration, and maintenance services for civilian aircraft. Parachute manufacturers may also provide rigging services, but are not required to obtain a certificate under this same regulation. The U.S. military market is one of the largest for parachute rigging services. Entities serving only the military do not require FAA certification. The market is two tiered—the larger national market and the smaller local market. Nationally, the largest companies are defense contractors and/or equipment manufacturers. FAA certificates very few of these entities as parachute lofts, although some are certificated as parachute manufacturers. The local market exists to serve sport parachutists. The sport business tends to go to the most convenient local loft. Not counting the small number of very large entities with over 1000 employees, including U.S. government agencies, over 75 percent of the remaining employment is in entities employing 90 to 210 persons. Those entities employing fewer than 90 persons are generally independently owned and operated companies which compete primarily in the local sport market.

Effects of Proposed Size Threshold Values

Table 31 shows the estimated total number of entities of each type and the estimated number and percent of entities that FAA would consider small under the proposed standards. The data available to FAA on firms having fewer that 20 employees are especially poor. FAA invites any *independently owned and operated* firm with fewer than twenty employees which must comply with any existing FAA regulations or will have to comply with any proposed FAA regulation to submit its name and number of employees and type of business to the address listed under "INVITATION FOR PUBLIC COMMENTS" above for review.

TABLE 31.—EFFECTS OF PROPOSED SMALL ENTITY THRESHOLD VALUES

SIC	Entity type	Total number of entities	Number and percent of entities considered small under proposed definitions
0721	Aerial Agricultural and Pest Control	296	221(75%)
2399	Parachutes	12	3(25%)
	Aircraft Seat Belts, Except Leather	58	15(26%)
	Aircraft Tie Down Strap Assemblies, Except Leather	5	2(40%)
2531	Aircraft Seats	78	27(35%)
3011	Aircraft Tires and Inner Tubes	4	0(0%)
3069	Rubberized Survival Equipment	46	20(43%)
3537	Pallets and Containers	40	15(38%)
3585	Aircraft Environmental Control Equipment	20	9(45%)
3592	Fuel Control Equipment, Including Carburetors	36	14(39%)
	Aircraft Pistons and Piston Rings	12	6(50%)
	Aircraft Engine Valves	7	6(86%)
3599	Other Aircraft Valves, N.E.C.	53	24(45%)
3647	Aircraft Lighting Systems and Fixtures	38	13(34%)
3662	Aircraft Communications Equipment	80	26(32%)
	Aircraft Navigational Equipment	105	33(31%)
3691	Aircraft Batteries	5	2(40%)
3694	Engine Starting and Electrical Generating Equipment	24	11(46%)
	Spark Plugs for Internal Combustion Engines	4	1(25%)
	Voltage Regulators	4	3(75%)
3811	Aircraft Flight Instruments	102	32(31%)
3829	Aircraft Fuel System Instruments	44	16(36%)
	Aircraft Engine Instruments	41	11(27%)
	Aircraft Measuring Instruments, Not Elsewhere Classified	30	13(43%)
	Air Traffic Control Equipment	23	8(35%)
7622	Aircraft Radio Equipment Repair	765	420(55%)
7319	Aerial Advertising, Including Skywriting	23	14(61%)
8299	Aircraft Maintenance Technician Schools	92	19(21%)
7999	Parachute Lofts	27	17(63%)

Data Sources

The sources of data used in establishing the size standards include: The *Standards Industrial Classification Manual*, which is used as a guide in defining industries; Dun and Bradstreet, *Market Identifer (DMI) Files; FAA Index of Parts Manufacturer Approval (PMA)*, a compilation of all companies certified by the FAA to produce replacement parts or design modifications for installation on a particular aircraft; *FAA Index of Articles Certified Under the Technical Standard Order System (TSO)*, which contains a detailed listing of all aeronautical products subject to FAA Technical Standard Orders and the manufacturers which hold TSO approval; *FAA Advisory Circular AC#147-2W, Directory of FAA Certified Aviotion Maintenance Technician Schools*, which lists all such schools under the authority of FAR, Part 147; *FAA; Advisory Circular AC#140-7D, FAA Certified Maintenance Agencies Directory*, which lists repair stations certified under FAR, Part 145 and parachute lofts certified under FAR, Part 149; *FAA Airmen and Aircraft Registry (AAR)*, a comprehensive, computerized listing of certified airmen and aircraft; *Aircraft Registration Master File (ARMF)*, which provides information on certificated aircraft and the uses to which aircraft are put; the FAA's own files of articles and correspondence; and information provided by trade associations.

Method of Establishing Cost Threshold Values

The FAA has used the same criteria to develop the proposed cost threshold values that it used previously (See FAA's first notice for detailed discussion) to develop the threshold values stated in FAA Order 2100.14. These are summarized below.

The threshold value for each entity type is equal to one percent of the annual cost of doing business for the 34th percentile small entity. FAA estimated the threshold value by identifying the 34th percentile small entity, calculating and verifying its annualized cost, and calculating the threshold value as 1 percent of the annualized cost.

To identify the 34th percentile small entity, FAA created lists of small entities rank ordered by size. Each list included all identified entities with employment equal to or less than the small entity size threshold. Subsidiary companies were not included because they are not independently owned and operated, a requisite condition in the definition of small entity, as set forth in the Regulatory Flexibility Act.

Next, annual costs of doing business were calculated using sales and profitability data:

Cost=Sales−(Sales×Profit Margin).

Sales figures used to calculate annual costs of doing business were either actual reported sales or estimates statistically derived. To derive estimates for each entity type, FAA generated a curve by plotting expected sales by employment. The curve is the least squares regression fit of actual sales and employment data. Profit margins used in the calculation are median values for the four-digit SIC within which an entity type is classified.

In each entity type, FAA compared the actual sales data for the thirty-fourth percentile small entity with the fitted value on the curve. Where the actual value deviated significantly, indicating an anomolous case within the entity type, the fitted value was used to compute the cost. Otherwise the actual sales data were used.

The following example of how the method of establishing cost thresholds was applied to one entity type, aircraft seats (SIC 2531), illustrates the general method used to arrive at the proposed cost threshold values for all twenty-nine entity types.

Example: Based upon the size threshold value, this entity type has 27 small entities. Therefor, the ninth smallest size entity is closest to the thirty-fourth percentile (33.3 percentile) and is the entity size on which the cost threshold is based. This entity employs 25 people.

Assessment of the available sales data for the entity type showed that a log-log regression estimate yielded a good fit of the sales and employment data. The equation of the fitted curve, plotting sales versus employees is:

$\text{Sales}=111{,}635\ (\text{employees})^{.80}$

The correlation coefficient (R^2) equals .70. The value indicates that the fitted curve is a good benchmark for estimating expected sales versus employment values for this entity type. Sales data were not available to the FAA for the thirty-fourth percentile small entity, therefore the fitted value provides the best estimate. The fitted value is $1,466,062.

The annual cost of doing business was calculated using sales and profitability data. The profit margin for SIC 2531 equals .03.

Cost=Sales−(Sales×Profit Margin).=$1,466,062−($1,466,062×.03)=$1,422,060.

The cost threshold equals one percent of the annual cost:

Cost Threshold=$1,422,060×.01=$14,220.

The specific application of the methodology to each entity type varied depending upon the availability and characteristics of the data. The detailed sources and explanations for the calculation of threshold values for all of the entity types are available for inspection at FAA Headquarters. For appointment to inspect sources, call Leonard Oberlander, Regulatory Analysis Branch, APO-210, (202) 426-3070.

Significant Economic Impact Standards

The figures in Table 32 approximately equal one percent of the total annual cost of the 34th percentile small entity in each entity type. The figures are in 1983 dollars. To convert them to current dollars, FAA proposes multiplying them by the ratio of the current implicit GNP price deflator to that for December 1983. (Implicit price deflators for GNP may be found in the *Survey of Current Business*.) Note that no threshold annualized cost levels have been presented for Aircraft Tires and Inner Tubes (SIC 3011) and Storage Batteries (SIC 3691). There is not a sufficient number of small entities for FAA to apply a significant cost threshold in either of these two industries.

BILLING CODE 4910-13-M

Reestablishment of the Air Traffic Procedures Advisory Committee

Notice is given of the reestablishment of the Federal Aviation Administration (FAA) Air Traffic Procedures Advisory Committee. This advisory committee was established on the recommendation of a task group that was formed by the Secretary of Transportation on January 28, 1975. The task group's recommendation called for the establishment of a standing group to review all air traffic control procedures and practices. The Administrator of the FAA is the sponsor of the committee. The membership will include experts from the Government, the aviation industry, and those representing the viewpoints of other elements of the aviation community. Non-Federal members of the committee do not become Government employees. They serve without compensation and at their own expense. The committee will make recommendations for standardizing, clarifying, and upgrading present air traffic control procedures and practices and recommend new or revised procedures necessary to accommodate new air traffic control concepts.

Public Interest

The Secretary of Transportation has determined that the reestablishment and continued use of the committee is necessary in the public interest in connection with performance of duties imposed on the FAA by law. Meetings of the committee will be open to the public except as provided for in section 10(d) of the Advisory Committee Act.

Issued in Washington, DC, on March 17, 1986.

Walter H. Mitchell,

Executive Director, Air Traffic Procedures Advisory Committee.

BILLING CODE 4910-13-M

Radio Technical Commission for Aeronautics (RTCA), Special Committee 142—Air Traffic Control Radar Beacon System/Mode S (ATCRBS/Mode S) Airborne Equipment; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of RTCA Special Committee 142 on Air Traffic Control Radar Beacon System/Mode S (ATCRBS/Mode S) Airborne Equipment to be held on April 15-16, 1986, in the RTCA Conference Room, One McPherson Square, 1425 K Street, NW, Suite 500, Washington, DC commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Introductory Remarks; (2) Approval of the Minutes of the Meeting Held on December 3-4, 1985; (3) Briefing on FAA Data Link Program; (4) Report of the Editorial Working Group; (5) Discuss Format of Committee Report; (6) Review Second Draft Report on Minimum Operational Performance Standards for Mode S Data Link; (7) Pilot Factors Working Group Report; (8) Develop Future Work Program; and (9) Other Business.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC 20005; (202) 682-0266. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on March 14, 1986.

S.B. Poritzky,

Designated Officer.

DEPARTMENT OF THE TREASURY

Fiscal Service

[Dept. Circ. 570, 1985 Rev., Supp. No. 12]

Surety Companies Acceptable on Federal Bonds; MIC Property and Casualty Insurance Corporation

A Certificate of Authority as an acceptable surety on Federal bonds is hereby issued to the following company under sections 9304 to 9308 Title 31 of the United States Code. Federal bond-approving officers should annotate their reference copies of the Treasury Circular 570, 1985 Revision, on page 27121 to reflect this addition:

MIC Property and Casualty Insurance Corporation. Business Address: 3044 West Grand Boulevard, Detroit, MI 48202. Underwriting Limitation [b]: *$2,193,000.* Surety Licenses [c]: All except AL, CA, DE, HI, IL, ME, MA, NH, NC, OR, RI, VT, WY. Incorporated In: Michigan. Federal Process Agents.[d]

Certificates of Authority expire on June 30 year year, unless revoked sooner. The certificates are subject to subsequent annual renewal as long as the companies remain qualified (31 CFR Part 223). A list of qualified companies is published annually as of July 1 in Department Circular 570, as to Underwriting Limitations, areas in which licensed to transact surety business and other information.

Copies of the Circular may be obtained from the Surety Bond Branch, Finance Division, Financial Management Service, Department of the Treasury, Washington, DC 20228.

Dated: February 25, 1986.

W.E. Douglas,

Commisioner, Financial Management Service.

BILLING CODE 4810-35-M

Internal Revenue Service

Income Taxes: Age 65 Exemptions and Zero Bracket Deductions; Eligibility Determinations and Social Security Administration Files

AGENCY: Internal Revenue Service, Treasury.

ACTION: Announcement.

SUMMARY: This document announces that the Internal Revenue Service will use Social Security Administration date of birth files to determine the eligibility for and the proper amount of additional exemptions claimed on Forms 1040 and 1040A by taxpayers and their spouses for being age 65 or over. These files will also be used to determine the eligibility and the proper zero bracket amount for taxpayers with unearned income who could be claimed as dependents on their parent's tax returns.

FOR FURTHER INFORMATION CONTACT: Ruby Alston, Program Analyst, Returns Processing and Accounting Division, Office of Assistant Commissioner (Returns and Information Processing), Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224, 202-566-4089, not a toll-free call.

Announcement

The additional exemption for taxpayer or spouse age 65 or more specified in Internal Revenue Code section 151 is allowed as a deduction in computing taxable income. The deduction is available to eligible taxpayers age 65 or over at the end of the taxable year by filing Form 1040 or 1040A, U.S. Individual Income Tax Returns.

The zero bracket amount specified by Internal Revenue Code section 63 cannot be used by taxpayers with unearned income of $1,000 or more, who could be claimed as a dependent by another taxpayer.

To determine eligibility and amount of allowable age 65 exemptions and zero bracket deductions, the Internal Revenue Service will use Social Security Administration date of birth files to match against Forms 1040 and 1040A. If a taxpayer or spouse has improperly claimed the additional age exemption or the zero bracket deduction, he/she will be notified of a proposed tax adjustment to his/her tax return.

Fredric F. Perdue,

Director, Returns Processing and Accounting Division.

UNITED STATES INFORMATION AGENCY

Culturally Significant Objects Imported for Exhibition; Determination; Amendment

On March 14, 1983, notice was published at page 10791 of the **Federal Register** (48 FR 10791) by the United States Information Agency pursuant to Pub. L. 89-259 relating to the exhibit "China: 7,000 Years of Discovery." A new exhibition site, at the Boston Museum of Science beginning on or about June 1, 1985, to on or about December 1, 1985, was added to the itinerary published in the original notice by amendment published in the **Federal Register** on May 23, 1985 (50 FR 21309).

An additional exhibition site has been added to the amended itinerary. The exhibit will be on display at the Southwest Museum of Science and Technology, Dallas, Texas, beginning on or about June 1, 1986 to on or about December 31, 1986.

Public notice of this amendment to the notice is ordered to be published in the **Federal Register.**

Dated: March 17, 1986.

Thomas E. Harvey,

General Counsel and Congressional Liaison.

COPYRIGHT ROYALTY TRIBUNAL

TIME AND DATE: 1:30 p.m., Tuesday, April 1, 1986.

PLACE: Room 458, 1111 20th Street, NW., Washington, DC 20036.

SUBJECT: Ascertainment of best accounting method for the distribution of the cable copyright fund. The question arises from the Tribunal decision to create the basic, 3.75% and syndex funds.

STATUS: Open.

FOR FURTHER INFORMATION CONTACT: Robert Cassler, General Counsel, Copyright Royalty Tribunal, 1111 20th Street, NW., Suite 450, Washington, DC 20036.

Dated: March 18, 1986.

Edward W. Ray,
Chairman.

COUNCIL ON ENVIRONMENTAL QUALITY

March 18, 1986.

TIME AND DATE: 10:00 a.m., Tuesday, April 1, 1986.

PLACE: Conference Room, First Floor, 722 Jackson Place, NW., Washington, DC.

MATTERS TO BE CONSIDERED:

1. The Department of Energy will brief the Council on the Nuclear Waste Policy Act, with particular emphasis on the environmental assessments requirements.
2. Other business.

A. Alan Hill,
Chairman.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

March 18, 1986.

Change in Previously Announced Agenda

TIME AND DATE: Originally scheduled for March 20, 1986; now scheduled for 10:00 a.m., Wednesday, April 16, 1986.

PLACE: Room 600, 1730 K St., NW., Washington, DC.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission originally scheduled the following item for a meeting, but will now hear oral argument on the item:

1. Secretary of Labor on behalf of Michael Hogan and Robert Ventura v. Emerald Mines Corp., Docket No. PENN 83-141-D. (Issues include whether the administrative law judge erred in dismissing the discrimination complaint.)

Any person intending to attend this hearing who requires special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs. Subject to 20 CFR 2706.150(a)(3) and 2706.160(e).

CONTACT PERSON FOR MORE INFORMATION: Jean Ellen (202) 653-5629.

Jean H. Ellen,
Agenda Clerk.

5

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

March 18, 1986.

TIME AND DATE: 10:00 a.m., Wednesday, March 26, 1986.

PLACE: Room 600, 1730 K St., NW., Washington, DC.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission will consider and act upon the following:

1. Magma Copper Company, Docket No. WEST 83-17-M. (Issues include whether the administrative law judge erred in finding a violation of 30 CFR 57.19-128(a)(1982), a mandatory safety standard dealing with wire rope.)

Any person intending to attend this meeting who requires special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs. Subject to 29 CFR 2706.150(a)(3) and 2706.160(e).

CONTACT PERSON FOR MORE INFORMATION: Jean Ellen (202) 653-5629.

Jean H. Ellen,
Agenda Clerk.

6

LEGAL SERVICES CORPORATION

TIME AND DATE: The meeting will commence at 9:00 a.m., Saturday, March 29, 1986, and continue until all official business is completed.

PLACE: Capitol Holiday Inn, Columbia Room, 550 C Street, SW., Washington, DC 20024.

STATUS OF MEETING: Open.

MATTERS TO BE CONSIDERED:

1. Approval of Agenda
2. 1986 Consolidated Operating Budget
3. Public Comment

CONTACT PERSON FOR MORE INFORMATION: Timothy H. Baker, Executive Office, (202) 863-1839.

Date issued: March 19, 1986.

Timothy H. Baker,
Secretary.

BILLING CODE 7545-01-M

8

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of March 24, 1986.

A closed meeting will be held on Tuesday, March 25, 1986, at 2:30 p.m. An open meeting will be held on Thursday, March 27, 1986, at 10:00 a.m., in Room 1C30.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a) (4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Grundfest, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Tuesday, March 25, 1986, at 2:30 p.m., will be:

Formal orders of investigation.

Settlement of administrative proceedings of an enforcement nature.

Amendment of order instituting administrative proceeding of an enforcement nature.

Institution of administrative proceedings of an enforcement nature.

Institution of injunctive actions.

Opinion.

The subject matter of the open meeting scheduled for Thursday, March 27, 1986, at 10:00 a.m., will be:

1. Consideration of whether to adopt an amendment to Rule 17Ac2-1, and revisions to Form TA-1, utilized for registration as a transfer agent; a new SEC Supplement to Form TA-1 to require information about persons associated with an independent, non-issuer transfer agent; and a new Rule 17Ac2-2 requiring transfer agents to complete new Form TA-2, an annual report regarding the nature and scope of a transfer agent's business activities. For further information, please contact Randy G. Goldberg at (202) 272-2365.

2. Consideration of whether to issue a release that would approve a proposed rule change of Depository Trust Company ("DTC") revising DTC's fee schedule for major DTC services. For further information, please contact Jerry Greiner at (202) 272-2066.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Patrick Dougherty at (202) 272-3077.

Dated: March 18, 1986.

John Wheeler,
Secretary.

1986
UMI

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[Docket No. 60235-6035]

Financial Assistance for Research and Development Projects To Strengthen and Develop the U.S. Fishing Industry

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of availability of financial assistance.

SUMMARY: For FY86, Saltonstall-Kennedy funds are available to assist persons in carrying out research and development projects which address any aspect of a U.S. fishery involving the U.S. fishing industry (recreational or commercial) including, but not limited to, harvesting, processing, marketing, and associated infra-structures. NMFS issues this notice describing the conditions under which applications will be accepted and how NMFS will determine which applications it will fund.

DATE: Applications should be sent to the applicable regional or Washington office of the National Marine Fisheries Service by May 27, 1986. (For addresses, see Section E.2.)

FOR FURTHER INFORMATION CONTACT: Phyllis S. Bentz, S–K Program Manager, National Marine Fisheries Service, Washington, DC 20235, Telephone: 202–634–7451.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Saltonstall-Kennedy (S–K) Act (15 U.S.C. 713c-2–713c-3) makes available to the Secretary of Commerce up to 30 percent of the gross receipts collected under the customs laws from duties on fishery products. The Secretary must use at least 60 percent of these funds each year to make available grants to assist persons in carrying out research and development projects which address any aspect of United States fisheries, including, but not limited to, harvesting, processing, and marketing. U.S. fisheries [1] include any fishery that is or may be engaged in by U.S. citizens or nationals or citizens of the Northern Mariana Islands. The phrase "fishing industry" includes both the commercial and recreational sectors of U.S. fisheries.

There is no guarantee that sufficient funds will be available to make awards for all approved projects. For FY 86, $8 million was appropriated for the S–K program. Approximately $1.06 million has been committed to fund the second year of FY 85 multi-year projects, and about $7 million may be used to fund new fisheries research and development projects, subject to availability.

II. Funding Priorities

Fisheries research, development, and utilization proposals should relate to one or more of the priority areas in the Regional and National sections. The NMFS will also consider other proposals (note exceptions which follow); however, funding will be available only if sufficient projects adequately addressing the specific priorities are not received.

Except for the Western Pacific, Puerto Rico, and the U.S. Virgin Islands, funding will *not* be provided for projects primarily involving the following activities: (1) Infrastructure planning and construction; (2) port and harbor development; (3) aquaculture research and development; (4) resource enhancement; (5) research evaluating the ability or extent to which fish are attracted to fish aggregating devices; and (6) extension activities such as newsletters or technology transfer unless identified as a necessary part of a specific project.

The NMFS has identified fisheries and priorities on a regional basis in conjunction with commercial and recreational fishing industry groups, other organizations, and governmental entities having an interest in the development and use of fisheries in the region.

Some priorities were found to relate to several, and in a few instances, all fisheries or regions and are listed as national priorities. In these cases, the application should address the relative extent to which multiple fisheries resources would be addressed.

The funding priorities conform to the NMFS S–K Long Range Plan, which identifies problems and opportunities for S–K funding.

Priorities for FY 86 funding within specific fisheries are listed below, along with a summary of activities funded in FY 85. In some cases the priorities indicate that proposals should build upon or take into account past or current work in the area. Lists of ongoing and past studies, and more detail where necessary, are available from the applicable regional or Washington office. (For addresses, see Section E.2.)

A. Northeast Region

1. *Squid, Mackerel and Butterfish:* Projects funded in FY 85 cover both domestic and export market development activities for mixed species such as squid, mackerel, butterfish, hakes, herring, ocean catfish, ocean pout, pollock, skates, and bluefish (both recreationally and commercially caught). Included are consumer education, training of food-service distributors, testing of innovative product forms utilizing undervalued species, and preparation of export information. Also funded was a study of the technical and economic factors related to freezer trawlers.

For FY 86, the NMFS seeks projects which will complement these activities or address other developmental impediments. Specifically, the NMFS will give priority for funding to projects that:

a. Examine means to locate and harvest fishery resources which have identifiable capacity for significant production.

b. Conduct in-plant demonstrations of new or innovative processing equipment to allow processors to evaluate opportunities to make greater use of nontraditional species of fish. Projects must assess the technical and economic feasibility of using the equipment.

c. Conduct economic feasibility analyses on harvesting and processing of non-traditional species.

d. Identify chemical indicators for decomposition in current and potential squid products.

e. Execute regional domestic and/or export marketing programs, including product development activities, in cooperation with States, media, industry and other interests.

f. Investigate the development of new mackerel products for domestic and/or foreign markets.

g. Examine means to increase recreational harvest of mackerel by party boats and headboats in the Mid-Atlantic area.

h. Test/demonstrate various separator trawls in the Northwest Atlantic fisheries to reduce by-catch of juveniles and non-target species.

2. *Atlantic Demersal Finfish:* A major effort to evaluate existing techniques and potentially new methods to process and use fish waste was funded in FY 85. Also funded were projects involving: the study of the economic feasibility of a vertically integrated surimi and analog plant, using whiting and red hake, located proximate to major markets; continuation of on-board training activities to expand quality handling techniques to vessels which cannot at this time realistically adopt the preferred bleeding and boxing system. Relating to this and other fisheries, a project was funded to evaluate a model for implementation of a State underwritten mutual insurance association for vessel insurance.

In FY 86, priority will be given to projects which:

a. Evaluate the technical and economic feasibility of shifting fishing effort to other species, such as hake, and resolve associated problems.

b. Evaluate existing techniques or develop new methods to process and use fish wastes and determine technical and economic feasibility of their application through in-plant demonstrations. Efforts should supplement, and not duplicate on-going fish waste studies, e.g. those of the Northeast Fish Waste Task Force and the New England Fisheries Development Foundation.

c. Conduct regional domestic and/or export marketing programs to develop new markets for Atlantic demersal finfish species, e.g. cod, haddock, yellowtail flounder, winter and summer flounder, grey sole, silver and red hake, wolffish, cusk, etc.

d. Evaluate and demonstrate economic returns at each level of processing and distribution associated with maintenance of high quality products.

e. Develop, modify, test, and/or evaluate harvesting methods that will enhance conservation measures.

3. *Coastal, Estuarine and Great Lakes Fisheries:* Projects funded in FY 85 focused on: developing new markets for underutilized species of freshwater fish and fish products in the Great Lakes area and other States having commercial fisheries dependent upon harvesting underutilized species of freshwater fish; a coordinated consumer education, domestic and export marketing program for the Mid-Atlantic Region; the expansion of a fishing vessel and processing plant quality project in the Northeast to the retail segment of the industry; and a clam waste processing project to model the use of natural processes to improve the quality of plant production wastes.

Priorities for FY 86 funding will focus on:

a. Expansion of domestic and/or foreign markets for underutilized fishery products. This may include new product development, test marketing, and promotion of non-food application of rough fish.

b. Demonstrate/implement marketing strategies developed for the charter boat/headboat industry, including integration into tourism.

c. Examine and demonstrate the potential for developing recreational fishing as a new industry in coastal communities.

B. Southeast Region

Both commercial and recreational projects should be concentrated on shifting current harvesting activity from fully or over utilized fisheries to alternate fisheries, or should contribute to solutions for the specific problem areas identified in the following sections. Proposals will have to contain appropriate economic analysis where the output' [illegible] icability and priority depend upon the product, process, or concept being economically viable.

1. *Latent Southeast Resources:* A major initiative funded during FY 85 focused on product and market concept development, exploratory fishing, handling, storage and transportation studies, and foreign and domestic market investigations. Also funded were projects: to produce a Southeastern Seafood Product Quality Code based on industry recommendations and supported by existing pertinent regulatory documentation; to develop guidelines for the emerging tuna fishery in the Southeast with emphasis on product quality and economic profile; and to assess the biological and commercial significance of bigeye scad fishery in the U.S. Virgin Islands. Activities were continued to develop and implement a comprehensive long range educational program to make underutilized species more desirable to marine recreational fishermen in the Southeast.

FY 86 proposals should contribute to the increased, continued harvest and sales of any species of finfish which is underutilized, including the herring like species. Specifically, proposals should:

a. Assess the commercial significance of stocks.

b. Develop, evaluate, and demonstrate new technology for the commercial harvest of midwater schooling species in deeper offshore waters.

c. Develop, evaluate, and demonstrate new technology for on-board or shoreside handling, grading, and storage systems which support commercial activity.

d. Develop new commercial products or processes which provide evidence of market and economic feasibility.

e. Develop indices of chemical metabolites/end products that form during harvesting, processing, or storage in small pelagic species which reflect changes in quality as perceived by sensory methods.

f. Investigate use of multiple species in surimi-based products.

g. Conduct market research and develop export or domestic markets for latent resources or freshwater catfish and crayfish.

h. Develop technology for sorting fish by species or size in the harvesting operations so as to avoid unwanted by-catch and the need for on-board sorting and grading. Proposals for research on specific species such as butterfish will be considered from qualified researchers, but demonstration projects without a substantial research and development component will not be considered.

i. Develop a profile of traditional marine recreational fishing in the Southeast to assist public and private sector organizations in stimulating economic development based on marine recreational fishing. This profile should synthesize and summarize existing information on fishing patterns, target species, demographic characteristics of anglers, trip expenditure information, and other pertinent data.

j. Evaluate access and infrastructure needs of the U.S. Virgin Islands and Puerto Rico to support increased marine recreational fishing activity.

k. Develop and implement strategies to integrate marine recreational fishing into tourism industry programs giving special emphasis to the needs of charter and headboat fishing businesses.

l. Develop and implement programs to increase the use of underutilized sportcaught species.

2. *Menhaden:* Projects were funded in FY 85 which continue research on the use of high pressure carbon dioxide to extract and refine fish oil, and which address the effect of fish oil on plasma lipids.

In FY 86 proposals should:

a. Address human food or other high value uses of menhaden. Areas of work should concentrate on the use of menhaden surimi or mince in product or process development (ongoing projects should result in menhaden surimi being available for use by successful applicants).

b. Provide for determining consumer acceptance and relative value.

c. Address potential domestic as well as export markets.

d. Conduct a study to characterize the amino acid profile of menhaden fish meal based on a statistically sound data base.

---

[1] For purposes of this notice, a fishery is defined as one or more stocks of fish, including tuna and shellfish, which are identified as a unit based on geographic, scientific, technical, recreational and economic characteristics, and any and all phases of fishing for such stocks. Examples of a fishery are Alaskan groundfish, Pacific whiting, New England whiting, Gulf of Mexico groundfish, etc.

VOL
51
ISS
55
MR
21
1986
UMI

3. *Shrimp:* A project was funded in FY 85 to develop a method to determine net drained weight of block frozen shrimp which will be used to identify short weights and fraud in shrimp shipments. Also funded was a project relating to the entire Gulf and South Atlantic commercial fishing fleet to develop an industry vessel safety code, coupled with risk finance alternatives for vessel owners subscribing to the code.

In FY 86 funding priority will be given to proposals designed to stabilize the shrimp industry at its current economic value. Proposals can address quality issues including inspection of imports and an assessment of the relative value of different alternatives to bisulfites. Proposals must build upon or take into account past or current work in the areas. Proposals dealing with other problems threatening the continued viability of the shrimp industry will also be given consideration including risk management, the reduction of insurance costs, and the dissemination of information about and the adoption of Trawl Efficiency Devices (TED's) by the commercial shrimp industry. Proposals should supplement and not duplicate on-going risk management studies.

4. *Molluscan Shellfish:* Through the development of shellfish water quality standards, a project funded in FY 85 will recommend techniques to control incidences of viral illnesses and new management procedures to maintain the safeness of molluscan shellfish. Proposals must build upon or take into account past or current work in all of these areas.

In FY 86 priority will be given to proposals which:

a. Address the development of product forms/products which reduce public health concerns associated with raw products.

b. Develop better predictive indices of fecal contamination or pollutant loads for existing shellfish growing areas.

c. Develop and demonstrate better field procedures to detect and measure human pathogenic viruses, i.e., hepatitis A., Norwalk, and rotaviruses, in oysters, including the correlation of virus levels with bacterial indicators. Proposals should build on, and not duplicate any past work.

d. Develop new technology to address depuration or allied techniques to kill or eliminate enteric viruses. Proposals must build upon or take into account past or current work in all of these areas.

C. Southwest Region

The Southwest Region is comprised of two distinct geographic areas—the U.S. Pacific Islands and the California coast. The island fisheries differ significantly in many instances from the mainland fisheries. Accordingly, we have established a list of funding priorities for each of the geographic areas.

1. U.S. Pacific Islands

Projects funded in FY 85 will allow for infrastructure development in Guam, and also for analysis of possible processing facility development in a number of islands. Other projects funded will focus on enhanced fishery production from reseeding island reef areas with juvenile trochus and giant clams and development of effective artificial reef technologies for high energy environments. Also funded were experimental fishing projects which focus on albacore in waters Southwest of American Samoa, and on demonstration of effective pole and line fishing for tuna in the local waters of Kosrae.

In the U.S. Pacific Islands, priority consideration will be given in FY 86 to projects which contribute to the fishery development goals of Hawaii, Guam, American Samoa, the Commonwealth of the Northern Marina Island and the Trust Territories of the Pacific Islands. All proposals should be consistent with the cultural and social perspectives of the island people.

Projects related to fish aggregation devices (FADs) will not be funded during this cycle. The key problem affecting FADs throughout the Pacific is the short life expectancy caused by basic deficiencies in mooring design. Based upon the recommendations of a 1983 mooring design study sponsored by the South Pacific Commission, the NMFS has funded FAD projects in Yap and American Samoa. Until these projects are evaluated in the latter part of 1986, the use of S–K funds for FAD research will not be considered until FY 87.

Proposals which address problems in the following areas will be given priority for funding in FY 86:

a. *Industry Development:* Projects to continue development of shoreside fisheries facilities and seafood marketing outlets by providing business management expertise, quality control systems, and marketing assistance. Projects should have the ultimate goal of creating self-sustaining business enterprises or creating new marketing opportunities.

b. *Tuna:* Projects which investigate the potential production of sashimi grade tuna and improve pole-and-line bait fishing. Particular attention should be given to upgrade the handling and quality of tuna for sashimi markets.

c. *Other Pelagic Species:* Projects related to other oceanic pelagic species (e.g., mahimahi, wahoo, billfish, shark) should focus upon developing local and overseas market outlets. Particular attention should be focused on maintaining product quality (e.g., avoidance of histamine in mahimahi, urea in shark) through improved handling, processing, and storage methods.

d. *Bottomfish:* Projects to expand harvesting opportunities and develop marketing channels (local and export) for these species. Projects for bottomfish development in areas where the resources may be distressed and unable to withstand added fishing pressure will not be funded.

e. *Vessel Support Facilities:* Proposals for continued design, engineering and construction of fishing vessel support facilities. Proposals requesting construction funds much identify matching fund commitments equal to the level of requested Federal S–K funding. Proposals should demonstrate a need by local fishermen.

f. *Recreational Fisheries:* Projects which assess opportunities for development of chartered sport fishing ventures in Pacific Island areas. Such projects should consider potential tie-in with local tourism development. Services and facilities available and needed for sport fishing development should be identified.

g. *Artificial Reefs:* Projects which investigate the technical feasibility and cost effectiveness of developing or adapting artificial reef technology to tropical waters for recreational and commercial fishing.

2. California

a. *West Coast Groundfish/California:* In FY 85 the NMFS funded projects: to continue domestic marketing of Pacific whiting; to develop export markets for whiting and other groundfish species; to establish a prototype seafood retail training school; to develop an operating model to analyze changing economic conditions (landings, prices, etc.) in the fishing industry on the West Coast; and to develop a model to link marine recreational fishing tackle sales to changes in species abundance.

Pacific whiting and shortbelly rockfish continue to be the highest priority groundfish species for commercial development in FY 86. However, innovative projects that address the priorities identified below will be considered for any groundfish species. Specifically, priority for funding in FY 86 will be given to projects that:

(1) Demonstrate innovative fishing techniques which improve production, reduce marine mammal and bird mortality, and shift effort from fully utilized species.

(2) Investigate alternative product forms.

(3) Demonstrate quality assurance and control technologies.

(4) Investigate cost effective methods that improve handling, processing and/or waste disposal technologies. Proposals should supplement, and not duplicate, on-going fish waste studies, e.g., those of the Northeast Fish Waste Task Force and the New England Fisheries Development Foundation.

(5) Develop a forecast of California marine recreational fishing activity for 1990. The forecast should identify causes for changes and should be based on statewide information through 1985.

(6) Investigate and develop bone-softening processing technology for shortbelly rock fish and jack mackerel.

(7) Investigate and develop domestic and export markets for underutilized groundfish species.

b. *Albacore Tuna:* Projects funded in FY 85 address several facets of albacore marketing ranging from general applications in institutional markets to specific applications in Pacific coast retail trade. Priority for FY 86 funding will be given to projects which:

(1) Identify and/or introduce alternatives to canned tuna product forms.

(2) Demonstrate quality control measures that improve market acceptance of fresh and frozen products.

(3) Identify harvesting techniques and locations.

(4) Develop effective handling and new packaging methods for promoting increased home consumption of sport caught tuna.

c. *West Coast Coastal Pelagics:* No projects unique to this fishery were funded in FY 85. However, some of the groundfish projects also relate to West Coast coastal pelagics. Examples are the marine recreational fisheries economic model and the prototype seafood retail school.

In FY 86, priority will be given to projects that:

(1) Investigate technologies to develop new product forms.

(2) Develop new domestic and export markets for presently underutilized species.

(3) Evaluate sport catch consumption patterns and develop alternatives for greater utilization of sport caught species that are presently discarded.

D. Northwest Region

The Northwest fishing industry requires a development program which focuses on fully utilizing groundfish found in the Exclusive Economic Zone off Oregon, Washington and Alaska.

1. *West Coast Groundfish (Oregon, Washington and Alaska):* The NMFS funded projects in FY 85 that will: Develop a technique to optically detect parasites to easily segregate infested products which are subject to regulatory action; investigate and eliminate several factors causing a soft textural condition in sablefish; investigate the serious problems of texture and rapid spoilage that inhibit the use of Pacific whiting in traditional forms of product presentation; apply state-of-the-art and emerging technologies to wash fish flesh efficiently and effectively to produce a generic intermediate fish protein material for a wide range of uses; continue existing promotional activities for the Oregon and Washington charterboat industries which will focus on non-salmonid species; market charterboat services with the travel and tourism industries within these States; increase consumer awareness of pollock through a variety of promotional activities and implementation of a marketing strategy; and create fishing vessel safety instruction and videotapes based on a safety manual currently being drafted.

The FY 86 priorities expressed below will promote further development and continue to strengthen the base of the Region's industry.

a. Develop new product forms for groundfish resources which have economic potential and will increase domestic consumption of groundfish resources. Specific projects might include: development of uses for minced groundfish; development of specific products for use in Federal procurement programs (e.g., USDA School Lunch and Department of Defense Military Feeding Programs); and an examination of various packaging alternatives.

b. Develop improved processing and harvesting technologies which increase efficiency, productivity, and competitiveness of the region's groundfish industry. Specific projects might include: development and demonstration of methods to remove parasites from processed fish products, and evaluation of gear technologies to generate information to minimize the by-catch of traditional resources and maximize catch and quality of groundfish.

c. Continue to develop a safety training program for fishing vessels; develop video tapes for safety training; and develop a safety program for processing facilities.

d. Conduct export promotion activities including development of export market analyses, export promotional material, and export trade missions, seminars, and trade shows. These activities should focus on specific groundfish product forms.

e. Demonstrate an at-sea quality assurance system for trawler/processor vessels. The demonstration should reflect the risk associated with the process and product.

f. Identify and evaluate consumer preferences and biases for target species, angling methods, and supporting facilities in marine recreational fisheries. Continue development of an advanced marketing program coordinating industry efforts with the travel and tourism industry to increase the awareness of, opportunity, and participation in marine recreational fisheries for non-salmonid species. These target species may include lingcod, black rockfish, and true cod.

E. Alaska Region

Alaska Groundfish: Projects funded in FY 1985 address diversification of pollock product forms, improved pollock processing technologies and use of pollock as ingredients in other finished products; increase consumer awareness and use of Alaska pollock through retail advertising and promotional testing, and education of foodservice operators (especially school and healthcare); and continue efforts to teach fishermen in Alaska techniques for handling, storing, and distributing ocean whitefish through demonstrations and workshops.

Proposals which address impediments to full use of Alaska grounfish in the following areas will be given priority for funding in FY 1986:

1. Harvesting

a. Develop and conduct demonstrations of new technology that promote improved quality of fish delivered to processing facilities.

b. Develop new information on techniques and gear design for minimizing bycatch of certain fish and shellfish species in trawl fisheries.

c. Develop resource profiles of groundfish species not currently utilized by U.S. industry.

2. Processing Activities

a. Develop new product forms having technical and economic potential for increasing use of groundfish. Product development may include the use of minced fish or surimi.

VOL
51
ISS
55
MR
21
1986
UMI

b. Develop technology to increase efficiencies of fish processing lines.

c. Develop industry knowledge and understanding of opportunities for groundfish by-product utilization and marketing.

d. Develop studies on vacuum packaged seafoods, including shelf-life, microbiological evaluations and packaging.

3. Marketing Activities

a. Develop well-focused consumer and institutional marketing projects that increase awareness of Alaska groundfish products. All projects in this area must have measurable objectives.

b. Develop refinements of industrial marketing efforts promoting food industry utilization of Alaska pollock products.

4. Recreational Fisheries

Priority consideration will also be given to projects that assist in development of recreational fisheries. Proposals may include, but are not limited to assessing utilization of groundfish species by the charter boat industry, analysis of the potential increase in recreational fisheries for halibut, and the relationships of recreational charter business to major local and regional tourist industries.

F. National

Proposals which address topics that are not species specific, but apply to multiple fisheries involving multiple regions will be evaluated as "national" proposals by the NMFS Office of Utilization Research.

In FY 85, the NMFS funded national projects which addressed issues cross-cutting a number of fisheries and regions. Specifically, NMFS funded projects which: Address strategies to reduce fishing vessel insurance costs and improve vessel safety; develop and implement a standard system for seafood inclusion in the Universal Product Code; create public service announcements promoting seafood consumption; develop nutritional information and support materials; manage Seafood U.S.A. exhibitions at major international food shows; develop retail and foodservice video training programs; compare inspection programs for fish and fishery products in selected foreign countries and conduct an economic analysis on what appears to be the most viable option for the U.S. industry; develop a market research program for U.S. fishing tackle manufacturers; and continue implementation of artificial reef technology to develop marine recreational fishing opportunities.

In FY 86, priority wil be given to projects applicable to multiple fisheries and regions as indicated below.

1. Marine Recreational Fishing Industry

a. Prepare a report on economic activity associated with marine recreational fishing. A report was prepared in 1983, based upon 1980 information, making projections through 1985. The validity of the forecast should be ascertained; causes for changes in economic activity should be determined; and a forecast for 1990, based on information through 1985, should be established.

b. Analyze the types of fishing gear used in recreational fisheries, including the type and quantity of imports and competitiveness of U.S. tackle manufacturers.

2. Standards and Regulations

a. Develop international standards for frozen squid. These should be compatible with all species of squid available to U.S. harvesters, and support positions of the United States in the *Codex Alimentarius* in developing standards to protect consumers and facilitate trade.

b. Identify conditions and risks related to the processing/trade/consumption of various classes of fishery products (e.g., fresh fish, ready-to-eat shrimp, molluscan shellfish, canned fish) and assess current food regulations relative to risk assessments addressing: (a) Public health; and (b) quality maintenance/determination. Regulations include: 21 CFR Part 110 (Current Good Manufacturing Practice in Manufacturing, Processing, Packing or Holding Human Food); Federal Standard 369 (Sanitation Standards for Fish Plants); 21 CFR Part 123 (Frozen Raw Breaded Shrimp); 21 CFR Part 161 (Fish and Shellfish); 50 CFR Part 260 (Inspection and Certification); and 50 CFR Parts 261–267 (United States Standards for Grades).

3. New Product Forms

a. Identify the central quality and edibility characteristics of surimi-based end products. This should include proposing test methods for measuring these characteristics, and developing model end product specifications.

b. Determine the nutritional composition of natural products (e.g., king crab, snow crab, scallops, shrimp, lobster) for which analog products may likely be substituted; and the level and quantity of specific nutrients likely to be required to establish nutritional equivalency in surimi-based products. This should include analysis of products made from surimi containing 0% and 10% natural king crab, snow crab, scallops, shrimp and lobster.

c. Identify indices of decomposition and develop methods for use by industry and regulatory personnel in the field (non-laboratory) for evaluating decomposition in: (1) Surimi-based products, and (2) fresh fishery products.

d. Develop new fish-style products from surimi and/or minced fish.

e. Determine the technical feasibility of applying hyperfiltration technology to recover protein materials from wash water used in surimi processing, characterize the recovered materials and evaluate their potential uses.

f. Determine the feasibility of obtaining and measuring biomedically important compounds from seafood or seafood waste materials. Proposals should indicate how work will supplement and not duplicate on-going efforts, e.g. those of the Northeast Fish Waste Task Force and the New England Fisheries Development Foundation. Proposals should also build on the longstanding efforts of Sea Grant in this area.

4. Marketing

Develop materials focusing on current seafood and health nutrition developments. Development should be coordinated with industry and other promotional efforts in this area.

5. Education, Training and Information

Develop training materials focusing on seafood processing personnel involved in quality control and production. In particular, proposals should address, where possible, the production of educational materials in a videotape format. The focus of materials should be on hygienic and technological practices in handling, processing and storage; and evaluation of good manufacturing practices and final product quality.

6. Marine Insurance

Identify, examine, and apply new options and strategies to build upon current S–K fishing vessel safety and insurance projects. These should aim at reducing or managing fishing vessel risk and associated insurance costs.

7. Harvesting Investment Strategies

Organize a forum to identify and evaluate private sector approaches to link vessel investment strategies with fisheries resource availability.

III. How To Apply

A. Eligible Applicants

Applications for grants or cooperative agreements for fisheries development projects may be made, in accordance

with the procedures set forth in this notice by:

1. Any individual who is a citizen or national of the United States;

2. Any individual who is a citizen of the Northern Mariana Islands (NMI), being an individual who qualifies as such under Section 8 of the Schedule on Transitional Matters attached to the Constitution of the NMI;

3. Any corporation, partnership, association, or other entity, non-profit or otherwise, if such entity is a citizen of the United States within the meaning of Section 2 of the Shipping Act, 1916 as amended (46 U.S.C. 802).[8]

No individual or organization that is in arrears on any outstanding debt to the U.S. Department of Commerce will be considered for funding. Any first time applicant for Federal grant funds is subject to a preaward accounting survey prior to execution of the award. The NMFS encourages women and minority individuals and groups to submit applications. NOAA employees including full, part-time, and intermittent personnel, (or their immediate families) and NOAA offices or centers (note that this does not include Sea Grant institutional personnel) are not eligible to submit an application under this solicitation, or aid in the preparation of an application, except to provide necessary information or guidance about the fisheries development and utilization program and the priorities and procedures included in this solicitation.

B. Amount and Duration of Funding

For FY 86, the NMFS may have an estimated $7.0 million available to fund new fishery research and development projects. Although grants or cooperative agreements will generally be awarded for a period of one year, multi-year projects will be considered if certain criteria are met. However, multi-year projects are the exception and not the norm.

To qualify as a multi-year award, a project must, in addition to the criteria elaborated under "Administrative Requirements" and other applicable sections, meet the following criteria: (1) The technology to be developed must require more than a single year to research, develop and demonstrate; (2) The products or services to be developed require more than a single year to research, design and demonstrate and/or market; (3) Single year funding would otherwise result in *significant* discontinuity in project implementation; (4) Projects must indicate completed objectives, tasks, or products for the end of each funding cycle. The burden of proof for meeting these criteria rests with the applicant. No projects will be funded beyond three consecutive years. Once approved, multi-year projects will not compete for funding in subsequent years. For multi-year projects, funding beyond the first year will be contingent on the availability of new fiscal year program funds and the extent to which project objectives were met during the prior year.

In the FY 85 funding cycle, the NMFS funded eight multi-year proposals. These include major initiatives in the areas of development of a Universal Product Code for fisheries products; fishing vessel safety and insurance; seafood retail training; resolution of processing waste disposal problems; management of U.S. exhibits at foreign food shows; research on fish oils on plasma lipids; shellfish quality and marketing standards; and boat launching ramps on Guam.

Publication of this announcement does not obligate NMFS to award any specific grant or to obligate any part or the entire amount of funds available. Funding for successful applications generally will be provided by October 1986.

C. Cost-Sharing Requirements

The NMFS must provide at least 50 percent of the total cost of the project, but will provide no more than 80 percent of total project costs. The non-Federal share may include funds received from private sources or from State or local governments or the value of in-kind contributions. Federal funds may not be used to meet the non-Federal share of matching funds. In-kind contributions are noncash contributions provided by the applicant or non-Federal third parties. In-kind contributions may be in the form of, but are not limited to, personal services rendered in carrying out functions related to the project, and permission to use real or personal property owned by others (for which consideration is not required) in carrying out the project.

The percentage of the total project costs provided from non-Federal sources, not to exceed 50 percent of the costs of the project, will be an important factor in the selection of projects to be funded. Exemption from cost-sharing requirements may be granted in unusual circumstances only to non-profit, public interest organizations which demonstrate no financial ability to meet cost-sharing requirements and to government institutions in American Samoa, Guam, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, Puerto Rico and the U.S. Virgin Islands under the provisions of 48 U.S.C. 1469a. The total project costs and the percentage of cost-sharing required will be determined as described below.

1. Determining Total Project Costs

The total costs of a project consist of all costs incurred in the performance of project tasks, including the value of the in-kind contributions, to accomplish the objectives of the project during the period the project is conducted. A project begins on the effective date of a grant, cooperative agreement, or contract award between the applicant and an authorized representative of the United States Government and ends on the date specified in the award. Accordingly, the time expended and costs incurred in either the development of a project or the financial assistance application, or in any subsequent discussions or negotiations prior to award, are neither reimbursable nor recognizable as part of the recipient's cost share.

The NMFS will determine the appropriateness of all cost-sharing proposals, including the valuation of in-kind contributions, on the basis of guidance provided in Office of Management and Budget (OMB) Circulars. In general, the value of in-kind services or property used to fulfill the cost-sharing requirements will be the

---

[8] To qualify as a citizen of the United States within the meaning of this statute, citizens or nationals of the United States or citizens of the NMI must own not less than 75 percent of the interest in the entity or, in the case of a non-profit entity, exercise control of the entity that is determined by the Secretary to be equivalent to such ownership; and in the case of a corporation, the president or other chief executive officer and the chairman of the board of directors must be citizens of the United States, no more of its board of directors than a minority of the number necessary to constitute a quorum may be non-citizens; and the corporation itself must be organized under the laws of the United States, or of a State, including the District of Columbia, Commonwealth of Puerto Rico, American Samoa, the Virgin Islands of the United States, Guam, the NMI or any other Commonwealth, territory, or possession of the United States. Seventy-five percent of the interest in a corporation shall not be deemed to be owned by citizens or nationals of the United States or citizens of the NMI, if: (i) the title of 75 percent of its stock is not vested in such citizens or nationals of the United States or citizens of the NMI free from any trust or fiduciary obligation in favor of any person not a citizen or national of the United States or citizen of the NMI; (ii) 75 percent of the voting power in such corporation is not vested in citizens or nationals of the United States or citizens of the NMI; (iii) through any contract or understanding it is arranged that more than 25 percent of the voting power in such corporation may be exercised, directly or indirectly, in behalf of any person who is not a citizen or national of the United States or a citizen of the NMI; or (iv) by any means whatsoever, control of any interest in the corporation is conferred upon or permitted to be exercised by any person who is not a citizen or national of the United States.

VOL 51
ISS 55
MR 21
1986
UMI

fair market value of the services or property. Thus, the value is equivalent to the costs of obtaining such services or property if they had not been donated. Appropriate documentation must exist to support in-kind services or property used to fulfill cost-sharing requirements.

2. Determining the Level of Cost Sharing Required

The percentage of the total project costs that must be provided from non-Federal sources follows:

a. *20 percent:* For projects that would benefit the general public as well as the fishing industry but offer no unique advantage to specific industry sectors, the non-Federal cost share will be no less than 20 percent of the total project cost, and no greater than 50 percent. These projects would ordinarily involve research on the safety of fishery products or other activities for which members of the fishing industry would not necessarily receive direct benefits.

b. *30 percent:* For projects that contain economic risks which prevent an individual or group within the fishing industry from undertaking them without assistance, the non-Federal cost share will be no less than 30 percent of the total project cost. Most applications will be in this category.

c. *40 percent:* For projects which involve significant fishing industry participation, entail a limited risk, and in which the prospects for immediate future gain for the project are significant, the non-Federal cost share will be no less than 40 percent of the total project cost.

D. Format

Applications for project funding must be complete. They must identify the principal participants and include copies of any agreements between the participants and the applicant describing the specific tasks to be performed. Applications must identify the specific priorities to which they are responding. If an application is not in response to a priority, it should be so stated. Project applications should give a clear presentation of the proposed work, the methods for carrying out the project, its relevance to developing and strengthening the U.S. fishing industry and cost estimates as they relate to specific aspects of the project. Budgets will include a detailed breakdown by line item with appropriate justification. Applicants should not assume prior knowledge on the part of the NMFS as to the relative merits of the project described in the application. Applications must be submitted in the following format:

1. Cover Sheet

An applicant must use OMB Standard Form 424 as the cover sheet for each project within an application. Applicants may obtain copies of the form from the NMFS Regional Offices, NMFS Washington Office or Department of Commerce Regional Administrative Support Centers (RASC); addresses are listed under the "Application Submission and Deadline" section which follows.

2. Project-Summary

Each project within the application must contain a summary of not more than one page which provides the following information:

a. Project title.

b. Project status: (new or continuing)

c. Project duration: (beginning and ending dates)

d. Name, address, and telephone number of applicant.

e. Principal Investigator(s).

f. Specific priority(ies) to which project responds.

g. Project objective.

h. Summary of work to be performed. For continuing projects the applicant will briefly describe progress to date in addition to work proposed with the additional funds.

i. Total Federal funds requested (initial and total amount and percentage of total project costs).

j. Project costs to be provided from non-Federal Government sources (initial and total amount and percentage of total project costs).

k. Total project costs.

3. Project Description

Each project within the application must be completely and accurately described. Each project description may be up to fifteen pages in length. The NMFS will make all portions of the project description available to the public and members of the fishing industry for review and comment; therefore, NMFS will *not* guarantee the confidentiality of any information submitted as part of any project nor will NMFS accept for consideration any project requesting confidentiality of any part of the project. Each project must be described as follows:

a. *Identification of Problem(s):* For new projects, describe how existing conditions prevent the U.S. fishing industry from developing a fishery or using existing fisheries. In this description, identify (1) the fisheries involved, (2) the specific problem(s) that the fishing industry has encountered, (3) the sectors of the fishing industry that are affected, (4) the specific priorities to which the proposal responds, and, (5) how the problem(s) prevent the fishing industry from using the fishery resources. If the application is for the continuation of an existing S–K funded project, describe progress to date and explain why continued funding is necessary.

b. *Project Goals and Objectives:* State what the proposed project will accomplish and describe how this will eliminate or reduce the problem(s) described above. For multi-year projects, describe the ultimate objective of the project and how the individual tasks contribute to reaching the objective. Describe the time frame in which tasks would be conducted.

c. *Need for Government Financial Assistance:* Explain why members of the fishing industry cannot fund all the proposed work. List all other sources of funding which are or have been sought for the project.

d. *Participation by Persons or Groups Other Than the Applicant:* Describe (1) the level of participation by NMFS, Sea Grant, or other Government and non-Government entities, particularly members of the fishing industry, required in the project(s); and (2) the nature of such participation. In addition, list names and addresses of the members of the fishing industry consulted during the preparation of the project description.

e. *Federal, State, and Local Government Activities:* List any existing Federal, State, or local Government programs or activities, including State Coastal Zone Management Plans, this project would affect and describe the relationship between the project and these plans or activities. List names and addresses of persons providing this information.

f. *Project Outline:* This section requires the applicant to prepare a general narrative fully describing the work to be performed which will achieve the previously articulated goals and objectives. A chart which outlines major goals, supporting work activities, timeframe, and individuals responsible for various work activities must be included.

The narrative should include information which responds to the following questions:

(1) How will the project be structured?

(2) What major products, (e.g., research, services, or activities) will be produced and what is the specific nature of these products?

(3) What supporting work activities (be as specific as possible) will be undertaken to produce major products, services?

(4) Who will be responsible for carrying out various work activities? (Highlight work which will be subcontracted and provisions for competitive subcontracting).

(5) What methodology will be used to evaluate final products or services, and how will it be integrated into the project?

The milestone chart should graphically illustrate the major products, research, services and/or activities, supporting work activities and associated timeline; and the individual responsible for various work activities.

Because this information is critical to understanding and reviewing the application, NMFS encourages applicants to provide as much detail as possible. Applications lacking sufficient detail may be eliminated from further consideration.

g. *Project Management:* Describe how the project will be organized and managed. List all persons, directly employed by the applicant, who will be involved in the project, their qualifications, and their level of involvement in the project. If any tasks will be conducted through subcontracts, provide copies of any agreements between the applicant and the proposed subcontractors which describe the specific tasks they will perform. Since open and free competition is encouraged, contracts in excess of $10,000 are subject to competitive bids and documentation of the process. If a subcontractor is chosen prior to application submission, the competitive process used must be documented. If an award is made, all proposed sole source contracts in excess of $5,000 and all competitively bid contracts in excess of $10,000 are subject to prior approval by the Grants Officer. If no subcontractor has been chosen, indicate this.

h. *Project Impacts:* Describe the impact of the project in terms of anticipated increased landings, production, sales, exports, product quality, safety, or any other measurable factors. Describe the specific products or services that will be produced by this project. Describe how these products or services will be made available to the fishing industry.

i. *Evaluation of Project Impacts:* The procedures for evaluating the relative success or failure of a project in achieving its goals should be clearly delineated within each proposal. It is the responsibility of applicants to identify the best methodology for evaluating project effectiveness.

Evaluation procedures in each proposal should contain the following:

(1) The project objectives should be stated in a substantive, measurable way.

(2) Specific methods should be defined that will be used to evaluate (a) the success or failure of the project; and (b) how the project contributed to fisheries development.

(3) The benefits of the project should be clearly defined. Depending on the nature of the benefits, the evaluation methodology should be able to accurately assess the benefits. For example, if statistical procedures are to be used, their specific application and use in the project evaluation should be described.

(4) Where benefits might be termed "intangible," methods should be defined to measure results. For example, in the case of consumer education or market promotion programs, will post awareness surveys be conducted?

j. *Project costs:* Costs must be provided in a detailed budget. No cost sharing can come from another Federal source. Costs must be allocated to the Federal share and matching share provided by the applicant. Applicant's matching costs are to be divided into cash and in-kind contributions. A standard budget form is available from the offices listed in Section E. A separate budget must be submitted for each project within an application. For multi-year projects, funds will be provided as specified tasks are completed. Therefore, an applicant submitting a multi-year project must submit two budgets—one covering total project costs (including individual outyear costs) and one covering the initial funding request for the project. The initial funding request should cover funds required during the first 12-month period. NMFS will not consider fees or profits as allowable costs for grantees. To support its budget the applicant must describe briefly the basis for estimating the value of the matching funds derived from in-kind contributions. Costs for the following categories must be detailed in the budget.

(1) Personnel.

(a) Identify salaries by position and percentage of time of each individual dedicated to the project.

(b) Fringe Benefits. Indicate benefits associated with personnel working on the projects.

(2) Consultants and Contract Services. Identify all consultant and/or contractual service costs by specific task in relation to the project.

(3) Travel and Transportation.

(a) Identify major travel and transportation costs, number of people traveling and purpose of travel.

(b) Itemize costs, including approximate air fare, per diem rates, and/or any additional fees associated with the trip, such as conference fees, registration fees, etc.

(4) Equipment, Space or Rental Costs.

(a) Identify equipment purchases or rental costs with the intended use.

(b) Identify space rental costs with specific uses.

(5) Other Costs.

(a) Consumable office supplies. Include cost for pens, paper, typewriter ribbons, etc.

(b) Postage and Shipping. Include postage for correspondence, material produced under grant as well as air freight, truck or rail shipping of bulk materials to be used in conferences and workshops.

(c) Printing costs. Include costs associated with producing materials in conjunction with the project.

(d) Final Audit. Include costs of having a special audit of the project performed. This cost should not be included if an organizational audit will be used in place of a special audit for the project.

(e) Telephone and Telegraph. Identify estimated calls and monthly bills.

(f) Utilities. Identify costs of utilities and percentage of use in conjunction with performance of project.

(g) Additional costs. Indicate any additional costs associated with the project whcih are allowable under OMB circular A–122.

4. Project Consolidation

Applicants may submit two or more projects under one proposal but must identify project costs, including adminstrative costs, separately for each individual project. As a result, the amount of administrative funds provided will be based on the actual number of projects funded.

5. Supporting Documentation

This section should include any required documents and any additional information necessary or useful to the description of the project. The amount of information given in this section will depend on the type of project proposed. The applicant should present any information which would emphasize the value of the project in terms of the significance of the problems addressed. Without such information, the merits of the project may not be fully understood, or the value of the project to fisheries development may be underestimated. The absence of adequate supporting documentation may cause reviewers to question assertions made in describing the project and may result in a lower

VOL 51
ISS 55
MR 21
1986
UMI

ranking of the project. Reviewers will not necessarily examine all material provided as supporting documentation except where sufficient detail is lacking in the project description to properly evaluate the project. Therefore, information presented in this section should be clearly referenced in the project description, where appropriate.

E. Application Submission and Deadline

1. Deadline

The NMFS will accept applications for funding under this program between March 20, 1986 and May 27, 1986. An application will be accepted if the application is received by any of the offices listed below on or before May 27, 1986.

2. Submission of Applications to NMFS Reviewing Offices

Applicants must submit one signed original and two (2) copies of the complete application. *Applications are not to be bound in any manner.*

a. Applications relating to a specific fishery or a particular region should be submitted to the appropriate NMFS Regional Office as specified below:

Northeast Region (Maine, Massachusetts, Rhode Island, Connecticut, Vermont, New Hampshire, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, Ohio, Indiana, Illinois, Wisconsin, Michigan, Minnesota): Regional Director, National Marine Fisheries Service, P.O. Box 1109, Gloucester, MA 01930, Telephone No: (617) 281-3600

Southeast Region (North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas, New Mexico, Oklahoma, Arkansas, Tennessee, Kentucky, Missouri, Kansas, Nebraska, Iowa, Puerto Rico, Virgin Islands): Regional Director, National Marine Fisheries Service, Duval Bldg., 9450 Koger Blvd., St. Petersburg, Florida 33702, Telephone No: (813) 893-3142

Southwest Region (California, Hawaii, Nevada, Arizona, American Samoa, Guam, Trust Territory of Pacific Islands, Northern Mariana Islands): Regional Director, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, CA 90731, Telephone No: (213) 548-2575

Northwest Region (Washington, Oregon, Idaho, Montana, Wyoming, Utah, Colorado, North Dakota, South Dakota): Regional Director, National Marine Fisheries Service, Bin C15700, 7600 Sand Point Way, NE., Seattle, Washington 98115, Telephone No: (206) 527-6150

Alaska Region (Alaska): Regional Director, National Marine Fisheries Service, P.O. Box 1668, 709 West Ninth Street, Juneau, AK 99802, Telephone No: (907) 586-7221

b. Applications addressing national priorities should be sent to: Director, Office of Utilization Research, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, DC 20235, Telephone: (202) 634-7111

c. Questions of an administrative nature should be referred to the offices listed below:

Northeast: NOAA RAS/EC32, Eastern Administrative Support Center, 253 Monticello Avenue, Norfolk, Virginia 23510

Southeast: NOAA RAS/CC31, Central Administrative Support Center, Federal Bldg. Room 1756, 601 East 12th Street, Kansas City, Missouri 64106

Northwest/Southwest/Alaska: NOAA RAS/WC33, Western Administrative Support Center, BIN C15700, 7600 Sandpoint Way, NE, Seattle, Washington 98115

Washington: NOAA RAS/DC33, National Capital Administrative Support Center, NBOC1 Room 106, 11420 Rockville Pike, Rockville, Maryland 20852

IV. Review Process and Criteria

A. Evaluation and Ranking of Proposed Projects

For applications meeting the requirements of this solicitation, NMFS will determine which office should evaluate the proposed work. This will normally be the office where the application is filed.

1. Consultation With Interested Parties

The NMFS will evaluate the project(s) contained in the application in consultation with representatives from other Federal Government agencies with programs affecting the U.S. fishing industry, members of the fishing industry, and other fisheries interests, as necessary. The regional and Washington Offices of NMFS will make project descriptions available in the following manner:

a. *Public review and comment.* Regional applications may be inspected at the office to which they are submitted. All applications will be available for inspection at the NMFS Office of Industry Services, 3300 Whitehaven Street, NW., Room 324, Washington, DC from June 3, 1986 to June 13, 1986. Written comments will be accepted at a regional or the Washington office until June 13, 1986.

b. *Consultation with members of the fishing industry.* The NMFS shall, at its discretion, request comments from members of the fishing industry who have knowledge in the subject matter of a project or who would be affected by a project.

c. *Consultation with Government agencies.* Applications will be reviewed in consultation with NMFS Research Centers and Utilization Laboratories, RASC Grants/Contracts Offices and, as appropriate, Department of Commerce and other Federal agencies. The Regional Fishery Management Councils may be asked to review projects and advise of any real or potential conflicts with Council activities.

2. Technical Evaluation

The NMFS will conduct a technical evaluation of each project. If an application contains two or more projects, the NMFS will evaluate the projects separately. All comments submitted to the NMFS will be taken into consideration in the technical evaluation of projects. The NMFS will give projects point scores based on the following evaluation criteria:

a. Adequacy of research/development/demonstration for resolving an impediment and possibilities of securing productive results (20 points).

b. Soundness of design/technical approach for resolving an impediment (20 points).

c. Organization and management of the project, including qualifications and previous related experience of the applicant's management team and other project personnel involved (20 points).

d. Effectiveness of proposed methods for monitoring and evaluating project. A specific evaluation methodology should be proposed as outlined in Section III. D.3.j (20 points).

e. Justification and allocation of the budget in terms of the work to be performed (20 points).

3. Formal Industry Review

After the technical evaluation, each reviewing office will solicit comments from the fishing industry, consumer representatives, and others, as appropriate, to rank the projects filed with the office. This review may be carried out by correspondence or involve formal meetings of industry representatives. Considered in the review, along with the technical evaluation, will be the significance of the problem addressed in the project. The reviewers will rank each project in terms of importance or need for funding, and provide recommendations on the level of funding NMFS should award to each project and the merits and benefits of funding each project.

B. Funding Awards

After projects have been evaluated, the reviewing offices will develop recommendations for project funding. They will submit the recommendations to the Assistant Administrator for Fisheries, who will determine the number of projects to be funded based on the recommendations provided, consistency of projects with the identified fisheries objectives, and the amount of funds available for the program.

The exact amount of funds awarded to a project will be determined in pre-award negotiations between the applicant and NOAA/NMFS Program and grants management representatives. The Department of Commerce (DOC) will review all recommended projects and funding before final authority is given to proceed on the project. The funding instrument will be determined by RASC Grants Officers. Projects may not be initiated in expectation of Federal funding until a notice of award document is received.

V. Administrative Requirements

A. Obligations of the Applicant

An Applicant must—

1. Meet all application requirements and provide all information necessary for the evaluation of the project.

2. Be available, upon request, in person or by designated representative, to respond to questions during the review and evaluation of the project(s).

3. If a project is awarded, manage the day-to-day operations of the project, be responsible for the performance of all activities for which funds are granted, and be responsible for the satisfaction of all administrative and managerial conditions imposed by the award.

4. If a project is awarded, keep records sufficient to document any costs incurred under the award, and allow access to records for audit and examination by the Secretary, the Comptroller of the United States, or their authorized representatives. The NMFS may provide a proportionate share of funds as part of the financial award to pay for an audit.

5. If a project is awarded, submit quarterly project status reports on the use of funds and progress of the project to NMFS within 30 days after the end of each calendar quarter. These reports will be submitted to the individual specified as the Technical Monitor in the funding agreement. The content of these reports will include, at a minimum:

a. A summary of work conducted which includes a description of specific accomplishments and milestones achieved;

b. The degree to which goals or objectives were achieved as originally projected;

c. Where necessary, the reasons why goals or objectives are not being met; and

d. Any proposed changes in plans or redirection of resources or activities and the reason therefor.

6. If a project is awarded, submit an original and two copies of a final report within 90 days after completion of each project to the NMFS Technical Monitor. The final report must describe the project and include an evaluation of the work performed and the results and benefits in sufficient detail to enable NMFS to assess the success of the completed project. The content of the evaluation should include, at a minimum:

a. Description of the original project goals and objectives, and the context in which the project was to benefit the fishing industry. This description should address the following questions:

(1) What were the original project goals and objectives?

(2) To what extent were goals measurable or quantifiable?

(3) Were modifications made to project goals and objectives and, if so, what was the cause for the modifications?

(4) Were the goals and objectives attained? How? If not, why?

b. Description of the specific accomplishments (information, products, or services) of the project and the relationship of these to the project's goals and objectives:

(1) List the specific information, products, or services produced by the project.

(2) Describe the relationship of the products and services to the original project goals and objectives.

(3) Describe the extent to which the products or services meet the needs of the fishing industry.

(4) Describe the value of the products or services by themselves or in concert with other activities.

c. Description of how the project benefited the fishing industry. This description should address the following questions:

(1) To what extent did the industry have access to the products or services produced by the project?

(2) To what extent have the fishing industry and associated infrastructure (universities, financial institutions, etc.) used the project's products or services to satisfy a need or lessen business or other risks?

(3) To what extent are the project's results likely to be used by the industry in the future?

(4) To what extent are project results likely to be used by others in the future to provide benefits to the fishing industry?

d. Description of the specific economic or other benefits the fishing industry received as a result of its use of the products or services of the project or as a result of others using the products or services. This description should address the following questions:

(1) Are clear economic benefits demonstrable?

(a) If economic benefits are demonstrable, how? (e.g. increased landings, production, sale and/or value of fishery products, increased exports, greater vessel or gear efficiency, etc.)

(b) If not, why? (Were the results too intangible? A function of greater elapsed time interval? Other?)

(2) Nature of benefits:

(a) What were the benefits of the projects?

(b) Are benefits one-time or continuing?

(c) To what extent are benefits measurable vs. intangible?

(d) Are benefits direct or indirect?

(e) Are the benefits the result of a "negative" finding?

e. Description of the actual need for Federal assistance in the project.

7. If a project is funded by grant or cooperative agreement, an applicant must comply with Office of Management and Budget (OMB) Circulars, and Treasury Circulars. Copies are available from the RASC Offices listed above.

8. In order for NMFS to assist the grantee in disseminating information, the grantee is requested to submit three copies of all publications printed with grant funds to the Office of Industry Services, NMFS, Washington, DC 20235.

B. Obligations of the National Marine Fisheries Service

The NMFS will:

1. Provide all forms and explanatory information necessary for the proper submission of applications for fisheries development and utilization projects.

2. Provide advice, through the NMFS Office servicing the applicant's area, to inform applicants of NMFS fisheries development policies and goals. Interested applicants are encouraged to contact the NMFS Washington or Regional Offices for clarification or explanation of any information appearing in this notice.

VOL 51
ISS 55
MR 21
1986
UMI

3. Monitor all projects after award to ascertain their effectiveness in achieving project objectives and in producing measurable results. Actual accomplishments of a project will be compared with stated objectives.

4. Maintain a mailing list for the annual S–K solicitations. Upon request, interested persons will be placed on the mailing list to receive the FY 87 solicitation at the time it is published in the Federal Register.

C. RASC Grants Officer Responsibility

The RASC Grants Officer is responsible for the administrative processing of NOAA Federal assistance awards. Questions from the recipient of an administrative nature will be referred to the Grants Officer. The official grant file will be maintained by the Grants Officer who will ensure that OMB, DOC, and NOAA policies are met.

D. Legal Requirements

The applicant will be required to satisfy the requirements of applicable local, State and Federal laws.

VI. Classification

This notice is not subject to Executive Order 12291.

Information collection requirements contained in this notice have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act and have been assigned OMB #0648–0135.

This notice of availability of financial assistance for fisheries research and development projects will also appear in the *Commerce Business Daily*.

(Federal Domestic Assistance Catalogue No. 11.427 Fisheries Development and Utilization Research and Demonstration Grants and Cooperative Agreements)

Dated: March 17, 1986.

Joseph W. Angelovic,

Deputy Assistant Administrator for Science and Technology, National Marine Fisheries Service.

Part III

Department of Agriculture

Office of the Secretary

7 CFR Part 26

Determination of World Price for Rice; Proposed Rule

VOL 51
ISS 55
MR 21
1986
UMI

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 26

Determination of World Price for Rice

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: The purpose of this proposed rule is to (1) prescribe a formula by which the Secretary of Agriculture will derive the prevailing world market price, adjusted to U.S. quality and location, for the 1985 through 1990 crops of rice, (2) provide a mechanism by which such price will be announced periodically, and (3) invite public comment on the proposals. These actions are required by sections 101(i)(1)(B)(ii) and 101A(a)(5)(B) of the Agricultural Act of 1949, as amended.

DATE: Comments must be received on or before April 7, 1986, in order to be assured for consideration.

ADDRESS: Mail comments to Dr. Howard C. Williams, Director, Commodity Analysis Division, USDA–ASCS, Room 3741, South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Eugene S. Rosera, Agricultural Economist, Commodity Analysis Division, USDA–ASCS, Room 3740 South Building, P.O. Box 2415, Washington, D.C. 20013 or call (202) 447–5954.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Departmental Regulation No. 1512–1 and has been designated as "not major". It has been determined that these provisions will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local governments, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The titles and numbers of the Federal assistance programs to which this notice applies are: Title-Rice Production Stabilization, Number 10.065, and Title-Commodity Loans and Purchases, Number 10.051 as found in the Catalog of Federal Domestic Assistance.

I have determined that this proposed rule, if implemented, will not have a significant economic impact on a substantial number of small entities. Consequently, no regulatory flexibility analysis is required under the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The public is invited to comment on the impact of this proposed rule on small entities, and I will review this determination in light of those comments.

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment. Therefore, neither an environmental assessment nor an Environmental Impact Statement is needed.

This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

Section 101(i)(1)(B)(ii) and section 101A(a)(5)(B) of the Agricultural Act of 1949, as amended, provide that the Secretary of Agriculture shall prescribe by regulation (1) a formula to define the prevailing world market price for rice; and (2) a mechanism by which the Secretary shall announce periodically the prevailing world market price for rice.

The prevailing world market price for rice, as determined in accordance with the formula set forth in this proposed rule, shall be utilized under several provisions of the rice program for the 1985 through 1990 crops of rice which are designed to make domestically produced rice more competitive in the world market.

For example, the prevailing world market price for rice shall be used in the determination of the level at which a producer of the 1985 through 1990 crops of rice may repay a price support loan. In addition, beginning April 15, 1986, the Secretary shall make payments to producers of 1985 crop rice who have not sold or delivered such rice under a sales contract and who were either eligible to obtain a loan on such rice but did not obtain such a loan or who were ineligible to obtain a loan on such rice. Such payments shall be determined based upon the difference between the loan level established for the 1985 crop and the prevailing world market price.
